## U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Sept 11 Nov 1967  
Day Month Year

2. Time of day: \_\_\_\_\_  
Hours Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern  
b. Central  
c. Mountain  
d. Pacific  
e. Other \_\_\_\_\_

(Circle One): a. Daylight Saving  
b. Standard

4. Where were you when you saw the object?

Cement City Jubson Michigan  
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

1 \_\_\_\_\_  
Hours Minutes Seconds

a. Certain  
b. Fairly certain

c. Not very sure  
d. Just a guess

5.1 How was time in sight determined? By clock

5.2 Was object in sight continuously? Yes \_\_\_\_\_ No ✓

6. What was the condition of the sky?

DAY  
a. Bright  
b. Cloudy

NIGHT  
a. Bright  
b. Cloudy

7. If you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you  
b. In back of you  
c. To your right

d. To your left  
e. Overhead  
f. Don't remember

8. If you saw the object at NI

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight—pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

Arcturus

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
  - b. Like a bright star
  - c. Sharply outlined
  - d. Don't remember

e. Other \_\_\_\_\_  
\_\_\_\_\_

14. Did the object disappear while you were watching it? If so, how?  
*yes behind a cloud*

---

15. Did the object move behind something at any time, particularly a cloud?  
 (Circle One):  Yes    No    Don't know.    IF you answered YES, then tell what it moved behind: *When it moved it would go behind a cloud or the cloud moved in front of it*

---

16. Did the object move in front of something at any time, particularly a cloud?  
 (Circle One):  Yes    No    Don't know.    IF you answered YES, then tell what in front of: *It went in front of a cloud or cloud went in front of it*

---

17. Tell in a few words the following things about the object:  
 a. Sound *no sound*  
 b. Color *Reddish white*

---

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?  
*It was about the size of a large star.*

---

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

*clouds*

*object*

20. Do you think you can estimate it? (Circle One)  
 IF you answered YES, then who

---

21. Do you think you can estimate how fast? (Circle One)  
 IF you answered YES, then how

---

22. Where were you located when you saw the object? (Circle One):  
 a.  Inside a building  
 b. In a car  
 c. Outdoors  
 d. In an airplane (type)  
 e. At sea  
 f. Other \_\_\_\_\_

---

24. IF you were MOVING IN AN AIRCRAFT:  
 24.1 What direction were you moving?  
 a. North  
 b. Northeast  
 24.2 How fast were you moving?  
 24.3 Did you stop at any time while you were moving? (Circle One)

---

25. Did you observe the object through:  
 a. Eyeglasses    Yes  
 b. Sun glasses    Yes  
 c. Windshield    Yes  
 d. Window glass     Yes

---

26. In order that you can give as clear a description as possible of the objects which, when placed up in the sky, would appear like the object you saw, draw a picture of the object as you saw it.  
*a bright*

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

IF you answered YES, then what speed would you estimate? \_\_\_\_\_

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

IF you answered YES, then how far away would you say it was? \_\_\_\_\_

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other \_\_\_\_\_

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other \_\_\_\_\_

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? \_\_\_\_\_ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

Yes

No

c. Windshield

Yes

No

g. Theodolite

Yes

No

d. Window glass

Yes

No

h. Other \_\_\_\_\_

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

*a bright light*

MEMO FOR THE RECORD

Based on telecon with Mr. Dort of FAA, North Olmsted, Ohio

Mr. Dort said that they had picked up an unidentified target on November 11 on their radar. The object was a definite, primary target and was in a place where they didn't ordinarily pick up targets.

Initially the target was at an azimuth of 070 degrees, was traveling about 50 mph and was approximately 20 to 25 miles north of Erie. Although they have no height finder, Mr. Dort felt that the target would have had to have been quite high. Olmsted lost the object about 8 miles NW of Buffalo. Buffalo lost it at about 3 miles.

There are no scope photos, and no one actually saw the object. It traveled in a straight line from initial position toward Buffalo.

Mr. Dort said he thought it must be a balloon. He stated that the wind was in the right direction but that he could not find anyone who had launched a balloon that should have been in the area at that time.

