Dear Mr. [REDACTED]:

This replies to your recent letter in which you requested information on your unidentified observation of April 8, 1967.

We have been unable to reach a definite conclusion on your observation because of insufficient information. Essential data, such as flight characteristics, angular velocities, maneuvers, etc., are quite important in a comprehensive evaluation. If you had reported your observation to your nearest military installation at the time, an evaluation would have been possible. The UFO investigator at your nearest military installation is in a far better position to conduct an on-the-spot investigation. Your information will be added to our present data base.

If you should ever witness another strange phenomena in our atmosphere, contact the UFO investigator at Stewart Air Force Base, New York.

Sirs:

Has the Air Force reached a conclusion pertaining to my sighting?
My name is [REDACTED] and I sent a UFO questionnaire to Wright Patterson
AFB during the month of April this year.

I was under the impression that a representative of the Air Force would
contact me to discuss my case. This has not been done.

If you have reached a conclusion please notify me of the results. I am
very interested in UFOs and am head of a UFO organization. We support
the Air Force's conclusions that at this time no scientific evidence has
been presented to support the idea that UFOs are extraterrestrial.

I am anxiously awaiting your reply,

Sincerely,

Lazar Keitelman

August 24, 1967

Dear Mr. [REDACTED]

Reference your latest correspondence of August 3, 1967. We are still unable to reach a definite conclusion on your observation because of insufficient information.

The description you submitted could be that of a hot air balloon. Many individuals launch hot air balloons; therefore, it would be impossible to determine whether one was in the area at the time of your observation.

The form you completed is a copy of an Official Air Force form; however, we normally need additional information on any sighting before reaching a definite conclusion. We recommend you contact the nearest Air Force base immediately after a sighting. The base investigator is in a far better position to collect essential data. If he is unable to reach a positive identification, he will then send the report to Wright-Patterson Air Force Base for further investigation. However, it is necessary to report without delay.

We regret that you are unsatisfied with our present policy; however, if you desire to contact the investigator at Stewart Air Force Base in the future. I am sure he will be available.

Sincerely,

Proposed reply to ~~XXXXXXXXXX~~, letter August 3, 1967 (Sighting April 8, 1967)

Dear Mr. ~~XXXXXXXXXX~~

Reference your latest correspondence of August 3, 1967. We ~~are~~
still have been unable to reach a definite conclusion on your
observation because of insufficient information.

A possible explanation would be that of a hot air balloon. The
description you submitted is consistent with such an evaluation.

There are many individuals who have launched hot air balloons; therefore,
it would be impossible to determine whether a ~~hot air balloon~~ was
positively in your area at the time of your observation.

The form you completed is a copy of an Official Air Force form;
however, we normally need additional information on any sighting
before reaching a definite conclusion. That is why an individual
needs to contact the nearest Air Force base. The base investigator
is in a far more desirable position to collect essential data, such
as detailed flight characteristics, angular velocities, weather
conditions, etc. It is his responsibility to collect and analyze all
data pertinent to each sighting. If he is unable to reach a positive
identification, the report is then sent to the office at Wright-Patterson
Air Force Base for further investigation for a final determination.

Since there was no indication in your report of a threat to the
security of the United States, nor was there any indication of any
new scientific or technical data, the Air Force does not feel that
further investigation into your sighting should be made.

Report submitted
to
Director

We regret that you are unsatisfied with our present policy;
however, if you desire to contact the investigator at Stewart AFB
in the future, I am sure he will be available.

The object seemed to come out of the middle of nowhere. It was in sight it was alone. It was angular by playing with a flashlight, but it was too big and weird. It happened so fast I don't really know what was. The other assumption was birds but birds don't fly that fast, don't fly at night and do not shine.

First, it travelled in a straight line. Then, it dipped, went around the house, and disappeared behind the trees. We never saw it again. It was like one of those things that you see in the night but it never definitely enters a

place and then it's gone.

At first I thought the thing was an airplane but it had none of the blinking ~~or~~ navigational lights or just the one steady light. Someone then mentioned that it might be a blimp advertising a new shopping center in town; however, it was the wrong shape for a blimp and besides, what company would be advertising at that time of night?

It was this morning when at the school orchestra someone mentioned that numerous people had called the weather and radio stations to report a U.F.O. at about 10:35 in the west end of town. Did I think it might be a U.F.O. I am inclined to submit this only after an eighth grader started talking about seeing an orange-red object at about that time during rehearsal.

