5. PHOTOS	6. SOURCE		
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Civilian		
7. LENGTH OF OBSERVATION	8. NUMBER OF OBJECTS	9. COURSE	
5-8 mins	one	NW	
10. BRIEF SUMMARY OF SIGHTING		11. COMMENTS	
Obj observed moving fm the NW toward the East. Appeared as a red light, small. No image of body or anything other than a light. Movement slow & erratic.		Balloon released fm Warren shortly before sighting. Winds would have carried the balloon over Canton at about the time of the sighting.	

33 ^{9 page} When did you report to some official that you had seen the object?

Immediately:

I called first Akron Canton Weather

Bureau at airport. I called next Air Force Dept of Canton ~~and~~ Air Defense Filter Center at 1916 Cleveland Ave NW

Glendale 3-7676

at the airport they saw nothing - overcast condition - it is about 4 to 6 miles or more from my home to the northwest.

I called air force center here + they told me they would send an air radar alert out.

Page 9

34 - Was anyone else with you
at time of sighting
a - yes

35 If yes, did they see it too
a - yes

36 list name + address

a - my wife [REDACTED]
a my brother in law.

[REDACTED], who is
living with us now while home from
college. Fern College in Cleveland Ohio
studies Civil Engineering.

37 Was this the first time you
saw object like this.

a - yes

Page 10.

38 Do you think you can estimate speed of object?
a It seemed to move slow when more directly overhead, a little faster or slower than a balloon or a dirigible.

39- How far was it?

a - Well if it were plane size maybe 5 to 8 thousand feet if a large object could be miles or.

40 Please give following information about yourself.

Name

Address

Tel

Job

Age

[REDACTED]
[REDACTED] CANTON, Ohio
[REDACTED]
Glenlake [REDACTED]
Welder at Macomber Inc.
33 - Sex - Male

11. Page

Please indicate education

a Grade school - yes

b High school - yes

c College - no

d Technical school - In the Navy
Radio School at Northwestern Univ
and about ~~the~~ almost the 1st part
of an Electrical Engineering course from
International Correspondence School
at Scranton Pa.

I saw the object almost
the whole time except when
I called the Weather Bureau, a
minute or so, I didn't see it
but my wife & brother in law
observed it. Our telephone is
right beside the kitchen door
and I could slip out on the
back step and look out and

12 still observe it.

I hope that this information can be of some help. I firmly believe it was no plane or any object I've ever observed before. When it stopped I came into the house to call, it actually stood still. It seemed to get very bright all at once, almost as if it were above a ~~the~~ slight wisp of cloud cause to light seemed to reflect on clouds then it moved to the eastward, got dim and then bright again but not as bright as when directly overhead, then it disappeared behind clouds.

REMARKS			
<p>Larry- Here is a letter from an individual report- a UFO. Must give him credit for not sending it to Keyhoe after reading his book. It got into the hands of the Base Provost Marshal here. Suggest the following answer:</p> <ol style="list-style-type: none"> 1. Our preliminary conclusion is that it was a balloon with traces of a light probably a light, launched at night probably from Warren, Ohio; by the Weather Bureau. Warren is about 40 miles northeast of Canton. Investigation shows that balloons were launched at Warren on the night of his sighting and that the prevailing winds were in the direction of Canton from Warren. Further, his description of the object and its MOVEMENTS movements indicate the strong possibility that it was a balloon. 2. We are adding his report to the many others we receive in our continuing investigation of aerial phenomina. 3. Thanks for sending it to the Air Force. <p><i>(Copy of interim answer by P. Marshal inclosed)</i></p> <p>(You are probably aware that Gregory is on two or three weeks leave-and we're hurting) copy requested</p>

Maj. Tacker/ocf/55555t

13 June 1958

Dear Mr. [REDACTED]

This is to acknowledge your letter of 13 May 1958 concerning an unidentified flying object sighted by you on the day previous.

Preliminary conclusions indicate the object to be a weather balloon, launched from Warren, Ohio by the Weather Bureau. Prevailing winds were also in the general direction of Canton from Warren.

We are adding your report to our files on investigations of aerial phenomena.

Thank you for your interest in this matter.

Sincerely,

LAWRENCE J. TACKER

MAY 15 1958

FOR OFFICIAL USE ONLY
(AFR 190-16)

Obige

May 13, 1958

To:

Canton Ohio

Commander

Wright Patterson AFB,

I have no way of starting this letter but from information in a book called "Flying Saucer From Outer Space" by Donald Keyhoe there is a technical info sheet in the appendix I'll start from there:

1: When did you see the object:
May 12, 1958

2 Time:
approx 0820 hr 12 May ✓

3 Time zone
Daylight saving time

2 page
4: When were you when you
saw the object?

~~_____~~ N.E. Canton Ohio

5^a Estimate how long you saw
the object. —

about 5 to 8 minutes

3 How certain of time are you?
fairly certain.

6 What was condition of sky?
no trace of daylight

7- If you saw object at night, what
did you notice concerning stars &
moon

Stars = many - Moon - none

8- Was the object brighter than
background of sky?

yes

④ page
14 - Tell in a few words, the following things about the object?
a sound - no sound
b color - red.

15 shape - no details except round red light - pulsating -
Path irregular at times.

16 - The edges of object were,
Fuzzy or blurred - no sharp outline.

17 - was there more than one.
no.

18 Picture Path

5 page

19- If possible what was length
- in feet? Don't know

20

How large did it appear as
compared with object held in
hand or arms length.

a- a nickel or bigger held out at
arms length.

21 It disappeared from view
behind clouds to the east.

22 where were you?

Inside a ~~tee~~ my house

26 where were you

In the residential section
of town.

27 I was watching a television
movie at the time. Our sofa sits
across the room from a picture
window. I happen to notice a

6 red light - its side and thought
it was a low plane at first.

Our walls are painted a flame orange
color and there were 2 oval table
lights lit. There was quite a bit of
reflection from the walls on the
window, so for me to see through
the color reflected in the window
the light was bright enough to
attract my attention.

28. What direction were you
looking when object was sighted
a - North

29 when last seen
a East.

30 - angular direction + Elevation
a - approx true north, below
north star, Elevation - 35° to 40°

B when it disappeared?
from true north - 50° degree or more
" horizon - 60° degree

It was directly overhead
when it changed course.

32 Weather condition

- a clouds
scattered overhead to south
thick to north west overcast;
- b weather
dry
- c wind
no wind
- d temperature
cool.
