Washington, D.C.

Dear Sirs:

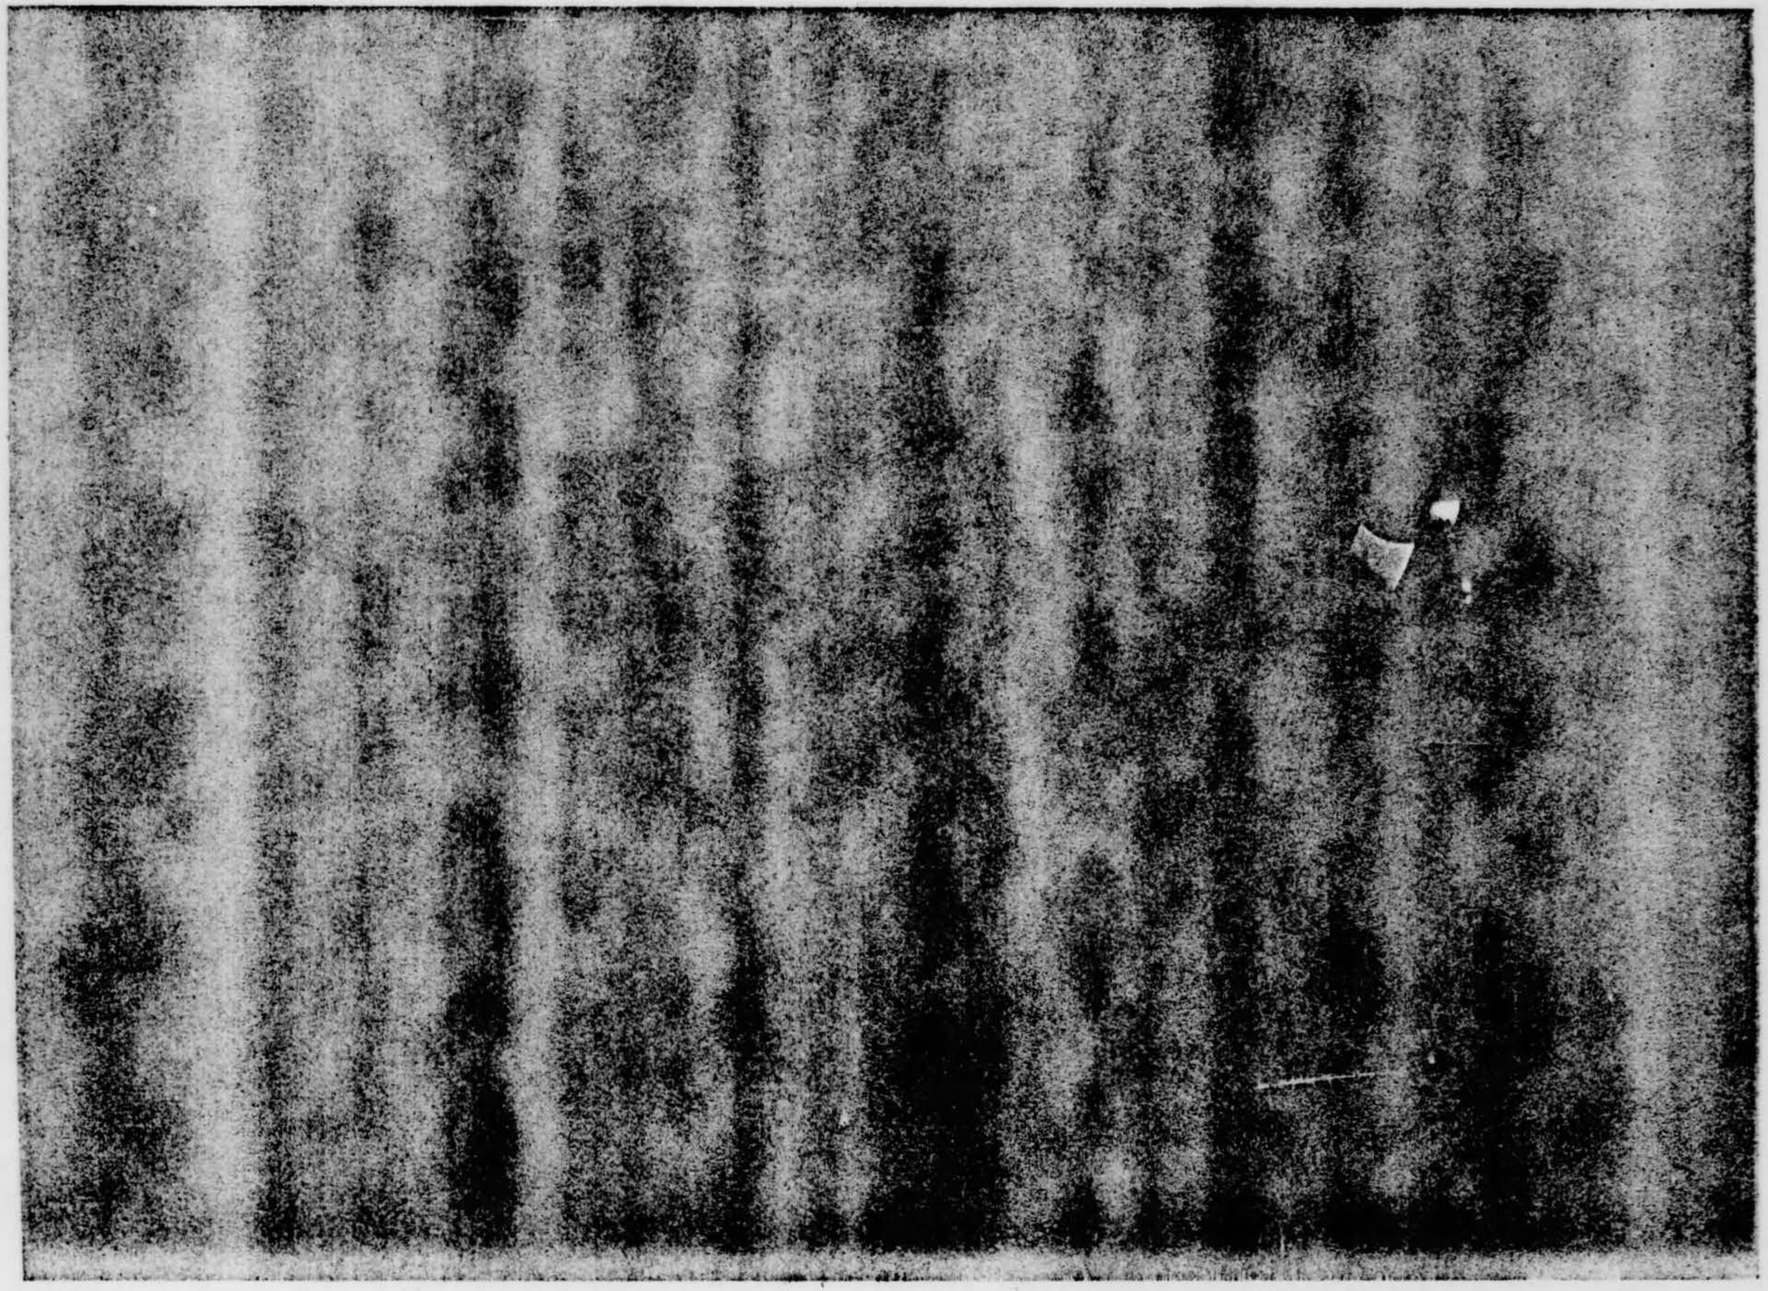
In the course of a conversation the other day, a person mentioned the sighting of an unidentified flying object to me. Since I do have a rather large interest in this field, I interviewed the person who was involved in the sighting. I thought you might be interested in his answers to several questions which I put to him.

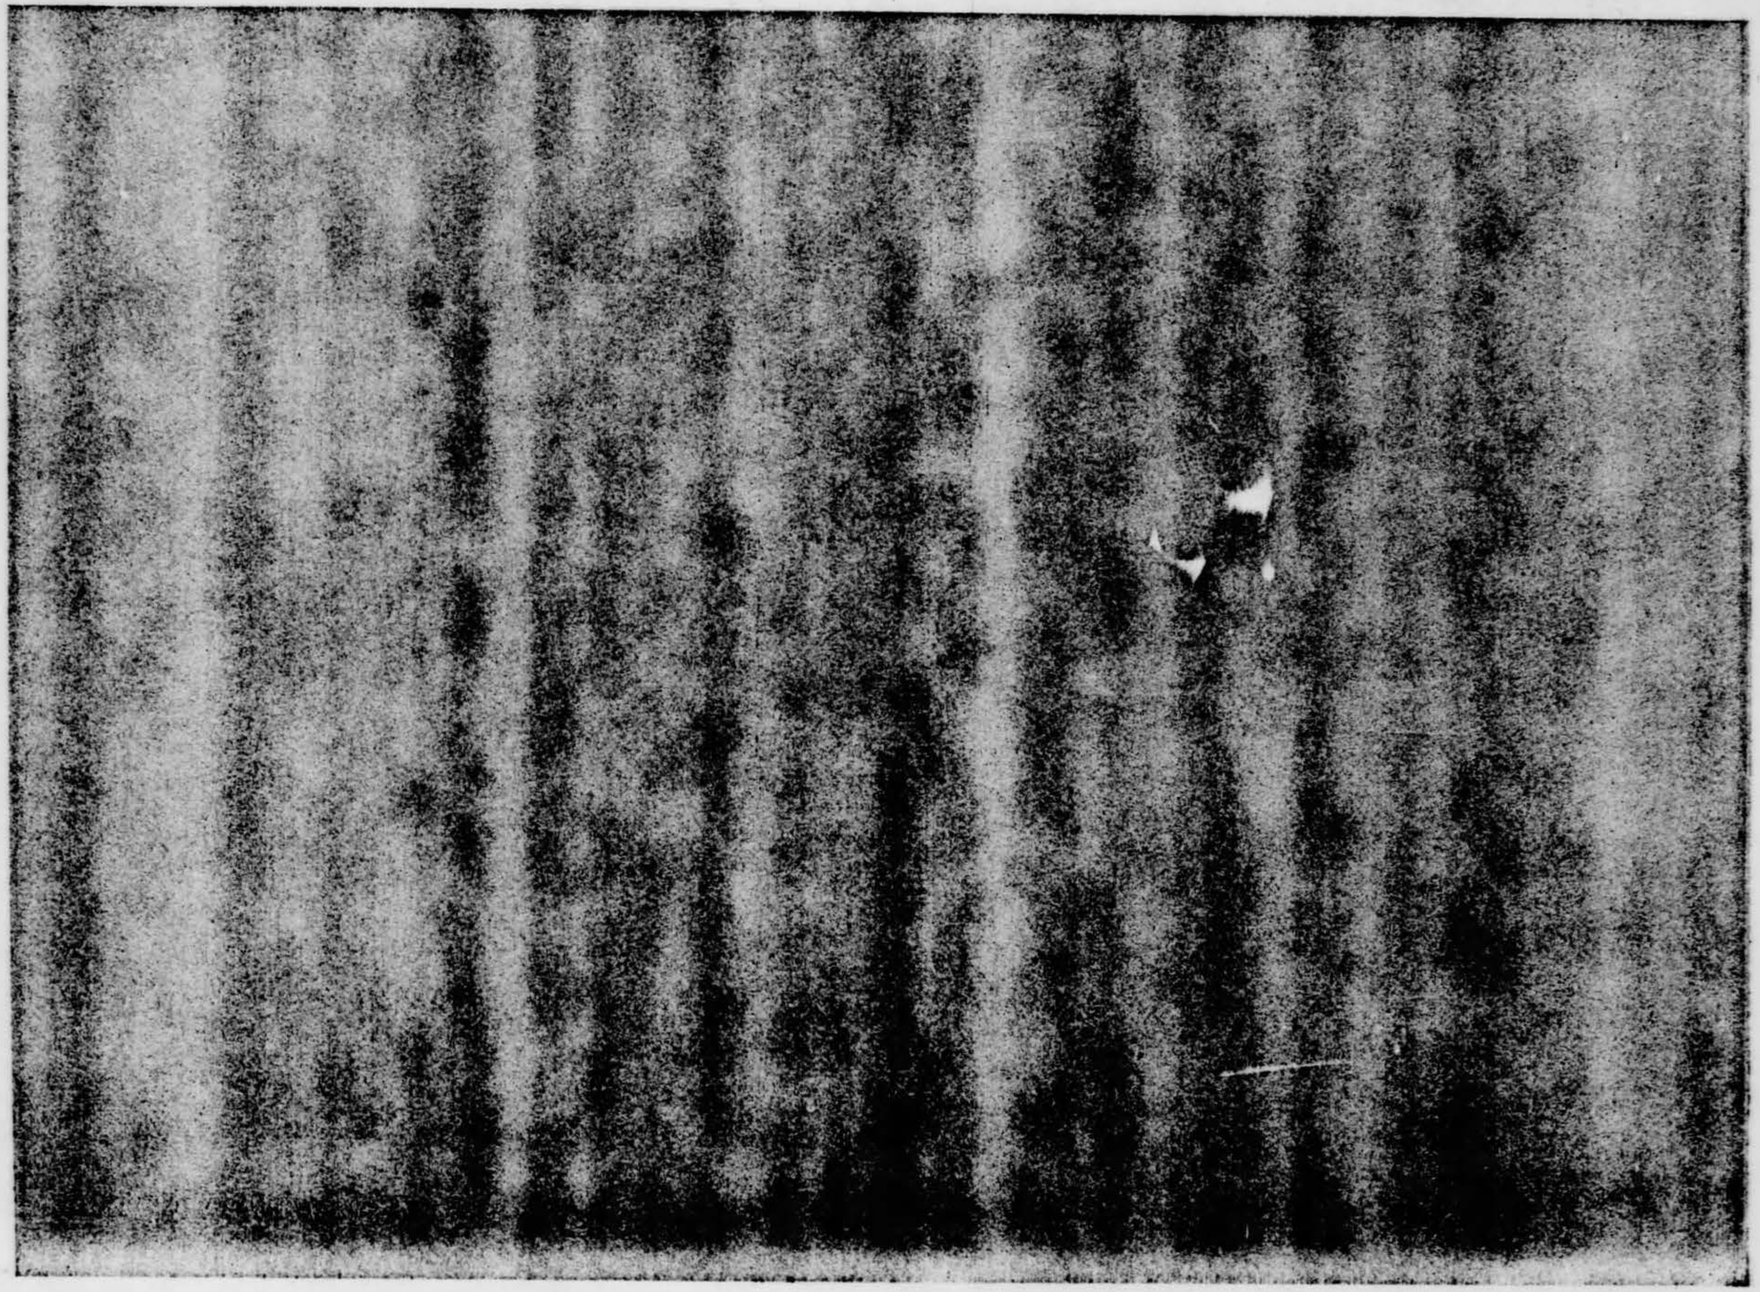
Question #1 was-What were the conditions under which you saw the object in the sky? The answer was that it was a clear night with a few clouds."It was about 9:30 P.M. two weeks ago when I first spotted the object in the sky. It seemed to be shining as from the reflected light of the sun. It had a fantastic speed. As it reached the zenith, four pink objects shot out of it, one to each point of the compass. The pink objects were going at a fantastic rate of speed. As the white object continued to descend, it stopped 30° above the horizon."

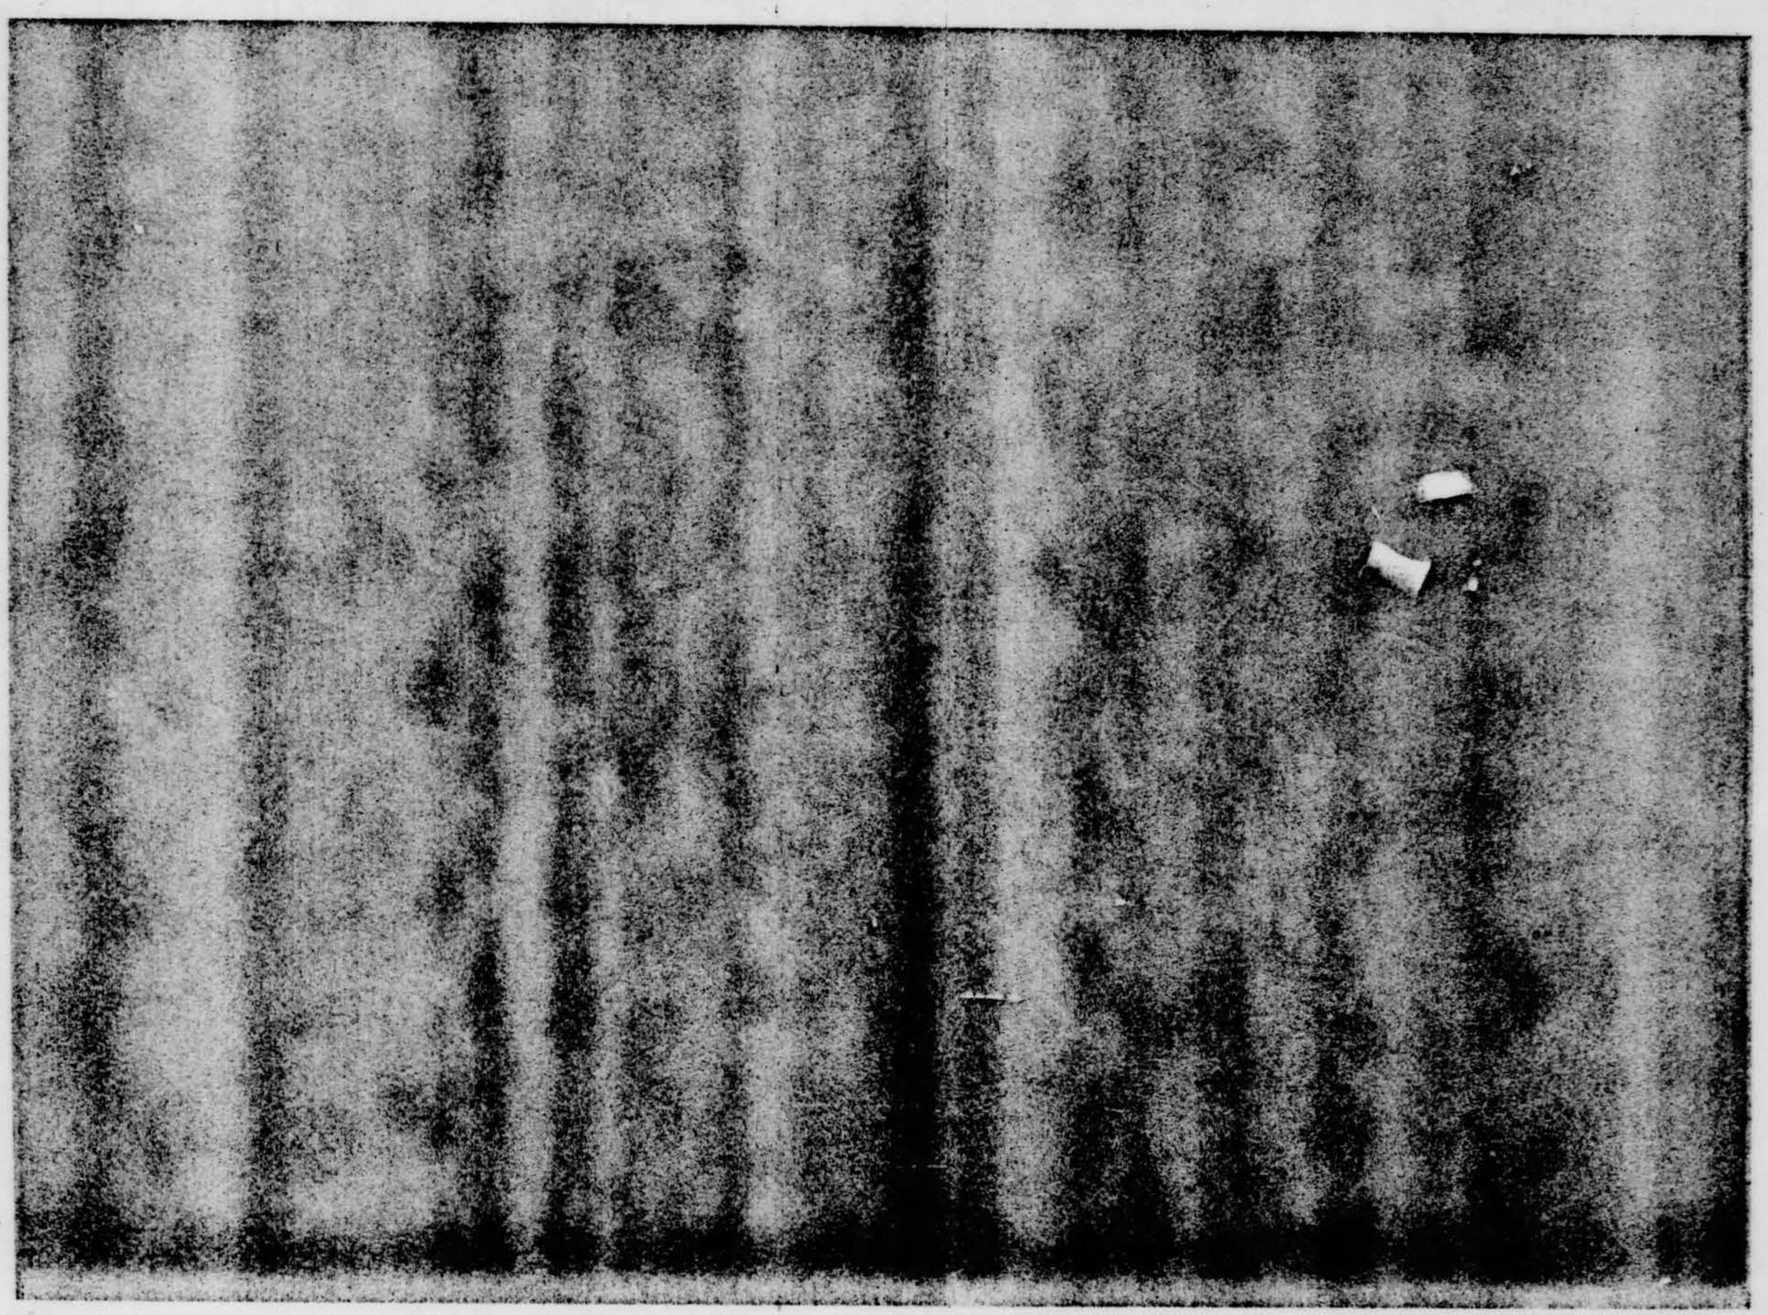
Question #2 was-Did anything occurr when the object stopped? Answer was-"The object changed color from reddish-pink, to green, to yellowish-orange.

