	2100C STL 15 miles	Clear and 10
(5) Amount of cloud cover	less than 6/10 covering	.2
(6) Thunderstorms	None	None
(7) Temperature gradient	-2.1°/per/1000 ft	
	Surface:	ISO Thermal - 6,000
	Aloft:	6,000 Normal to Tropopause 40,000

h. Other Unusual Activity - None.

i. Interception Action - None.

j. Air Traffic

Normal commercial air traffic in and out of Lambert Field, St. Louis, Missouri. Considerable military air traffic at high altitude on strategic exercises.

k. Position Title and Comments of Preparing Officer.

The manner in which the object hovered and moved slowly, combined with the instantaneous disappearance, would indicate that it might be a balloon which eventually burst at high altitude. However, the Weather Bureau reported no balloons in the area, and stated that their balloons carry a white light, which burns only 15 minutes. Refractions from the atmosphere might make a white light appear red to a ground observer.

l. Physical Evidence - None.

THE FOLLOWING ARTICLE WAS EXTRACTED FROM THE ST. LOUIS GLOBE DEMOCRAT, FRIDAY, 22 JULY 1960, PAGE 3A.

" 2 COUNTY GROUPS  
SEE STRANGE RED  
LIGHTS IN SKY

Two separate groups of St. Louis County residents, about three-quarters of a mile from each other, said they saw bright red lights in a circular formation in the sky about 10 p.m. Wednesday.

The [REDACTED] family, [REDACTED], University City, observed the mysterious lights through a 120-power telescope.

Mrs. [REDACTED], [REDACTED] her nephew, her niece, and her two young sons watched the object through powerful Navy binoculars.

Dozens of persons reported seeing a mysterious red light or lights in the sky above St. Louis County about 9:30 or 10 p.m. Wednesday. Many others reported flickering, erratically-moving red lights in the sky about the same time Tuesday night.

Mrs. [REDACTED] said she and her companions watched the object for 15 or 30 minutes before the lights seemed to rise and then disappeared suddenly.

"It looked like a wheel," she said. "There was a double row of lights in a circle, and it had spokes, also lighted. We sighted it when we were in a car near our home. When we pulled up it seemed to be right overhead, and I heard a muffled humming, which later faded out."

Mrs. [REDACTED] said she ran in and got her husband's binoculars. Then the group watched the lights as they moved steadily west, zig-zagging slightly, and later started to rise.

"What seemed to be a flickering of the lights to the naked eye was really a movement of the lights, we found when we looked through the binoculars," she said.

"It must have been terribly high when it disappeared, because it looked like a star just before it vanished."

[REDACTED] 14, whose hobby is astronomy, described the object as "four very bright red objects, in a circle around a central point at about 20 revolutions per minute."

The lights appeared to be one light to the naked eye, he said. They moved from east-northeast to west-southwest "at about the speed of a slow airplane," he said.

He said he could not tell how high or how far away the lights were. They disappeared "one by one, seeming to merge into each other" he said.

[REDACTED], his brother [REDACTED] 12, their parents and two neighbors observed the object through telescopes, until the last light west generally straight up, taking a slightly erratic course, he reported.

SUMMARY (Give summary which highlights the salient factors of narrative report. Begin narrative text on AF Form 112a unless report can be fully stated on AF Form 112. List inclosures, including number of copies)			
<p>A telephone call was received from Mr. [REDACTED] by the Base Clearance Officer the night of 19 July 1960, reporting an unidentified flying object. A number of his neighbors were also reported as having seen the object. This information was immediately followed by a telephone call from Mrs. [REDACTED], University City, St. Louis, Missouri, providing the same type of information. This headquarters contacted Det 6, 10th Radar Bomb Scoring Squadron and the 798th AC&amp;W Squadron the morning of 20 July to evaluate the report. Det 6, 10th RBS did not become active until 2200, 19 July, one half hour after the time of the reported sighting. The log of the 798th AC&amp;W Sq showed no activity at that time.</p> <p>Another report was received from Mrs. [REDACTED] the night of 20 July, reporting a similar sighting at approximately the same time, 2130 local. Det 6, 10th RBS was contacted at 0830 local, 21 July and reported one aircraft at 39,000 ft tracking East to West over North St. Louis at 2150 local, 20 July. The 798th AC&amp;W Sq log was negative. The U.S. Weather Bureau, St. Louis, Missouri stated no balloons were in the vicinity at the time of the reported sighting. Many other persons have been quoted by the press and radio in the St. Louis area as having seen the object both nights. This headquarters is unable to determine the nature of the object, and is forwarding this information IAW paragraph 13b, AFR 200-2. Also inclosed is an extract from a local newspaper which gives an account of the incident and names and addresses of additional observers.</p> <p style="text-align: center;">1 incl. **a. Description of the Object:**

- (1) Shape. Round
- (2) Size. Approximately size of a quarter.
- (3) Color.  
Bright red, varying in intensity.
- (4) Number.  
One.
- (5) Formation.  
N/A
- (6) Any discernible features or details.  
None.
- (7) Tail, trail or exhaust.  
None.
- (8) Sound.  
None.
- (9) Other pertinent or unusual features.  
None.

**b. Description of Course of Objects:**

- (1) What first called the attention of observer(s) to the object(s)?  
Neighbors called it to his attention.
- (2) Angle or elevation and azimuth of the object(s) when first observed.  
Straight overhead.
- (3) Angle or elevation and azimuth of object(s) upon disappearance.  
To the East at high altitude.
- (4) Description of flight path and maneuvers of object(s).  
Stopped and hovered. Went backwards once or twice.

(5) How did the object(s) disappear?

Instantaneously to the East first night. Instantaneously to the West second night.

(6) How long was the object(s) visible. (Be specific, 5 minutes, 1 hour, etc)

Approximately twenty (20) minutes first night; thirty (30) minutes second night.

c. Manner of Observation:

(1) Use one or any combination of the following items:

Ground-visual, ground-electronic, air electronic. (If electronic, specify type of radar).

Ground-visual.

(2) Statement as to optical aids (telescopes, binoculars, and so forth) used and description thereof.

No aids first night. Mrs. [redacted] utilized a telescope second night, after locating object with naked eye.

(3) If the sighting is made while airborne, give type of aircraft, identification number, altitude, heading, speed and home station.

N/A

d. Time and Date of Sighting:

(1) Zulu time - date group of sighting.

200230Z and 210230Z

(2) Light conditions - (Night, day, dawn, dusk.)

Night.

e. Location of Observer(s). Exact latitude and longitude of each observer, and/or geographical position. A position with reference to a known landmark also should be given, such as "2 mi N of Deeville," "3 mi SW of Blue Lake". Typographical errors or "garbling" often result in electrically transmitted messages, making location plots difficult or impossible.

University City, St. Louis, Missouri. Observed from front of homes in West St. Louis.
