

**PROJECT 10073 RECORD**

<b>1. DATE - TIME GROUP</b> 1 Mar 67      02/0530Z	<b>2. LOCATION</b> Memphis, Tennessee (1 witness)
<b>3. SOURCE</b> Civilian	<b>10. CONCLUSION</b> Possible <del>(AIRCRAFT)</del>
<b>4. NUMBER OF OBJECTS</b> One	
<b>5. LENGTH OF OBSERVATION</b> 20-30 seconds	<b>11. BRIEF SUMMARY AND ANALYSIS</b> Object was dark and elongated similar to cigar but not tapered to end. Object had lights on underside which blinked in sequential pattern with undulating effect. Observer states she is in the habit of looking at the sky and saw light as result. Object almost even straight overhead, possibly a little to the north. Object disappeared instantaneously to the north.
<b>6. TYPE OF OBSERVATION</b> Ground-Visual	
<b>7. COURSE</b> North	
<b>8. PHOTOS</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
<b>9. PHYSICAL EVIDENCE</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No. But I have seen other UFO's several times in the last 2 months in this vicinity. See # 35.

31. Was anyone else with you at the time you saw the object? (Circle One) Yes  No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes  No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [REDACTED] [REDACTED] [REDACTED]  
Last Name First Name Middle Name

ADDRESS [REDACTED] MEMPHIS 38111 TENN.  
Street City Zone State

TELEPHONE NUMBER [REDACTED] AGE 44 SEX F

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I am a psychiatric social worker in a child guidance clinic. Have M.S.S.W. degree & 9 years total experience in this field. Prior to that I was a Director of Religious Education in several Presbyterian churches, & have M.R.E. degree also. I grew up in Memphis. Became interested in UFO's in early 1950's through a friend who was a physicist. Have read several books on UFO's but only recently resumed interest in the subject because of new paperback books available & recent reported sightings in this area. I walk a lot & have open field.

33. When and to whom did you report that you had seen the object?

3 March 1967  
Day Month Year

I called the local AF office of special investigations & on the same date received a call from Lt. Col. Gardner, Blytheville AFB, & talked with him about 15-20 minutes.

34. Date you completed this questionnaire:

24 March 1967

(I would have sent it sooner but was out of town till 3/23, was leaving the day the questionnaire came.)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

See #30. I will try to list other UFO's I have seen before & after the March 2 observation. None of them were convincing enough prior to March 2 to make me feel I should make a report to AF. After the March 2 sighting I have seen several I wanted to report but have put off doing so because it takes time & I was quite busy getting ready to leave town to attend a convention in Washington, D.C.

Jan. 21 (I believe that is correct date) Saturday, 2:45 pm - saw a small, bright, silvery object from my backyard, in general NE direction. No sound, saw it 3-4 min. Clear, slightly hazy day. Saw no wings on it & felt it moved more slowly than airplane. Told a friend about it & she called Weather Bureau the next day. Saw two other similar objects but not convinced they were not airplanes.

March 12 - A bright, clear Sunday afternoon, about 2:15 pm. From corner of Jackson & University Ave., saw a round or egg-shaped yellowish-white object pass directly overhead from South to North. No sound. It went in a straight line, did not bounce or wiggle at all (I thought it was a balloon) or change altitude. Wind was from South, 15-20 mph, but this went faster, & was out of sight in less than 1 minute. Looked about 500 feet altitude. A friend was with me & also saw it. Later we glimpsed it again.

I saw it or some other object still later (30 min. later.) Will fill out report on this if you like.

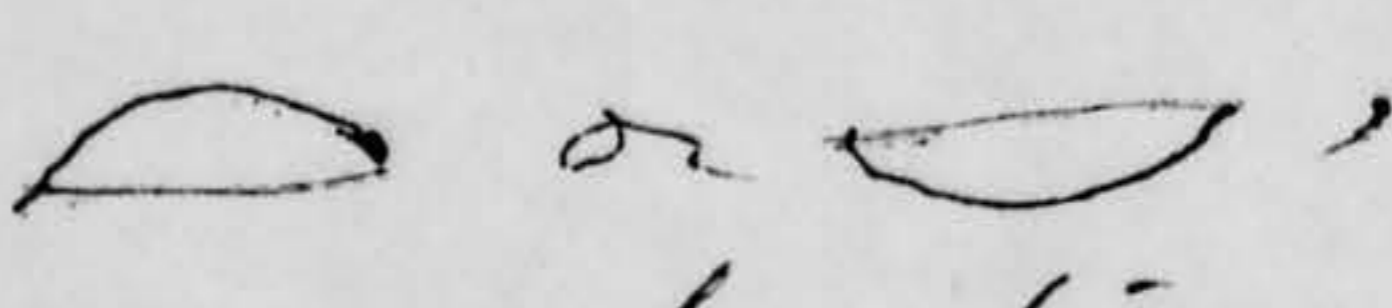

Weather Bureau & they said they sent up a balloon at 11:00 a.m.