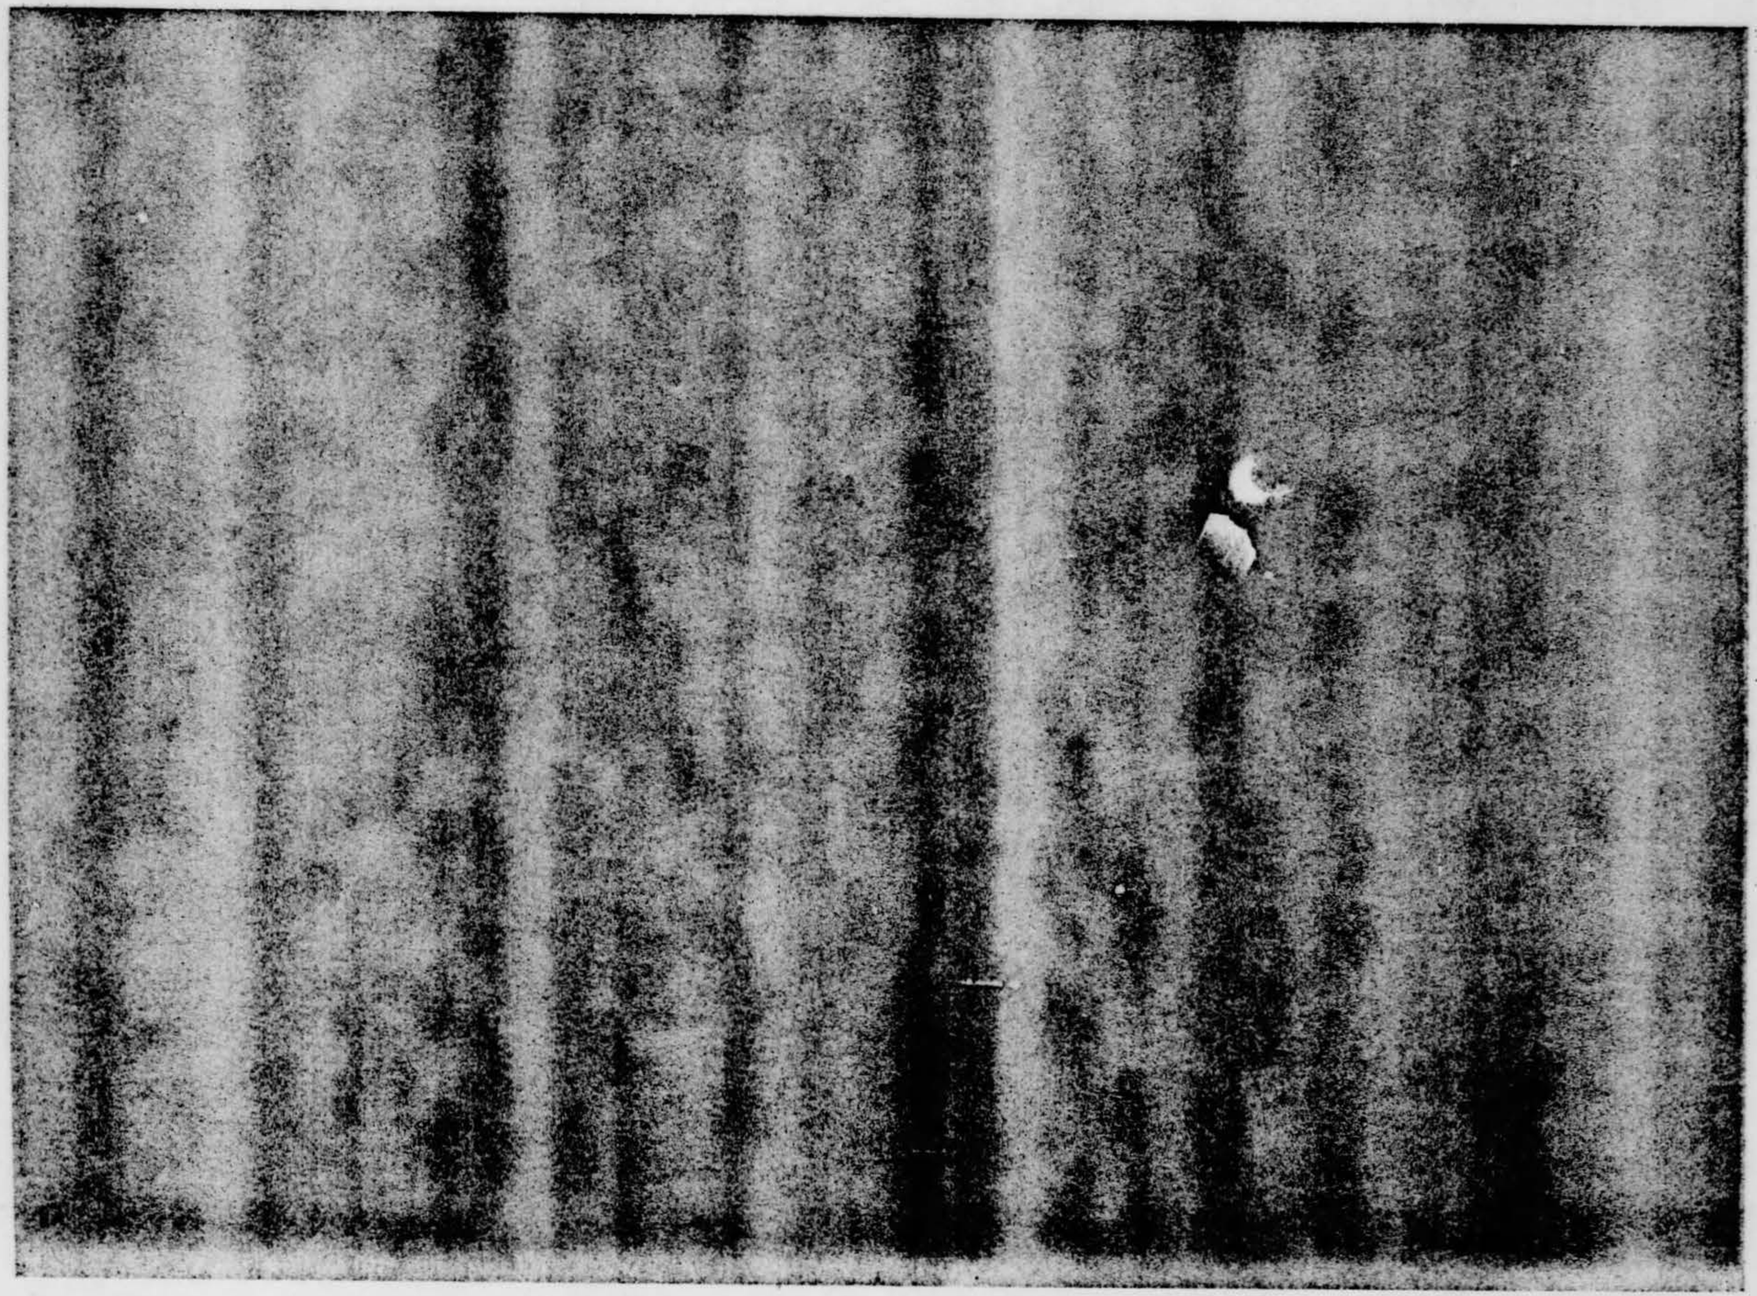
Question #3 was-Next what happened?
Answer was that the object kept changing colors and then suddenly dissappearred.

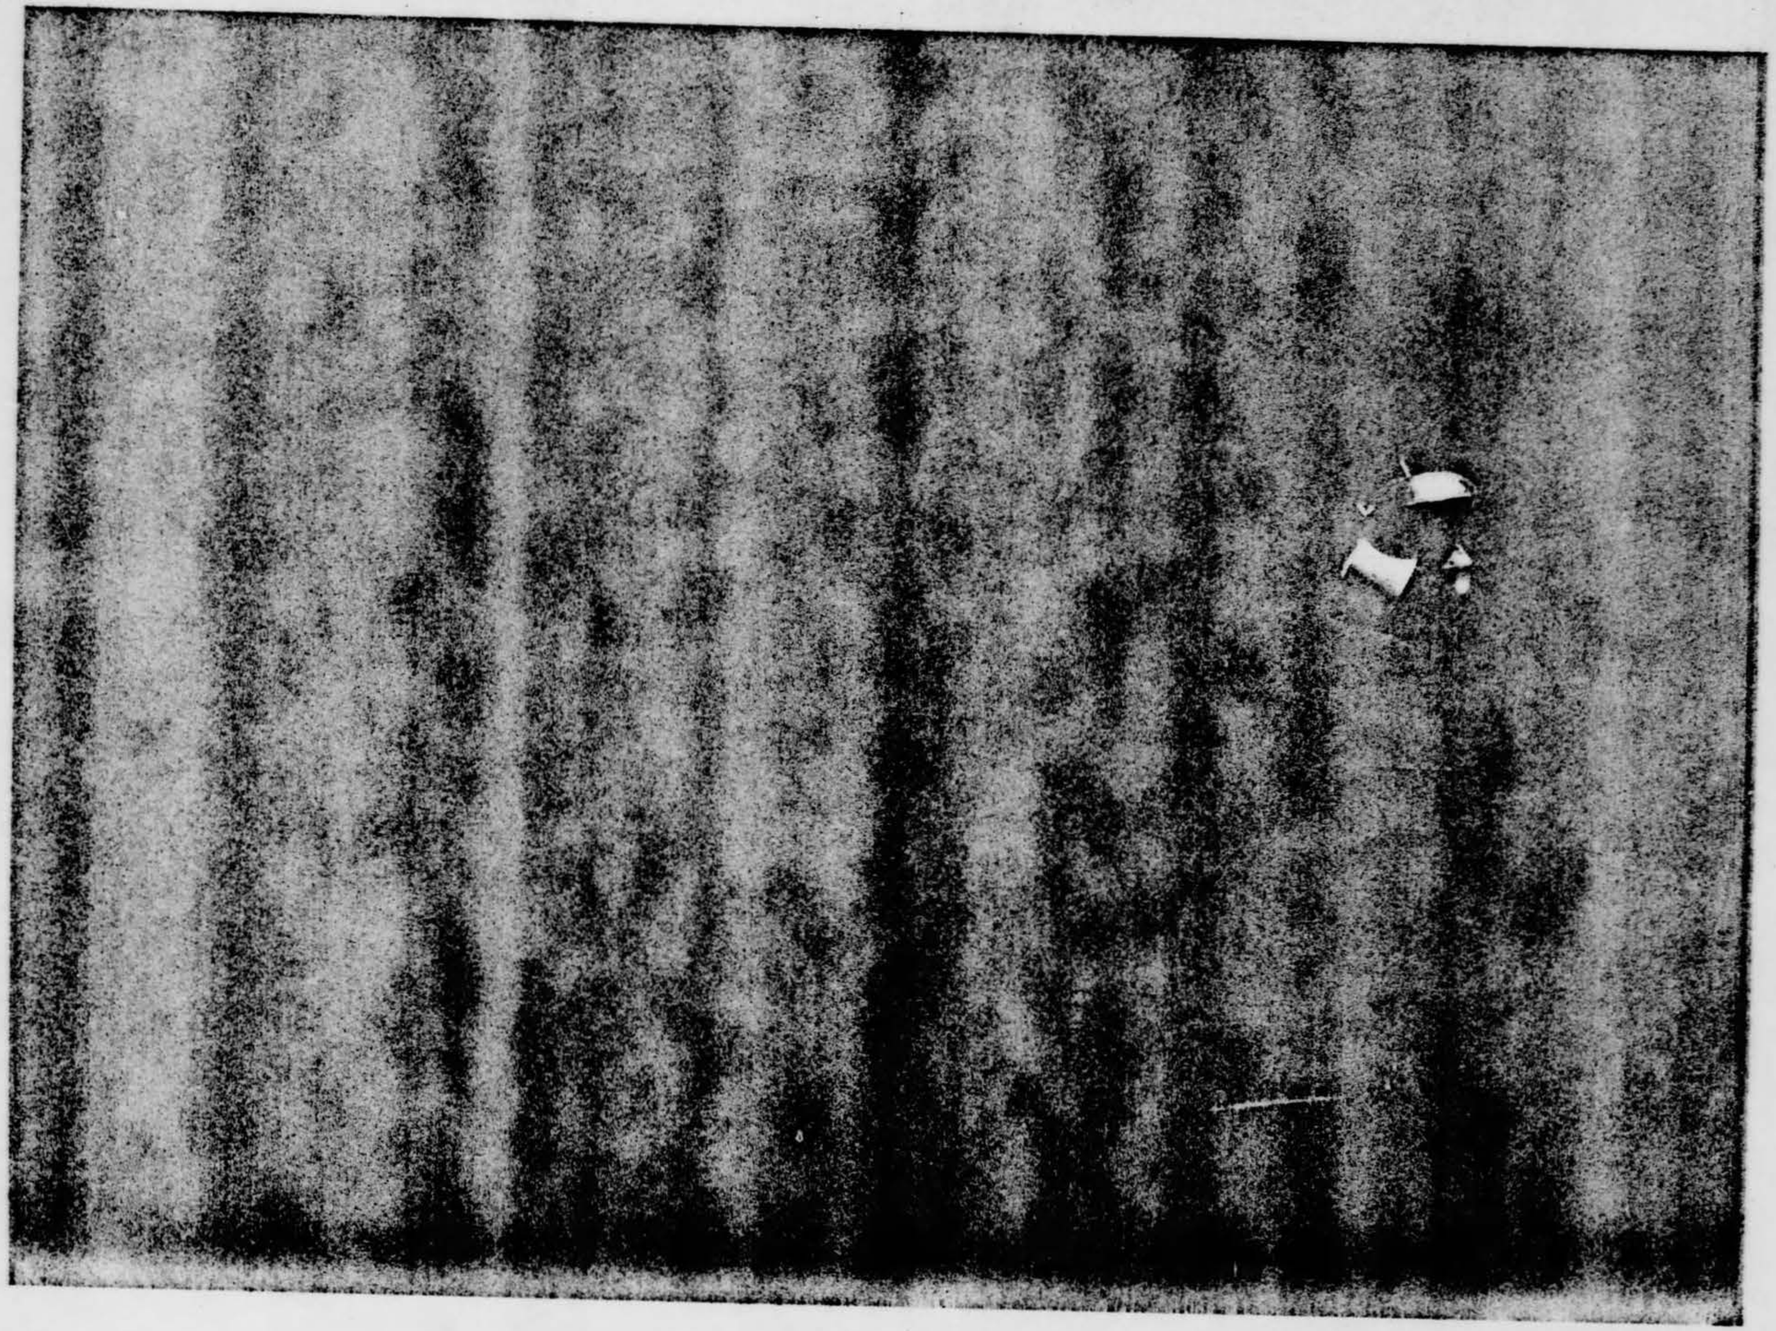
Question #4 was- Was their any noise or sound that caught your attention? Answer was negative.

