Dear Sirs:

On the second Monday in the month of November, 1961, I saw a "object" gliding silently through the sky. I had a camera in my hands at the time. I then took three photos of the "UFO". They all took in the light of this object. I am sending the photo and negative that might help you determine if it was a flying saucer. If you want to see the other negatives write back to me and I will send them to you.

Yours very truly,
~~XXXXXXXXXX~~

P. S. I am holding the best negative in case you do not answer back.

Place an arrow beside the drawing to show the direction the object was moving.

18. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

19. IF there was MORE THAN ONE object, then how many were there? _____
 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

21. How large did the object appear to you as compared to an object with which you are familiar?

About as large as a very large, round radio antenna.

22. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

It covered it.

23. Did the object disappear while you were watching it? If so, how?

No

(It went behind the mountain.)

24. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I have never seen nor heard of a object that would look like this one if placed in the sky.
