8 JULY 65

~~████████████████████~~
Cincinnati, Ohio

July 22, 1965

~~Satellite~~

Dear Major Quintanilla,

On July 8, 1965 I noticed a "star" moving quickly past the "big dipper" from S.W. to N.E. It took about fifteen minutes for it to pass the big dipper.

I'm sure my eyes weren't deceiving me because the night was clear and the stars were easily visible. Actually I've been waiting years to spot a satellite and I assumed this was what I had waited to see. My husband saw it, too.

The only description I can

give is that it looked like a
star.

Thank you for your time and
consideration. If you can tell
me what I saw, I'd appreciate
it. Is it one of our weather
stations?

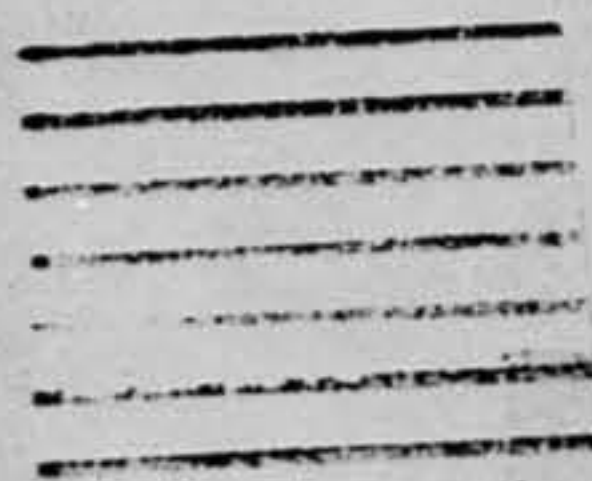

Sincerely yours,

Mrs.