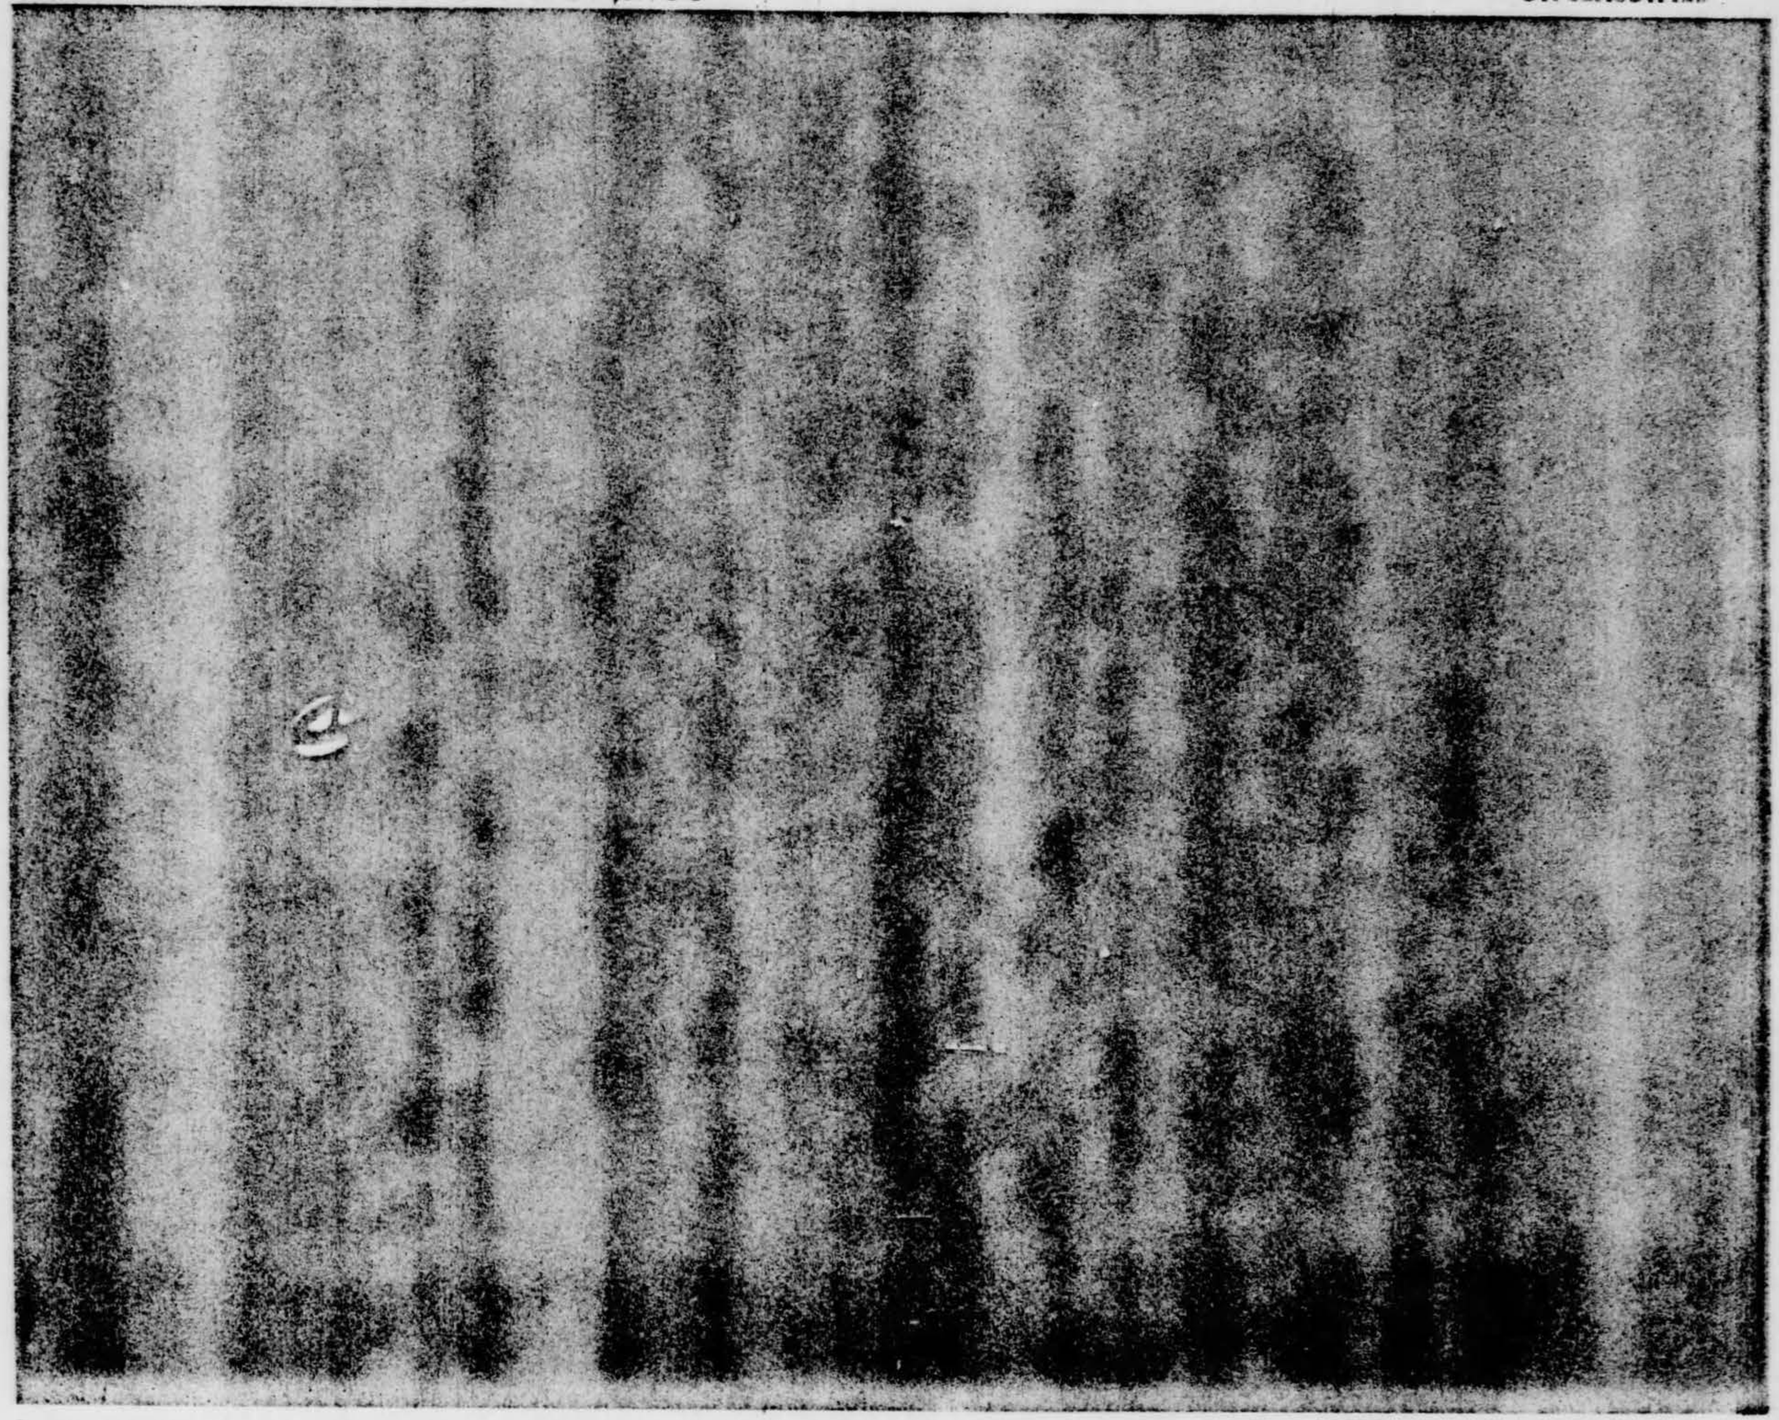


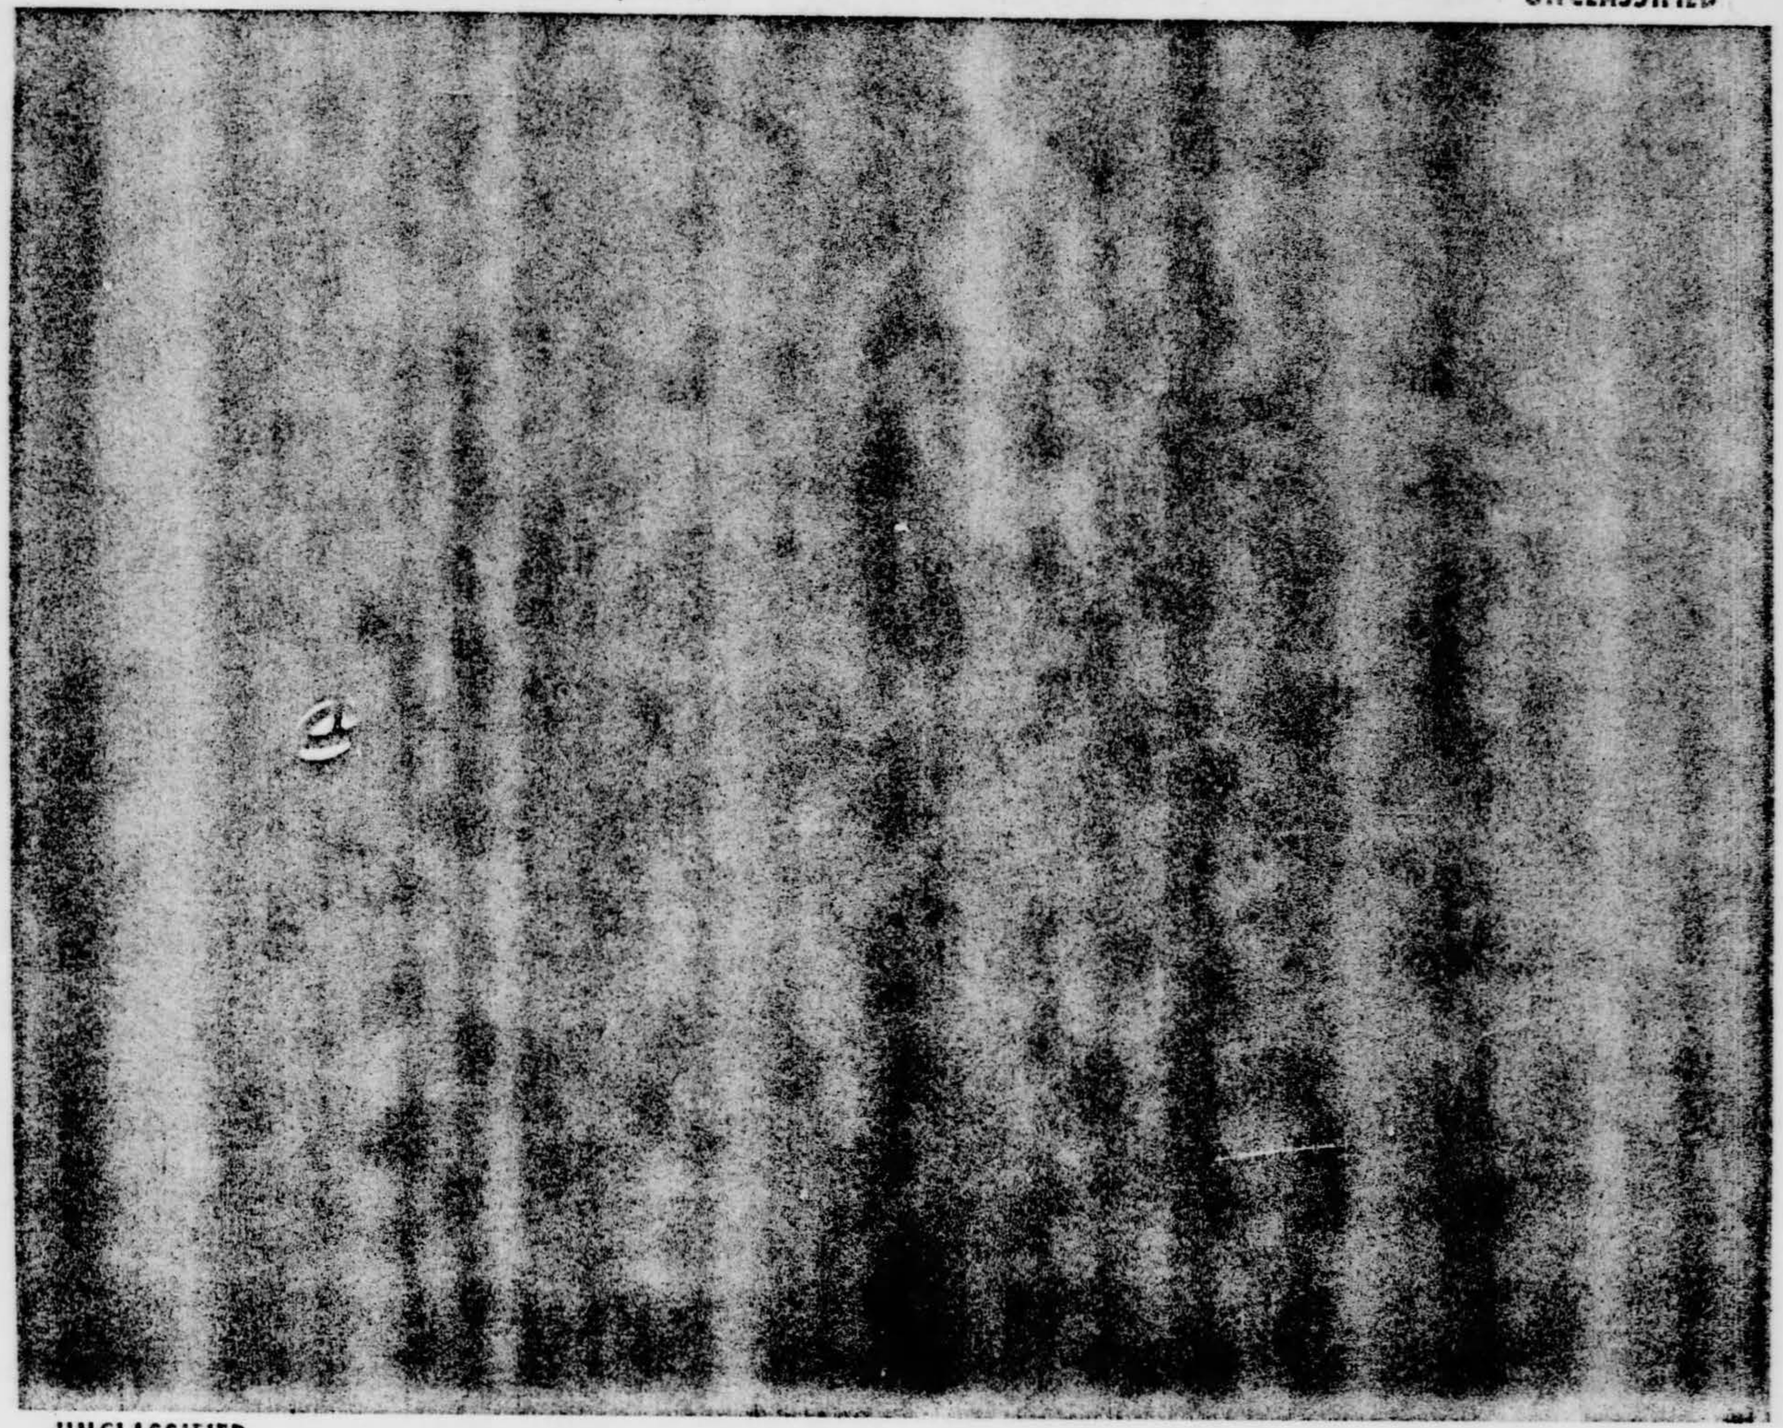












NCIO File with 2-3 Aug 65

RE-EXAMINATION AND ANALYSIS

SUBJECT: UFO sightings 2-3 August, 1965, Valentine, Nebr. reported by Judi Anne Hatcher in "Report of Unidentified Object or Phenomenon."

OBJECTIVES: To check all possible data on the scene and to fill in data gaps in the original report. Note: Original report was written in California and object positions, etc. were determined by memory.

GENERAL RE-EXAMINATION: Object positions were measured at the scene of the sightings and, for future reference, plotted on the panorama. This was drawn so that, when held at 22" from the eye, the objects in the skyline have the correct apparent size and position, and the objects therefore the correct positions in the sky. In cases where the objects were not viewed from the point from which the drawing was made, corrections have been made for the apparent position change of the objects. (Note: this applies particularly to objects C and B. In the report objects B are said to be moving behind a tree. From the panorama point, they were not.) As a check, the apparent elevation of several landmarks was measured from the panorama point. This general re-examination resulted in some corrections of the original data.

CORRECTIONS: (as shown on panorama)

Object A: Minimum elevation, $7\frac{1}{2}^{0}$; maximum elevation 20^{0}; max elevation photographed, $18\frac{1}{2}^{0}$; approximately due west.

Objects B: Minimum elevation, 10^{0}, while rising over house; minimum final elevation, object B_4 26^{0}; maximum final elevation, object B 33^{0}; distances between objects B, B_1 4^{0}; B_1, B_3 3^{0}; B_2, B_3 1^{0}; B_2, B_4 9^{0}; B_4, B 12^{0} upon rising; final object distances (in same order) 3^{0}, 2^{0}, 1^{0}, 6^{0}, 8^{0}; NNE to NE, arcing path.

Objects C: meeting elevation, 15^{0}, NW, between Dippers; movement: object C became visible and moved to meeting point in 10-15 sec. traveling approx. 30^{0}, angular speed, 2 to 3 deg/sec. similar for object C_1. stationary for less than 1 sec. and disappeared in less than one sec, fading out while moving over dotted lines indicated on panorama.

Object D: minimum elevation, approx. 8^{0}, maximum elevation, 32^{0}; no photo (see examination of photo B.)

EXAMINATION OF PHOTO B:

Camera position: By observation, it was obvious that the photo was not of object D as first reported. There is no pole in the proper position from anywhere near the observation scene. From the NW corner of 7th and Main the pole would be in the correct position, but the lighting and wires different. Thus, the only possible alternative is that the photo was of object A in the West. The Approximate camera position was determined by memory and observation of the apparent positions of the cross wires with respect to the pole. Thus it was determined that the camera position was approximately 134 feet ~~east~~ and between 52'8" and 51'4" south of the pole, elevated on a ladder 5'7" high, with the camera pointing at about a 25° angle. The three test photos (photo 1) were taken from 51'4", 52'2" and 52'8" south of the pole, determining that the correct position is approx. 52'2" south.

Star determination: from this position, Arcturus was observed to "set" over the pole, as in the UFO photo, at 12:42 A.M. August 3, determining that it indeed was the correct star.

Exposure determination: Trial interrupted exposures of Arcturus were made to determine the length of the UFO exposure. The shutter was open and closed as follows:

OPEN	CLOSED
30 sec.	30 sec.
30 sec.	30 sec.
30 sec.	30 sec.
60 sec.	30 sec.
30 sec.	5 min.
30 sec.	30 sec.
30 sec.	30 sec.
30 sec.	30 sec.
60 sec.	30 sec.
30 sec.	indofinate
60 sec.	60 sec.
60 sec.	60 sec.
60 sec.	end.

producing the dotted star trails. By comparison with photo 2, in which the pole is the same size as in photo 3, the exposure length was determined to be at least 2 min 20 sec. and at most 2 min 40 sec. depending on how far behind the pole the star went before the exposure was stopped. The approximate angular velocity of the UFO upwards, if the varying light trail is taken to mean light intensity change, is about 4°/min.

COMMENTS ON THE PHOTO: The fact that no other star trails are visible in the UFO photo is probably because of the increase in background illumination near the horizon, compounded by slower film. The test shots were taken with Tri-X developed in Acufine, a much faster film than the XX used for the UFO shots. This film was developed and printed by the Lincoln Journal staff, and as yet no information about their processes has been obtained.

GENERAL COMMENTS: It is interesting that all witnesses were quite convinced that the photo B had been taken facing north, a complete impossability! Even the photographer's records, written immediately after the sighting, give no indication that a photo was taken facing west that includes a star and pole, although one is indicated for the north. This sighting and investigation points up the need for on the spot investigations as soon as possible after the sighting to minimize the need of relying on the memory of a witness. Even though the incident is still vivid in my mind, It is most frustrating that I can remember the star-pole photo taken facing north (which was never returned by the newspaper) as if I took it yesterday, but can not, even in the face of this investigation, recall a similar photo taken facing west. Perhaps had the investigatin been conducted sooner after the sighting this photo puzzle could have been solved, or perhaps it would never have existed.

Judi Anne Hatcher,
investigator
report prepared 8/67

Question #5- Has this occurred again since two weeks ago?
Answer-Yes"Last night my wife and daughter both were outside. At approximately 7:00P.M., the object appeared traveling west to east. As it reached the area overhead, they saw three pink objects expelled from it. Both the object and the pink objects had a high rate of speed. The pink objects dissappeared over the horizon.The originial white object descended to about 60° above the eastern ho rizon and suddenly dissappeared."

In the interest of science and this country, I have forwarded this information to you. The first person to see the object was Dr. [redacted], Phoenix Arizona. The other two people were his wife [redacted] and daughter [redacted] Their phone number is [redacted]. I trust that this information will be held confidential. Dr. [redacted] has aggreed to be interviewd by any person wishing it. I would rather that my name were not mentioned even though Dr. [redacted] knows that I am sending this letter.

I trust that I shall here from you on this matter. I shall be quite interested in its outcome.

Very truly yours;

[redacted],

Mr. [redacted]

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

7	August	1964 or 65
Day	Month	Year

2. Time of day: 8 or 9 Hour ? Minutes

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
(b.) Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): (a. Daylight Saving)
b. Standard

4. Where were you when you saw the object?

5 [redacted]	Walcott	Iowa
Nearest Postal Address	City or Town	State or County

5. How long was object in sight? (Total Duration) _____ Hours _____ Minutes ½ Seconds

(a. Certain)
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? By my own judgment

5.2 Was object in sight continuously? Yes ✓ No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

Mr. John P. Spaulding
Lt. Colonel, USAF
Chief, Civil Branch
Community Relations Division
Office of Information
Department of the Air Force
Washington, D. C.

NAP

Dear Lieutenant-Colonel Spaulding:

Thank you for your letter of July 16, regarding the National Investigations Committee on Aerial Phenomena (NICAP). I agree with the NICAP that UFO's are "a problem of national importance" -- maybe -- and for that reason, I am very glad the Air Force checks on them.

However, as you will see from the enclosed, which I send in case it may be of interest to you, there would seem to be some Fayettevillians who regard these flying objects, identified or unidentified, as of interstellar or cosmic importance. The Keyhoe outfit, of course. Mr. Ted Wylie, our local editor, is either more naive than one would think, or having a lot of fun with these people. I sent him your letter, and the first item is his follow-up. Later, a meeting of some local and Arkansas members of the group was covered by a reporter from the Times, with considerable publicity--and the usual frenetic reactions.

The only UFO's I have seen around these parts are (1) the tail light of a high-flying plane, U by me alone; and (2) a strange light, hovering on the western horizon after sunset, blinking on and off a phosphorescent light, like a magnesium flare -- until I identified it as a lightning bug perched on the nearest twig of the willow tree by the back porch!

Incidentally, my letter to the NICAP, addressed to Matawan, New Jersey (the best address Mr[redacted] could remember) was returned -- "Insufficient Address" -- "Unknown [redacted]

Sincerely,

Rachel Harris Campbell

Local Line

A continuing interest in unidentified flying objects has been evident this summer, with stories from many sections reporting sightings of various kinds. The Department of the Air Force does not accept involvement of the matter, according to a letter written to a Fayetteville resident in response to an inquiry. One of the officers wrote: "The National Investigations Committee on Aerial Phenomena is a private UFO organization and is in no way connected with the government. Their report 'The UFO Evidence' has been reviewed by the Air Force. It is a voluminous collection of reports, facts, opinions, excerpts of investigative reports, and correspondence all designed to support the conclusion of NICAP that UFO's are a problem of national importance."

What most folks would like for the Air Force to say is: What does the Air Force think of the facts? Little along this line is to be gleaned from the contents of the letter.

UFOs have been tracked at miles per hour and are capable of maneuvers impossible for present-day aircraft.

Farish, who says he has observed several UFOs, described his latest sighting near Plummerville. He said that in May of this year he saw an object

Group Meeting In Fayetteville Investigates Reports Of UFO's

By PAT DONAT
Times Staff Writer

The controversy over unidentified flying objects (UFO) has once again become front page news with reports of sightings of these objects being made over the weekend in four southwestern states.

The Air Force, following the pattern it set back in 1947 when the flying discs were first investigated, dismisses the sightings and a spokesman for the North American Air Defense Command in Colorado Springs, Colo. said the objects were probably some of the planets or stars, Jupiter, Rigel, Capella, Betegeuse or Aldeberan.

The Air Force has investigated 9,130 cases since 1947 and 666 sightings have not been solved. So far this year 222 reports have been investigated and Air Force observers say four of these remain unexplained.

Co-incidentally with the latest sightings members of the National Investigations Committee on Aerial Phenomena (NICAP) were holding an informal meeting here in Fayetteville at the home of Mrs. Edwin P. Higgins.

NICAP, the chief opponent of the Air Force's stand that the sightings have a natural explanation, was organized in 1956 by Maj. Donald E. Keyhoe (USMC, Ret.) to investigate and evaluate unidentified flying object reports.

The phenomena occurring in the southwestern skies was not observed by the group here. One of the members, Lucius Farish of Plummerville, Ark. interviewed yesterday morning said the purpose of the organization is to disseminate information to the public and to press for Congressional hearings to study information compiled by the group.

NICAP maintains the objects are interplanetary, Farish said. This premise is based, he explained, on the fact that the which came to a standstill in the air, lights blinked on and off and he observed it for four to five minutes before it disappeared.

He reported that another member attending the meeting, identified as a University senior at Denton, Tex., related seeing two small discs hovering over one of the University buildings.

Farish, a 28 - year - old, free lance writer, said NICAP publishes a bi - monthly magazine called the UFO Investigator and a booklet called, "The UFO Evidence", which outlines findings of the organization.

UFO sightings have been made in the Fayetteville area and Mrs. Higgins told of seeing a pulsating light which passed over very rapidly a year ago.

A more spectacular sighting was reported here by Henry Seay in 1955. Seay said a circular object which looked like it was shooting sparks appeared within 200 feet of him. The object took off over a ripened field of oats and Seay said, "It couldn't have been sparks flying from it, although that is what it looked like, because it would have set the field on fire." Seay's report was publicized at the time it occurred.

Reporter Watches Mystery Lights Move Across Sky

(EDITOR'S NOTE — The TIMES, as well as many other newspapers in other parts of the nation, has received many reports in the past few days about unidentified objects in the night sky. Here, a TIMES reporter describes his experience with the phenomena.)

By WES HOLT
TIMES Staff Writer

Last night my wife and I were sitting in our back yard playing with an assortment of cats and dogs which seem to congregate around anyone going by the name of Holt, when Barbara, my wife, pointed to the North and exclaimed, "What's that?"

Being aware, of course, of recent happenings, I turned to look in the direction she indicated, and spied four red lights, and two smaller bluish green lights which appeared to be following along after the red ones.

Reaching to my side I picked up a pair of Navy binoculars, (which just happened to be within reach) and trained them on the lights.

There appeared to be no appreciable difference than seeing them with the naked eye, with the exception that they appeared larger.

Even with binoculars, I could not determine whether it was an object or a group of objects.

The objects were traveling in a line from about East North East to West South West. For the two or three minutes in which they were visible to us, the lights traversed, at a guess, about 170 degrees across the night sky, and disappeared in the Southwest.

I make no claims as to the identity of this object (objects) The only claim I make is that we, my wife and I, did observe them at about 10:25 last night.

To describe the sight; there were four red lights arranged in a diamond pattern, with the two blue-green ones trailing just below and to the rear. One of the blue lights traversed back and fourth behind the four red. It did not flash. It was a light that moved back and forth, below and to the rear.

The object, or objects, did not appear to me to resemble any aircraft I have ever run across, and after spending eight years in the Air Force, I have seen my share.

I for one believe that people who claim to spot these unidentified flying objects (UFO's) or whatever they are, do see something, and whatever it is needs an explanation.

I don't have one. . Do you?

POLICE IN

Receive Reports Of Flying Objects

Police in both Springdale and Fayetteville received reports of unidentified flying objects last night.

A Mrs. Harrison of Springdale called the Springdale police at 8:25 p.m. to report she had sighted an object giving off a blue light and travelling very rapidly from the south to the north over Springdale.

Twenty minutes later the Fayetteville police were alerted by Mrs. Charles Edward Craig that she and her husband had seen a strange flying object moving west and giving off a reddish white light. The object stopped for five minutes and started moving again. They observed it from the vicinity of the Animal Science building on the campus.

Mrs. Harrison, who maintained an all night vigil, reported a second sighting moving southeast to west at 9:45 p.m. and at 2 a.m. called again to say one was going northeast. Her last report was at 3:30 a.m. when she reported one going east. She said the colors ranged from red, green, yellow and blue.

Mrs. Don Morrow of Elmdale Addition reported her eight-year-old daughter and 12-year-old playmate had seen a strange object hovering over the west section of the city at 7 p. m. Monday. The youngsters described it as being a long, grey-cigar - shaped object with colored lights at each end.

Police at Jonesboro in Northeast Arkansas, received reports

(CONTINUED ON PAGE FIVE)

POLICE

that UFOs had been sighted over Jonesboro about 8 p. m. and again near 11 p.m.

This is the third straight day of reports of mysterious objects in the skies.

Two newsmen have taken pictures of what they identify as UFOs. One, taken by Bob Campbell of Sherman, Tex. is described as showing a slightly oval burst of light that appeared

an immensely bright light in the trees.

Two UFO sightings were reported by Herschell Rains of West Fork. One at 8:30 p.m. when he said he observed four bright lights, travelling in a staggered single line flying from west to east in the north at about a 45 degree angle above the earth. He said these were brighter than the Evening Star with a slightly orange tint. At the time he saw and identified jets in the area, which he said had no relation to these UFOs. Later he observed a second sighting of two lights, travelling the same path. Both flights went through the talk of the Big Dipper he said.

and the last a red in color and somewhat smaller than the others."

The group, including Col. and Mrs. William Russell, and son, William Jr., and Lt. and Mrs. Russell Self and son, Martin, said they saw a second group at 9 p.m. flying in the same formation as earlier.

A similar phenemena was reported at 8 p.m. by Mr. and Mrs. Jim Fields in the south part of Springdale, who said they saw three small dots of lights at about a 60-degree angle above the western horizon. They said the center light was higher than the other two and the formation moved very rapidly and disappeared into the northeast.

UFO 'Size Of Automobile' Is Reported

By PAT DONAT
(TIMES Staff Writer)

An unidentified flying object (UFO) "the size of a car" was reported at tree-top level eight miles north of Viney Grove last night.

The Bill Estep family said they were seated in their living room around 10 p.m., when a flashing light outside attracted their attention. Mrs. Estep said when they went outside they saw "a long, narrow, silver object with lighted windows and a revolving light on top hovering in the air just above the trees."

She compared the light to that of a police car except that the light was white instead of red. The object made a loud clicking noise, she said, and at intervals gave three short blasts as a siren. "When it left it made sparks similar to a Roman candle," she said.

"It didn't scare me," she said, "because I had been reading about them."

Trooper Tommy Williams of the State Highway Patrol and Robin Strong, of the Prairie Grove Police Department were called to the scene at 9:30 p.m. Both said they had seen "nothing". They were called back at 11 p.m. when the Esteps said the object had returned and was now behind their chicken house. The object disappeared before they arrived. Streng said that 10 to 15 persons at the site told him they had seen the UFO and agreed in their descriptions of it.

"They had seen something," Strong said.

Williams said that upon his return home he noted what he thought was a falling star, but said it seemed too close to the earth to be this phenomena.

"I don't know what it was," he said.

At 11:30 p.m. Mrs. Joe Boggs of Hwy. 16 West was awakened from a sound sleep and looked out of her window to see

A rash of sighting reports were made to Fayetteville City Police.

Twelve observers reported three lights immediately overhead in the Northridge subdivision at 8:15 p.m. They said the lights came from the West, going east, and described them as being globe - shaped, two to three times bigger and brighter than earth satellites they had observed before. The group included Mrs. E. Debes, Norbert

(CONTINUED ON PAGE EIGHT)

Roach, Susan and Cathy Debes and Nancy Roach.

This early sighting was also apparently noted by three law students who said they saw three balls of light coming from the west going east. This sighting was made from the Law Building on the campus.

Another sighting, at the same time was reported by Jim Burnett at the University who said he saw three objects going northwest. He reported to city police he had counted nine lights on these objects which he viewed with binoculars.

In the south part of the city Mr. and Mrs. Jeff Black and Betty Black said they saw three objects moving southwest to northeast at 8:15 p.m.

Mrs. Bill Johnson of Hwy. 16 West reported to police at 8:58 and said "one was going over every 20 minutes."

A spokesman for the Federal Aviation Agency here said this morning [illegible] over the

A third sighting was reported by Mr. and Mrs. J. B. Martens and daughter, Judy. They said they saw a pulsating light which moved vertically at about 10:25 p.m. in the southwest. Martens said he had the impression that it was triangular in shape because three points of light were brighter than the remainder of the object. The object was observed by the Martens for 15 minutes and they said there was no noise and that it changed from red, to blue to white in color.

Eureka Springs police investigated after receiving a report that a "saucer-shaped object was hovering over the west part of the city." City patrolman Joe Hussey identified the object as the planet Mars.

city was normal last night. Traffic however in the skies over Fayetteville was heavy with reports made to the Times this morning of falling stars, jet planes and a low flying B-52 Bomber, observed at an estimated elevation of 700 ft.

Springdale also came in for a rash of reports. Seven persons, including a retired army colonel said they saw three lights, "about the size of a good-sized marble" travelling southwest to northeast very rapidly. They described them as flying in a line with the first two orange

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight -- pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

A flare about a quarter of a mile away.

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

UFOs Move Into Area At Jonesboro

8/4/65

FORT SMITH, Ark. (AP) — Twelve UFO watchers saw meteors, an earth satellite and a beautiful sunrise but no unidentified flying object today.

The group convened at midnight on a mountain near Fort Smith at the urging of Tony Delaney, a radio news man who said he lost his skepticism about flying objects when he sighted some Monday night.

