10. BRIEF SUMMARY OF SIGHTING A big, extremely fast objt streaking from ENE to SW across sky. "Very similar to Greyhound bus about a mile away--going about 1700 mph, head lights out, but lots of dusty glow behind." No sound or color. Appeared - 85° fm N, 40° fm horizon. Disappeared - 230° fm N, 25° fm horizon. Weather clear, dry and cold.				11. COMMENTS Objt apparently moving to SW, which is counter to any of artificial satellites. Description of objt is characteristic of an objt entering earth's atmosphere. Direction of movement rules out a satellite; therefore, objt was probably a meteor.	

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

Just in case this should be a possible sighting of the afore mentioned Russian "vehicle," let me know. otherwise, forget it, and I'm sorry to have troubled you. (I do not have much hope that anyone else would have seen "this" — it moved so rapidly — unless they were real "pros.")

Hon. Bruce Alger
WASHINGTON, D. C.

Dear Sir:

At exactly 4:07 AM CST early Thursday morning, March 9th, I was out in my back yard doing a bit of amateur satellite watching....hoping to see the polka-dot 12 footer, and

I SAW A BIG, extremely fast, unidentified object streaking from about ENE to SW across the sky. It moved so fast was hard to focus on it, but I DO remember quite a bit of the impression it left with me.

This object, seemingly, moved so darn fast that I would never have given it much later thought, except that the 7:00 AM news that morning carried big story that the Russians had orbited a dog, etc. in a 5-ton rocket.

If whoever looks after things like that should happen to want my impressions of this thing I saw, I would be glad to tell them what I remember. I know this is rather a silly letter, but I wanted to 'tell someone', and, naturally, I AM curious as to whether the time coincided with what we might know of when their rocket came down.

Sincerely,

~~XXXXXXXXXX~~