North Olmsted, Ohio 44070

1. Reference your radar sighting of an unidentified flying object on November 11, 1967. Request you provide information on the following questions.

- a. What time was it when you first observed the object? What is the length of time that it was observed?
- b. What was the height, course, and speed of the object?
- c. From the height and return strength could you estimate the size of the object?
- d. What type of radar was used?
- e. Did anyone else track the object?
- f. How did the object disappear?
- g. Do you know of any possible cause for the sighting?
- h. What action was taken to determine the identity of the object?

2. Your assistance in providing additional information on your sighting is appreciated.

North Olmsted, Ohio  
December 11, 1967

Department of the Air Force  
Aerospace Technologies Division  
Wright-Patterson Air Force Base, Ohio 45433

Dear Sir:

The following information is provided per your request regarding the unidentified target observed on the Cleveland Center Radar on November 11, 1967.

- a. It was first observed at approximately 2105 EST and observed for about 1 hour and 30 minutes
- b. Height was unknown, but estimated to be above 10,000 feet due to radar coverage in that area.
- c. A very large primary target was received. Would equal or better than a DC-6 type aircraft.
- d. ARSR radar was being utilized.
- e. As object approached Buffalo Terminal Area, it was pointed out to Buffalo Tower at Buffalo, New York.
- f. The target just vanished both from the Cleveland Center's and Buffalo Tower's radar, where radar coverage is excellent. This was approximately 10 miles northwest of the Buffalo VOR.
- g. No.
- h. Action was taken to vector aircraft to the area of sighting. Due to obscured weather, and tops were above 29,000 feet, aircraft would not accept radar vectors to the area. No aircraft were on top of the clouds at the time.

Gerhard C. Dort

Eglin AFB, Florida

*from Newsworld, AFSC, Nov 67, Vol II, No 11*

## Lights In Florida Sky

THE SKY OVER Eglin AFB was as bright as day for several minutes during the final night test mission of a new flare launcher here. Over 200 million candle power of light was given off while flares were burning simultaneously. The launcher was tested by the Air Proving Ground Center and developed by the Air Force Armament Laboratory, both of the Air Force Systems Command.

## U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

8. IF you saw the object at Night:
- 8.1 STARS (Circle One):
- a. None
  - b. A few
  - c. Many
  - d. Don't remember

9. What were the weather conditions?
- CLOUDS (Circle One):
- a. Clear sky
  - b. Hazy
  - c. Scattered clouds
  - d. Thick or heavy clouds

10. The object appeared: (Circle One)
- a. Solid - Very!
  - b. Transparent
  - c. Vapor

11. If it appeared as a light, was it:
- a. Brighter
  - b. Dimmer

11.1 Compare brightness to something familiar:

Alumina

12. The edges of the object were:
- (Circle One):
- a. Fuzzy or blurry
  - b. Like a bright star
  - c. Sharply defined
  - d. Don't remember

13. Did the object:
- a. Appear to stand still at a distance?
  - b. Suddenly speed up and then slow down?
  - c. Break up into parts or explode?
  - d. Give off smoke?
  - e. Change brightness?
  - f. Change shape?
  - g. Flash or flicker?
  - h. Disappear and reappear?

1. When did you see the object?

SAT. Nov. 1967  
Day Month Year

2. Time of day:

Noon time  
Hours Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern  
b. Central  
c. Mountain  
d. Pacific  
e. Other \_\_\_\_\_

(Circle One): a. Daylight Saving  
b. Standard

4. Where were you when you saw the object?

[Redacted] AVE. EASTON MASS.  
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

7-10  
Hours Minutes Seconds

a. Certain  
b. Fairly certain

c. Not very sure  
d. Just a guess

5.1 How was time in sight determined?

No. of first steps taken while observing

5.2 Was object in sight continuously?

Yes No

6. What was the condition of the sky?

DAY  
a. Bright  
b. Cloudy

NIGHT  
a. Bright  
b. Cloudy

DAY + clear No clouds

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you  
b. In back of you  
c. To your right

d. To your left  
e. Overhead  
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight—pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid *-Very!*
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

aluminum foil

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
  - b. Like a bright star
  - c. Sharply outlined
  - d. Don't remember

e. Other \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

U.S. DEPARTMENT OF COMMERCE  
ENVIRONMENTAL SCIENCE SERVICES ADMINISTRATION  
WEATHER BUREAU

Fort Wayne, Indiana 46809  
January 8, 1968

IN REPLY REFER TO:

