Dear Sir:

Wednesday, July 29, 1964, at approximately ten:twenty p.m. two flying objects were seen just east of the Milky Way. They were first spotted near the southeast horizon and made their flight across the sky to the southwest horizon. Their flight onward consumed approximately one to two minutes. No sounds were heard during the complete flight. The objects stayed approximately the same distance apart during the complete flight. The objects twinkled as a star might. At one time they seemed to disappear behind a star. They gradually faded away as though they were going out into space. The objects were obvious and were spotted immediately. We, Linda Jasper and myself, were witnesses.

Yours truly,
~~Washington, Missouri~~