Two photographers were in the group and Delaney hoped to get proof that something was in the sky. UFO reports have been cropping up throughout the Midwest during the last week.

Delaney said Tuesday that he saw brilliant red and green objects moving across the sky Monday night.

He said another effort to photograph the objects will be made Saturday night.

Meanwhile, police at Jonesboro, in Northeast Arkansas, received reports that UFO's had been sighted over Jonesboro about 8 p.m. and again about 11 p.m. Tuesday night.

Nick Dowdy told police he watched five objects through a telescope. The objects were reported in the sky northwest of Jonesboro.

Camera Crews On Lookout For UFOs Over Arkansas

8-3-65

FORT SMITH, Ark. (AP) — Camera crews engaged by a Fort Smith radio station will try tonight to get photographic proof that unidentified flying objects are in the air over Oklahoma and West Arkansas.

"We'll be shooting both color and black and white," said Tony Delaney, news director of station KFSA, who is himself convinced that something unusual is going on aloft.

Delaney said he and two others set up a UFO watch on Wildcat Mountain Monday night and made three separate sightings of strange flying objects.

"I went out there as a skeptic, but I'm not a skeptic any more," Delaney said.

Using binoculars, Delaney said, his party watched a group of four objects for about five minutes, a pair of objects for about 10 minutes and a single object for several minutes.

"We also sighted two aircraft and the Tyros weather satellite," Delaney said. "But these objects weren't aircraft. They weren't meteors, either. Meteors fly in a straight line. These things went right, left and up and down."

Delaney said the objects were brilliant blue and green but changed to brilliant white under acceleration.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address Houston, Tex

Phone [redacted] Age 38 Occupation

b. Shape of Object top half of the moon c. Color bright orange

d. Size (compare to dime, quarter, baseball, basketball, or larger item)

e. Number of Objects 1

f. Formation, if more than one

g. Unusual features of object looked like a space capsule

h. Was there a tail, vapor trail, or exhaust? i. Any Sound

j. What called attention to the observer

k. What angle and elevation was the object on first observance 30°

l. What angle and elevation was the object when disappeared 30°

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object hanging towards the southeast

n. How did the object disappear (instantly, to the north, no direction, etc.)

o. How long was the object visible (5 min, 1 hour, etc.) 1½ to 2 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)

naked eye

q. Time and date of sighting [redacted] 2200, 2 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) due west of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) cloudy & broken

u. Temperatures of day (80°, 90°, etc)

v. OTHER INFORMATION not answered above: Thunderstorms in the southwest quadrant.

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

27

See over for weather

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted]

Phone [redacted] Age 13 Occupation _____

b. Shape of Object Birds c. Color Black & White

d. Size (compare to dime, quarter, baseball, basketball, or larger item) _____ e. Number of Objects Several

f. Formation, if more than one disc shaped and spinning

g. Unusual features of object _____

h. Was there a tail, vapor trail, or exhaust? _____ i. Any Sound Yes

j. What called attention to the observer Beat beat whining

k. What angle and elevation was the object on first observance _____

l. What angle and elevation was the object when disappeared _____

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object _____

n. How did the object disappear (instantly, to the north, no direction, etc.) _____

o. How long was the object visible (5 min, 1 hour, etc.) 1305 to 1330

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) _____

q. Time and date of sighting 4 Aug

r. Light conditions (night, day, dusk) _____

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) _____

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) _____

u. Temperatures of day (80°, 90°, etc) _____

v. OTHER INFORMATION not answered above: Darting in and out of clouds

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a.Name [redacted] Address [redacted]

Phone _____ Age ____ Occupation _____

b. Shape of Object _____ c. Color Different colors

d. Size (compare to dime, quarter, baseball, basketball, or larger item)

_____ e. Number of Objects 4

f. Formation, if more than one 2 SW a mile apart, 1 west, 1 SW farther to right

g. Unusual features of object glowing

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound _____

j. What called attention to the observer _____

k. What angle and elevation was the object on first observance _____

_____

l. What angle and elevation was the object when disappeared _____

_____

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object _____

_____

n. How did the object disappear (instantly, to the north, no direction, etc.) ____

_____

o. How long was the object visible (5 min, 1 hour, etc.) _____

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) ____

_____

q. Time and date of sighting _____

r. Light conditions (night, day, dusk) _____

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) west & southwest of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) _____

u. Temperatures of day (80°, 90°, etc) _____

v. OTHER INFORMATION not answered above: _____

_____

_____

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a.Name Mrs [redacted] Address Houston, Tex

Phone [redacted] Age ____ Occupation ____

b. Shape of Object ____ c. Color Red

d. Size (compare to dime, quarter, baseball, basketball, or larger item) ____ e. Number of Objects 1

f. Formation, if more than one ____

g. Unusual features of object glowing - very high frequency squeal

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound yes

j. What called attention to the observer barking dogs

k. What angle and elevation was the object on first observance overhead

l. What angle and elevation was the object when disappeared ____

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object ____

n. How did the object disappear (instantly, to the north, no direction, etc.) ____

o. How long was the object visible (5 min, 1 hour, etc.) ____

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) ____

q. Time and date of sighting 0022, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) ____

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) ____

u. Temperatures of day (80°, 90°, etc) ____

v. OTHER INFORMATION not answered above: ____

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

30

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO [redacted]

3.a. Name [redacted] Address Houston, Tex

Phone [redacted] Age ____ Occupation ____

b. Shape of Object round c. Color green, red, blue & white

d. Size (compare to dime, quarter, baseball, basketball, or larger item) ____ e. Number of Objects 4

f. Formation, if more than one circular

g. Unusual features of object striped with light

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound ____

j. What called attention to the observer ____

k. What angle and elevation was ~~the object~~ on first observance ____

l. What angle and elevation was the object when disappeared ____

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object ____

n. How did the object disappear (instantly, to the north, no direction, etc.) ____

o. How long was the object visible (5 min, 1 hour, etc.) ____

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) binoculars

q. Time and date of sighting ~~XX~~ 2327, 3 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) ____

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) ____

u. Temperatures of day (80°, 90°, etc) ____

v. OTHER INFORMATION not answered above: Flashing one per second green, red, blue, & white

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

~~XX~~ 31

14. Did the object disappear while you were watching it? If so, how?

It was traveling as swiftly as a meteor and burnt out like a meteor. I've seen meteors before

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound none

b. Color green

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

~~about the same~~ a little less than all.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a.Name [redacted] Address [redacted] Pasadena, Tex

Phone [redacted] Age ____ Occupation ____

b. Shape of Object Round c. Color white

d. Size (compare to dime, quarter, baseball, basketball, or larger item) ____ e. Number of Objects 1

f. Formation, if more than one ____

g. Unusual features of object ____

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound ____

j. What called attention to the observer ____

k. What angle and elevation was the object on first observance ____

____

l. What angle and elevation was the object when disappeared ____

to the east

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object east to west and then reversed course and went west to east.

n. How did the object disappear (instantly, to the north, no direction, etc.) ____

to the east

o. How long was the object visible (5 min, 1 hour, etc.) 2 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) ____

throughfa telescope

q. Time and date of sighting 2110, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) ____

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) ____

u. Temperatures of day (80°, 90°, etc) ____

v. OTHER INFORMATION not answered above: high altitude & high speed.

____

____

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted]

Phone [redacted] Age 25 Occupation House wife

b. Shape of Object Round c. Color White - Red

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
Dime e. Number of Objects (1)

f. Formation, if more than one N/A

g. Unusual features of object

h. Was there a tail, vapor trail, or exhaust? NO i. Any Sound NO

j. What called attention to the observer [redacted]

k. What angle and elevation was the object on first observance
45°, UNK.

l. What angle and elevation was the object when disappeared
45° over Houses

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object East to West

n. How did the object disappear (instantly, to the north, no direction, etc.)
Faded out

o. How long was the object visible (5 min, 1 hour, etc.) 45 minutes

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
NAKED EYE - binoculars

q. Time and date of sighting 2000 hrs, 7 Aug 65

r. Light conditions (night, day, ~~dusk~~) night,

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) West of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) hazy Clear

u. Temperatures of day (80°, 90°, etc)

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) ~~No~~

IF you answered YES, then what speed would you estimate? About the average speed of a meteorite.

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? ¼ mile

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
(c. In open countryside?)
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, than complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	(No)	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A bright green flare about ¼ mile away.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted]

Phone [redacted] Age 35 Occupation Manager Gen. Elect. Credit

b. Shape of Object Round c. Color Orange or Reddish

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
Automobile e. Number of Objects (1)

f. Formation, if more than one None

g. Unusual features of object Glow From bottom

h. Was there a tail, vapor trail, or exhaust? NO i. Any Sound None

j. What called attention to the observer your son

k. What angle and elevation was the object on first observance
Horizonal 5000 to 10000

l. What angle and elevation was the object when disappeared
Horizonal Disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object
North East to South

n. How did the object disappear (instantly, to the north, no direction, etc.)

o. How long was the object visible (5 min, 1 hour, etc.) 2 minutes

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
naked eye

q. Time and date of sighting ~~2015 > mar 65~~

r. Light conditions (night, day, dusk) ~~night~~

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) ~~over Houston Texas northeast~~

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) ~~clear~~

u. Temperatures of day (80°, 90°, etc)

Dear "Watchem"

Watchem what you say.

Reference the attached article.

~~1.~~ Donald E. Keyhoe, ~~Maj (USMC Retired) (1922 for medical reasons)~~
a) was never associated with Air Force Project Bluebook.
b) The air force releases the information onnALL sightings, b th explained and unexplained (example Socorro, N.M attachemnt and fact sheet)
c) The Air Force does not ~~caution~~ ANYONE regarding ~~MXX~~ retention of UFO information on a sighting which he has observed. All persons, including military
d) Keyhoe retired in 1922 from the USMC for medical reasons, and did not "resign" his commission.

Meteors Due To Shower This Week

The Earth's best known meteor shower will occur here Tuesday through Saturday.

The Perseid shower will reach its maximum display Thursday night, when scientists predict up to 50 meteors an hour.

Dr. Thomas Pulley, director of the Houston Museum of Natural Science, said the shower this year "will not be very easy to see because of a full moon." They will be seen as faint flashes if seen at all.

He doubted the display—which is caused by passage of the Earth through clouds of space dust—would add to the recent rash of flying saucer stories.

"All it takes for flying saucers is a newspaper story," he said.

Texas

Meteorologist Claims UFOs Just Reflections

DALLAS, Tex.(AP)-Dale Milford, radio and television meteorologist, said Wednesday he believes he has found the source of at least a large number of the unidentified flying objects--UFO's--reported in recent days.

Milford, meteorologist for stations WFAA, said he found confirmation of his theory today after an airplane flight in search of the phenomenon.

His theory is that the UFO's are the reflection of light from a warmer layer of air between two cooler layers, called an inversion. The inversions can be seen by weather bureau radar.

He and Kent Biffle of the Dallas Morning News flew at 9,500 feet early Wednesday morning over a Dallas suburb, Richardson, to which they were guided by ground reports of flying objects and by the U.S. Weather Bureau.

Milford reported that he saw what could be called a "flying object." He said it was the reflection of a star.

The meteorologist said the object moved back and forth and changed direction horizontally.

Milford said at one period the object, or reflection, remained stationary for two minutes.

HOUSTON CHRONICLE

DIAL WATCHEM

IT'S SAUCER TIME AGAIN: "I understand there is a National Investigating Committee on Aerial Phenomena (NICAP). How do I go about joining it? Does it investigate unidentified flying objects?"—Sam Butler Jr.

WATCHEM: NICAP is headed by Maj. Donald E. Keyhoe. Keyhoe originally was a member of the Air Forces 'Project Bluebook' which investigated reports of UFOs. He became disgusted and said: "The Air Force has a policy of only making statements about sightings that could be explained. The Air Force has an official regulation stating unexplained sightings are not to be discussed." He resigned his commission and became part of NICAP. For more information, the address is NICAP, 1536 Connecticut Ave., NE., Washington, D.C.

4 August 1965

Many Texans Report Strange Objects in Sky

Unidentified flying objects were reported Tuesday night South America.

Hundreds of reports poured in to the Air Force, the Weather Bureau, newspapers and radio stations. Many were from points in Texas.

At Lufkin a newsman said he saw several of the objects that appeared to be moving southeastward, and at the nearby Angelina County Airport an official of the Federal Aviation Agency said he watched one until dawn. He concluded it was a star.

Report Flashing

Officials at Kilgore, Nacogdoches and other East Texas points said they received many reports from residents, who said the UFOs flashed red and green lights as they moved slowly across the sky.

In the Valley, hundreds of miles from the East Texas sightings, Raymond Rodriguez reported seeing "four burning objects" that fell to the ground. He said they resembled hot coals and burned his fountain pen when touched. He saved some of the ashes.

From Sherman, a radio newsman reported watching a bright flare in the sky for more than an hour.

He took pictures, which showed an oval flare of light giving off sparks.

In Junction City, Kan., another newsman took a picture of a skydiver, and discovered later the film also showed eight black dots in the sky. They resembled nothing but eight black dots.

AP Wirephoto
Mrs. Elmo Dillon of Dallas shows sketch of unidentified flying object she observed through an 85-power telescope early Tuesday.

"Had No Shape"

More colorful UFOs were reported by Gary Harvey, a Cheyenne, Wyo., newspaper editor. He said one hovered near the edge of town, but moved away when he drove toward it. Another appeared in the opposite direction, but also moved away as he approached. He said both flashed red, white and blue lights but "had no shape."

Many people gathered to watch the objects and saw them move slowly to the southwest, Harvey said.

At Sioux City, Iowa, a high school teacher reported he drove into the country to look for UFOs, and found one. "Anyone who claimed it was a star would be out of his mind," he said.

In Northern Minnesota, police reported seven or eight objects that "bobbed up and down, hovered and darted about." One report said the objects were spotted green on the side, with a flashing red light on top.

The Oklahoma City weather observer who repored flying objects Sunday night, insisted today they were "no mirage." He described the UFO as an oval with flat top and bottom "with two rings around it."

Another Oklahoma City weather observer saw one, too. He said it was an airplane.

Joined by Another

In northern Arkansas a man reported an object that "moved back and forth" until it was joined by another, dark red in color. They flew off together, he said.

There were several reports of red-and-white flashing objects near Denver. Near Albuquerque, N.M., one sped past at low altitude. It was green.

Near Dallas, two men watched one through a telescope. was red.

The Air Force continued today to say the UFOs probably were only stars or planets, plus imagination.

UNIDENTIFIED FLYING OBJECTS

HOUSTON POST
5 August 1965

Houston Post 5 Aug 65

150 Call Post in 2 Hours

'You Saw UFO? Fancy That'

Those UFOs are blitzing the Houston area.

About 150 persons called the Houston Post between 8 and 10 PM Wednesday to report sightings. Many others called police.

They came in various shapes —like coins, arrowheads, balls and one that looked like a four-leaf clover — and they went in more directions than even the Ancient Mariner could have believed.

ALTHOUGH most of the callers were children, some speaking to an accompaniment of falsetto giggles, adults also reported a number of saucers.

One dignified-sounding lady who lives near Rice University said she spotted a gold-colored four-leaf clover speeding "above the treetops." She wouldn't give her name.

One small boy reported a bright object falling—like the star over the Domed Stadium.

ANOTHER reported an object with one red and one white light flying over his elementary school.

One man said a group of three red objects zipped from the southwest to the northeast horizon in 40 seconds. One of them circled to the north and came back.

Red, orange and white were the most popular colors for the unidentified craft. Although most rushed across the sky in straight lines, some wavered or wiggled, one fishtailed, and another flew in a square.

NONE OF THE callers sounded drunk.

Radar operators at the Houston weather bureau and the Federal Aviation Agency at the Houston International Airport said they spotted nothing on their screens they couldn't explain.

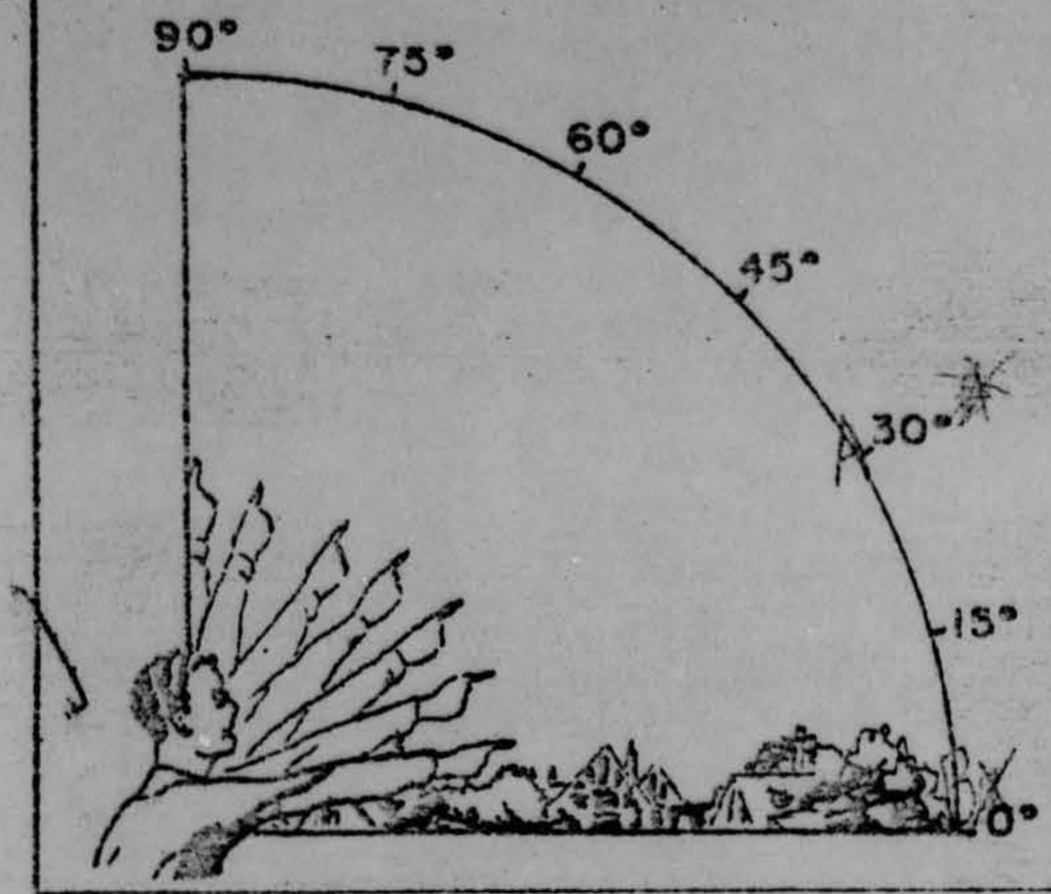
Ellington Air Force Base radarmen were unavailable for comment.

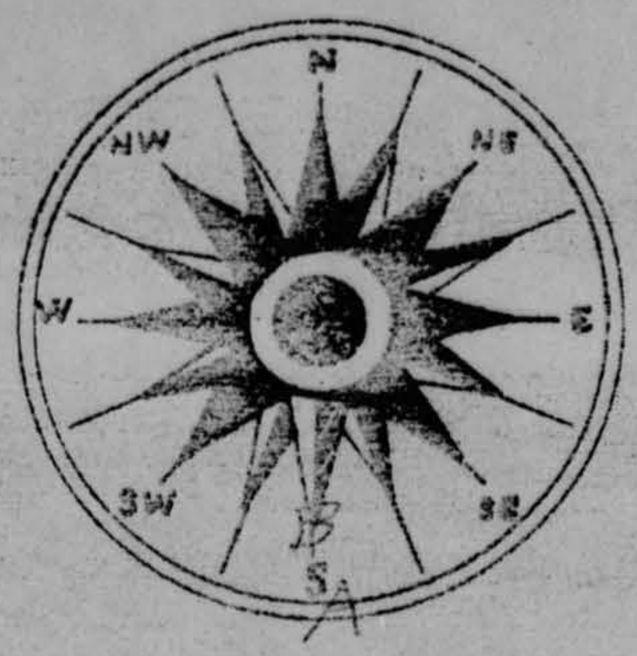
A 13-year-old reported a bright silver-and-orange object "shot up into the sky" from his backyard. "It dug up the grass," he added.

ANOTHER MAN, from the Jacinto City area, took a defensive stand:

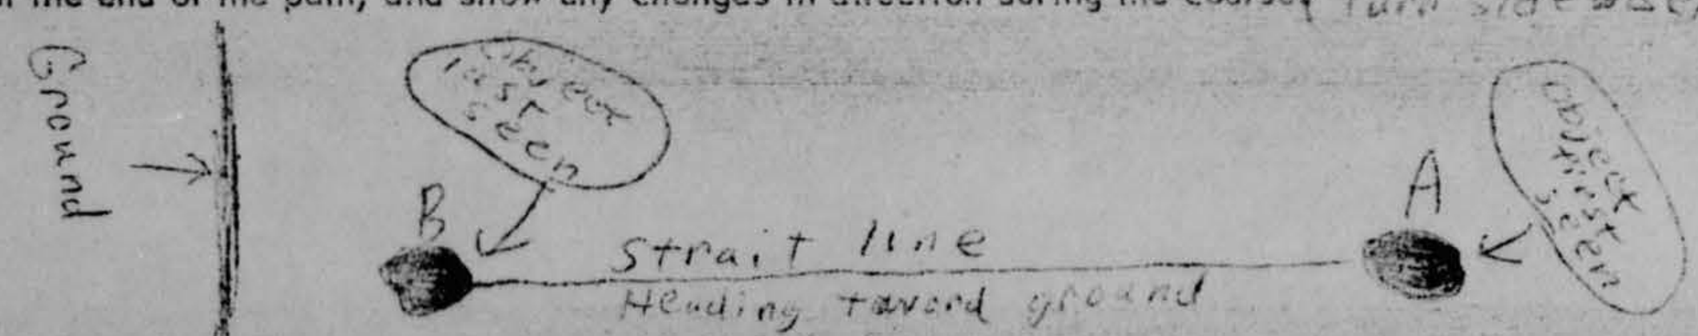
"I been reading about these UFOs and I'm not calling just because of that," he said. "I damn well saw something tonight, and so did my wife, my daughter and my son."

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course. (Turn sidewise)



29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

UNIDENTIFIED FLYING OBJECTS

Houston Post
4 August 1965

Houston Post 4 Aug 65

A Squadron in Brazil!

Saucers Are Flying All Around--Even Landing Reported

People were looking up in Houston Tuesday night, and like hundreds of other sky-conscious observers on two continents, they were seeing things.

Reports of unidentified flying objects came from Southwest, Southeast and Northeast Houston, from towns throughout Texas, Oklahoma, Montana, Minnesota and even from Brazil and Chile.

A squadron of 18 flying saucers was seen by five persons in northern Brazil's Parana State, according to press reports from Curitiba, Brazil.

From Santiago, Chile, came a report of a flying saucer which landed, but took off when a group of people moved toward it. There was also a report of one possible landing near Justin, Texas.

SEVERAL HOUSTON residents who telephoned the Houston Post reported seeing moving objects about 8:45 PM Tuesday. Some said what they saw was orange-colored, some said red, some said green and blue.

Said H. P. Alford, 7102 McHenry: "At 15 minutes to 9 my

See FLYING on Page 2

Houston Post 4 Aug 65

Flying Saucers

Continued From Page 1

wife and I and two children were sitting in the patio and this thing was going southwest, spinning, at a high rate of speed. It was kind of dull red . . . round like a plate."

Bobby Field, 13, of 1716 Gray, and his aunt, Mrs Janie Field, reported seeing an orange object move across the sky toward the northwest at about the same time.

THE HOUSTON Police Department received a report of a similar sighting at 8:40 PM, from Larry Jackson of 14330 Renault.

Other reports of sightings came to the Post from Frank Leocadi, 11, who lives at 302 Peden, and from Mrs Dorothy Brown and her son, Ronnie, who live in a rural community near Cleveland.

"I saw two of them," said Ronnie, 15. "The second one I saw seemed to have a hook coming from the bottom."

TUESDAY WAS the third night in a row of profuse reports of UFOs throughout Texas and the Southwest.