Hector Quintanilla, Jr., Major, USAF  
Chief, Aerial Phenomena Office  
Aerospace Technologies Division  
Production Directorate,  
Department of the Air Force  
Headquarters Foreign Tech. Div.  
Wright-Patterson Air Force Base,  
Ohio 45433

Dear Sir:

With regards to the subject, UFO Observations, 11 November 1967, a 30-gram balloon with a lighting device was released at approximately 12:01 AM EST on Nov. 11. This type balloon reaches about 30" in diameter when first inflated with some increase in size at high levels, and travels with the wind at all levels. Most balloons burst and fall to earth within an hour or two after release. It would seem very unlikely that any balloon released at Fort Wayne would remain aloft long enough to be observed between Cleveland and Buffalo.

We know of no other agency launching balloons in this area.

Very truly yours

*Clyde H. Downes*  
Clyde H. Downes  
Meteorologist in Charge.

P. S. The Weather Bureau at Toledo Express Airport, RFD4, Swanton, Ohio 43558, takes pilot balloon flights.

# UFO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? \_\_\_\_\_

*Didn't see it move but it disappeared fast*

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? \_\_\_\_\_

*2 1/2 to 4 miles*

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type) \_\_\_\_\_
- e. At sea
- f. Other \_\_\_\_\_

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other \_\_\_\_\_

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- a. North
- b. Northeast
- c. East
- d. Southeast
- e. South
- f. Southwest
- g. West
- h. Northwest

24.2 How fast were you moving? *walking* miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

- |                 |     |                                     |                |     |                                     |
|-----------------|-----|-------------------------------------|----------------|-----|-------------------------------------|
| a. Eyeglasses   | Yes | <input checked="" type="radio"/> No | e. Binoculars  | Yes | <input checked="" type="radio"/> No |
| b. Sun glasses  | Yes | <input checked="" type="radio"/> No | f. Telescope   | Yes | <input checked="" type="radio"/> No |
| c. Windshield   | Yes | <input checked="" type="radio"/> No | g. Theodolite  | Yes | <input checked="" type="radio"/> No |
| d. Window glass | Yes | <input checked="" type="radio"/> No | h. Other _____ |     |                                     |

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

34. Date you completed this questionnaire:

SAT. Nov. 1967  
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was carrying lumber to a spot behind the barn... while doing so I chanced to look up toward NW sky and saw the object described completely motionless & totally soundless. I kept my eye on this thing during the time it took me to traverse the distance of the length of the barn with my somewhat heavy load.

On the two seconds I took to lay load down + then look up again it had disappeared.

I walked  
tried to  
zone but  
seen. (The

quietly

Page 8

I walked out into my field & tried to see where it could have gone but it was nowhere to be seen. (Tho I had a good view from where I was originally)

## Reasons for my concerns:

1. I know it was not a plane because at its apparent distance I should have definitely heard noise & definitely observed some motion!
2. Thing was so high in the sky and so clearly observed that its complete disappearance (over horizon) in two seconds broke all the laws of physics I expect to be obeyed by all forms of matter - - In other words that thing should have been visible at that point in the sky for a lot longer than 2 seconds.
3. It was solid - clearly outlined & yet unidentifiable & strange appearing.

## U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Feb Day      Nov Month      67 Year

2. Time of day:

7 : 41  
Hours      Minutes

(Circle One):      A.M.      or      P.M.