I HAVE BEEN COMPILING DATA ABOUT FLYING SAUCERS SINCE 1947 AND I HAVE MADE TRIPS ON RESEARCH TO DIFFERENT PLACES, AT DIFFERENT DATES, A GREAT DEAL OF INFORMATION ACHIEVED, AND IMPORTANT FINDINGS. THIS IS ONE OF MY INQUIRING TRIPS PLANNED TO THE MOUNTAINS OF MICHOACAN WHERE I HEARD FLYING SAUCER HAVE BEEN SEEN VERY OFTEN. I DEPART FROM WATSONVILLE APRIL 8 1967, STAYS GUADALAJARA FEW DAYS AND FRIDAY 14. AT 4 P.M. I TOOK THE BUS TO MORELIA. APPROACHING DESTINATION THE SIGHTING TOOK PLACE. ON A WINDING ROAD THAT KEEP ME DISORIENTED. THE FOLLOWING DAYS SPENT ON RESEARCH. TOO MANY PEOPLE HAVE SEEN THE UFO'S AROUND HERE. SOME LITTLE SHEPHERDS HAVE COINED A NEW NAME FOR THEM. THEY CALL THEM FLYING "SOMBREROS". (HATS).

Flying Saucer? Nope, Flying Sign

It was a sign of the times — not a flying saucer.

When Oklahoma City residents saw something crossing the sky for more than an hour Saturday night they telephoned police and stared into the sky.

A Cessna 172 airplane towing a 40-foot-long electric advertising sign flew north to south from 7:30 to 9 p.m. Saturday.

Telephone calls started soon after pilots Allen Mosley, 35, of 111 Kelley Dr., Moore, and William

Haynes, 35, of 409 NW 92, took to the air with a 9-foot-high sign covered with white electric lights.

Oklahoma City's police department received the most calls (more than 2-dozen). Other metropolitan police departments also were phoned.

Tinker Air Force Base, Will Rogers World Airport tower and Wiley Post tower also received calls.

Police information officer J. D. Burkhart received the first call and mentioned it to a skeptical re-

porter. The reporter walked up one flight of stairs to the police dispatcher's office and found D. C. Bowen also talking on the phone about a flying saucer.

And then the phones really started ringing.

Most of the calls came from the northwest Oklahoma City area. The "craft was seen hovering over my house," a man said. "My son and I are watching it this second," an excited mother said in another

conversation.

Most of the calls were the same report, and were prefaced by: "I saw it. What is it? You won't believe this," and "Now I'm not a nut, but..."

Oklahoma City police via telephone quickly learned from Tinker's Rapcon (Radar Approach Control) that the base was in radio contact with the pilots and it "all was an advertising gimmick."

Police learned the pilots had written permission from the Federal Aviation Agency several days ago.

Two persons entered the police station to give their eye-witness account.

"It looked like a giant hamburger bun without meat," Mrs. Linda Simmons, 39, Oklahoma City, said. Her sister-in-law, Miss Jean Rice, 14, said: "There were lights in the middle of it where the meat would be going 'blip, blip, blip'."

The pair said everyone (about 50 persons) parked at a downtown drive-in cafe was out of the cars and looking upward. "One guy even tried to follow it in his car," Mrs. Simmons said.

The pair was enlightened about the Cessna 172 and seemed a little disappointed.

The pilots, both Tinker flight instructors, are the men who fly the bannered plane at the University of Oklahoma's home football games.

Mosley said their plane flew from 65 to 85 miles per hour at about 1500 feet. "We flew over the field here several times to make sure people could read the sign at that altitude," he said.

Asked if he was concerned about triggering a flying saucer scare, Mosley said: "I hope it didn't scare anyone, but it is to attract attention."

THE OKLAHOMA JOURNAL, WEDNESDAY, MAY 24, 1967

UFO Seen In City

A Del City man reported sighting a "flying saucer" in the southwest skies over Oklahoma City Tuesday night.

Jim Misenheimer, 4125 SE 29, said the flying object had the appearance of a billowing parachute with "a bunch of lights in line."

He said the lights pulsed at five-second intervals as the object circled in the southwest skies, turned south and reversed directions at least once.

Misenheimer said the object was first spotted by Wilma Patrick, daughter of Mr. and Mrs. Amos Patrick. It was also observed by Mrs. Misenheimer and Mr. and Mrs. Patrick. The sighting was at 9:22 p.m. and the object went out of sight about 10 or 12 minutes later, they reported.

