COMMENTS  <del>UNIDENTIFIED.</del> Pending further consideration by UFO committee. <u>RE IDENTIFIED BY ADDITIONAL WITNESSES. FLOCK OF BIRDS.</u>		

14. Did the object disappear while you were watching it? If so, how?

Yes - appeared to be covered by the heavy clouds in the sky.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):  Yes  No  Don't Know. IF you answered YES, then tell what it moved behind: Clouds

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):  Yes  No  Don't Know. IF you answered YES, then tell what in front of: the clouds. Also a plane taking off from National Airport passed under it.

17. Tell in a few words the following things about the object:

a. Sound Mune

b. Color Gray to black.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

$\frac{1}{4}$  to about  $\frac{1}{20}$  Object changed size continuously

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

→ The movement was barely discernible. The object appeared to hover in one place in the sky.

The size and shape changed continuously. The larger the size the lighter gray the color. At one time it condensed into a small ball and its color was then jet black.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

*It moved very slowly if at all either vertically or horizontally.*

IF you answered YES, then what speed would you estimate? \_\_\_\_\_

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? 1 to 2 miles

22. Where were you located when you saw the object?  
(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type) \_\_\_\_\_
- e. At sea
- f. Other \_\_\_\_\_

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other \_\_\_\_\_

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- a. North
- b. Northeast
- c. East
- d. Southeast
- e. South
- f. Southwest
- g. West
- h. Northwest

24.2 How fast were you moving? 0-5 miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

*I was in heavy queuing hour traffic which barely moved.*

25. Did you observe the object through any of the following?

- |                 |                                      |                                     |                |     |                                     |

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

*The object seemed to be alive. It behaved like a giant amoeba, or one would observe in a microscope. I also considered it might be a flock of small birds, changing formation, but I am sure it was not a flock of birds because of its swiftly changing shape and because it remained relatively stationary in one spot in the sky.*

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

*It remained virtually stationary - though I think there was some slight vertical & horizontal motion back & forth.*

29. IF there was MORE THAN ONE object, then how many were there? only one  
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No.

31. Was anyone else with you at the time you saw the object? (Circle One) Yes  No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes  No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

ADDRESS [Redacted] Street U.S. ARMY, WASH. 25, D.C. City Zone State

TELEPHONE NUMBER [Redacted] AGE 46 SEX M

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33 years service in the U.S. Army with normal exposure to the latest developments in science as it applies to the military. I am in the Corps of Engineers and thus am primarily engaged in military construction and military field engineering.

33. When and to whom did you report that you had seen the object?

Day Month Year

None prior to this report.

34. Date you completed this questionnaire:

13	Dec	63
Day	Month	Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I am quite positive that the object or phenomenon was there, because in the course of moving in the heavy traffic - stop and go - the object was blocked from my view by trees or structures, but each time I looked up when my view was clear I could see it in the same place. I only lost sight of it for good when I had to turn left onto another road thus putting the object behind me.

It did not appear to be anything solid - it ~~was~~ looked more nearly like a black gas. Only once did it condense into a relatively small ball and at that time it had an intense black color and did seem to be solid. In fact, though I am not absolutely certain of this, when it was in the shape of a small ball it appeared to reflect the light from the gray overcast sky.

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

Report of Unusual Phenomena Sighting over Washington,  
D.C. 11 and 12 December 1963

Reference sighting #14 in the AF Fact Sheet, this office received a telephone call from a member of the Netherlands Embassy who stated that he had read the Fact Sheet and this item was of particular interest to him.

He further advised that he had seen just such an unusual phenomena in the skies over Washington on several occasions, and that in each case it developed that the phenomena was a flock of starlings being chased by a bird of prey. This would coincide with the description of the observation by the two observers who stated that the phenomena did not appear solid and that the size and shape changed continually.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? 2  
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

SEE 28 ABOVE.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NEVER.

31. Was anyone else with you at the time you saw the object? (Circle One)  Yes  No

31.1 IF you answered YES, did they see the object too? (Circle One)  Yes  No

31.2 Please list their names and addresses:

33. When and to whom did you report that you had seen the object? AS SOON AS WE GOT HOME  
December 1963 TO PENTAGON (AT DUTY OFFICER)  
Day Month Year

34. Date you completed this questionnaire:

19 December 1963  
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I WAS DRIVING, AND THEREFORE COULD NOT WATCH THE OBJECTS CONTINUOUSLY. MY WIFE, HOWEVER, DID DO SO; AND HER OBSERVATIONS WERE MORE COMPLETE AS TO THE MOVEMENTS THAT TOOK PLACE. HER COMMENTS FOLLOW.

[REDACTED]

I agree with my husband's observations except for question 19. It seems to me that when objects appeared to be moving less around them - slant off & move & when they did so they appeared more or less flat but still visible. There were times when they were not visible but it was not necessarily when they were moving.

Captain Quintanilla:

Mr. ██████████ of the Netherlands Embassy called Major Jacks this morning, upon receipt of a UFO Fact Sheet sent to him some time ago. He said that in reading over the 1963 cases, #14 regarding the phenomena observed over Washington, was of particular interest to him. He said that he had seen this same type ~~xxxxx~~ of phenomena on several occasions. What it was (he reported) was a flight of starlings (of which there are millions in this area), most often being chased by a bird of prey.

Dear Colonel [REDACTED]:

Reference telephone conversation of February 10th, the Air Force has been unable to make any evaluation of the sighting you reported.

Since the object viewed was apparently over National Airport during a period of heavy air traffic and no reports were made from aircraft or tower personnel, it is believed that you observed some natural phenomena. However, there is no evidence to support any conclusion as to the cause of the observation.

Sincerely,

Dear Commander [REDACTED]:

The Air Force has been unable to make any evaluation of the observation which you and Mrs. [REDACTED] reported having seen in the vicinity of the 14th Street bridge on or about December 12, 1963.

Since the object viewed was apparently in the vicinity of National Airport during a period of heavy air traffic, and no reports were made from aircraft or tower personnel nor from any other persons in the vicinity of the bridge on that date, it is believed that you observed some natural phenomena. However, there is no evidence to support any conclusion as to the cause of the observation.

Sincerely,

1. Reference telephone conversation between Mrs Helen Gaiser, your office, and TSgt David Moody, this office, on 3 Feb 64, regarding UFO sightings. Those discussed are as follows:

a. 11 Dec 63, Colonel and Mrs [REDACTED], Chief of Engineers, U S Army, Wash 25 D C, office phone [REDACTED]

b. 12(?) Dec 63, Commander and Mrs [REDACTED], [REDACTED], Alexandria, Virginia, [REDACTED] 9.

2. On the data presented we have been unable to evaluate the sighting and/or sightings. Since the object and/or objects viewed were apparently over International Airport during a period of heavy air traffic and no reports were made from aircraft or tower personnel, it is believed that some natural phenomena was observed. We have no evidence to support any conclusion as to the cause of the sighting and/or sightings.