Between March 12 + 18 from my backyard I saw several UFO's: (all at night).

A small reddish light, the same <sup>size &</sup> brightness as a moderately bright star, which moved in a straight line but then circled, made no noise. It disappeared when I went to get another observer. While I was peering intently at it, a dark, perhaps transparent thing passed overhead at lower altitude & was gone before I could focus on it. No sound. It was late at night & could have been a bird, but I have never seen a bird like that at that hour. (It went straight, not like a bat, etc.)

A low-~~flying~~ flying object (about 5-10 degrees from horizon) with flashing red & orange lights, no noise, late at night, moving from So. to No. or No. to So., due East of my backyard. Have seen this 2 or 3 times & neighbors have also. The most impressive sighting was when it hovered & moved slowly back & forth, with lights changing from white to red to green or blue, like sparklers. Could see no shape or outline. Too low for airplanes & no sound. Other neighbors have seen oval, reddish objects near R.R. tracks N.E. of my house. All the dogs barked in ~~the~~ the direction of the object, & this is why I went out to look.

Last night (March 23) several neighbors & I saw a bright light almost motionless in NW direction, low on horizon, for 10 minutes or more. It dimmed, grew bright, went out, came back on, & finally went out or faded out. I called a friend

who lives in that direction about 3 miles away, but she did not see it. I thought it was a star at first, even though there is no bright star in that direction, — the evening star is <sup>recently</sup> several compass points South of there. There were no clouds & nothing visible which could have caused it to seem dimmer. Binoculars were not too helpful — it still looked small, but some observers thought it was disc shaped — like ,

I got that impression at times, thru binoculars. The first observers saw it from a moving car on way home & said it moved rapidly. They kept it in sight & called us to look when they got home. Today in the Commercial Appeal there was a report of "strange ovals" in the sky <sup>last p.m.</sup> seen by several people, including policemen. This newspaper is rather conservative in reporting UFO's, so the evidence must have been rather strong. The article said the sightings were from 8-10 pm, & it was about that time (8:00 or earlier) we saw the bright object.

I hope this will help. I will be glad to fall out some more reports & to be more accurate as to times, etc., if you would like. over  
→

Several children have also seen a long, white object at night which moved from W. to E in our neighborhood. It seemed almost transparent, & would stop & then move very rapidly. I believe they saw this on March 16 or 15 at about 10:00 pm. They all saw it at once & came running into my neighbor's backyard, quite excited & even a bit frightened. (They also got excited over a plain old star last pm, but I think they wanted attention, whereas on March 15 or 16 they seemed convinced & already had had plenty of attention when we were discussing their previous UFO sightings for the first time.)

## PROJECT 10073 RECORD

FORM  
FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

Air Force Major Hector Quintilla  
Wright-Patterson AFB  
Dayton, Ohio

Dear Major Quintilla,

I would like some information  
on U.F.O.s sighted around Memphis, Tenn.

I am a boy about 11 years of age and  
very interested in the subject of U.F.O.  
and even sighted one.

It was on Saturday March, 18, 1967:

On Saturday night my friend ( )  
( ) and I ( ) were over  
at his house for about 4 hours when we  
saw it. (We always go over in his (Dennis?)  
yard on Friday and Saturday nights looking  
for ~~the~~ U.F.O.s) It ~~was~~ looked like  
an airplane because it followed the landing  
pattern used by most planes landing  
~~and~~ at the ~~Memphis~~ Municipal airport.  
It went across the sky four times,  
on the fifth pass it took off at  
a tremendous speed.

over

Genef  
164

Yours truly

## U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Sat, 18      March      1967  
Day                  Month                  Year

2. Time of day: 10      5  
Hour                  Minutes

(Circle One):      A.M.      or       P.M.

