SUPPLEMENTARY INVESTIGATIVE EFFORTS:

1. A check with Naval Air Station, JACKSONVILLE, FLORIDA (GeoRef GJJA 1920) revealed that the following Flight Plans were filed: Navy No. 1165 SNB-type aircraft, round robin- DAFONA, ORLANDO, MELBORN, and JACKSONVILLE, FLORIDA (31/2345Z Oct 55 to 01/0155Z Nov 55); Coast Guard No. 1260 UF-1 type aircraft from JACKSONVILLE, FLORIDA, departed at 01/0115Z Nov 55, returned at 01/0300Z Nov 55; Navy No. R-GD type aircraft departed Jax at 01/0105Z Nov 55 for Guantanamo Bay, Cuba.

2. A check with Naval weather Station, JACKSONVILLE, FLORIDA revealed the following weather conditions at 01/0115Z to 01/0145Z Nov 55: 6000 ft., 290° at 23K; 10,000 ft., 250° at 22K; 16,000 ft., 260° at 69K; 20,000 ft., 250° at 62K; 30,000 ft. 250° at 124K; 50,000 ft., 250° at 68K; 80,000 ft., 060° at 17K; 500 ft., Scattered; 3,000 ft., Overcast; Visibility 4 mil-s. light rain showers; Surface wind NW at 9K.

3. A check with Dr. [REDACTED] or, Astronomer, University of Florida, GAINESVILLE, FLORIDA (GeoRef GHHQ 4139) revealed that no observations had been made at times of the sightings.

4. A check with the Jacksonville Filter Center, JACKSONVILLE, FLORIDA revealed no additional information.

5. A request for flight plans of military aircraft was submitted to Flight Service Center, Maxwell Air Force Base, ALABAMA. Flight Service Center was unable to fulfill this request due to work load at this time, however, Operations Officer stated that SAC was experimenting with flares and Hq 2nd Air Force (SAC) Barksdale, Air Force Base, LOUISIANA would probably release that information.

6. A check with Hq 2nd Air Force revealed that MacDill Air Force Base, FLORIDA had 14 B-47 type acft and 14 KC-97 type acft refueling in central FLORIDA at 01/0115Z to 01/0145Z Nov 55. During refueling operations, lights red, amber, green, and white may be seen at night and normally refueling was accomplished at 15,000 ft.

Flight 2-C, 4602d AISS	20-UP03-7-55	6	6	

COMMENTS of Preparing Officer:

1. In the opinion of the Preparing Officer, the sighting at 01/0200Z Nov 55 by Mr. [REDACTED] was caused by SAC aircraft refueling in central Florida as indicated on page 5, this report, for the following reasons:

a. Mr. [REDACTED] first reported to Filter Center, Jacksonville, Florida that the sighting was at 01/0115Z to 01/0145Z Nov 55 at which time the refueling project was in progress.

b. Mr. [REDACTED] reported that he had observed bomber type aircraft with a passenger type aircraft above after he had observed the lights.

c. Due to the wind conditions at 16,000 ft, all sound of the aircraft would have been carried away from Mr. [REDACTED] as he viewed the objects looking South and to the West.

2. Information requested from Hq 2nd Air Force was based on T1 Msg 7689, 35th Air Division DTG 02/1915Z Nov 55, which did not mention the sighting at 31/0200Z Oct 55, therefore, no definite conclusions can be made but due to the similarity of the sightings and in the same vicinity, it too may have been a refueling operations.

Joseph A. Boyer Jr. Capt USAF
THADDEUS W KALLINI
for Capt., USAF
Officer in Charge

COMMENTS of Approving Officer:

1. Concur with the opinion of the Preparing Officer that the sighting at 01/0200Z Nov 55, by Mr. [REDACTED], was caused by the SAC air-to-air refueling operation.

2. Due to the similarity of the above sighting and the 31/0300Z Oct 55 sighting, the possibility exists that it too may have been a refueling operation.

NO CASE (INFORMATION ONLY)
SOURCE: DHM "World of Flying Saucers"

31 October 1955
Florida (Gainesville)

A flight of bombers refueling in mid-air at night can be a startling spectacle and more than once has been reported as a gathering of flying saucers.

Such an incident occurred in Florida on October 31, 1955, when a disk jockey at Gainesville broke into his radio program about ten o'clock in the evening to announce that flying saucers were over the station. Many of his listeners hurried out of their houses to look at the Halloween visitors, clearly visible in the night sky. One reporter stated that he had seen four to six objects, oblong in shape, brilliantly glowing, red and orange, traveling soundlessly in a straight-line formation that later changed to a V [8]. Both the radio station and the police station were swamped with telephone calls from frightened citizens, most of whom calmed down when they learned the explanation: a flight of bombers had been refueling at an altitude of 32,000 feet.