3. Time Zone:

(Circle One): a. Easterh  
b. Central  
c. Mountain  
d. Pacific  
e. Other \_\_\_\_\_

(Circle One): a. Daylight Saving  
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address

Tupper Lake  
City or Town

New York  
State or County

5. How long was object in sight? (Total Duration)

3 30  
Hours      Minutes      Seconds

a. Certain  
b. Fairly certain

c. Not very sure  
d. Just a guess

5.1 How was time in sight determined? \_\_\_\_\_

5.2 Was object in sight continuously?      Yes       No \_\_\_\_\_

6. What was the condition of the sky?

DAY  
a. Bright  
b. Cloudy

NIGHT  
a. Bright almost bright  
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you      d. To your left  
b. In back of you      e. Overhead  
c. To your right      f. Don't remember

8. IF you saw the object at NIGHT

8.1 STARS (Circle One):

a. None  
b. A few  
c. Many  
d. Don't remember

9. What were the weather conditions?

CLOUDS (Circle One):

a. Clear sky  
b. Hazy  
c. Scattered clouds  
d. Thick or heavy clouds

10. The object appeared: (Circle One)

a. Solid  
b. Transparent  
c. Vapor

11. If it appeared as a light, was it:

a. Brighter  
b. Dimmer

11.1 Compare brightness to:

As bright

12. The edges of the object were:

(Circle One): a. Fuzzy or  
b. Like a ball  
c. Sharply  
d. Don't remember

13. Did the object:

a. Appear to stand still at a point?  
b. Suddenly speed up and then slow down?  
c. Break up into parts or explode?  
d. Give off smoke?  
e. Change brightness?  
f. Change shape?  
g. Flash or flicker?  
h. Disappear and reappear?

## U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

6 11 67  
Day Month Year

2. Time of day:

7 24  
Hours Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern  
b. Central  
c. Mountain  
d. Pacific  
e. Other \_\_\_\_\_

(Circle One): a. Daylight Saving  
b. Standard

4. Where were you when you saw the object?

[Redacted] Ave Valley Stream New York  
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

\_\_\_\_\_ 4 \_\_\_\_\_  
Hours Minutes Seconds

a. Certain  
b. Fairly certain

c. Not very sure  
d. Just a guess

5.1 How was time in sight determined? clock

5.2 Was object in sight continuously? Yes ✓ No \_\_\_\_\_

6. What was the condition of the sky?

DAY  
a. Bright  
b. Cloudy

NIGHT  
a. Bright  
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you  
b. In back of you  
c. To your right

d. To your left  
e. Overhead  
f. Don't remember

8. IF you saw the object at NIGHT

8.1 STARS (Circle One):

(Circle One): a. Fuzzy or b  
b. Like a brig  
c. Sharply d  
d. Don't rem

13. Did the object:

a. Appear to stand still at an  
b. Suddenly speed up and ru  
c. Break up into parts or exp  
d. Give off smoke?  
e. Change brightness?  
f. Change shape?  
g. Flash or flicker?  
h. Disappear and reappear?

# R FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight—pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor

- d. As a light
- e. Don't remember

(lights)

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer

- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

a plane on fire

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
  - b. Like a bright star
  - c. Sharply outlined
  - d. Don't remember

e. Other were lights around the disk

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

## Official U.S. Air Force UFO form c

Page 3

14. Did the object disappear while you were watching it? If so, how?

No, just disappeared behind trees.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):  Yes No Don't know. IF you answered YES, then tell what it moved behind: trees

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):  Yes No Don't know. IF you answered YES, then tell what in front of: buildings and trees

17. Tell in a few words the following things about the object:

a. Sound: there was absolutely no sound  
b. Color: red + white lights

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

I think that we saw, at this time, ~~was~~ that this object was cigar shaped.

20. Do you think you can estimate the size of the object?  
(Circle One)

IF you answered YES, then

21. Do you think you can estimate the speed of the object?  
(Circle One)

IF you answered YES, then

22. Where were you located when you observed the object?  
(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other \_\_\_\_\_

24. IF you were MOVING IN A

24.1 What direction were you moving?

- a. North
- b. Northeast

24.2 How fast were you moving?

24.3 Did you stop at any time during the sighting?

(Circle One)

25. Did you observe the object through any of the following?

- a. Eyeglasses
- b. Sun glasses
- c. Windshield
- d. Window glass

26. In order that you can give a description of the object, please draw a picture of the object which, when placed up

A mo  
lights w  
some whe

# Force UFO form continued

Page 3

Page 4

20. Do you think you can estimate the speed of the object?

(Circle One)  Yes  No

IF you answered YES, then what speed would you estimate? 250 MPH

21. Do you think you can estimate how far away from you the object was?

(Circle One)  Yes  No

IF you answered YES, then how far away would you say it was? \_\_\_\_\_

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type) \_\_\_\_\_
- e. At sea
- f. Other \_\_\_\_\_

