[REDACTED], Panama City, Florida. Occupation: Housewife.

Estimate of reliability: Mrs. [REDACTED] also appeared very sincere and serious about the matter. However, like Mrs. Cooper, she to admits to being a poor judge of altitude distances.

(7) Weather and winds aloft at time and place of sighting:

- (a) Observer states that weather was clear, with thin scattered clouds, and no wind at ground level.
- (b) Air Weather Service (Tyndall AFB, Florida): Reports on winds aloft were available for the period 0900 CST (1500Z) only. They are: 6,000 ft, 175° at 10 knots; 10,000 ft, 210° at 10 knots; 13,000 ft, 220° at 40 knots; 20,000 ft to 30,000 ft, none plotted.
- (c) Ceiling: thin, scattered @ 30,000 feet. (Report for 11:28 AM CST)
- (d) Visibility: 10 miles
- (e) Amount of cloud cover: 0.4, 0.2 heavy.
- (f) No thunderstorms in area.

(8) No unusual activity or condition, meteorological, astronomical, or otherwise reported in the area.

(9) No physical evidence of sighting available.

(10) No interception or identification action was taken.

(11) There were twenty-six (26) Tyndall aircraft in the local area at the time of sighting. Local radar reports no unidentified sighting at the time of the observation.

(12) Report prepared by S/Sgt Gerard L. Stout, Wing Intelligence Office, Tyndall AFB, Florida. It is the opinion of the preparing WCO that since there were twenty six (26) aircraft in the local area at the

time of sighting, that visibility was ten (10) miles and that both sources admitted being poor judges of altitude distances, that the sighting could possibly have been a local aircraft.

Note: After this report had been prepared, the preparing WCO heard a newscast over the local radio station (station WOLP). The newscaster stated that a Tyndall pilot had contacted the Panama City News Herald office (a local newspaper publication) stating that he, the pilot, had observed a large flock of birds just shortly before 1200 hours 8 March 1954, in the vicinity of this airbase. The observation was made from an aircraft. This office contacted the radio station and the News Herald office in an effort to obtain the pilots name, however neither of the above had any permanent record.

OFFICE, TYNDALL AFB, FLORIDA. IT IS THE OPINION OF THE PREPARING NCO THAT SINCE THERE WERE TWENTY SIX (26) AIRCRAFT IN THE LOCAL AREA AT THE TIME OF SIGHTING, THAT VISIBILITY WAS TEN (10) MILES AND THAT BOTH SOURCES ADMITTED BEING POOR JUDGES OF ALTITUDE DISTANCES, THAT THE SIGHTING COULD HAVE POSSIBLY BEEN A LOCAL AIRCRAFT.

NOTE: AFTER THIS MSG HAD BEEN PREPARED. THE PREPARING NCO HEARD A NEWSCAST OVER THE LOCAL RADIO STATION. THE NEWSCASTER STATED THAT A TYNDALL PILOT HAD CONTACTED THE PANAMA CITY NEWS HERALD OFFICE, STATING THAT HE (THE PILOT). HAD OBSERVED A LARGE FLOCK OF BIRDS JUST SHORTLY BEFORE 1200 HRS 8 MAR 54, IN THE VICINITY OF THIS AIRBASE. THE OBSERVATION WAS MADE FROM AN AIRCRAFT. THIS OFFICE CONTACTED THE RADIO STATION AND THE NEWS HERALD OFFICE IN AN EFFORT TO OBTAIN THE PILOTS NAME, HOWEVER NEITHER OF THE ABOVE HAD ANY PERMANENT RECORD.

SUMMARY: (Enter brief summary of report. Use significance in final one-sentence paragraph. List inclusions at lower left. Begin text of report on AF Form 112-Part II.)			

At approximately 11:20 AM on 8 March 1954, Mrs. [REDACTED] and Mrs. [REDACTED], both housewives and dependents of military personnel stationed at Tyndall AFB, Florida, reported observing an Unidentified Flying Object. The location of the sighting was at the east entrance to DuPont Bridge, 30° 5' N, 85° 35' W. Both observers stated that the object first appeared as a white cloud, with tinges of silver. The observers also stated that the object change appearance and color every few seconds. The object was observed for a period of five (5) minutes and remained in motion for the entire period of observation. No sound was heard. Both sources stated that they were rather reluctant to report the incident, since they had always laughed at Flying Saucer stories, but now believe that the possibility exists.

(1) Description of the object:

- (a) Both sources stated that the object changed shape every few seconds. When first observed it had a cigar shape appearance, then changed to a delta wing appearance, and when last observed it had a round, flat appearance.
- (b) In size it appeared to both observers to be approximately thirty-five (35) inches in diameter. This figure was arrived at by comparing an ordinary beach ball held at arms length from the observers.
- (c) The color of the object varied as the object changed appearance. Both sources state that during the first and second observations the object was white, with tinges of silver. When last observed, in round, flat shape, it was pinkish-grey in color.
- (d) Number - negative.
- (e) Formation - negative.
- (f) Discernible features - negative.
- (g) Tail, trail, or exhaust - negative.
- (h) Sound - negative.
- (i) Pertinent or unusual features - negative.

(2) Description of course of object:

- (a) Mrs. [REDACTED] first observed the object, calling Mrs. [REDACTED] attention to it. Mrs. [REDACTED] stated that it appeared as a white cloud breaking up. It then faded away and reappeared a few moments later.
- (b) When first observed the angle of elevation was 30° at 90° azimuth.
