<b>10. BRIEF SUMMARY OF SIGHTING</b> Change Brightness - Bright yellow white, at time changing to orange - Edges of obj like a bright star - Size of a pea at arm's length observed in the sky moving into the valley.  (See Case File)			<b>11. COMMENTS</b> UNIDENTIFIED	

25. Where were you located when you saw the object?  
(Circle One):

- a. Inside a building *and*  
 b. In a car  
 c. Outdoors  
 d. In an airplane  
 e. At sea  
 f. Other \_\_\_\_\_

26. Were you (Circle One)

- a. In the business section of a city?  
 b. In the residential section of a city?  
 c. In open countryside?  
 d. Flying near an airfield?  
 e. Flying over a city?  
 f. Flying over open country?  
 g. Other \_\_\_\_\_

27. What were you doing at the time you saw the object, and how did you happen to notice it?

Observing the sky as a matter of routine; this belongs to research in the realm  
of atmospheric orgone energy phenomena; especially flimmering of stars and  
movement of DOR clouds as well as rain clouds.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- |                                    |                                    |                                    |                                    |
|------------------------------------|------------------------------------|------------------------------------|------------------------------------|
| <input type="radio"/> a. North     | <input type="radio"/> c. East      | <input type="radio"/> e. South     | <input type="radio"/> g. West      |
| <input type="radio"/> b. Northeast | <input type="radio"/> d. Southeast | <input type="radio"/> f. Southwest | <input type="radio"/> h. Northwest |

28.2 How fast were you moving? \_\_\_\_\_ miles per hour.

28.3 Did you stop at any time while you were looking at the object?

(Circle One)      Yes                      No

29. What direction were you looking when you first saw the object? (Circle One)

- |                                    |                                    |                                    |   |
|------------------------------------|------------------------------------|------------------------------------|---|
| <input type="radio"/> a. North     | <input type="radio"/> c. East      | <input type="radio"/> e. South     | <input type="radio"/> g. West                 |
| <input type="radio"/> b. Northeast | <input type="radio"/> d. Southeast | <input type="radio"/> f. Southwest | <input checked="" type="radio"/> h. Northwest |

30. What direction were you looking when you last saw the object? (Circle One)

- |   |                                    |                                    |                                    |
|---|------------------------------------|------------------------------------|------------------------------------|
| <input type="radio"/> a. North                | <input type="radio"/> c. East      | <input type="radio"/> e. South     | <input type="radio"/> g. West      |
| <input checked="" type="radio"/> b. Northeast | <input type="radio"/> d. Southeast | <input type="radio"/> f. Southwest | <input type="radio"/> h. Northwest |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North W - 25 degrees. approx.  
b. From horizon 10 - 15 degrees. approx.

31.2 When it disappeared:

- a. From true North E - 5 degrees. approx.  
b. From horizon - - - degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

34. What were the weather conditions at the time you saw the object?

34.1 CLOUDS (Circle One)

- a. Clear sky  
 b. Hazy  
 c. Scattered clouds  
 d. Thick or heavy clouds  
 e. Don't remember

34.2 WIND (Circle One)

- a. No wind  
 b. Slight breeze  
 c. Strong wind  
 d. Don't remember

34.3 WEATHER (Circle One)

- a. Dry  
 b. Fog, mist, or light rain  
 c. Moderate or heavy rain  
 d. Snow  
 e. Don't remember

34.4 TEMPERATURE (Circle One)

- a. Cold  
 b. Cool  
 c. Warm  
 d. Hot  
 e. Don't remember

35. When did you report to some official that you had seen the object?

29      January      1954  
 Day                  Month                  Year

mailed a few days later

36. Was anyone else with you at the time you saw the object?

(Circle One)  Yes       No

36.1 IF you answered YES, did they see the object too?

(Circle One)  Yes       No

36.2 Please list their names and addresses:

Miss ██████████ Orgonon, Rangesley, Maine  
 Miss ██████ was called in to observe, when the second object moved in on the same route, slightly lower than the first one.

37. Was this the first time that you had seen an object or objects like this?

(Circle One) Yes       No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

Similar phenomena were called to my attention over the preceeding months on several occasions, especially on January 13th and 14th, around 7.34 PM; also doubtful observations of similar kind on January 17th and January 19th, 1954. Observation of January 28th was distinguished by mountain background.

38. In your opinion what do you think the object was and what might have caused it?

See attached Survey of Problem

**U. S. AIR FORCE TECHNICAL INFORMATION SHEET**  
(SUMMARY DATA)

In order that your information may be filed and coded as accurately as possible, please use the following space to write out a short description of the event that you observed. You may repeat information that you have already given in the questionnaire, and add any further comments, statements, or sketches that you believe are important. Try to present the details of the observation in the order in which they occurred. Additional pages of the same size paper may be attached if they are needed.