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other \_\_\_\_\_

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- a. North
- b. Northeast
- c. East
- d. Southeast
- e. South
- f. Southwest
- g. West
- h. Northwest

24.2 How fast were you moving? \_\_\_\_\_ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)  Yes  No

25. Did you observe the object through any of the following?

- a. Eyeglasses  Yes  No
- b. Sun glasses  Yes  No
- c. Windshield  Yes  No
- d. Window glass  Yes  No
- e. Binoculars  Yes  No
- f. Telescope  Yes  No
- g. Theodolite  Yes  No
- h. Other Naked-Eye

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A movie marquee with flashing lights with the red light situated somewhere on the object.

ch of the  
much of

the object  
drawing

# Official U.S. Air Force UFO form c

Page 5

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass when you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? \_\_\_\_\_  
 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

There was only one object.

30. Have you ever seen this, or

No

31. Was anyone else with you

31.1 IF you answered YES,

31.2 Please list their names

Last Name First Name Middle Name

ADDRESS [Redacted] Valley Stream 11580 N.Y.  
Street City Zone State

TELEPHONE NUMBER [Redacted] AGE 13 SEX Boy

Indicate any additional information about yourself, including any special experience, which might be pertinent.

My friends (the ones I have listed) and I have often made observations on the Moon & stars at different times of the year, using a refractor telescope. We also took notes on our sightings. We have never noticed anything similar to this before.

33. When and to whom did you report that you had seen the object?

\_\_\_\_ Day \_\_\_\_\_ Month \_\_\_\_\_ Year

We did not report this to anyone else.

# Official U.S. Air Force UFO form co

Page 7

34. Date you completed this questionnaire:

6 / 11 / 69  
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The object was first sighted when [redacted] screamed that he thought that something in the sky (plane) was on fire. Then [redacted] + I both said that we should follow it. It headed north-east, and at times made sharp rises into the air and sudden drops, and later changed its course heading, and fading behind the trees to the west. I <sup>heard</sup> ~~heard~~ <sup>impact</sup> no sound. The object had <sup>small</sup> yellow lights around the sides dimming and brightening every once in a while. It traveled as fast as an airplane as to scan over the area. Of course this speed is only an estimate because we did not ~~th~~ know how far away the object was. I will also add that there was a red light on the top, but I am not sure exactly where on the top.

I would

*Treysa*  
*Summary*

TDPT (UFO) Maj Quintanilla/70916/mhs/17 Feb 68

UFO Photographs, November 1967

USAF (AFIGIIC)

1. Reference your OSI Communication, Hq D24C-185/70/508, 15 January 1968, subject "Alleged UFO Sighting in Treysa, FRG."
2. We are unable to positively identify the objects in the photographs that you forwarded to us. However, the majority of the photographs are of ground lights, above which, is a single light source. We feel that this light source may be the planet Venus, which was at an approximate elevation of 12° and an azimuth of 130° at 0545 hours on November 6. Venus had a stellar magnitude of -4.1 on November 6, 1967, and was by far the brightest astronomical body in the sky. However, without knowledge of the elevation and azimuth of the object that Sgt. Clark sighted, we are unable to positively identify the object.
3. Several other photographs appear to be multiple exposures of an unknown light source.
4. Since the observations took place outside the limits of the United States, no further investigation will be made. Sgt. Clark's photographs are attached.

