Dear Sir,

I am sending my version of the sighting of the U.F.O.'s as you requested I do, in writing.

October 28, 1965

I was driving south on Jay Lane at about 12:25 in the afternoon. I came to Central road and stopped, I looked to the right and as I started to look to the left I saw 2 objects in the sky straight ahead but at approximately a 50° angle. The objects were in the southern part of the sky. They didn't appear to be moving, they looked like two miniature moons (the way the moon shines at night), they were about the size of a silver dollar, they didn't move one way or another, just fixed, round like the moon. I watch for several seconds amazed at the sight, then the objects became flat like a line in the sky. I don't remember seeing them maneuver in any way except that they just turned into thin lines, then I believe they started moving. I'm not sure because when the globes turned into lines, I decided to drive home to see them better from my windows which are on the 2nd floor.

p.s. During the whole sighting a jet was rising slowly to the far left of the objects, the jet was moving up in the general direction of the objects then the objects turned into thin lines and I think started to move further south. I remember thinking that the jet had seen the objects and ~~was~~ going up to investigate them. Whether this fact is valuable to you or not, I don't know. If I can be of further help, please let me know.

AS GLOBES

Glowing LIKE THE
