

PROJECT 10073 RECORD

1. DATE - TIME GROUP 4 March 67 ⁰⁷ /1100Z	2. LOCATION Corvallis, Oregon one
3. SOURCE Civilian	10. CONCLUSION Astro(Mars) ✓ Mars was on an AZ of 164 deg at an El of 30 deg
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 15 minutes	11. BRIEF SUMMARY AND ANALYSIS Observer was putting the dog out doors when he looked up and saw a bright object in the southern sky. The object was round about the size of a pin head. It was red and yellow in color. The object did not disappear it was still visible when the observer quite looking. The only noted movement was a swaying back and forth. The description is consistent with that of an astronomical observation. Mars with a stellar magnitude of approximately -0.2 at this time of the year would have been the brightest thing in the southern sky.
6. TYPE OF OBSERVATION Ground Visual	
7. COURSE Stationary

<p>4. NUMBER OF OBJECTS One</p>	
<p>5. LENGTH OF OBSERVATION 2-4 minutes</p>	<p>11. BRIEF SUMMARY AND ANALYSIS Various observers around the area reported a bright round shaped object red in color slowly travel toward the west. One witness said that it looked like the object was on fire. Another witness said the object was more of a yellow color than a red. The object slowly rose from the ground or at an low altitude and traveled toward the west. One witness said that the object looked like it burnt up above the horizon. It appears that the witnesses could have seen a plastic bag with candles such as have been responsible for numerous UFO sightings as of late. A recent article appeared describing the construction of such a device.</p>