"I know it wasn't a plane," Misenheimer said.

At the time I saw the objects I was talking on the phone, looking out the window when they appeared from the north west over the hill. They were not too high first seem to glide along not real fast. I could not hear any sound in the house. And they were soon gone over the other hill to the south east.

We have very open minds towards this. We figured that it might not be anything more than a weather balloon or airplane. We as a class figured you could tell us what you think it is. It didn't leave a jet stream, nor did it leave a sound, yet the sound may be due to the distance we were away from it. It was pretty high up and distinct features could be given. The class was an Academic Analytical Geometry class. A total of twenty-seven watched the (object).

I'm John Brumberg and I have been delegated to write to you and find out what you think please send information to my address on the other page because we will be leaving school shortly.

Thank you

I walked out of my friends house about 7:10 AM. (13-4-67). I looked up in the air and saw two airplanes one traveling west and the other east. The object ~~and~~ then spotted to the left of the airplane ^(west) which was before it. As the plane advanced more west the object turned north and went over the airplane. It was hovering all the while I saw it. It then proceeded North until another airplane was to the right of it coming from the North East. The object ^{then} went ~~then~~ toward the airplane changing its direction to northeast. It went over it and went on until it came to a complete stop. Something came out of the bottom smaller the object $\frac{1}{2}$ of its size. It ~~came~~ out about 10 ft. from the bottom and it also stopped about 3 sec. as I begin to write this report of which I saw
on the evening of April 12, 1967 it was quite late
ten as I stepped outside to gaze at the stars for
the evening was quite warm I was looking towards
the western horizon when suddenly there appeared
a bright shiny object which seemed unusual for
a star I observed the object for five minutes
when I noticed it was moving at a very slow
pace and rising I ran inside my house and
picked up a pair of binoculars ran outside and
discovered the object which I was observing stopped
moving and made a peculiar shape like a roll of
film unwound with a arrow head on the end of it
that how it looked with out the binoculars color
of object was like a yellow star but I couldn't

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

12 4 67
Day Month Year

2. Time of day: _____
Hours Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address

City or Town

State or County

5. How long was object in sight? (Total Duration)

Hours Minutes Seconds

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes _____ No _____

6. What was the condition of the sky?

I was leaving my house and just as I stepped off my back porch I noticed this red-white color changing light. I called my mother and ran upstairs while she watched it. I got my binoculars and got a short look at the object just before it went behind the hill. It appeared the same as it did to the eye. I then later it disappeared ran up Maple Ave to see it I could see it again, which I didn't. I have counted out airplane because it moved too slowly and helicopter because a helicopter that close would make a hell of a lot of noise.

Proposed reply to [redacted], letter August 3, 1967 (Sighting April 8, 1967)

Dear Mr. [redacted]:

Reference your latest correspondence of August 3, 1967. We still have been unable to reach a definite conclusion on your observation because of insufficient information.

A possible explanation would be that of a hot air balloon. The description you submitted is consistent with such an evaluation. There are many individuals who have launched hot air balloons, therefore, it would be impossible to determine whether a hot air balloon was positively in your area at the time of your observation.

The form you completed is a copy of an Official Air Force Form; however, we normally need additional information on any sighting before reaching a definite conclusion. That is why an individual needs to contact the nearest Air Force base. The base investigator is in a far more desirable position to collect essential data such as detailed flight characteristics, angular velocities, weather conditions, etc. It is his responsibility to collect and analyze all data pertinent to each sighting. If he is unable to reach a positive identification the report is then sent to the office at Wright-Patterson Air Force Base for further investigation for a final determination.

Since there was no indication in your report, of a threat to the security of the United States, nor was there any indication of any new scientific or technical data, the Air Force does not feel that further investigation into your sighting should be made.

AUG 21 1967 *h Sefuni*

We regret that you are unsatisfied with our present policy;
however, if you desire to contact the investigator at Stewart AFB
in the future, I am sure he will be available.

attn: Lt. Colonel Barnett B. Young

Dear Mr. ~~_____~~

This is a reply to your letter explaining my observation of an unidentified flying object.

In that letter you stated that my observation could not be thoroughly investigated due to insufficient data. You stated that flight characteristics, maneuvers, angular velocities etc. are essential for proper investigation. If you check the form I submitted to Project Blue Book, Wright-Patterson AFB, you would clearly see that I described flight characteristics and maneuvers, though they were not irregular. As for angular velocities, I saw no questions pertaining to this subject nor explaining this characteristic of flight.

