INITIALS EMH

COMMENT: The sighting observed by this person was clear and she did not act overly excited. Was definitely sure she was not seeing things, she assured her husband of this, being that he was the first to call attention to this. This party, after terminating our telephone call, called back and stated her husband had called her saying it was reported over the radio that there was an obvious sighting of some object at approximately the same time that this occurrence took place. I have no way of determining if this was an aircraft or satellite of our own or foreign.

ERNEST A. HEGNER, Civilian
Base Flight Operations Dispatcher

PROJECT 10073 RECORD

1. DATE - TIME GROUP 12 September 65 12/2300Z	2. LOCATION Chicago, Illinois (2)
3. SOURCE Civilian	10. CONCLUSION INSUFFICIENT DATA FOR EVALUATION ✓ Will be evaluated if form 164 is returned.
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 30 seconds	11. BRIEF SUMMARY AND ANALYSIS Observers sighted a yellowish-green oblong object. At first it was stationary and then it moved very rapidly towards the SW. When the object moved it caused a reddish haze. The object seemed to have an outer stationary circle and an inner circle spinning clockwise. Sounds like reflection or even possible a/c. If directional data is such that flight path consistent with duration.

Dear Sirs:

Three friends and I thought we spotted an unidentified flying object. The following is all we thought we could remember.

1. We saw the object on Sept. 1, 1953.
2. We saw the object at 5:50 p.m. to 9:
3. We are in the Central time zone and we are on daylight savings time.
4. We were in an alley talking when one of us saw it. The nearest postal address was 2141 Touhy Ave, which is in Chicago, Ill.
5. We saw the object for about 20 to 25 minutes. We are not positive.
6. There wasn't a trace of daylight. There were a few stars out. The moon was bright.
7. It was brighter than the background, and was as bright as an automobile light about a mile and a half away.
8. The object seemed to veer off to the right and then to the left. Other wise it just moved straight north.
9. It didn't move behind anything in the sky, but it was lost to our view when it got behind a house.
10. It didn't move in front of anything either.
11. The object appeared to be a solid.
12. We didn't look at it through any eyeglasses, sunglasses, etc.
13. The object made no sound, and it was white.
14. The edges of the object were like those of a star.
15. There was only one object.
16. It is impossible to estimate the distance or speed of the object.
17. The object was on the ground in the residential district.
18. When we spotted it a object in the residential district.
19. The light was very clear and there was a slight breeze.
20. We also saw and heard that night.
21. This was the first official report of the object.
22. The object was also seen by a friend. There name is as follows.

[Redacted]
Chicago, Ill. Chicago, Ill. Chicago, Ill.

23. This is the first time any of us have seen anything like this.
24. We couldn't estimate the size of the object either.