Two Tarrant County Deputy Sheriffs said they saw a brightly lighted object touch the ground near Justin, 11 miles from Denton. Peace officers who searched the area said nothing extraordinary was found.

A policeman at Lewisville, in South Denton County, said he watched a multi-colored object pass within 100 feet of the Lewisville dam.

Several Austin residents saw mysterious objects in the sky. An Austin meteorologist, Melvin McLaughlin, said an unidentified blip appeared on his radar screen early Tuesday.

OTHER REPORTS came from Norman, Okla; Minneapolis ND Saint Paul, Minn, and Billings, Montana.

The sighting of the "squadron" in Brazil was first made by two little girls who said they saw four objects coming over the horizon in broad daylight at Astorga, about 250 miles west of Sao Paulo.

The girls called three neighbors, who said they saw the four objects followed by 14 other saucers flying in formation.

A SPOKESMAN for Tinker Air Force Base in Oklahoma City said an official dispatch from Washington gave two possible explanations for the reported phenomena:

1) A meteor shower which began July 26 and ends Friday.

2) Weather conditions have been favorable for "scintillation"—a natural phenomenon which causes stars to appear to twinkle or distant objects to appear to dance when seen through layers of the atmosphere.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted] Houston

Phone [redacted] Age 47 Occupation Housewife

b. Shape of Object round c. Color orange & red

d. Size (compare to dime, quarter, baseball, basketball, or larger item) dime e. Number of Objects 1

f. Formation, if more than one n/a

g. Unusual features of object none

h. Was there a tail, vapor trail, or exhaust? no i. Any Sound no

j. What called attention to the observer looking

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object Going west

n. How did the object disappear (instantly, to the north, no direction, etc.)

o. How long was the object visible (5 min, 1 hour, etc.) 1 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) naked eye

q. Time and date of sighting 2002, 4 Aug

r. Light conditions (night, day, dusk) dusk

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.)

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc)

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted] Houston, Tex

Phone [redacted] Age 66 Occupation Retired newspaperman

b. Shape of Object round c. Color bright

d. Size (compare to dime, quarter, baseball, basketball, or larger item)

e. Number of Objects 1

f. Formation, if more than one

g. Unusual features of object flashing

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound

j. What called attention to the observer

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object heading southwest

n. How did the object disappear (instantly, to the north, no direction, etc.)

o. How long was the object visible (5 min, 1 hour, etc.) 7 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)

naked eye

q. Time and date of sighting 1955, 4 Aug

r. Light conditions (night, day, dusk) dark

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) southwest of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 79°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address Houston, Tex

Phone [redacted] Age 18 Occupation student

b. Shape of Object round c. Color bright

d. Size (compare to dime, quarter, baseball, basketball, or larger item)

e. Number of Objects 1

f. Formation, if more than one

g. Unusual features of object

h. Was there a tail, vapor trail, or exhaust? i. Any Sound

j. What called attention to the observer looking up

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object stationary

n. How did the object disappear (instantly, to the north, no direction, etc.)

still there

o. How long ~~was the~~ object visible (5 min, 1 hour, etc.)

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)

q. Time and date of sighting 2030, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) directly overhead

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 79°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted] Houston, Tex

Phone [redacted] Age 25 Occupation secretary

b. Shape of Object small c. Color light

d. Size (compare to dime, quarter, baseball, basketball, or larger item)

e. Number of Objects

f. Formation, if more than one

g. Unusual features of object blue, flashing red light

h. Was there a tail, vapor trail, or exhaust? i. Any Sound

j. What called attention to the observer

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object east to west

n. How did the object disappear (instantly, to the north, no direction, etc.) behind house

o. How long was the object visible (5 min, 1 hour, etc.) 2, 3 minutes

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) naked eye

q. Time and date of sighting 2050, 4 Aug

r. Light conditions (night, day, dusk) very dark

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) southwest of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.)

u. Temperatures of day (80°, 90°, etc)

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO [redacted]

3.a. Name [redacted] Address [redacted]

Phon[redacted] Age 11 Occupation student

b. Shape of Object no shape c. Color white

d. Size (compare to dime, quarter, baseball, basketball, or larger item) sun rising e. Number of Objects

f. Formation, if more than one

g. Unusual features of object

h. Was there a tail, vapor trail, or exhaust? i. Any Sound

j. What called attention to the observer been reading the papers

k. What angle and elevation was the object on first observance 30° up

l. What angle and elevation was the object when disappeared 45° up and disappears

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object SW to NE

n. How did the object disappear (instantly, to the north, no direction, etc.)

o. How long was the object visible (5 min, 1 hour, etc.) 30 seconds

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) binoculars

q. Time and date of sighting 2040, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) Edge of South Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) Little hazy

u. Temperatures of day (80°, 90°, etc)

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

8

FTD (TDEW)
Wright-Patterson AFB, Ohio 45433
4 Nov 65

[redacted]
Houston, Texas

Dear Mr [redacted],

The UFO report submitted to Ellington Air Force Base regarding an observation of 4 Aug is under review at Project Blue Book, Wright-Patterson Air Force Base. On the data presented, we are unable to determine the nature of the object observed. Would you please complete the attached Form 164 and return it to us at your convenience in the envelope provided.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Project Blue Book

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No I have not seen this or a similar object before except for maybe a flare or skyrocket. Don't know exact date, usually around 4 of July or on T.V. etc.

31. Was anyone else with you at the time you saw the object? (Circle One) (Yes) No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes (No)

31.2 Please list their names and addresses:

[redacted] St. Walcott, Iowa 52773
[redacted] Walcott, Iowa 52773
[redacted] Walcott, Iowa 52773

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS 3 [redacted] (Street) Walcott (City) (Zone) Iowa (State)

Zip Code 52773

TELEPHONE NUMBER [redacted] PRESENT AGE 13 SEX MALE

AGE WHEN SAW OBJECT 10 or 11

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I am widely interested in phenomena such as U.F.O's.

33. When and to whom did you report that you had seen the object? My Brother [redacted] and 5 Cousins [redacted] My mother along with Kids at my school and a U.F.O. Magazine published by Dell, and [illegible]

? (Day) August (Month) 1964 or 5 (Year)

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address Houston, Tex

Phone [redacted] Age 28 Occupation Dispatcher DPS

b. Shape of Object white light c. Color

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
quarter+ e. Number of Objects

f. Formation, if more than one

g. Unusual features of object

h. Was there a tail, vapor trail, or exhaust? i. Any Sound

j. What called attention to the observer

k. What angle and elevation was the object on first observance
very high - far west

l. What angle and elevation was the object when disappeared
very high - directly overhead

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object west to east - no maneuvers

n. How did the object disappear (instantly, to the north, no direction, etc.)
faded out quickly

o. How long was the object visible (5 min, 1 hour, etc.) 15 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
binoculars

q. Time and date of sighting 2125, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.)

t. Weather (clear day, hazy, cloudy, broken clouds, etc.)

u. Temperatures of day (80°, 90°, etc)

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted]t Address [redacted] Houston, Tex

Phone [redacted] Age 54 Occupation list clerk

b. Shape of Object round c. Color bright

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
basketball e. Number of Objects 2

f. Formation, if more than one side by side

g. Unusual features of object zig zag motion

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound ____

j. What called attention to the observer was looking for objects

k. What angle and elevation was the object on first observance
very high

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object
west to east

n. How did the object disappear (instantly, to the north, no direction, etc.)
slowly

o. How long was the object visible (5 min, 1 hour, etc.) 5 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
naked eye

q. Time and date of sighting 2120, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.)

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 75°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO [redacted]dy

3.a. Name Mrs [redacted] Address Houston, Tex

Phone _____ Age 22 Occupation Housewife

b. Shape of Object star c. Color red

d. Size (compare to dime, quarter, baseball, basketball, or larger item) _____ e. Number of Objects 3

f. Formation, if more than one _____

g. Unusual features of object just a very real bright red

h. Was there a tail, vapor trail, or exhaust? _____ i. Any Sound _____

j. What called attention to the observer neighbors called attention to it.

k. What angle and elevation was the object on first observance _____

l. What angle and elevation was the object when disappeared _____

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object going north

n. How did the object disappear (instantly, to the north, no direction, etc.) faded away

o. How long was the object visible (5 min, 1 hour, etc.) 5 to 6 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) naked eye

q. Time and date of sighting 2130, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) south of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) very clear

u. Temperatures of day (80°, 90°, etc) 85°

v. OTHER INFORMATION not answered above: _____

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

11

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO. [redacted]

3.a. Name [redacted] Address Houston, Tex

Phone [redacted] Age 18 Occupation student

b. Shape of Object round c. Color green & red

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
penny e. Number of Objects 1 or 2

f. Formation, if more than one

g. Unusual features of object fixed position

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound

j. What called attention to the observer

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object northwesterly

n. How did the object disappear (instantly, to the north, no direction, etc.)
instantly

o. How long was the object visible (5 min, 1 hour, etc.) 10 to 12 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
naked eye

q. Time and date of sighting 2155, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) XXXXX

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 75°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

12

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted] Houston, Tex

Phone [redacted] Age 20 Occupation housewife

b. Shape of Object round c. Color white

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
twice the size of a star e. Number of Objects 1

f. Formation, if more than one

g. Unusual features of object moving very fast - high rate of speed

h. Was there a tail, vapor trail, or exhaust? i. Any Sound

j. What called attention to the observer

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object west to east

n. How did the object disappear (instantly, to the north, no direction, etc.)

o. How long was the object visible (5 min, 1 hour, etc.) 1 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
naked eye

q. Time and date of sighting 2130, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.)

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 75°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

1J

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a.Name [redacted] Address [redacted] Tex

Phone [redacted] Age 27 Occupation Housewife

b. Shape of Object unknown c. Color red

d. Size (compare to dime, quarter, baseball, basketball, or larger item)

e. Number of Objects 1

f. Formation, if more than one

g. Unusual features of object red blinking light

h. Was there a tail, vapor trail, or exhaust? i. Any Sound

j. What called attention to the observer

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

did not disappear - still in sight

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object stationery

n. How did the object disappear (instantly, to the north, no direction, etc.)

no

o. How long was the object visible (5 min, 1 hour, etc.) 5 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)

naked eye

q. Time and date of sighting 0030, 5 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) above Pasadena

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 80°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

14

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to RDO [redacted]

3.a.Name [redacted] Address Houston, Tex

Phone [redacted] Age 33 Occupation housewife

b. Shape of Object round c. Color red, green, silver

d. Size (compare to dime, quarter, baseball, basketball, or larger item) dot e. Number of Objects 2

f. Formation, if more than one moving towards each other

g. Unusual features of object silver objects erupting

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound ____

j. What called attention to the observer noticed slight movement

k. What angle and elevation was the object on first observance about 45°

l. What angle and elevation was the object when disappeared still in sight

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object 1 north & 1 south

n. How did the object disappear (instantly, to the north, no direction, etc.) lightly faded out

o. How long was the object visible (5 min, 1 hour, etc.) 1 hr & ½

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) naked eye

q. Time and date of sighting 2330, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) north of Houston & south of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 80°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

15

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a.Name [redacted] Address Ellington AFB, Tex

Phone [redacted] Age 21 Occupation Radar Operator

b. Shape of Object star c. Color white

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
pin head e. Number of Objects 1

f. Formation, if more than one

g. Unusual features of object high & travelling very fast

h. Was there a tail, vapor trail, or exhaust? i. Any Sound

j. What called attention to the observer watching sky

k. What angle and elevation was the object on first observance 70° to west

l. What angle and elevation was the object when disappeared 15° to NW

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object west toward NW

n. How did the object disappear (instantly, to the north, no direction, etc.)
to northwest

o. How long was the object visible (5 min, 1 hour, etc.) 10 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
naked eye

q. Time and date of sighting 0035, 5 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) west over Ellington AFB

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 80°

v. OTHER INFORMATION not answered above: Sighted by 3 more persons.

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

16

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address Houston, Tex

Phone [redacted] Age 20 Occupation student

b. Shape of Object thin line c. Color orange

d. Size (compare to dime, quarter, baseball, basketball, or larger item)

e. Number of Objects 1

f. Formation, if more than one

g. Unusual features of object flash of light and a long trail

h. Was there a tail, vapor trail, or exhaust? ~~yes~~ i. Any Sound no

j. What called attention to the observer saw bright light

k. What angle and elevation was the object on first observance horizontal

l. What angle and elevation was the object when disappeared horizontal

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object southeast

n. How did the object disappear (instantly, to the north, no direction, etc.) instantly

o. How long was the object visible (5 min, 1 hour, etc.) 30 to 45 seconds

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) naked eye

q. Time and date of sighting 0030, 5 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) south of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 80°

INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted]ton, Tex

Phone [redacted] Age 24 Occupation Housewife

b. Shape of Object round c. Color white

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
baseball e. Number of Objects 3

f. Formation, if more than one one stationary, 2 moving towards it

g. Unusual features of object none

h. Was there a tail, vapor trail, or exhaust? no i. Any Sound no

j. What called attention to the observer flash of light

k. What angle and elevation was the object on first observance straight up

l. What angle and elevation was the object when disappeared on the horizon

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object east to west

n. How did the object disappear (instantly, to the north, no direction, etc.)
over the horizon

o. How long was the object visible (5 min, 1 hour, etc.) a few seconds

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
naked eye

q. Time and date of sighting 0025, 5 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) north of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 80°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

18

34. Date you completed this questionnaire: 2 (Day) December (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

My brother had seen a similar object a couple
few nights before and he said that it
seemed as if it nearly hit him. He was
running at the time and the object he said
was the color green & (the object) was
traveling the speed of the average meteor.

I understand to my knowledge that meteors
meteors do not burn green, therefore,
it seems the object couldnt have been a
meteor.

It seemed as if the object may
have fallen or landed in a field
¼ mile away.

I know that Green meteors are very rare,
but how could my brother and I both see a
green meteor within a few nights of each other and
at almost the exact location

I am not sure if the object was round because
it was traveling so fast.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted] Houston, Tex

Phone [redacted] Age ____ Occupation Cook

b. Shape of Object square c. Color red, white, blue

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
5 to 15 ft square e. Number of Objects 1

f. Formation, if more than one

g. Unusual features of object

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound

j. What called attention to the observer radio program

k. What angle and elevation was the object on first observance 40°

l. What angle and elevation was the object when disappeared 40°

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object east

n. How did the object disappear (instantly, to the north, no direction, etc.)
flew out of sight

o. How long was the object visible (5 min, 1 hour, etc.) 5 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
naked eye

q. Time and date of sighting 0200, 5 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) north of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 80°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be mad to confirm nor deny the observance of the object.

19

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address Pasadena, Tex

Phone [redacted] Age ____ Occupation ____

b. Shape of Object ____ c. Color white

d. Size (compare to dime, quarter, baseball, basketball, or larger item) ____ e. Number of Objects 1

f. Formation, if more than one ____

g. Unusual features of object seen for last 10 days from 1930 to 2030 hours.

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound ____

j. What called attention to the observer bright white light

k. What angle and elevation was the object on first observance 25° angle

l. What angle and elevation was the object when disappeared ____

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object none

n. How did the object disappear (instantly, to the north, no direction, etc.) faded out

o. How long was the object visible (5 min, 1 hour, etc.) 1 hour the past 10 days.

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) naked eye

q. Time and date of sighting 10 to 20 July 1965, 1930 to 2030 hours.

r. Light conditions (night, day, dusk) dark

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) north of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) ____

u. Temperatures of day (80°, 90°, etc) ____

v. OTHER INFORMATION not answered above: Position changed to west of Houston at a 5° up angle. Called into AC&W Sq and they were not painting anything on radar.

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO. [redacted]

3.a. Name [redacted] Address Houston, Tex

Phone [redacted] Age 15 Occupation

b. Shape of Object Round c. Color red

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
k flashlight e. Number of Objects 2

f. Formation, if more than one

g. Unusual features of object

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound

j. What called attention to the observer just looked up into sky.

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object east to west

n. How did the object disappear (instantly, to the north, no direction, etc.)
no idea

o. How long was the object visible (5 min, 1 hour, etc.)

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)
naked eye

q. Time and date of sighting 2015, 19 Jul

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.)

t. Weather (clear day, hazy, cloudy, broken clouds, etc.)

u. Temperatures of day (80°, 90°, etc)

v. OTHER INFORMATION not answered above: Observed by Jessie Nichols, 21, same address

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

21

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted]n Houston, Tex

Phone [redacted] Age 25 Occupation Salesman at Foley's

b. Shape of Object star c. Color white

d. Size (compare to dime, quarter, baseball, basketball, or larger item) pinpoint e. Number of Objects 4

f. Formation, if more than one grouped together, then in pairs, then in line

g. Unusual features of object brightened and dimmed quickly

h. Was there a tail, vapor trail, or exhaust? no i. Any Sound no

j. What called attention to the observer just looking at the sky

k. What angle and elevation was the object on first observance not sure

l. What angle and elevation was the object when disappeared just disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object east to west

n. How did the object disappear (instantly, to the north, no direction, etc.) instantly

o. How long was the object visible (5 min, 1 hour, etc.) 5 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) naked eye

q. Time and date of sighting 2400, 3 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) east of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) 77°

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

22

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address [redacted] Houston, Tex

Phone [redacted] Age 12 Occupation _____

b. Shape of Object round c. Color silver gray

d. Size (compare to dime, quarter, baseball, basketball, or larger item) skillet e. Number of Objects 1

f. Formation, if more than one _____

g. Unusual features of object round with holes in the side

h. Was there a tail, vapor trail, or exhaust? _____ i. Any Sound Slight hum

j. What called attention to the observer heard the hum and looked up

k. What angle and elevation was the object on first observance _____

l. What angle and elevation was the object when disappeared _____

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object northwest

n. How did the object disappear (instantly, to the north, no direction, etc.) into the clouds

o. How long was the object visible (5 min, 1 hour, etc.) 3 to 4 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) binoculars

q. Time and date of sighting 1025, 4 Aug

r. Light conditions (night, day, dusk) day

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) northeast of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) cloudy

u. Temperatures of day (80°, 90°, etc) _____

v. OTHER INFORMATION not answered above: going zig zag

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

23

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO [redacted] Pasadena, Texas

3.a. Name Daughter of [redacted] Address [redacted]

Phone [redacted] Age 8 Occupation [redacted]

b. Shape of Object round c. Color white

d. Size (compare to dime, quarter, baseball, basketball, or larger item) little bigger than a baseball e. Number of Objects 2

f. Formation, if more than one side by side

g. Unusual features of object window on side

h. Was there a tail, vapor trail, or exhaust? [redacted] i. Any Sound High frequency

j. What called attention to the observer Barking dogs

k. What angle and elevation was the object on first observance

l. What angle and elevation was the object when disappeared

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object to the west

n. How did the object disappear (instantly, to the north, no direction, etc.)

o. How long was the object visible (5 min, 1 hour, etc.)

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.)

q. Time and date of sighting 0945, 5 Aug

r. Light conditions (night, day, dusk)

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.)

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) cloudy

u. Temperatures of day (80°, 90°, etc)

v. OTHER INFORMATION not answered above:

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

24

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name Mrs. [redacted] Address [redacted] Houston, Tex

Phone [redacted] Age adult Occupation _____

b. Shape of Object round c. Color whitish

d. Size (compare to dime, quarter, baseball, basketball, or larger item) dime e. Number of Objects 1

f. Formation, if more than one _____

g. Unusual features of object _____

h. Was there a tail, vapor trail, or exhaust? fuzzyi. Any Sound _____

j. What called attention to the observer Star gazing for Venus

k. What angle and elevation was the object on first observance 45°

l. What angle and elevation was the object when disappeared over the horizon

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object west

n. How did the object disappear (instantly, to the north, no direction, etc.) into the west

o. How long was the object visible (5 min, 1 hour, etc.) 2 min

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) naked eye

q. Time and date of sighting 2015, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) south

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) _____

v. OTHER INFORMATION not answered above: _____

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

25

UNIDENTIFIED FLYING OBJECTS (UFO)
INFORMATION SHEET

1. Answers to the following questions will be obtained from persons calling in regard to the observance of an unidentified flying object (UFO). If person refuses to give answers to 3a, do not complete report.

2. Complete Information Sheet in duplicate and forward to BDO.

3.a. Name [redacted] Address Houston 16, Tex

Phone _____ Age 16 Occupation _____

b. Shape of Object domed c. Color shiny

d. Size (compare to dime, quarter, baseball, basketball, or larger item)
basketball e. Number of Objects 1

f. Formation, if more than one _____

g. Unusual features of object going fast

h. Was there a tail, vapor trail, or exhaust? ____ i. Any Sound _____

j. What called attention to the observer flash of light

k. What angle and elevation was the object on first observance _____

l. What angle and elevation was the object when disappeared _____

m. What was the flight path of object (to north or south, to east or west) and were there any maneuvers of the object to the southeast

n. How did the object disappear (instantly, to the north, no direction, etc.) ____

o. How long was the object visible (5 min, 1 hour, etc.) 30 sec.

p. How was the object observed (naked eye, radar, telescope, binoculars, etc.) ____
naked eye

q. Time and date of sighting 2400, 4 Aug

r. Light conditions (night, day, dusk) night

s. Geographical position of object (North of Houston, South of Pasadena, directly overhead, etc.) north of Houston

t. Weather (clear day, hazy, cloudy, broken clouds, etc.) clear

u. Temperatures of day (80°, 90°, etc) _____

v. OTHER INFORMATION not answered above: _____

5. Thank caller for information, but do not promise that a return call will be made to confirm nor deny the observance of the object.

NCIO Accepted 67

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

? (Day) August (Month) 1964 or 65 (Year)

2. Time of day: 12 (Hour) _____ (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
(b.) Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): (a. Daylight Saving)
b. Standard

4. Where were you when you saw the object?

[redacted] (Nearest Postal Address) Walcott (City or Town) Iowa (State or County)

5. How long was object in sight? (Total Duration) 1 (Hours) _____ (Minutes) _____ (Seconds)

a. Certain
(b. Fairly certain)
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? By clock (electric)

5.2 Was object in sight continuously? Yes ✓ No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

HEADQUARTERS
HAMILTON AIR FORCE BASE and 78TH COMBAT SUPPORT GROUP
United States Air Force
Hamilton Air Force Base, California 94935

REPLY TO ATTN OF: SGOTN-BO

23 August 1965

SUBJECT: UFO Reports

TO: AFCS (FTD)
Wright-Patterson AFB, Ohio 45433

1. Attached reports are submitted for your information and disposition. Follow-up investigations revealed no additional information or explanations. Personnel reporting subject sightings were sent thank you letters from the Base Joint Office of Information.

2. The 8mm movie film submitted by Mr [redacted], [redacted], San Pablo, California, was previewed locally and decision made to forward for purpose of your more expert evaluation. It is requested by Mr [redacted] that his film be returned when you are finished examining it.

FOR THE COMMANDER

Alfred V. Mankedick

ALFRED V. MANKEDICK, Civ
Asst Base Operations Officer

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

Venus

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	~~Don't know~~

Don't know what long to know

Important all if she don't know or NO I can't remember the time when the object appeared

14. Did the object disappear while you were watching it? If so, how?

~~It just ~~ disappear while ~~we were watching~~ ~~it.~~ No it did not disappear while we ~~(were)~~ looked, or anyone else where watching it.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) ~~No~~ Don't Know. IF you answered YES, then tell what it moved behind: A tree. It had moved upward and to the right (sideways) when it was last seen and that how it could tell that it was moving.