3. Time Zone:

(Circle One): a. Eastern  
b.  Central  
c. Mountain  
d. Pacific  
e. Other \_\_\_\_\_

(Circle One): a. Daylight Saving  
b.  Standard

4. Where were you when you saw the object?

[REDACTED]      Memphis      Tennessee  
Nearest Postal Address      City or Town      State or County

5. How long was object in sight? (Total Duration)

0      40      0  
Hours                  Minutes                  Seconds

a. Certain                                  c. Not very sure  
b.  Fairly certain                      d. Just a guess

5.1 How was time in sight determined? By watch

5.2 Was object in sight continuously?      Yes \_\_\_\_\_      No

6. What was the condition of the sky?

DAY                                  NIGHT  
a. Bright                               Bright  
b. Cloudy                              b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you                      d. To your left  
b. In back of you                              e. Overhead  
c. To your right                              f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

\_\_\_\_\_

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
  - b. Like a bright star
  - c. Sharply outlined
  - d. Don't remember

c. Other \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

13. Did the object:

(Circle One for each question)

- |   |                                      |                                     |            |
|---|--------------------------------------|-------------------------------------|------------|
| a. Appear to stand still at any time?           | <input checked="" type="radio"/> Yes | No                                  | Don't know |
| b. Suddenly speed up and rush away at any time? | <input checked="" type="radio"/> Yes | No                                  | Don't know |
| c. Break up into parts or explode?              | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| d. Give off smoke?                              | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| e. Change brightness?                           | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| f. Change shape?                                | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| g. Flash or flicker?                            | <input checked="" type="radio"/> Yes | No                                  | Don't know |
| h. Disappear and reappear?                      | <input checked="" type="radio"/> Yes | No                                  | Don't know |

14. Did the object disappear while you were watching it? If so, how? The object move behind a tree

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):  Yes    No    Don't Know.    IF you answered YES, then tell what it moved behind: It moved behind a tree

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):    Yes     No    Don't Know.    IF you answered YES, then tell what in front of: \_\_\_\_\_

17. Tell in a few words the following things about the object:

a. Sound none

b. Color The object had red and white lights

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? about  $\frac{2}{5}$

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One)  Yes No

IF you answered YES, then what speed would you estimate? 40 mph

21. Do you think you can estimate how far away from you the object was?

(Circle One)  Yes No

IF you answered YES, then how far away would you say it was? 1/2 - 1 mile

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other \_\_\_\_\_

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other \_\_\_\_\_

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- |              |              |              |              |
|--------------|--------------|--------------|--------------|
| a. North     | c. East      | e. South     | g. West      |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

24.2 How fast were you moving? \_\_\_\_\_ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

- |                 |     |    |  |                                      |    |
|-----------------|-----|----|--|--------------------------------------|----|
| a. Eyeglasses   | Yes | No | <input checked="" type="radio"/> e. Binoculars | <input checked="" type="radio"/> Yes | No |
| b. Sun glasses  | Yes | No | f. Telescope                                   | Yes                                  | No |
| c. Windshield   | Yes | No | g. Theodolite                                  | Yes                                  | No |
| d. Window glass | Yes | No | h. Other _____                                 |                                      |    |

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

a pencil with "V" on top, or Block "Y"

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

Trees

29. IF there was MORE THAN ONE object, then how many were there? \_\_\_\_\_

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One)  Yes  No

31.1 IF you answered YES, did they see the object too? (Circle One)  Yes  No

31.2 Please list their names and addresses [REDACTED]  
[REDACTED]

32. Please give the following information about yourself:

NAME [REDACTED] [REDACTED] [REDACTED]  
Last Name First Name Middle Name

ADDRESS [REDACTED] Memphis 16 Tennessee  
City Zone State

TELEPHONE NUMBER [REDACTED] AGE 11 SEX Male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

20 March 1967 [REDACTED]  
Day Month Year

34. Date you completed this questionnaire:

Saturday      April      1967  
Day                      Month                      Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was at [redacted] house watching for UFOs with him, when I saw this object and said "Hey look! there's something." I asked him what time it was and he said "10:05".

The object moved back and forth across the sky, and on fifth time across, it took off and moved to a stationary position and went out as if someone turned off a light.

I would appreciate it if you would send me several Ftd 164 forms with envelopes in the case that I sight another object.

MEMO FOR THE RECORD: 17 April 67

Investigation revealed that there are two air refueling tracks in the area. The witness stated in the initial letter that the object looked like an aircraft in a landing pattern. The description is consistent with that of an aircraft sighting. An aircraft in a landing pattern could have accounted for the sighting.

Dear Major Quentenilla,

Could you give me Project  
Blue Book's evaluation of my  
sighting of Marsh (18 or possibly 20<sup>th</sup>).

Also, could you give me the  
names of all the people who  
have sighted U.A.O.s in the  
Batesville, Miss. area in the  
last 3 years? I would also ap-  
preciate any supplemental information  
you could supply me with.