## AGENT REPORT

(SR 380-320-10)

1. NAME OF SUBJECT OR TITLE OF INCIDENT

Alleged UFO Sighting in Treysa, FRG

2. DATE SUBMITTED

14 November 1967

3. CONTROL SYMBOL OR FILE NUMBER

## 4. REPORT OF FINDINGS

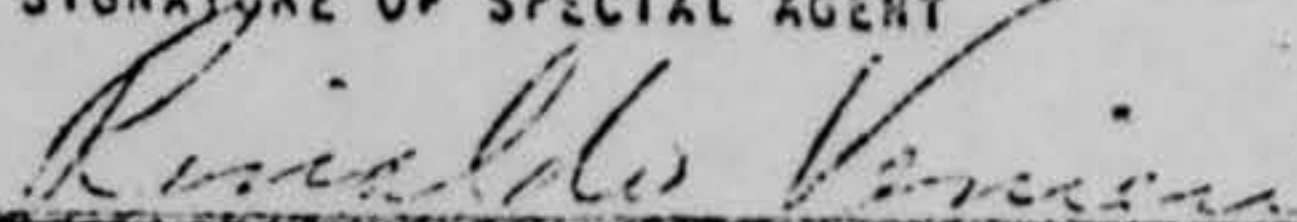

(MISCELLANEOUS) On 6 November 1967, Leonard W. Blankenship, RA 24 275 986, SSG E-6, Assistant Operations Sergeant, Company B, 709th Military Police Battalion, Giessen (MB7603), Federal Republic of Germany, (FRG), APO New York 09169, reported to the Giessen Field Office, 165th Military Intelligence Company, Giessen, the following information which was reported to him by Ervin L. Clark, RA 2898778, SP6 E-6, 7th USA Missile Detachment, Treysa (NB1340), FRG, APO New York 09169, concerning Unidentified Flying Objects (UFOs) in the Treysa, FRG area. The information reported was substantially the following:

On 6 November 1967, from approximately 0330 to 0545 hours, Clark observed five UFOs hovering over the Hartdurg Kaserne, Treysa. Two of the UFOs were approximately 15 to 20 feet in diameter and three were approximately eight to ten feet in diameter. All of the UFOs were of a red and white color with a green fringe. Clark photographed the UFOs on color film and submitted the unprocessed film (EXHIBIT \_\_\_ ) to the Military Police.

UNITED STATES GOVERNMENT

# Memorandum

TO : Major Hector Quintanilla Jr, USAF

DATE: January 3, 1968

FROM : U.S. Weather Bureau, Toledo, Ohio

SUBJECT: UFO Observation, 11 November 1967

No balloons were launched from our station , nor to my knowledge from any other station in our area, that could be responsible for that sighting.

The weather over this station at 2105 EST on 11 November 1967 was... 800 ft. broken clouds and 1200 ft. overcast with 8 miles visibility and winds from the southwest at 10 knots.

*Fred Davis*  
Fred Davis

Lt Marano:

The Navy did not have any balloon launches that might have been responsible for our sighting. They did have a launch 8 Nov from Minneapolis, however, it was terminated the next day and they had a confirmation on it on 9 Nov that it came down. Mr. Demboski was sorry that he couldn't be of further assistance.

## U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

8 NOV. 1967  
Day Month Year

2. Time of day: 9 00  
Hours Minutes

(Circle One): A.M. or P.M.

14. Did the object disappear while you were watching it? If so, how?

There were (3) objects. One remained insite for the total sighting. Other two disappeared & reappeared.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes  No  Don't know. IF you answered YES, then tell what it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes  No  Don't know. IF you answered YES, then tell what in front of:

17. Tell in a few words the following things about the object:

- a. Sound There was no sound at all
- b. Color flaming purple -

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

With a ruler held at arms length the object would be 6 inches long.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

During the week of when the sighting occurred the witnesses were hunting in the Parry Sound District, of Northern Ontario. The best city is North Bay ONT. CANADA the closest lake is Restoule a town being named after it. At ~~at~~ nine P.M. on November 8, 1967 the ~~was~~ four men were having a breath of fresh air when a former World War II bomber pilot (Buster Fair) spotted the U.F.O.'s. There were three objects, one standing out more clearly than the other two. They jerked back and forth in the air often hovering for up to two or three minutes at a time. As described their basic colour was a 'flaming purple'. The one object had four distinct bright lights on it. Each light was of the same brightness there being four at each corner of the U.F.O. During the duration of the sighting, which was around twelve minutes no sound was heard which could be pinned down as originating from the U.F.O.'s. Towards the end of the sighting only one U.F.O. could be seen. The other two after blinking off and on disappeared. ~~The~~ The sighting ended when the two men already mentioned went into ~~the~~ a building. The shape <sup>(edges)</sup> of the objects was irregular.

