5. PHOTOS ☐ Yes ☐ No		6. SOURCE Military		☐ Was Astronomical ☐ Probably Astronomical ☐ Possibly Astronomical	
7. LENGTH OF OBSERVATION 15 sec		8. NUMBER OF OBJECTS 1	9. COURSE NNE		☒ Other Star Marfak, Alpha
10. BRIEF SUMMARY OF SIGHTING Golden or light orange objt sighted on an azimuth of approx 010° by 2 airmen at Lockbourne AFB. Objt was at elevation of 005° and disappeared in same elevation. Objt was described as circular and approx 2" in diameter. Sighting lasted for 15 sec.			11. COMMENTS Azimuth of this UFO coincides with that of star Marfak at time and date given. Is probable that refraction of this star was cause of sighting. Short duration of sighting tends to substantiate this conclusion. It is still hard to explain why star was not recognized after it was higher in sky.

k. Lt Rudolph J. Meissner Jr., Intelligence Officer. Immediately after the sighting was reported I personally made checks with the Base tower, Local Columbus tower, Columbus approach control, and local police departments with negative results. The men, both vetrans, one with 19 years on the flight line, were completely reliable. They both stated that they had never seen anything like it before. One possible explanation is an inversion reflection, however, my experience is very limited in this area.
