26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It was like placing ~~it~~ a glowing orange ball up in the sky at a very high altitude.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

TELEPHONE NUMBER [Redacted] AGE 13 SEX Male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

Watching A.F. G's. is a hobby of mine. I'm sure I saw this object. It was no reflection. I took off my glasses to make sure.

33. When and to whom did you report that you had seen the object?

20 Nov. 1967 To the police and you!

34. Date you completed this questionnaire:

27 NOV 1964
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

This object looked like it could have been out in space. (But I doubt it)

When it disappeared it possibly ~~was~~ could have sped up faster than light. That's my theory for the disappearance.

Thank you.

P.S. sorry for the misspelled words.

Dear Sirs,

On the night of Nov. 20, 1964
My friends and I were out watching
the stars when we noticed an orange
light near the moon. It was traveling
from the West to the northwest at a
terrific speed. Any where from 500 -
700 mph. Its color did not change.
(a steady ~~orange~~ orange color) It had
no ~~sound~~ sound that we could
hear. After watching it for 1 and $\frac{1}{2}$
minutes it just dissappeared in-
to thin air. Three of us saw it.
I knew I should tell you about
so I'm sending you this letter.
You will find a diagram on the
second page of this letter. Please,
tell us what we saw. I'm a
Boy Scout. I didn't just imagine
it!