Dr. [REDACTED]  
[REDACTED]  
Rangely, Maine

Dear Dr. [REDACTED]

Your report of an unidentified flying object, together with your theory, has been received by the Air Technical Intelligence Center.

Your theory, along with many others, is being reviewed. Please be assured that the United States Air Force appreciates your interest in this matter.

Sincerely,

*UFO Questionnaire not included,  
Routine report on unusual  
sighting*

8. IF you saw the object at NIGHT, TWILIGHT, or DAWN, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None  
 b. A few *to North*  
 c. Many  
 d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight  
 b. Dull moonlight  
 c. No moonlight — pitch dark *(Pleasant - moon)*  
 d. Don't remember

9. Was the object brighter than the background of the sky?

(Circle One):

a. Yes

b. No

c. Don't remember

10. IF it was BRIGHTER THAN the sky background, was the brightness like that of an automobile headlight?:

(Circle One)  a. A mile or more away (a distant car)?

- b. Several blocks away?  
 c. A block away?  
 d. Several yards away?  
 e. Other

11. Did the object:

(Circle One for each question)

- |   |                                      |                                     |            |
|---|--------------------------------------|-------------------------------------|------------|
| a. Appear to stand still at any time?           | Yes                                  | <input checked="" type="radio"/> No | Don't Know |
| b. Suddenly speed up and rush away at any time? | Yes                                  | <input checked="" type="radio"/> No | Don't Know |
| c. Break up into parts or explode?              | Yes                                  | <input checked="" type="radio"/> No | Don't Know |
| d. Give off smoke?                              | Yes                                  | <input checked="" type="radio"/> No | Don't Know |
| e. Change brightness?                           | <input checked="" type="radio"/> Yes | No                                  | Don't Know |
| f. Change shape?                                | Yes                                  | No                                  | Don't Know |
| g. Flicker, throb, or pulsate?                  | Yes                                  | <input checked="" type="radio"/> No | Don't Know |

12. Did the object move behind something at anytime, particularly a cloud?

(Circle One):  Yes No Don't Know. IF you answered YES, then tell what it moved behind: single trees, silhouetted against; first, dark sky background, later against dark mountain in background

13. Did the object move in front of something at anytime, particularly a cloud?

(Circle One):  Yes No Don't Know. IF you answered YES, then tell what it moved in front of: "Spotted Mountain" and disappeared in valley eastward toward "Round Pond" (see attached sketch)

14. Did the object appear: (Circle One): a. Solid? b. Transparent? c. Don't Know.

15. Did you observe the object through any of the following?

- |   |     |    |  |     |    |
|---|-----|----|--|-----|----|
| a. Eyeglasses                                     | Yes | No | <input checked="" type="radio"/> e. Binoculars | Yes | No |
| b. Sun glasses                                    | Yes | No | f. Telescope                                   | Yes | No |
| c. Windshield                                     | Yes | No | g. Theodolite                                  | Yes | No |
| <input checked="" type="radio"/> d. Window glass* | Yes | No | h. Other <u>in open air</u>                    |     |    |

\*no lights in neighborhood, therefore no "reflection"

16. Tell in a few words the following things about the object.

- a. Sound none ; on other occasions a hum was heard
- b. Color bright yellow white, at times changing to orange

17. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

*too far away*

18. The edges of the object were:

- (Circle One): a. Fuzzy or blurred  
**b. Like a bright star**  
 c. Sharply outlined  
 d. Don't remember

- e. Other surrounding atmosphere  
illuminated in valley

19. IF there was MORE THAN ONE object, then how many were there? two  
 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

see sketch

both objects moved as described in sketch, one at a time. The first had disappeared in valley to the East, when the second appeared where the first had been, before it travelled among the trees, a few minutes previously.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.  
 \_\_\_\_\_ feet. no guess possible

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

(Circle One):

- |                  |                  |
|------------------|------------------|
| a. Head of a pin | g. Silver dollar |
| <b>b. Pen</b>    | h. Baseball      |
| c. Dime          | i. Grapefruit    |
| d. Nickel        | j. Basketball    |
| e. Quarter       | k. Other _____   |
| f. Half dollar   |                  |

- 22.1 (Circle One of the following to indicate how certain you are of your answer to Question 22.)

- |                          |                  |
|--------------------------|------------------|
| a. Certain               | c. Not very sure |
| <b>b. Fairly certain</b> | d. Uncertain     |

23. How did the object or objects disappear from view? behind the low ridge, between Orgonon and Badger's Camps, the ridge being lower than Spotted Mountain North in back of it.

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

about twice as large as Jupiter, when largest