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound none

b. Color Green, yellow, blue, and Red.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

All of ~~it~~ the object would have been covered by the match head.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

Important: My brother, while observing it through a telescope (5x) noticed that it looked like it had beacons & also ~~was~~ what appeared to be windows.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you *(Circle One)*

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other At my home on the edge of town

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North	c. East	e. South	g. West
b. Northeast	d. Southeast	f. Southwest	h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

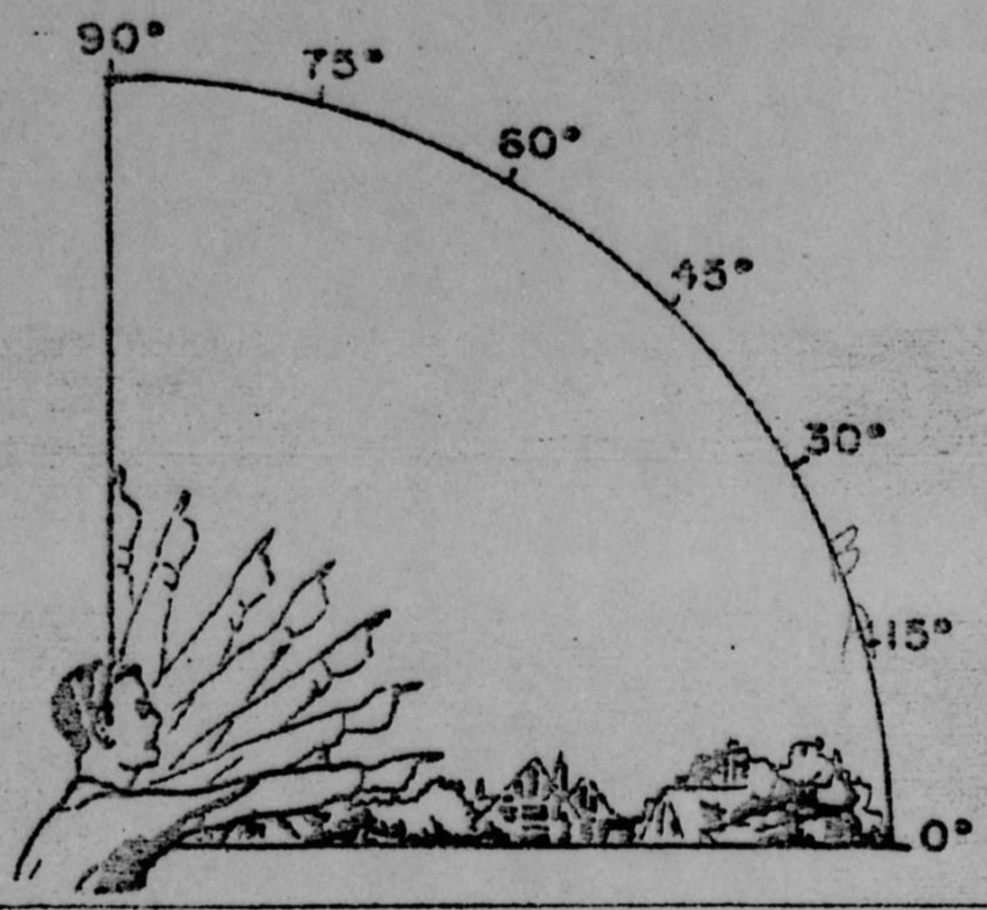
(Circle One) Yes No

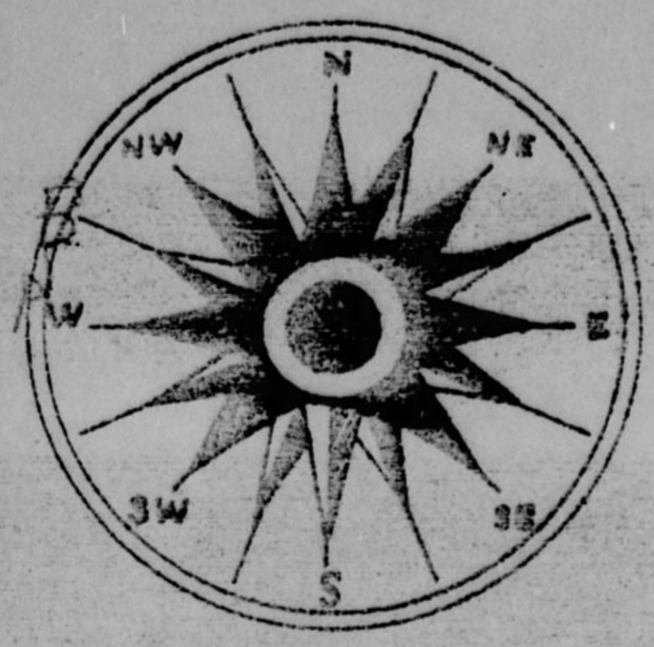
25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	(No)	e. Binoculars	(Yes)	No
b. Sun glasses	Yes	(No)	f. Telescope (SR)	(Yes)	No
c. Windshield	Yes	(No)	g. Theodolite	Yes	No
d. Window glass	(Yes)	No	h. Other _____		

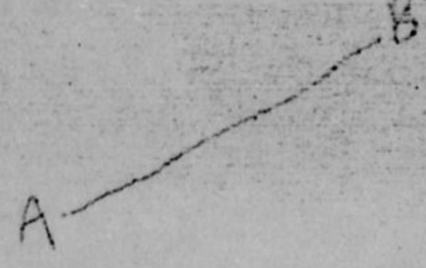
26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No I have not ever seen this or a similar object before.

31. Was anyone else with you at the time you saw the object? (Circle One) (Yes) No

31.1 IF you answered YES, did they see the object too? (Circle One) (Yes) No

31.2 Please list their names and addresses:

[redacted] Walcott, Iowa 52773
Walcott, Iowa 52773
Walcott, Iowa 52773
Walcott, Iowa 52773
of the Crumb family.

32. Please give the following information about yourself:

NAME [redacted] [redacted] [redacted]
Last Name First Name Middle Name

ADDRESS [redacted] Walcott Iowa
Street City Zone State

Zip Code 52773

TELEPHONE NUMBER [redacted] PRESENT AGE 13 SEX Male

AGE WHEN SAW OBJECT 10 & 11

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I am very interested in phenomena such as U.F.O's.

33. When and to whom did you report that you had seen the object? Kids at my school & U.F.O. magazine published by Donald Cousins Keen and Ralph Blumenfeld and I think major NICAP

7 August 1964&65
Day Month Year

34. Date you completed this questionnaire: 2 (Day) December (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The object was stationary in contrast with our (add) cars. water towers and after about from 45 minutes to an hour the object rose upward and to the right (sidewise) and then not went to sight.

My mother was so intriqued by it that she called up the W. O. C. weather ~~man~~ tower at Davenport, Iowa and told them about it. The object could have been a star or a Venus because how could a star stay in one place for from 45 min. to an hour while all of the other stars are moving to the west across the sky and then move sideways upward and to the right a completely different direction than the stars.

On the day of the sighting my brother had told me ~~that~~ it said in the paper what after a U.F.O. has been spotted ~~it~~ you should search for it 100 ~~days~~ days after its being sighted Angway, there was supposed to be a U.F.O. over that night because of its sighting 100 days before. I stayed up in bed that night and put my clothes on at about 12 o'clock that night and went outside, looked around a bit and suddenly spotted this light to the west of me ~~and~~ which was acting sort of peculiar. I got my brother and mother outside who were also ~~out~~ up at the time watching U.F.O. We watched it from our porch and called the neighbors over who were also outside at the time after watching it through binoculars and a star maps for a while (from 45 min to an hour) it moved upward and to the ~~right~~ right (sidewise) for a distance of about 5°. It then went to bed along with my brother and mother after watching it through our upstairs window. It may have been then when we, my mother and brother ~~saw~~ saw the object more upward and to the right (sidewise) because of the ~~probably~~ probably change in position (orbit) of the ~~star~~ star.

However ~~I~~ I have just checked and found ~~that it~~ ~~no change in position~~ could not possibly have made a seeming change in position as much as the change in position the object made.

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

? (Day) July or August Around 1949 (Month / Year)

2. Time of day: around 10 (Hour) _____ (Minutes)

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
(b. Central)
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

[redacted] ke (Nearest Postal ...) Postal Station Max (City or Town) Minnesota (State or County)

5. How long was object in sight? (Total Duration) _____ (Hours) 1 (Minutes) _____ (Seconds)

a. Certain
b. Fairly certain
c. Not very sure
(d. Just a guess)

5.1 How was time in sight determined? Don't remember

5.2 Was object in sight continuously? Yes ✓ No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

~~Lightbulb 4 feet~~ ~~Sunlight~~ ~~Sunlight~~ Lightbulb a few hundred meters, miles away.

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember

e. Other _____

13. Did the object:

	(Circle One for each question)		
a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

Yes, it broke into smaller pieces from a larger object and both the larger objects and smaller pieces went out.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No (Don't Know.) IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No (Don't Know.) IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

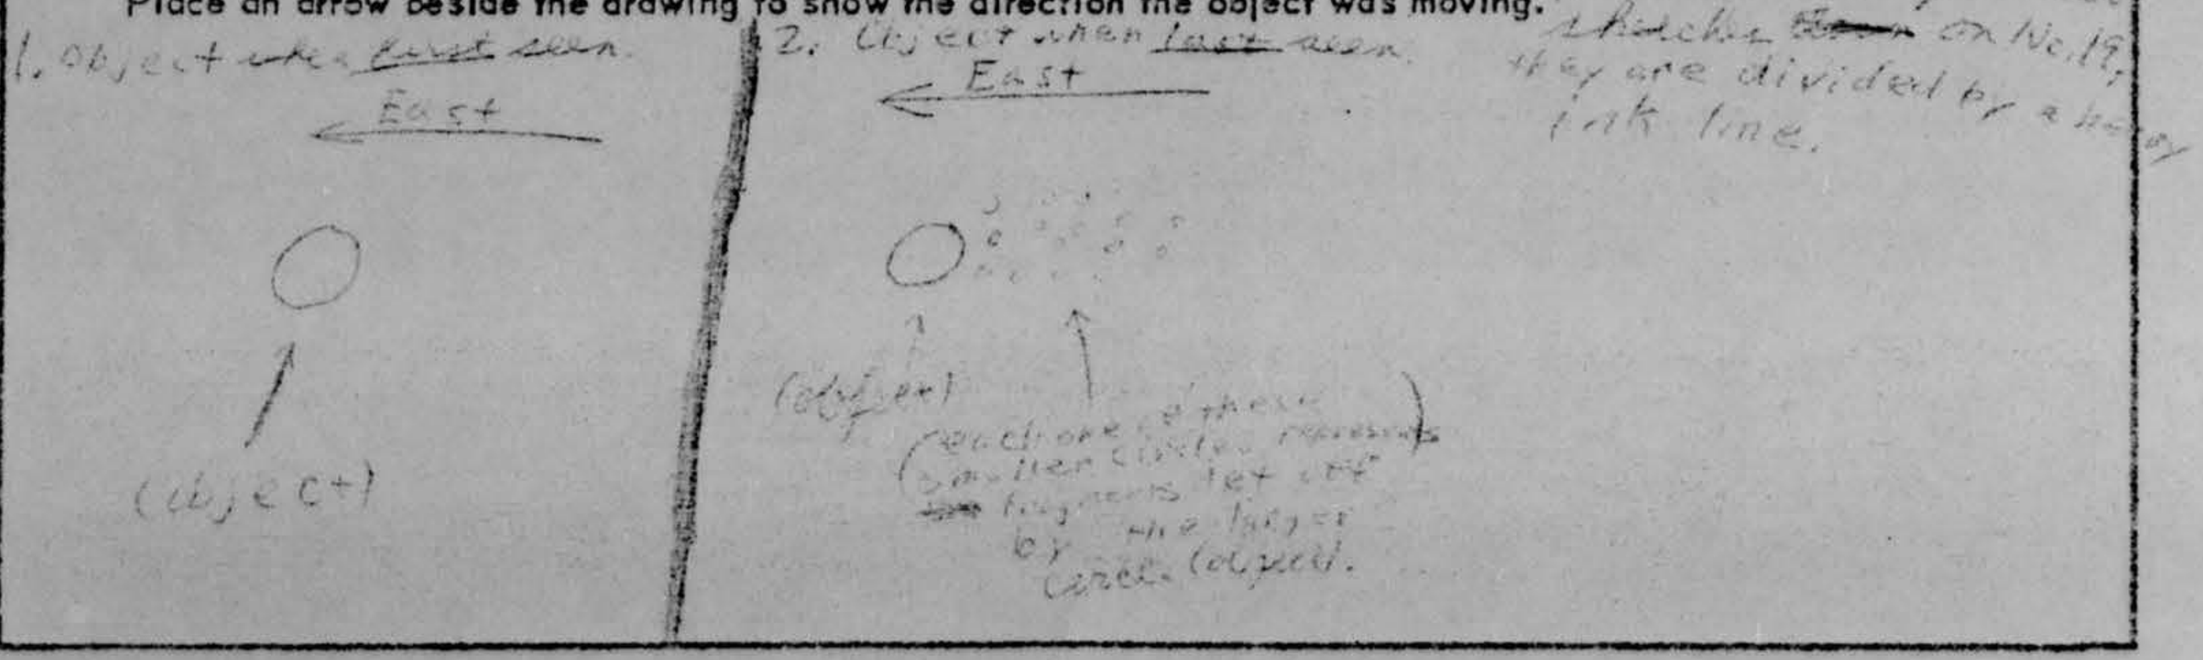
a. Sound Too far away to tell

b. Color White light like a star.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Nearly all of the object.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



Noticed how pilot drew sketches on No. 19, they are divided by a heavy ink line.

M.A. [redacted] – Astronomy

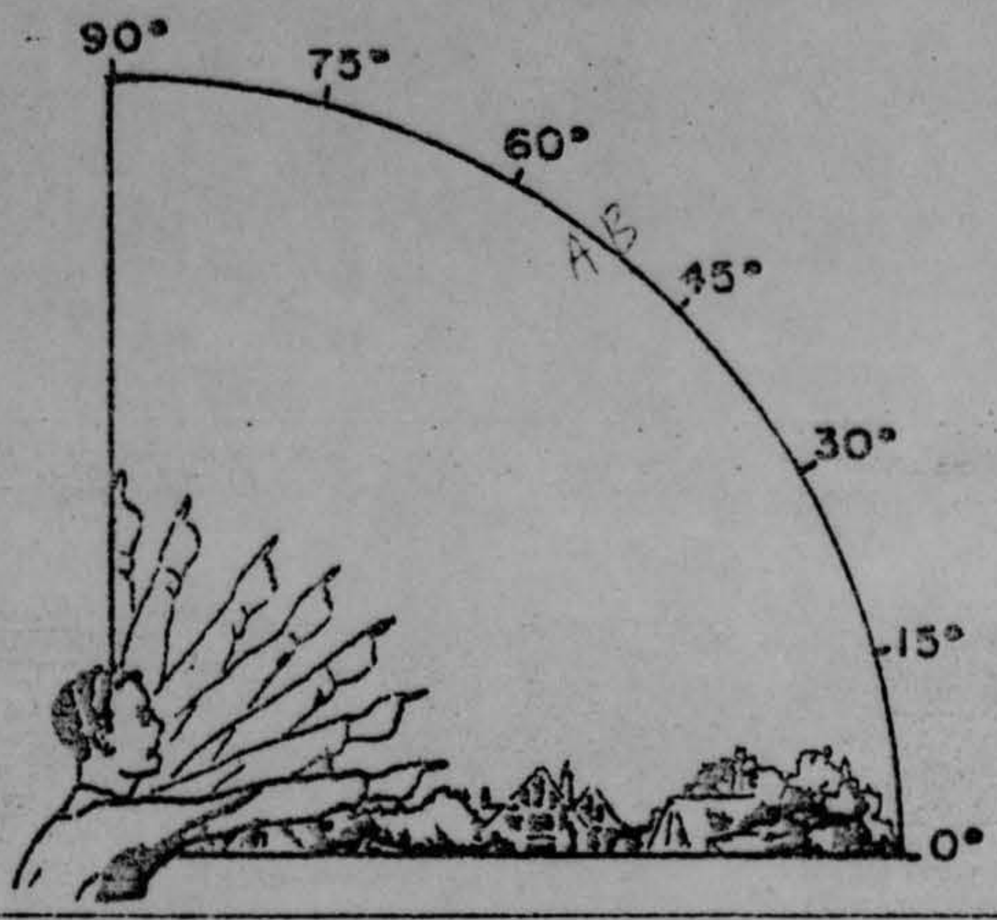
[redacted]

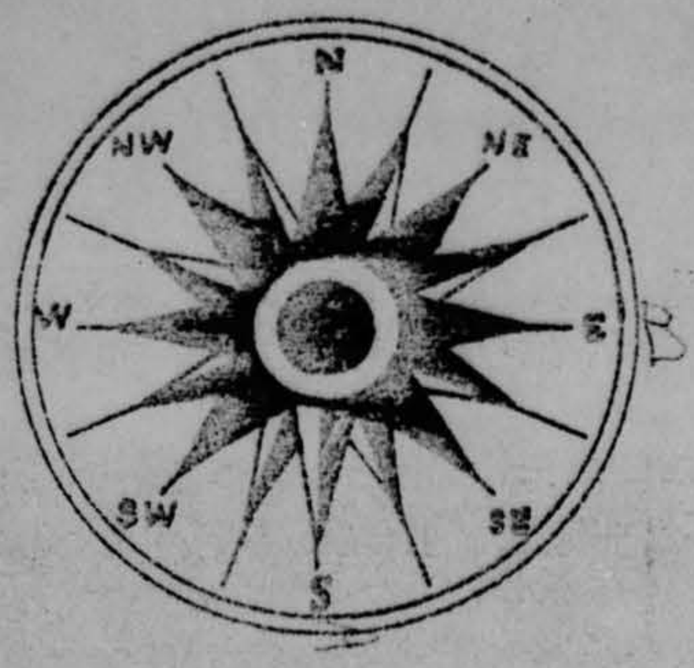
Walnut Creek

[redacted]

Called 2125

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

B ——— strait line ——— A

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No I have not seen this or a similar object before.

31. Was anyone else with you at the time you saw the object? (Circle One) (Yes) No

31.1 IF you answered YES, did they see the object too? (Circle One) (Yes) No

31.2 Please list their names and addresses:

Harvey P Bluedorn 343 S. Grove St. Walcott, Iowa 52773

32. Please give the following information about yourself:

NAME [redacted] [redacted] [redacted]
Last Name First Name Middle Name

ADDRESS [redacted] Walcott Iowa
Street City Zone State

Zip Code 52773

TELEPHONE NUMBER [redacted] AGE 50 SEX FEMALE

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object? Other people?

1 July August around 1947
Day Month Year

34. Date you completed this questionnaire: 3 (Day) December (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The object was ~~as~~ much slower than a meteor

We listened to the news the next day and there was no airplane crash as reported

Dear Sir,

I have enclosed ~~three~~ U. S. C. exchange in this envelope. I think I may have sent ~~two~~ of them to you once before but I did think over for I think I didnt put enough information in them. You didnt tell me to do them over, because I think I didnt tell my address.

Signed [redacted]

n Grad C

Roc 4 Jan 68

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Day	Month	Year
	August	1965

2. Time of day: 10:00 (Hour) ? (Minutes)

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address	City or Town	State or County

5. How long was object in sight? (Total Duration) about 5 to 10 minutes

(Hours) Minutes Seconds

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes ____ No ✓

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

Reproduced by Library of Congress, Legislative Reference Service
May 1966

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

_____

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: ___

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: ___

17. Tell in a few words the following things about the object:

a. Sound

b. Color

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

If you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

If you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? (Circle One)

a. Inside a building
(b. In a car)
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
(b. In the residential section of a city?)
c. In open country side?
(d. Near an airfield?)
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South (g. West)
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? about 50 miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes (No)

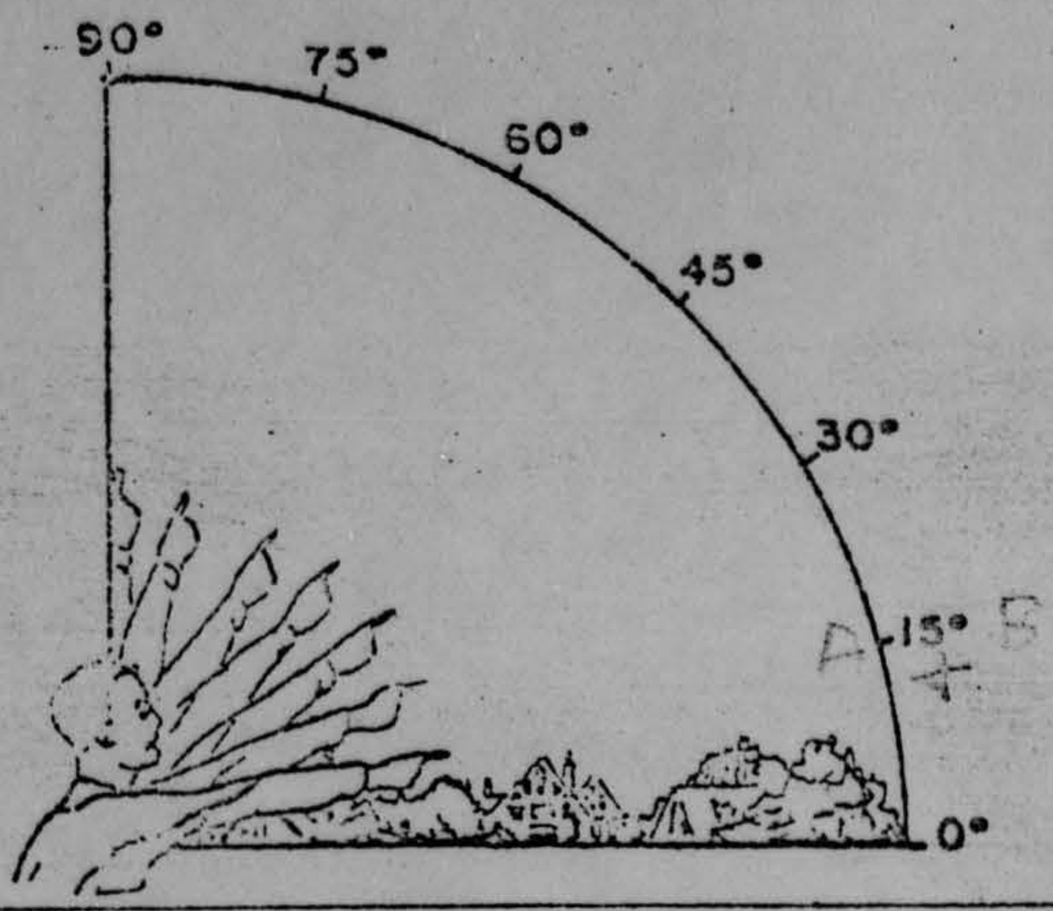
25. Did you observe the object through any of the following?

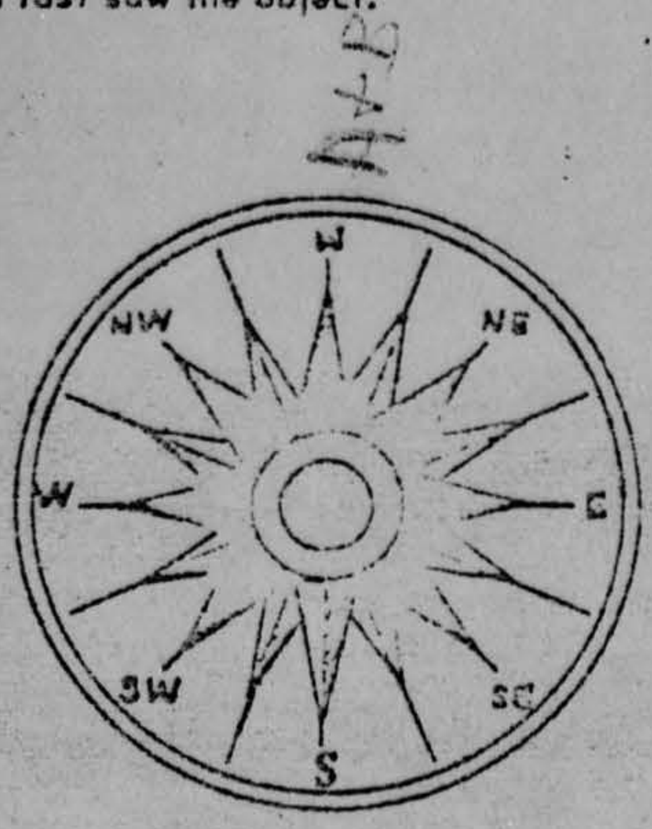
a. Eyeglasses Yes (No) e. Binoculars Yes (No)
b. Sun glasses Yes (No) f. Telescope Yes (No)
(c. Windshield) (Yes) No g. Theodolite Yes (No)
d. Window glass Yes (No) h. Other _____

26. In order that you may give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

(Sketch)

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [redacted] (Last Name) (First Name) (Middle Name)

ADDRESS [redacted] (Street) (City) (Zone) (State)

TELEPHONE NUMBER [redacted] AGE 13 SEX [illegible]

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

(Day) (Month) (Year)

Commack, NY

US AIR FORCE UFO FORM

NICAP.