You have my permission to use my name in statements, publications etc. if it is necessary.

December 29, 1967

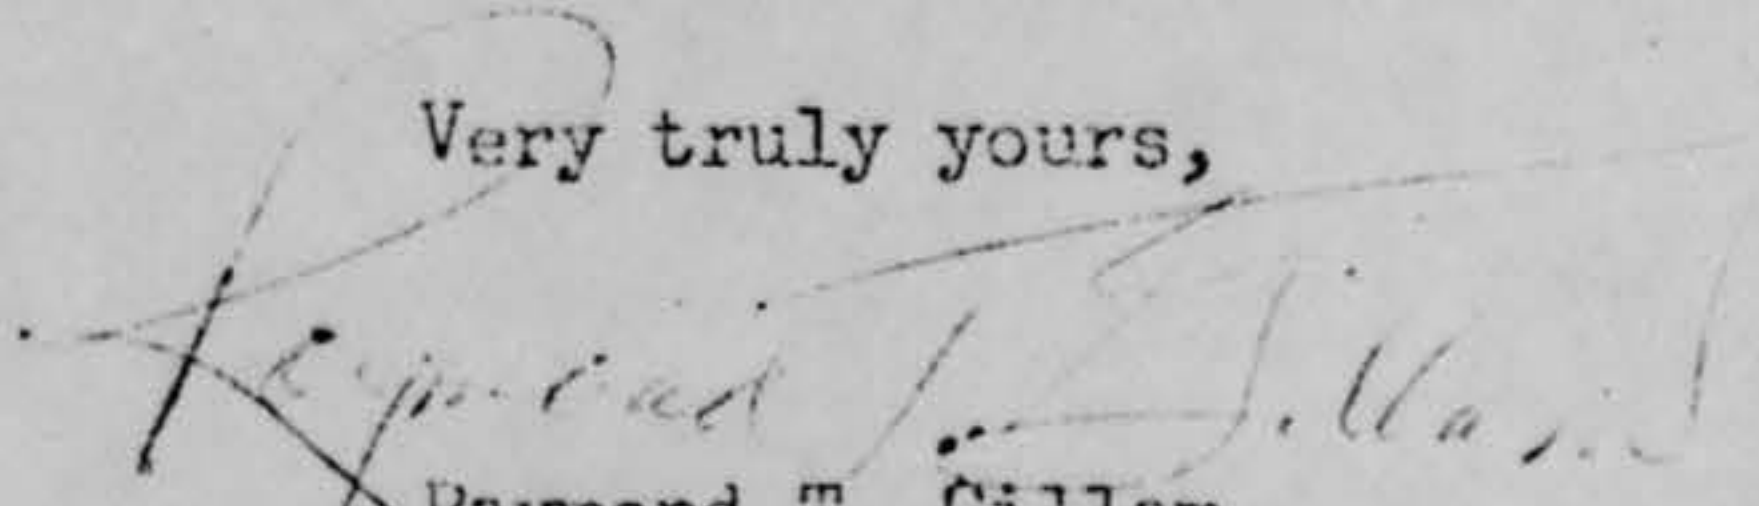

IN REPLY REFER TO:

Major Hector Quintanilla, Jr.  
Chief, Aerial Phenomena Office  
Aerospace Technologies Division  
Production Directorate  
United States Air Force

Dear Major Quintanilla:

Replying to the fourth paragraph of your letter of December 26, 1967, regarding an unidentified flying object north of Lake Erie at 2105 EST November 11, 1967, a rawinsonde balloon with rawinsonde attached was released at this station at 1800 EST on that date. We know of no other agency in this area which launches balloons. You may be interested to learn that the Weather Bureau Upper Air Station at Flint, Michigan was scheduled to release a rawinsonde balloon at the same time as the one released here, 1800 EST.

