If I have said previously, the object that my wife and I observed, did not make any sound, there was no definite outline or shape, only the two intense yellow lights. When it disappeared from my wife's view, she claims it went over the house but I believe I have the better insight in her statement, because when I saw after my glance and turned I was

unable to see it at any position
in the sky, and I remember that
there was not a great time
lapse, between the time I went for
my glasses, and the time I ran out
side. It had to revolve or oscillate
with great speed in order to
pass out of the picture.

Sincerely,

Dear Sir:

On Jan 6th my wife observed
a flying object through the living-
room window, and I immediately
went outside. As sure enough there
it was moving from about the
direction SSE, rather low on the
horizon. I thought at first that
it was an airplane, but when I
was outside I could not hear
a sound, it also interfered
with the T.V.

Sincerely,
[redacted]