1 when did you see the object - August 1965 end of summer

2 time of day 6 -7 pm Sunset was halfway

3 time zone a Eastern a. daylight saving

4 where were you when you saw the object?
nearest postal address city or town state or county

picture A Kings Park NY first View

picture B Commack NY 11725 2nd view

5. how long was object in sight A 20min or longer
B 10min "

5.1 how was time in sight determined We usually stay a half to an hour and it takes 5 min to go home or more (thats the maximun time I get to look at interesting things when with someone

5.2 was object in sight continuously YES each scene A & B

6 what was the condition of the sky"
day a. bright brightest most colorful sky with sun (setting) out of view behind hill.

7 if you saw the object during daylight where was the Sun located as you looked at oBject

on my left behind a hill (West side) about halfway

8 X

9 what were the weather conditions at the time you saw the object
d bright heavy stratus type clouds - funnel shaped objects started within clouds & dropped clear below them

weather DRY - WARM - No WIND

10 the object appeared A to be pulling clouds down into a cone shape
B - B smoky grey shapes dropping or hanging from cloud ceilings

X 11 if it appeared as a light was it brighter than the brightest stars

11.1 compare brightness to some common object

(Fluorescent Colored tube)
nothing could really be compared to it. other than Colored Twisters

	picture A	picture B
12. the edges of the object were	-cloudlike	like smoke

13. did the object:
a. appear to stand still at any time? No
b suddenly speed up and rush away at any time
c. break up into parts or explode ?
(d) give off smoke (Yes)
change brightness ——— No
f change shape ——— Slightly
flash or flicker ——— No
disappear and reappear ——— No

14 did the object disappear while you were watching it? if so how? NO
15 " " move behind something at any time NO
16 did the object move in front of something at any time NO
17 tell in a few words the following things about the object
SOUND NONE COLOR (A) all colors of the sunset only one step lower each band
(B) picture B xxxxx 7 similar gray shapes (whole shape one shade grey)
under Light clouds

18 we wish to know the angular size
my two thumbs wide & 4 deep which would be 2 pennies at top widest part down to about 4 pennies at bottom point
(picture B about half of above) 1 penny wide to 2 pennies long at bottom point ?

19 draw a picture that will show the shape of the object or objects labeling parts.
place arrow to show direction the object was moving.

A 
B 
20 do you think you can estimate the speed of the object?

NO (slow like clouds
21 seemed like it was close less than a mile away Pict A | Pict B ?

22 where were you located when you saw the object

pict A	pict B
(c.) outdoors facing smithtown bay	(b.) in a car facing fire in woods b. in car approaching our street (c.) outside in front of house

23 were you

A	B
(c.) in open countryside facing smithtown bay	(b.) in the residential section of town

24 If you were moving in an automobile

pict B
24.1 what direction were you moving? N by NW (woods) SW approaching home
24.2 20 mi an hour almost a stop at fire engine where we made a left hand turn 20 mi an hour and a stop ap roaching our driveway & home
24.3 Yes

25 did you observe the object through any of the following

pict A (c.) binoculars yes	pict B (c.) windshield yes ". out of car (without binoculars

26 in order that you can give as clear a picture as possible of what you saw describe in your own words a common object or objects which when placed in sky, would give the same appearance as the object which you saw.

30 have you ever seen this or similar NO

31 was anyone else with you at the time you saw the objects. YES
31.1 if you answered yes did they see the object too YES
31.2 names and addresses My husband 8 adults and about 10 children were at scene A
and noone could figure out what happened or what it was
(The people watching brought our attention to object)
None can be involved

32 Please give the following information about yourself;

name Mrs [redacted]
last first middle

[redacted] Connack 11725

[redacted] 44 years old female

worked at Air Fields 2 years observing and logging flights taking off and landing
saw many trainers exploding and falling with and without binoculars.

Last 15 years have been housewife and commercial advertising and illustration artist.
photography is a hobby
Always found observing skys day and evenings interesting since I was a child.

33 when and to whom did you report that you had seen the object THIS REPORT IS FIRST ONE
34 date you completed this questionnaire; March 4 1968

35 information which you feel pertinent and which is not covered in above.

see following page

PICTURE

US AIR FORCE UFO FORM CONT.

35. additional info Pastel pictures enclosed should cover the subjects reported and map section to get locations.

However I'd like to add: Picture A - I questioned the men and women & children what they thought it was if they saw anything falling (they said no) It could be possible something was dropped & they didn't notice it it water while watching the beautiful sight, so spectacular my art could never recapture it. My husband let me have his 35 mm camera but by the time I got it the pattern was less definite and I didn't hold camera steady. The slide and info I had recorded on all this disappeared. If I find it will send it in but, it would not add much anyway.

The sunset picture A resembled a picture of a geographic fault where the earths layers drop one step down throuout whole edge of separated section. To me I first thought it was a trail left by a jet that fell (never saw one of these go down) then I thought it could be a plane part or package fell and created this funnel (tube like shape) or dummy practice bomb. End of summer & day when no boats were out. We sailed our dinghy 7 years to this date in this location when we didnt go boating we came to look at scenery. I saw the most spectacular things in sky and water patterns & shape but none like this. Thought it could also be an air pocket which would twist clouds same way as a whirlpool does in water. On way home the following scene repeated 7 times (too even for nature I thought!)?

The picture B made me think of planes that had gone down in flames and made a smoke trail above then but not 7 in a row . Could be sky writers learning the trade with grey stuff or crop dusters or someone playing around up thar or experimenting. (or 7 + whirlpools

Sun had gone along with sky coloring by the time we got home 5 minute trip but it was plenty of light and clear vision. clouds were all above smoke or ? objects

Resembled Stench Twisters - but weather wasn't right

light Clear sky - Turning Towards Evening

Would like to have stopped to ask firemen to look at the two smoky points from the sky aimed in direction of the woods section they were putting out the fire in. Couldn't do it unless I was alone. Remember seeing a similar sight with one fire being put out and for miles & miles all new fires in this string of woods was erupting like an epidemic. trees would 'lit and so close could not see or remember else area . Thought it was a bunch of mutt fire bugs they had to use a car the distances were so great. NJ state , Conn ? can't be sure date/ or location. FALL or winter trees were Bare ?

Picture Avb.

UFO ?

I HAVE NEVER SEEN A FLYING SAUCER OR ANY SPACE MEN EXCEPT OUR OWN.

Read an article in Readers Digest about a nightwatchman receiving compensation for illness suffered from some garbage ODOR he said was dropped from an object over him.

A few years ago before reading this fantastic story I was awakened one night by an oder that was impossible to annalize. The closest I could come up with was human bones being burned. I never smelled any to compare with it so tried to add my 6th sense or ESP It came in strong throughout rear of house - could hear or see nothing -pitch black out. Side window next to it seemed possible to leave open a crack catching the air coming from front of house. A very warm night in summer. We have dogs and cesspools but that odor was different. Couldn't break it down to even match my brothers chemistry bombs & experiments as a kid. Stifeling is only word I could use.

Charting the Future

Numbers 1, 2 and 3 on map indicate proposed Long Island transportation centers. Dark line shows electrification work under way on LIRR lines. Previously announced electrification work planned under Phase One of the Commuter Agency's program is shown by dotted line. Phase Two electrification work is shown by shaded lines. Black planes denote existing general aviation airports; plane silhouettes show proposed airfields.

P.S. Since all this happened so long ago didn't want to send it locally plus, I don't want my husband or others to know about my sending this report in.

If you want more information use my full first name (no UFO lettering on envelope) and send me some UFO report forms to make it easier.

I have a small boy almost able to escape playpen and won't have the time or the energy to work this into my already hectic schedule.....

Have one more report - art work is complete (book movies type) This one is about a comet hitting a red light and I was happy to find out accidentally it was reported by a woman in Australia in mans or True magazine a year or two ago.

Hope I don't see anything else for years this is too much work,,,,,,

After putting all this stuff down I sympathize with you too.

Respectfully

Official U.S. Air Force U

14. Did the object disappear while you were watching it? If so, how?
yes it seem to hide behind Clouds

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) No Don't know. IF you answered YES, then tell what it moved behind: Cloud from time to time then went at a Slount real fast

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of:

17. Tell in a few words the following things about the object:

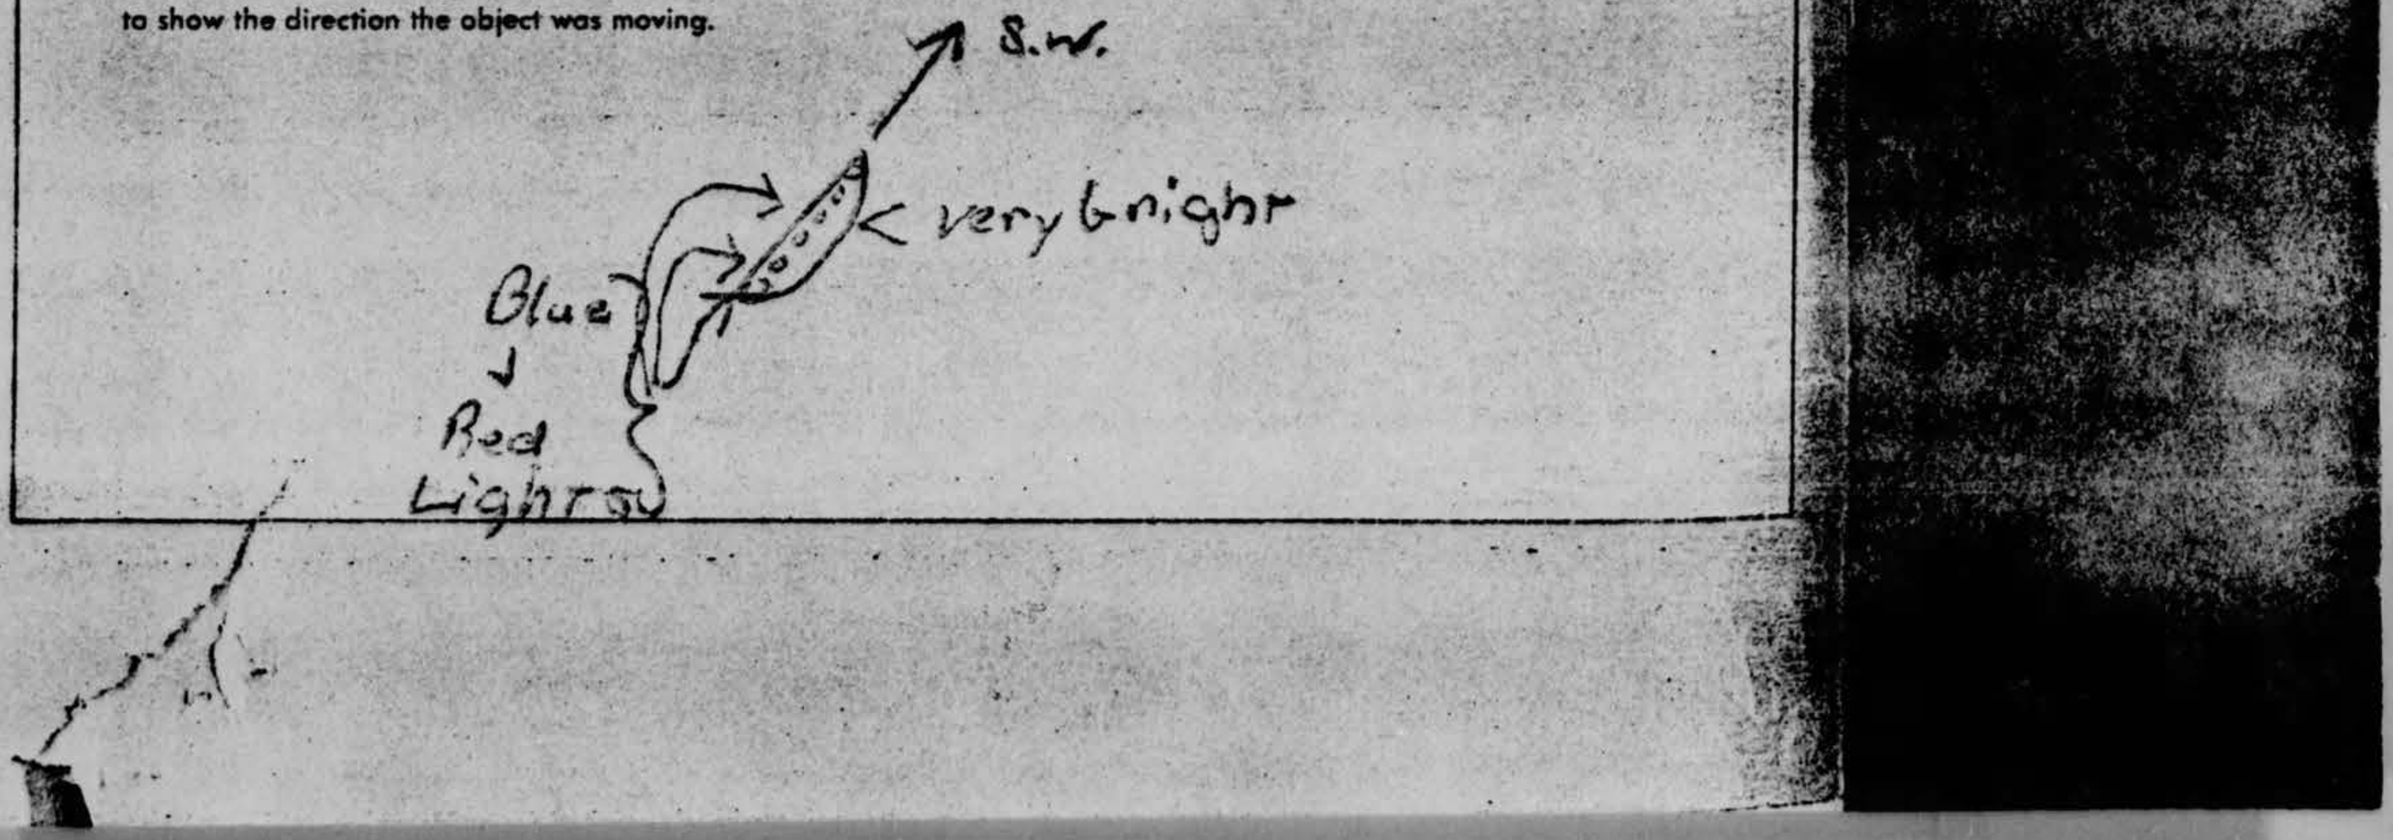
a. Sound no

b. Color bright white with blue + red light

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

all of it.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



FO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? 500 m.p.h.

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 2 miles

22. Where were you located when you saw the object?
(Circle One):

a. Inside a building
b. In a car
c. (Outdoors)
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other_____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

a flare going off in front of you

No Case Info only

OFFICIAL U.S. AIR I

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

-- (Day) August (Month) 1965 (Year)

2. Time of day: 8 (Hours) 45 (Minutes)

(Circle One): A.M. or (P.M)

3. Time Zone:

(Circle One): a. (Eastern)
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. (Daylight Saving)
b. Standard

4. Where were you when you saw the object?

Pearl River N Y (Nearest Postal Address) _____ (City or Town) _____ (State or County)

5. How long was object in sight? (Total Duration) 0 (Hours) 0 (Minutes) 30 (Seconds)

a. Certain
b. Fairly certain
c. Not very sure
d. (Just a guess)

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes _____ No ✓

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright
b. (Cloudy)	b. (Cloudy)

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. (None)
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. (No moonlight—pitch dark)
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. (Thick or heavy clouds)

WEATHER *(Circle One)*:

a. Dry
b. (Fog, mist, or light rain)
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. (Solid)
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. (Brighter)
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

a new flashlight shined in your face

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. (Like a bright star)
c. Sharply outlined
d. Don't remember
e. Other_____

13. Did the object: (Circle One for each question)

a. Appear to stand still at any time?	(Yes)	No	Don't know
b. Suddenly speed up and rush away at any time?	(Yes)	No	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	(Yes)	No	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	Yes	(No)	Don't know
h. Disappear and reappear?	(Yes)	No	Don't know

Official U.S. Air Force

34. Date you completed this questionnaire: 10 (Day) Feb (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I think you should have ask what was my first reaction.

At first I thought it's was a flare, but it stop for about 10 sec then rose.

I would like to know if my information has helped.

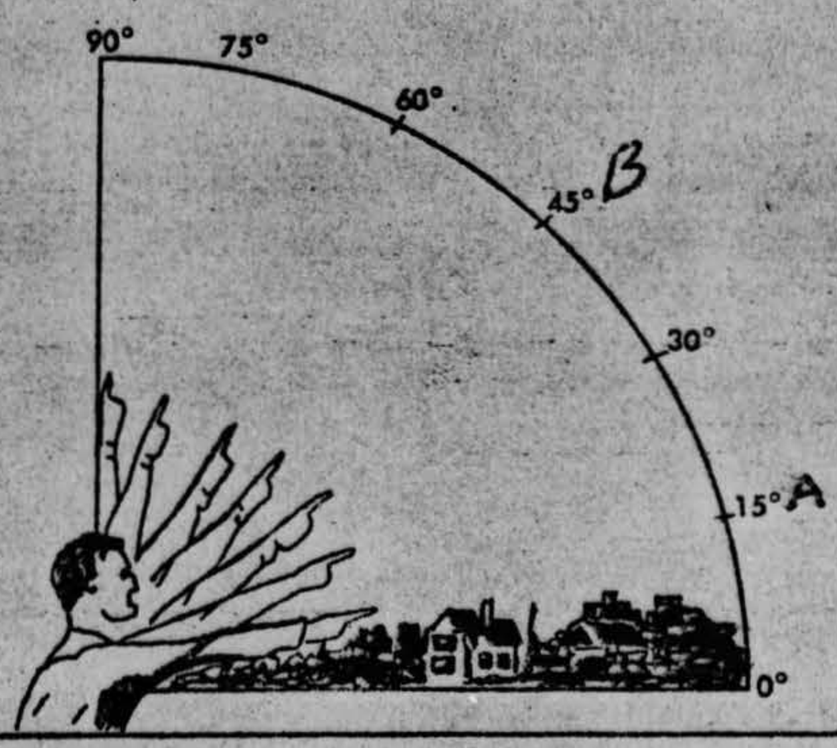
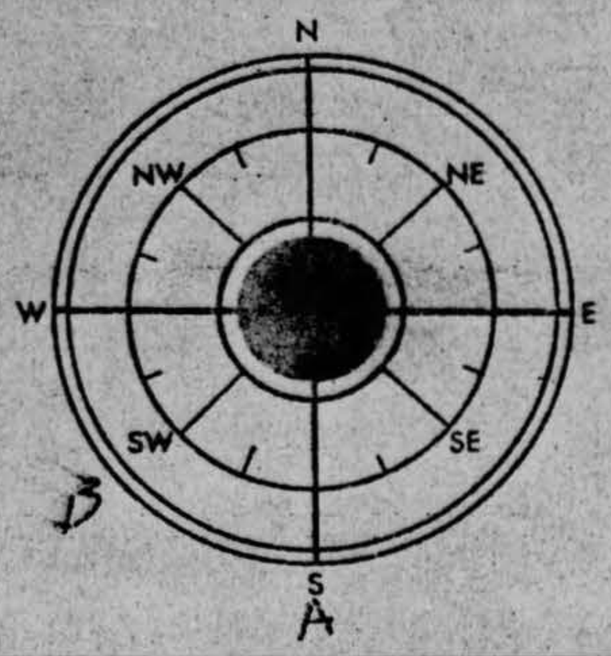
Dec 65

Brazil
Aug 65

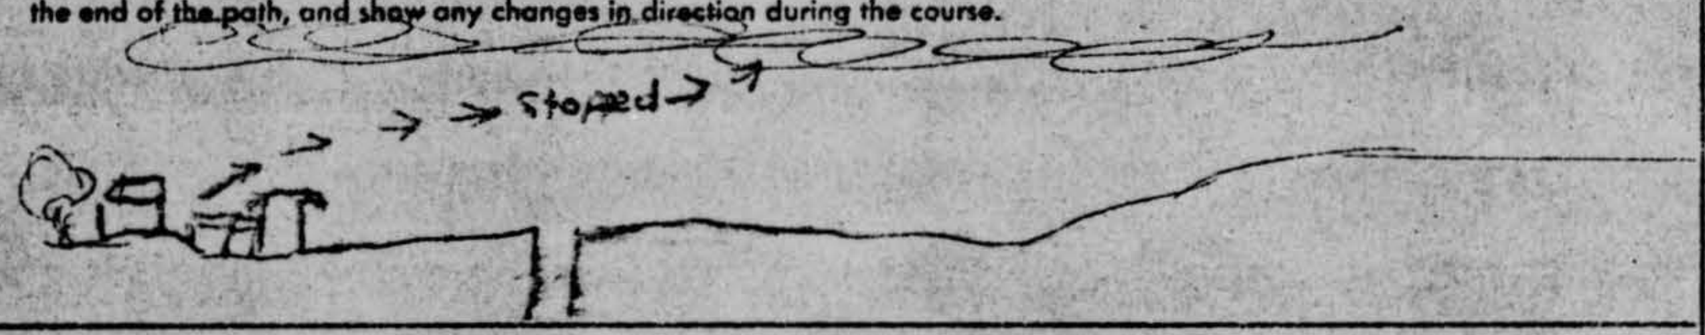
In Brazil, a man named Joao da Rio was fishing one day in early August when a tiny man about 28 inches high allegedly came up to him. The creature had large luminous eyes and spoke perfect Portuguese, according to the witness. Joao was informed by the visitor that he had come from another world, and as proof, he offered a piece of "unearthly" metal, which is now being analyzed. Joao is described by his employer as a "simple, honest man." ....

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



29. IF there was MORE THAN ONE object, then how many were there?_____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

no

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:

[redacted] r. Pearl River N.Y

32. Please give the following information about yourself:

Indicate any additional information about yourself, including any special experience, which might be pertinent.

Later in 1967- January I saw a U.F.O. In back of our house.

33. When and to whom did you report that you had seen the object? My family

____ August 1965
Day Month Year

Dear Sir,

I know this isn't too good of a report but I have been troubled over it ever since.

Signed

Ricky Barnes

UFO form continued

to send it. (the report) to the newspaper but my brother said he thought it was a satellite so we decided not to tell. ~~the next day~~ The next day in the paper my brother read about a satellite that was visible but I said that it was a U.F.O. for 2 reasons;

1. It shoot out from the bigger star and ~~there was~~ an exhaust or thrust was visible.

2. It stopped for about 30 seconds.

Also the bigger star from which it shot out from stayed still. But the next night it was gone.

Official U.S. Air Force

34. Date you completed this questionnaire: Tues. (Day) June (Month) 67 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

It was in August I think in the summer of 1965. We (me & my brother) were out on the lawn whatching the stars, (especially one big one, that was very bright) and all of a sudden a littler star shoot out from the bigger one. at first we thought it was a shooting star but as soon as it broke away it slowed down and just sort of cruised around (but always in one direction). When it did shoot out it looked like it left a white thrust flame but thats the only time it left any sort of a trail. After we were whatching it for awhile it stopped for about 30 seconds and started up again and from then on it got a little red. Then we saw it starting to descend so we ran to the side of the house, and it disappeared in front of to our surprise the moon, I think this was only a coincident though. We were going

Belluco, Chile

CHILE

Violet light again

The *Barbados Advocate* of August 2 tells how—"Villagers at Belluco, in Chile's southern Puerto Rico Montt zone, said that they saw a strange apparatus land in the village for five minutes yesterday morning. Then it took off and landed farther away.

