21 Sept. 66

Contact was made with Mrs. [REDACTED] concerning her observation of an unusual phenomena.

Observer was driving car south when she noted 2 balls of fire. as she + her husband watched the ~~set of~~ objects there was a white object that busted into another red object. The objects seemed to just dissolve away. Observer said she did not see the moon which was setting at about 2400.

At Mainz,

Your analysis looks
good to me — I think
Mr Beck saw the moon
disappear behind a cloud —

A low windshield,
especially if it's tinted,
can result in refraction
and give a double image
which might explain why
he saw two objects —

Movement of the cloud,
or a hallowing effect, might
cause the object (moon) to
appear to roll in & out of
the cloud — May Smith

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

This sighting was one of interest to me because of the angle of entry and the banking off and maintaining this attitude for the duration of their flight.

After the last object disappeared the small vapor or smoke clouds formed into one large cloud and continued on moving west and began to break up southwest of Laura, O. Approx. 2 mi.

At 23:45 I went outside and estimated level of cloud at 3000 feet.

The time these objects were visible outside the clouds was approx. 20-30 seconds, the complete time given earlier in this form was the total time from the first to the second sighting and the final cloud formation.

My final thought is that these objects were closer to me than I thought.

OVER

I would appreciate any answer
you could give me of this Phenomenon
which my wife and I witnessed on
this night.

Thank you,

Conversation with R [redacted] Laura, Ohio on 25 August 1966

Something weird came from the East last night at 1125 pm. Between Troy and West Milton. Left a contrail and left a cloud formation. Out of this orange disc shaped object, on its side, came $\frac{1}{2}$ out of cloud and watched it for eight minutes. Then a little cloud appeared and out of the front side came the orange and then all the clouds formed into one. Proceeded home and these clouds were breaking up. Thought it was approximately 5000 ft alt. His wife called his attention to it, looked like a ball, thought may be it was an aircraft breaking up. It would come and go. There was a large cloud coverage. It entered the atmosphere on 120 deg angle to the left, entered west. This thing was traveling from east to West. Came out from a cloud and then went back in a cloud. Called the Sheriff about it, don't know if he had any other reports. This cloud formation went into one main cloud and then broke up. Mr. Beck said he would be willing to fill out a form and would make a sketch of what he observed. Form 164 sent to him on 25 Aug 66.