Thanks

Personal Regards &

Harmon report

Dear Sirs:

I would like the blue book and  
any other ~~of~~ supplementary data  
which you could send me and

will you send ~~me~~ your evaluation  
of the report I submitted for  
a sighting in Memphis Tennessee  
March 18, 1967.

Thank You

Memphis, Tennessee

TDPT (UFO) Lt Col Quintanilla/70916/sjc/1 Jul 1968

UFO Observation, 18 March 1967

JUL 1968

2 Jul 68

Mr. [REDACTED]

Memphis, Tennessee 38116

1. This replies to your recent letter in which you requested the evaluation of your March 18, 1967 UFO observation.
2. You described the unidentified object as looking like an airplane, the lighting arrangement you drew is similar to that of an aircraft and you stated that the object looked like it followed the landing pattern used by most planes landing at the Municipal Airport. For these reasons, we feel that you observed aircraft in their landing patterns. Also, there are two air refueling tracks in your area. There is no indication that you observed anything extraterrestrial. Due to various atmospheric changes, people often misinterpret conventional aircraft for unidentified flying objects.
3. The Air Force is unable to release the names of witnesses to UFO sightings without their permission. UFO cases are filed chronologically and not geographically making a search for reports from Batesville, Mississippi too time consuming for the staff in our office.
4. The inclosed Blue Book brochure may be of interest to you. Thank you for your letter.

LT COL. QUINTANILLA, Jr, Lt Colonel, USAF  
Chief, Aerial Phenomena Office  
Aerospace Technologies Division  
Production Directorate

ATTN OF: TDET/UFO

15 March 1967

SUBJECT: UFO Observation, March 1967

1 MAR 67  
Memphis, Tenn

TO:

[Redacted]

Apartment 3  
Memphis, Tennessee 38111

Reference your unidentified observation. The information which we have received is not sufficient for a scientific evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided. Thank you for reporting your observation to the Air Force.

JAMES C. MANATT, Colonel, USAF  
Director of Technology and Subsystems

1 Atch  
FTD Form 164 w/envelope

TDET/UFO OFFICIAL FILE COPY

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- d. Don't remember

*not sure if moon was up, but I recall it was about a 3/4 moon at that time, & my impression was that it was not a moonless night.*

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

*solid with lights*

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

*Light window seen at great distance, - white & opaque.*

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
  - b. Like a bright star
  - c. Sharply outlined
  - d. Don't remember

*e. Other There was a definite outline but it was dark against a slightly lighter night sky so outline was not sharp.*

13. Did the object:

(Circle One for each question)

- |   |                                      |                                     |            |
|---|--------------------------------------|-------------------------------------|------------|
| a. Appear to stand still at any time?           | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| c. Break up into parts or explode?              | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| d. Give off smoke?                              | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| e. Change brightness?                           | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| f. Change shape?                                | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| g. Flash or flicker?                            | <input checked="" type="radio"/> Yes | No                                  | Don't know |
| h. Disappear and reappear?                      | Yes                                  | <input checked="" type="radio"/> No | Don't know |

14. Did the object disappear while you were watching it? If so, how?

*Went from South to North in straight line & faded into distance.*

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes  No  Don't Know. IF you answered YES, then tell what it moved behind: \_\_\_\_\_

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes  No  Don't Know. IF you answered YES, then tell what in front of: \_\_\_\_\_

17. Tell in a few words the following things about the object:

- a. Sound *None.*
- b. Color *Dark with pale white lights.*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

*About 1/4 or less.*

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

The lights were going off & on in a regular rhythm down the length of the object in opposite direction from the direction of movement across the sky. This gave it an undulating appearance like a caterpillar tractor tread, or like an (North) automated flashing sign which appears to point in a certain direction, like certain automobile turn-signals.

light  $\leftarrow \square \leftarrow \square \leftarrow \square$

(South)  $\rightarrow$

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

*Don't know size or height (altitude).*

IF you answered YES, then what speed would you estimate? \_\_\_\_\_

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

*An astrojet at that altitude  
would be about a mile  
up, I guess.*

IF you answered YES, then how far away would you say it was? \_\_\_\_\_

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other \_\_\_\_\_

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other \_\_\_\_\_

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? \_\_\_\_\_ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

Yes

No

c. Windshield

Yes

No

g. Theodolite

Yes

No

d. Window glass

Yes

No

h. Other \_\_\_\_\_

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

*I noticed it first because of the flickering white effect & thought it was a white kite tail or a reflection on a spider-web or wire. When I moved in order to keep it in sight I could see that it was oblong, dark, & shaped like a cigar or hot-dog-*

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? \_\_\_\_\_  
 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.