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE	OF	PAGES
Flight 2-C, 4602d AISS	20-UFOB-7-55	2	6	
I. SOURCE: [REDACTED] Address: [REDACTED], Florida Age: 40 Occupation: City Policeman Education: 5th grade-Elementary Qualifications: Unknown II. RELIABILITY: SOURCE gave much thought to each question asked and seemed fairly sure of his answers. In the opinion of the investigator, SOURCE was fairly reliable. III. SOURCE'S DESCRIPTION OF SIGHTING: SOURCE'S Statement: "I first sighted the objects while making a round of police duties Sunday night, 30 Oct 55, at 10:00 PM EST. They appeared to be bright round lights, about 12 inches in diameter. I then drove several miles out of Williston, stopped my car, and got out to scan the skies. At approximately 10:15 PM EST, one of the lights appeared to descend to within 150 feet of my car and at this time the light was so intense that it was blinding. Then suddenly it disappeared leaving no trace of anything in the bright moonlight. Monday night, 31 Oct 55, I sighted three more bright lights in the sky at approximately 9:00 PM EST. They appeared not to be over two hundred feet above the earth and as they came overhead the area lit up sufficiently enough to find a needle on the gravel road. They seemed to hover over Levy County until about 9:17 PM EST. Then I saw nine bomber type aircraft in vee formation at about 7,000 feet with a passenger type aircraft traveling about 3,000 feet above these aircraft. At no time was any sound or vapor trails observed. Additional Information: SOURCE was certain that he viewed the objects for 45 minutes at 31/0300Z Oct 55 and for 5 minutes at 01/0200Z Nov 55 in bright moonlight with a few stars shining. The objects were brighter than the sky background and bright enough to hurt eyes at one time. Objects did not give off smoke, change color or shape, flicker, throb, or pulsate, however they did appear to stand still, suddenly speed up and rush away at times. The objects appeared to be solid and at no time did they move in front or behind another object. At no time did they give off sound and the only color was like that of a bright light. SOURCE was looking to the South when sighting objects and to the Southwest when they disappeared. SOURCE estimated the objects were about 15 degrees above the horizon. Weather conditions were as follows: Clear sky, slight breeze, dry and warm. SOURCE estimated that the speed of the objects was greater than that of jet type aircraft.				

NOTE: THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, 50 U. S. C.—31 AND 32, AS AMENDED. AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE	OF	PAGES
Flight 2-C, 4602d AISS	26-UFOB-7-55	3	6	

I. SOURCE: [REDACTED]

Address: [REDACTED], Ocala, Florida

Age: 25

Occupation: City Policeman

Education: High School

Qualifications: Three Months Technical School (Army T-33 Radar)

II. RELIABILITY: SOURCE gave much thought to each question asked and seemed sure of his answers. In the opinion of the investigator, it would be difficult to find a more reliable SOURCE.

III. SOURCE'S DESCRIPTION OF SIGHTING:

SOURCE'S Statement: "The first time I saw them, they were coming from the South, going Northwest with no particular formation. Some were lighter in color than the others. There were six, one behind the other and they resembled a bright star. The objects made four or five passes over the field (Taylor Field) but were not close enough to tell their shape. They seemed to get brighter upon acceleration and the lights would cut out completely at times and then come on again. Finally the objects soared off into the distance."

Additional Information: SOURCE was fairly certain that he viewed the objects for a period of one hour at approximately 31/0200Z Oct 55 in bright moonlight with many stars visible. The objects were brighter than the sky background and they looked like big light bulbs. The objects did not appear to stand still at anytime, break into parts, explode, give off smoke, change shape, flicker, throb, or pulsate, however they appeared to suddenly speed up and rush away at times. At no time did the objects move in front or behind another object. Objects were observed at times through eyeglasses and the car windshield. At no time was any sound heard and only color was like that of a bright light. SOURCE was fairly certain that a dime held at arms length would cover the object. When objects first appeared, they were 220 degrees from true North and 15 degrees above the horizon. When objects disappeared, they were 320 degrees from true North and 15 degrees above the horizon. Weather conditions at the time were as follows: Clear sky, dry, no wind, and cool. SOURCE estimated that the speed of the objects were in the 700 MPH range.

Flight 2-C, 4602d AISS

PAGE

4

OF

6

PAGES

I. SOURCE: [REDACTED]

Address: [REDACTED], Ocala, Florida

Age: 24

Occupation: Policeman

Education: High School

Qualifications: Unknown

II. RELIABILITY: SOURCE gave much thought and time to each question asked and seemed sure of his answers. In the opinion of the Investigator, it would be difficult to find a more reliable SOURCE.

III. SOURCE'S DESCRIPTION OF SIGHTING:

SOURCE'S Statement: "Upon hearing talk over police radio I proceeded to location of the other cars, first observing six specks of light proceeding South in straight line above Western Horizon. Objects seemed to make left turns Southwest of here and then proceed North again out of sight over Northern Horizon. Within a few minutes they would all six reappear from the Northeast Horizon again. They followed this same pattern two or three times. Then approximately an hour later I observed one more of the same objects come from the North Horizon and go straight across out of sight over the West Horizon. They became very bright at times and seemed to be accelerating while they were very bright.

Additional Information: SOURCE stated that the time of the sighting was approximately 9:00 PM EST 30 Oct 1955 and estimated that he had the objects in view for a period of one hour but was not very sure of the time element. Object was brighter than the sky background and many stars were visible. He does not remember about the moonlight. The brightness was like that of a bright automobile headlight several blocks away. Object appeared to move behind a group of trees as it went out of sight over Northern Horizon two or three times. At no time did the object appear to move in front of something. Object made no sound and was the color of white or off-white. The edges of the objects were like that of a bright star and only one being sharply outlined. SOURCE was fairly certain that a pea held at arms length would cover the object but stated that he could not see all of the object as rear was unlighted. SOURCE was on routine patrol and heard other cars talking over the radio about the sighting, so he proceeded out to the airport (Tayler Field) where above observation was made. Weather conditions were as follows: Clear sky, dry, slight breeze and cool. SOURCE stated that if the object wasn't a "Flying Saucer", he had no idea as to what could have caused it.