I filled out all the questions accurately, as well as including a two page narrative of my experience. I am connected with a UFO organization which supports the Air Force stand that there is no evidence that UFOs are extraterrestrial. I am very familiar with this mystery. And I can say that I have eliminated all of the common explanations from the planet venus to ion plasma. To me, receiving a letter stating insufficient data is unacceptable.

I am sure that if you wished, This case could be investigated. I cannot accept this because I know that the Air Force has the means to investigate every case.

If my report was lacking in information why was I not contact immediately so I could supply the information? I am sure you will not overlook this case again, and will contact me as soon as you come to a plausible conclusion.

I can now see why many people become angry with the Air Force after receiving such a letter. As Chief of the Community Relations Division, you should realize that a letter such as that one could only antagonize a citizen who is truly searching for an answer to his case but is left "hanging in the air."

I hope you will ask for my case to be reexamined. I would like to contact the UFO investigator at Stewart AFB, New York concerning this case unless you think it is too late for this since a few months have past.

Sincerely,

Proposed reply to letter from [REDACTED] (Sighting: Apr 3, 1967)

Dear Mr. [REDACTED]:

This replies to your recent letter in which you requested information on your unidentified observation of April 3, 1967.

We have been unable to reach a definite conclusion on your observation because of insufficient information. Essential data such as flight characteristics, angular velocities, maneuvers, etc., are quite important in a comprehensive evaluation. If you had reported your observation to your nearest military installation at the time, an evaluation would have been possible. The UFO investigator, at your nearest military installation, is in a far better position to conduct an on-the-spot investigation. Your information will be added to our present data base.

If you should ever witness another strange phenomena in our atmosphere, contact the UFO investigator at Stewart AFB, New York.

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

it looked very close to the light that they shut up in New York if there is a fire box on the corner, but I stress

this is definitely not that.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass when you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. If there was MORE THAN ONE object, then how many were there? JUST ONE
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

I am the head of an amateur UFOLOGIST CLUB (S.P.A.I.C.) I have written Project Blue book before for information but did not include this fact. I am familiar with all UFO phenomena and feel I am an experienced or should I say competent observer. I am familiar with local aircraft.

I was going to ride my slot car with a friend, Mitchell Bornstein. We were at the bus stop of 34th St + Glenwood Road B'KLYN N.Y. We waited and then I saw it first. I turned to my friend and said "Is that an airplane?" and he said No. there was a lady at the bus stop, one of the *unknowns, and she still did not notice. I then said to Mitchell that it wasn't carrying any running lights. I then turned to the lady and said "Do you see that?" she answered yes. She was very interested and pointed at it. It moved slowly for a short distance for about 2 minutes. It then came to a dead stop and we all said it stopped. 2 men were walking by and they saw that we were excited and I turned to look at it. They confirmed the sighting. I didn't know who they

were. I then tested for angular size, distance, altitude, direction, time, wind, (about 3-5 mph from the west) and speed. (Let me make a correction, I estimated the speed since it had by now it stopped) I checked the weather, moon & stars. I didn't notice until later but a man had come out of his house to watch. I am including his name in this report without permission. All six of us then confirmed that particles were falling from the bottom of the UFO. These particles were only visible a few seconds ① after being dropped, but they kept coming one after another. I estimate about 20-30 "particles". Interesting thing was that the size, shape, and brightness of the UFO did not change when this was happening. After the particles had been dropped the UFO gradually ~~to~~ faded away but did not move. We then boarded a bus and I talked to Mitchell about the sighting extensively. The entire incident took about 5 minutes. I have eliminated certain possibilities through my experience and my knowledge of UFOs. (continued on paper)

- ① The particles may have reflected the light of the UFO. That may be the reason we saw them only for a second or two.

Sirs:

Has the Air Force reached a conclusion pertaining to my sighting?
My name is L. [REDACTED] and I sent a UFO questionnaire to Wright Patterson
AFB during the month of April this year.

I was under the impression that a representative of the Air Force would
contact me to discuss my case. This has not been done.

If you have reached a conclusion please notify me of the results. I am
very interested in UFOs and am head of a UFO organization. We support
the Air Force's conclusions that at this time no scientific evidence has
been presented to support the idea that UFOs are extraterrestrial.

I am anxiously awaiting your reply,

Sincerely,

[REDACTED]