"More than 15 people keeping a traditional all-night vigil beside the body of a young girl killed in a road accident reported seeing the object. They said that a violet light entered the room where the girl lay and they went outside to see where it came from. They saw a strange object giving off a dazzling violet light. They could not tell the shape of it, they said, because the light was so blinding.

"As they stood there, the object took off without a sound."

ARGENTINA

UFO Base?

From an entirely new source, ***Al-Ahram*** of Cairo, dated August 20, we learn, thanks to our correspondent's accompanying translation, that the Argentinian newspaper *La Razon* of August 19 stated that UFOs recently sighted, have established a base in a secluded valley among the mountains of Cordoba, and that members of the public witness these objects after sunset as they fly in groups at low altitudes over the valley. . . . .
(Credit: S. Alwan of Cambridge University.)

Dec 65

Lima, Peru
1 Aug 65

LANDINGS IN PERU: Among dozens of important UFO observations in Peru this past summer, are three landing stories which have a fair amount of detail in the newspaper accounts that have been sent to us.

The first occurred on about August 1st in a suburb of the capital city of Lima, where a 15-year-old boy named Alberto San Roman Nunez saw a small flying saucer at rest right on the roof of his home. The boy was on the roof taking in some wash when he was approached by a being about 3½ feet tall which had apparently emerged from the saucer. The creature had "greenish lights on his skin which made him look like a frog." Terrified, Alberto ran down the stairs. As he did so, he was enveloped in an intense red light which came from a circular craft which he saw pass over the roof heading toward the nearby ocean. Presumably the little man was then inside the craft.

Thereafter, an examination of the roof revealed four circles, each about a foot in diameter. These were in the shape of a square, in relation to each other; and another strange marking was found at the center of the square. These four circles corresponded to the position of four leg-like appendages which Alberto had seen at the bottom of the weird machine.

Aug 1, 1965

Family Reports Sighting Saucer

SYDNEY, Australia (Reuters) — A chorus of howling dogs woke up the McLintock family early Saturday and brought them rushing out of their farmhouse to see — they reported later — a flying saucer hovering over the farmyard.

The object had three rods protruding, one from the top and two from the bottom. It emitted two beams of light.

The object remained over the farmyard for about 15 minutes before moving off. Two of the McLintock boys, 12 and 10, admitted they saw it the day before but kept it secret.

The incident was reported at Goonumbla, New South Wales.

Dec 65

Wichita, Kansas
2 Aug 65

SCIENTIST REFUTES AIR FORCE CLAIM THAT HUGE WESTERN SAUCER FLAP WAS CAUSED BY STARS: Unidentified objects which were picked up on radar on August 2nd at the Wichita, Kansas, weather bureau, as well as elsewhere throughout the mid-west and west, were said by the Air Force to be the planet Jupiter or assorted stars. But Robert Risser, Director of the Oklahoma Science and Art Foundation planetarium in Oklahoma City (where numerous sightings were also made), said that local residents certainly did not see Jupiter or any of the stars which the Air Force listed in their explanatory report. Said Risser: "This statement by the Air Force is as far from the truth as you can get. Somebody has made a mistake. These stars and planets are on the opposite side of the earth from Oklahoma City at this time of year."

The sightings in question came in during the early days of August from Kansas, Texas, Oklahoma, New Mexico, Colorado, South Dakota, Nebraska, and Wyoming. In addition to numerous radar sightings, there were literally hundreds of separate reports by private citizens as well as police. But the Air Force stated, after a very superficial investigation, that the sightings were probably of the planet Jupiter or the stars Rigel, Capella, Betelgeuse, and Aldeberan.

Llanquihua, Chile
2 Aug 65

ANOTHER LANDING IN CHILE: Again thanks to our South American Editor, Mr. Von Hippel, we have learned of still another saucer landing. This one occurred on August 2nd in Llanquihua, Chile, and was witnessed by the Secretary General of the National Health Department for that area, as well as a large group of people who happened to be with him. The article does not state how far the group was from the UFO when it landed, but it does tell us that some of the women present were so overcome by emotion that they fainted.

Some of the men forced themselves to advance toward the craft, but as they did so, it took off at high speed. When they reached the landing spot, they found a round charred area the circumference of which had been severely burned. Several trees had been charred and uprooted.

Bells, Texas

TV Newsman Snaps UAO Photos

On the morning of 2 August 1965, photographer Robert Campbell was lying in bed at his home at Bells, Texas, listening to police broadcasts. His attention was arrested by conversations concerning an unconventional aerial object being tracked by radar (apparently at Tinker Air Force Base) and which was heading south. His source was the Texas State Police, the only part of the conversation he could monitor.

When he heard the information that the object, a blue-white light, was south of Durant, he took his 4x5 Speed Graphic camera and went into Bells where he encountered Police Chief Pete McCollum. They drove around until they were 1 mile east of Bells on Highway 82, where they spotted the object hanging motionless at 45 degrees elevation in the northeast. Campbell set up his tripod and took four time exposures of 2 minutes each, at 3 minute intervals. The photographs, on black and white film show a misty, glowing object with traces of what appears to be vapor on its surface.

After watching about 2½ hours, during which the object appeared to hover deadstill in the air, Campbell and McCollum left the area, went home and to bed.

Having been alerted by the same radio broadcast, several other individuals were also watching the object. Campbell and McCollum were 1 mile east of Bells, Oklahoma. Highway Patrolman Bill Quires was watching from Durant, 30 miles north of Bells, and Department of Public Safety Dispatcher, Jim Faglia was watching from a point seven miles south of Sherman, which is 12 miles west of Bells. None of these observers stayed to see the object depart.

The interesting point in this sighting is the number of observers as well as the difference between the naked eye observations and what the object looked like on film. Campbell said the object appeared as a blue-white sphere with well-defined edges.

Arizona

Sky Objects Reported In Globe-Miami Area

Eastern Arizona Bureau 8-4-65

GLOBE — Those Texas flying saucers apparently made a detour over Arizona Monday night, according to reports made to police agencies here. 2 Aug 65

The Arizona Highway Patrol's Miami office, sheriff's office, and Globe police said they received calls reporting two "red and white, long-tailed objects."

Deputy Sheriff Charles Roberts said a tourist reported the first sighting about 10 p.m. at 7-Mile Wash 25 miles northeast of Globe on U.S. 60. The second sighting, by two youths in Central Heights, followed a few minutes later. Central Heights is between Globe and Miami.

The distance between the two sightings is an estimated 30 miles.

One resident summed up the situation:

"The Air Force said there's no proof of these things coming from outer space.

"But Air Force officials did not say they didn't come from outer space."

Vol. 2, No. 44 Oklahoma City, Oklahoma 73110 7430 S.E. 15t

DENNIS WAGNER, 19, a student at Central State, expected the woman to look relieved when she came rushing back into the laundromat looking for her purse, but he was hardly prepared for the gasp of relief she emitted when he handed it over to her.

It turned out, though, the purse contained $4,000 in cash.

LORNA McKEMIE tells about the signboard just out of Price, Utah, that proclaims: "Two Finishes For Your Automobile —Liquor And Lacquer."

A READER calls in to tell about the road in the western part of Arkansas that is so winding he ran his battery down honking at his own tail lights.

OUR NEIGHBOR'S son came home from school the other dayand tearfully announced that Paul had taken his pencil. His parents consoled him and sent him off the next day with a new pencil.

That afternoon the scene was re-enacted and that did it!

The boy's father went to see Paul's father after supper. "It's the principle of the thing, not the pencils," he said. "I can get all the pencils I want at the office."

THE GUY ACROSS the desk says he hates to leave home because he can't stand to kiss his wife good-bye.

YOU HAVE TO GO way back for this one.

It took place during the Roosevelt era. There was this little old woman who introduced the new deacon to her husband who was a little deaf and a Republican.

"Darling," she said, "This is the new Deacon."

"New Dealer?" murmured the old gent irascibly.

Rare Saucer Photograph

The picture above is believed to be the first night color photograph of an unidentified flying object, commonly called a flying saucer. The picture, showing a clearly-defined yellow, blue and whitish egg-shaped object in the sky, was shot by Alan Smith, 14-year-old Tulsa boy, Aug. 2 when a rash of flying objects were reported over Oklahoma skies. Alan, his father, sister and neighbor pal were watching the object when Alan shot the one exposure on an

prints of the flying object."

"Then we started looking at the negatives and saw that the film company had not printed two of the negatives. One had a streak of light and the other had an object in one corner that appeared to be three or four colors," she said.

"We took it back to the film company and had them make an enlargement of that negative," Mrs. Smith continued. "The result was the UFO that had appeared over our back yard."

"The camera had gotten distinct lines of an object —while our eyes saw only a large round circle of light," she said.

Mr. Smith said the object appeared to be about 36 or 40 feet in diameter and about 5,000 to 8,000 feet high. He based this on his experience of visual sightings of aircraft in his work, etc.

The same night, Aug. 2, The Tulsa World reported, a group of Tulsa churchgoers reported sighting unidentified flying objects as the group left the Full Gospel Chapel about 12:30 a.m. Rev. Buster Stottlemyer, pastor, said he and three others saw the objects for about an hour before they disappeared over Sand Springs.

The pastor reports, he, too, saw the pulsating lights, identical to the description given by Alan and his father.

"It's odd. They would go a distance, then stop, change color, then go on." He said the colors changed slowly from white to green and then red. This also matches the description given by the Smith family.

The same night Ray C. Hall, public information officer for the Oklahoma Civil Defense agency, reported he saw the pulsating object between Norman and Moore as he drove on IS 35 to Norman.

He said he looked up to the northeast (his convertible top was down) and described what he saw this way:

"The craft was in the area northeast of Norman. There was a quarter-plus moon and the comparative size of the craft was almost as big as the moon would have been were it full.

"I saw four or six lights that were blinking regularly in rhythm. . . . . .half of them were red and half were

west to east.

Alan said he saw the object, walked 25 feet to his house, picked up the camera, returned outside and waited until it was almost overhead before exposing the one negative.

Members of the family said they heard a whine increase as the object speeded up. There was also an increase in the intensity of the light, they said.

It first appeared white as a star, turning red as it came closer, gyrating, turning blue, then green then cream white, Smith said.

The object appeared as if it were illuminated by searchlights.

The family reported dogs in the neighborhood started howling when the object appeared.

Members of the family said they could not see the definition of lights as it appears on the color negative. This indicated, experts say, that the camera was able to pick up something that the human eye was unable to see.

Atmospheric conditions that night included a dull moon, with a clear sky and stars.

The Smiths were first interviewed by Jim Krouse, aviation editor of the Journal, who heard of the picture through a Tulsa newsman. Other interviews were conducted by Bill Boykin, associate editor, W. P. Bill Atkinson, publisher, Hewes and Cliff King, photographer.

King and John Gumm, chief photographer, have shot color pictures of airplanes, stars, etc., in an effort to duplicate the image in some way.

Deep Fork Report Due

A comprehensive report on the problems and solutions of floodings in the Deep Fork river areas of northwest Oklahoma City will be laid before the city council Tuesday.

William E. Hedges, director of public works, said Monday he did not want the report released before councilmen considered it Tuesday.

It was compiled following a survey by a council committee headed by James H. Johnson, ward 4 councilman

ject an arbitrary size of 50 feet diameter. Measuring the image size on the film (4.5mm) the object would have to have been less than a mile distance from the camera."

"Measuring the density of the image on the film," Gumm continued, "the brightness of the object would be relatively twice that of a full moon."

King shot another roll of the same type color film, in the same camera, standing in the boy's back yard, at approximately the same time of night.

This was done, he explained, to eliminate the possibility that the boy's camera lens had a flaw in it or a light reflection was being bounced off of some earthly object.

All tests proved fruitless. The airplane picture looks like airplane lights. The color negatives shot by King turned up with no image or reflection. There was no flaw in the camera that could be detected by Journal photographers. The image on the negative is real, they concluded.

Alan, a newspaper carrier boy for the Tulsa Tribune, said he had paid little attention to flying saucer reports in the past and had given only cursory attention to newspaper stories about saucers in the past.

The family is a typical middle - class group. They live in a modest home and were contacted by the Journal first.

Journal editors asked all persons who personally had seen flying objects in the past to communicate by letter with the newspaper.

This information, complete with descriptions, etc., will be sent on to military authorities in an effort to help determine origin of the strange lights and objects.

"In the future, we ask anyone who sees a 'flying saucer' or object in the sky to call the Journal," they said. "We have trained photographers on duty around the clock and if you call, we may be able to shoot a picture of these reported objects."

They asked that letters, with descriptions, be sent to The Oklahoma Journal, 7430 SE 15, Oklahoma City,

Set Today

Jimmy G. Nix, 17-year-old son of a justice of the Court of Criminal Appeals, faces a hearing at 1:30 p. m. Tuesday on whether two 30-day suspended sentences will be revoked.

Judge John H. Porter of the court of special sessions handed young Nix, son of justice Kirksey Nix, the sentences including two $100 fines, after Nix pleaded guilty to beating up a 13-year-old girl and her escort in May.

They Saw The 'Saucer'

Alan Smith, 14, and his sister, Sheryl Holt, 18, stand in the back yard of their Tulsa home where both saw what they described as an unidentified flying object Aug. 1-2, 1965. Alan holds the official Boy Scout camera which he used to shoot the spectacular color photo of the object. The picture is reproduced on the front page. (Copyright 1965 by The Oklahoma Journal Publishing Co.)

First Night Color Shot Captures Flying Saucer

(Continued From Page 1)

o'clock high—Alan relates, he raised his camera and shot the picture.

He exposed only one negative, he explained later, because he couldn't see to wind the camera again.

The family waited 7 to 10 days before sending the film out for normal commercial processing. This was done to use up the entire roll. The film was sent to Exel Camera Store, 914 S. Detroit, Tulsa, for processing.

"When we got the film green. The colors were alternated and arranged in a circle that in my view looked oval shaped."

The letter, sent to Hayden Hewes, Oklahoma City, director of Interplanetary Intelligence of Unidentified Flying Objects, is reproduced on this page.

The first sighting by the Smiths came Aug. 1 when they reported seeing the object moving north to south at 1:45 a.m. The object was seen for 45 second, they said.

On the second night, Aug.

Both men are experienced, highly - skilled professional photographers. Gumm has served around the world and is known as an expert in his field.

Gumm reported that the Boy Scout camera used to shoot the picture has a fixed focus lens with a shutter speed of 1-50th of a second and a relative aperture of F:11.

The film was Kodacolor X having a relative speed of ASA 64. Approximate focal length of the camera lens is 2¼ inches or more tele-

DATE OF REPORT 9 June 1966

SUBJECT UNIDENTIFIED FLYING OBJECT

LOCATION TULSA, OKLAHOMA, USA DATE 2 August 1965

PHOTOGRAPHY

AF _____ IR _____ QUALITY Good

P NRS One Kodacolor negative and one 8" x 10" color print.

News article "The Oklahoma Journal" 5 October 1965

1. PURPOSE: This report answers Work Order Number 66-43 submitted by Major H. Quintanilla, Jr., TDEW/UFO, requesting a photo analysis of an alleged unidentified flying object photographed at Tulsa, Oklahoma on 2 August 1965.

2. ANALYSIS: The following analysis represents a joint effort of the Photo Processing (DPP) and Photo Analysis (DPA) Divisions. Based upon the information furnished, we can neither confirm or deny the identification of an unidentified flying object. The somewhat oval-shaped, tri-colored object shown in the photograph is believed to be an object; however, the following comments are furnished as discussion. The object is quite clear with rather well-defined edges and clarity of detail. Measurement of image size on the negative resulted in a 2.5 mm size rather than the 4.5 mm stated in the news article. Using the 2.5 image size and the camera/range data quoted in the article, the object becomes approximately 30 feet in diameter - or some 40% smaller than quoted in the article - at a range of less than one mile. Some question arises however as to the accuracy of the range determination (camera to subject) at the time of day (0145) and under the conditions stated in the news article. Range is very difficult to determine at night and cannot usually be determined accurately even by experienced pilots. A further question is posed as to why some tonal difference in the sky was not recorded on the film in that atsmospheric conditions on the night of 2 August 1965 were described as a dull moon with a clear sky and stars. Some tonal variations in a sky background are usually observed even on night photography. The only variation observed in this case was a line caused by a scratch on the film. Photo processing personnel noted that the image bears a resemblance, although doesn't appear identical, to the effect they have observed obtained by photographing a multi-colored revolving filter flood light of the type used to illuminate and color aluminum trees during the Christmas season.

Of Pontiff Stirs Crowd

NEW YORK (UPI)—Pope Paul VI climaxed a day of spectacle and emotion Monday night with a ritual of exquisite beauty in the bursting arena of Yankee stadium focused on his frail figure in the white robes of peace.

The appeal of the shy pontiff brought crowds of at least four million to the sidewalks of New York's great melting pot and 90,000 more jammed the stadium to see the pilgrim Pope of the Roman Catholic Church celebrate mass on the spot where Babe Ruth held sway.

Paul came to this most opulent of the world's cities with a cry for peace. And, for the most, the crowds were curiously subdued and in awe at the sight of the pontiff, his face occasionally wreathed in a smile and his arms extended in embrace or raised in benediction.

His stay came to a stirring climax in the cold night at the great ball arena, packed with the greatest crowd in its 42-year history as men and women of all faiths watched the Pope celebrate the mass.

The spectacle was telecast throughout the United States and sent by Early Bird Satellite live to a potential 44 million viewers in Europe and behind the Iron Curtain.

Standing in an open car, the Pope circled one and a half times around the stadium more accustomed to the likes

Yankee Stadium Mass

Pope Paul VI, wearing mitre, delivers his sermon at the Papal Mass for Peace at Yankee Stadium Monday night.

Pope Says Peace Key To Survival

NEW YORK (UPI)—Pope Paul VI warned the United Nations during a historic 14-hour visit to the United States Monday that mankind must find permanent peace or perish. President Johnson said the pontiff's peace pilgrimage "may be just what the world needs."

Crowds of at least four million hailed the pontiff as he made history's first papal visit to the United States. He came here as a pilgrim to plead for peace before the United Nations; but the emotional highspot of the visit was a mass Monday night at Yankee Stadium.

It was a long and tiring day for the frail 68-year-old pontiff who was up before dawn at the Vatican and arrived here at 7:25 a.m. CST. Before his departure Monday night he completed a rigorous schedule probably never before equalled by a reigning Pope.

The Pope's plane lifted off at 9:29 p.m. CST.

He rode in a 24-mile motocade through New York, spoke at the United Nations, conferred with the President, made 11 speeches, talked with Jewish and Protestant leaders, celebrated a mass and delivered a sermon at Yankee Stadium and visited the Vatican pavilion at the world's fair.

He was greeted by a sea of flags and cheers of the mil-

Sighted

TEXARKANA, Ark. (Staff) —A red, yellow and blue object which "seemed to alternate colors" has been spotted here by two local women.

A sighting Friday that lasted nearly one minute was reported by Mrs. J. E. Magee and her sister, Mrs. Lucille Paul. "It was about one-third as large as the sun," Mrs. Magee said.

The single report was the first since an epidemic of sightings plagued the area in August, according to the editor of the Texarkana Gazette.

You Can Help

Here's how you can help solve the flying saucer riddle in the United States:

1. If you have a camera, keep it loaded with color film. If you see an unidentified flying object in the sky, shoot a picture and you may have the second known color photo of a flying saucer.

2. If you don't have a camera and see a UFO, call the Journal immediately and give our professional photographers an opportunity to make the picture.

3. If you have already seen UFO, please send us complete details in a letter, giving time of sighting, description and all details. The information, with your permission, will be sent to proper authorities for evaluation. Send to The Oklahoma Journal, UFO Research, 7430 SE 15, Oklahoma City, Okla.

Jets Blast Cong Nest

SAIGON (UPI)—Giant U.S. B52 jet bombers in a predawn raid Tuesday blasted war zone "C" where the headquarters of the Communist Viet Cong is believed hidden in a maze of tunnels and bunkers.

The B52 raid, the 37th in South Viet Nam, took place 15 miles north of Tay Ninh city and about 70 miles northwest of Saigon. It followed fierce battles Monday on two fronts in the south between Communist guerrillas and Vietnamese government troops.

U.S. paratroopers, meanwhile, pushed into the war zone "D" north of Saigon in a new sweep against the Viet Cong.

U.S. Insane, Welch Claims

The founder and president of the John Birch Society Monday night described the U.S. as one vast insane asylum and charged the country's civil rights movement is Communist-inspired.

Robert Welch's remarks met with loud applause, standing ovations and cheers of nearly 700 persons at a society meeting in Municipal Auditorium.

Speaking on "A Touch of Sanity," Welch told the audience, "The whole country is one vast insane asylum and its letting the worst patients run the place."

Welch dwelled at length on Algeria's struggle for freedom and independence, paralleling it with the Negro revolution in America.

"The civil rights movement is planned, developed, promoted, controlled and run by Communists for Communist purposes," said Welch. His remark met with audience cheers.

Welch insisted the rash of Negro riots also are Communist-backed and designed "to terrorize Negroes from opposing" the civil rights movement.

He said the scenes in Harlem and the South do not make sense "unless you see what communism is trying to accomplish." Operating under the guise of a Negro revolutionary movement, Welch said the result is the killing of thousands of whites by a few criminal Negroes that the Communists can inflame.

ROBERT WELCH

"The Communists have no interest in the welfare of the Negro," said Welch.

The gray-haired Birch Society leader said that 95 per cent of all people supporting the civil rights movement do so for idealistic reasons. He added, "If 20 per cent of the American people realized that the civil rights movement is part of the Communist conspiracy, it would collapse in three months."

"The duty of the John Birch Society is to bring basic sanity back to the American scene. There is madness all

Watch For Journal Series On Saucers

With publication Tuesday of what is believed to be the first night color photograph of a flying saucer, The Oklahoma Journal launches an important series on unidentified flying objects.

The series will deal with saucers, their origin, history and mystery surrounding the reports.

Why are saucers here? What are they doing? Read this important series and find out details never before published in Oklahoma City.

If you're not a subscriber now, call OR 7-0521 and ask for circulation. They'll be glad to start delivery of your Journal in the morning.

First Night Color Shot Of Flying Saucer Bared

Copyright 1965 by The Oklahoma Journal Publishing Co.

At approximately 1:45 a.m. on August 2, Alan Smith, 14, standing in the back yard of his Tulsa home, pointed his small camera toward the darkened sky and clicked the shutter.

The image he recorded on the color negative may become the most famous photograph of our age.

Young Smith was sighting his camera at an unidentified flying object in the sky. He and his father had observed the UFOs August 1 and this night were prepared.

The image he got is believed to be the first night color picture of what is commonly called a flying saucer. The picture is eerie. The consequences of the one-in-a-million shot are far-reaching.

The negative shows a yellow, blue and whitish egg-shaped object, clearly defined in the sky. Protruding from the object are three tiny fingers which many have speculated may be the propulsion system. They could have been something else.

The picture was taken on a night when a rash of UFO's were sighted in Tulsa, Oklahoma City, Norman and other points throughout the southwest.

These were explained away by the Air Force as ...rs, planets, light...

west to east. From my back yard, it looked to be the size of a basketball or soccer ball.

"It again appeared as a ball of light, but moved slower than it did the first night. It was changing color from white, to red to blue-green. It's light pulsated with a high whining sound emiting from it. As the sound grew louder, the light was brighter. It gave us the creeps."

Five persons in the immediate vicinity saw the object that second night.

They included Alan; his father, A. L. Smith, 43, a turbine engine inspector for American Airlines in Tulsa; his sister, Sheryl Holt, 18; Sheryl's husband, Ron Holt, 18, and a neighbor boy, Daryl Swimmer, 15. Alan's family lives at 4719 S. 29 W, Tulsa. The Swimmer family lives at 4721 S. 29 W.

Smith, his son and daughter and her husband and the neighbor youngster all gave the same basic description of the light in the sky but pointed out that it did not appear the same as it does in Alan's color picture.

"It was just a blob of light," his sister says. When it was almost directly overhead — about 11
