27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? \_\_\_\_\_

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One)  Yes  No

31.1 IF you answered YES, did they see the object too? (Circle One)  Yes  No

31.2 Please list their names and addresses:

33. When and to whom did you report that you had seen the object?

8 March 1967  
Day Month Year  
Reported to: [Redacted] - State Trooper (Stephenson State Police Post)

34. Date you completed this questionnaire:

4 May 1967  
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The speed at which this object lost altitude before hovering and moving about made us realize this was not a star or aircraft of any sort, that we were familiar with. And the fact that we can only report it as a very bright light without any other shape or form, almost seems inadequate for a scientific evaluation.