Very truly yours,

  
Raymond T. Gillam  
Meteorologist in Charge

REPLY TO  
ATTN OF

DCIR

SUBJECT

Investigation of UFO Sighting 9 November 1967

TO: C

1. On the night of 9 November 1967 between the hours of 1250 - 1300Z several reports of a UFO sighting were received at the 7/13 Air Force Tactical Air Control Center at Udorn Royal Thai Air Force Base, Thailand. These reports were received from USAF aircraft in flight as well as from several other USAF installations in Thailand. Over 150 persons observed the phenomenon while attending a motion picture showing at the outdoor theater at Udorn RTAFB.
2. On 10 November 1967 I was appointed investigating officer for this incident. My investigation included interviews with officers and airmen stationed at Udorn RTAFB although telephonic corroboration of details of the sighting was made with one location to the south of this station. The details of individual observations closely parallel each other especially as to time, altitude and direction of flight of the UFO. The most complete report was submitted by LtCol John H. Scholtz of the 11th TRS who observed the phenomenon from the Udorn outdoor theater. Attachment 1 is a copy of Colonel Scholtz's report. Attachment 2 is a copy of the local weather report for the period just prior to the sighting as prepared by Detachment 15, 10 Weather Squadron, Udorn RTAFB. Attachment 3 is a copy of a newspaper article as reported in The Bangkok World on Saturday, 11 November 1967.
3. Many of the persons whom I interviewed had previously observed a meteorite shower as well as a shooting star. All reporters stated that the speed of the UFO was not as fast as any shooting star they had seen and the trajectory of the UFO across the horizon was much flatter than that of meteorite showers which had been observed. Additionally most reporters indicated that the path of meteorite showers was generally at a higher elevation above the horizon than the UFO. One reporter noted that the distance between fiery objects in a meteorite shower were greater than those noted on the night of 9 November.

Another observer pointed out that the arc of the UFO was not as high as the Echo Satellites he had observed. No sounds were heard relative to the UFO by any observer and no one could give an estimate as to its speed. All sightings including those at other stations as reported to 7/13 AF TACC were visual. No radar sightings were reported.

4. Conclusion. Insufficient evidence or corroborating data are available locally through open source material to positively identify the source of the UFO. Local newspapers reported the launching of a Saturn 5 rocket from Cape Kennedy, Florida at 1200Z, 9 November. No details as to the direction, altitude, orbital path, or times and locations of stage separations were listed in the local press. However, it is possible that the UFO incident as observed and reported in Thailand resulted from stage separation debris of the Saturn 5 rocket.

DAVID J. COLGAN, Lt Col, USAF  
Investigating Officer

Reference para 11 AFR 80-17, UFO Report.

1. UFO Report

a. Description of object

(1) Shape - undeterminable because of distance between observer and object, possibly cylindrical shape.

(2) Size - the lead object of the swarm was about the size of Venus in the night sky.

(3) Color - the lead object was blue white with a light intensity comparable to Venus. The remaining objects were the same color and the light intensities emitted were steady but of diminishing brilliance down to about the equivalent of the star Polaris.

(4) Number - there were approximately 12 objects in the swarm.

(5) Formation - the lead swarm had about ten objects in a random V-formation. The distance between objects was not uniform. The dimensions of the formation was measured using a lead pencil held at arms length and was enclosed within a rectangle measuring 7 degrees of arc in length by 3 1/2 degree of arc in width. The second formation with two objects was approximately 10 degrees of arc behind the lead object of the first formation and measured about 2 1/2 degrees by 1 degree of arc in size.

(6) Features or details - no significant features or details were noted.

(7) Each object in each formation left a distinct trail which was a thin dull gold color. Each trail measured approximately 20 degrees of arc.

(8) Sound - no sound was associated with the sighting.

(9) No other pertinent or unusual features.

b. Description of course:

(1) Observer was seated at the Udorn RTAFB outdoor movie theater when he first observed what was believed to be an

aircraft on fire in the distant northern horizon.

(2) The objects were first observed at a 10 degree angle of elevation - azimuth 320 degrees.

(3) Objects disappeared from observers view at 10 degrees elevation 150 degrees azimuth.

(4) The flight path of all objects was straight with no change of course. All objects traveling at same speed (no relative motion between objects). The best and closest point of observation was at 60 degrees elevation, azimuth 250 degrees.

(5) Objects disappeared as they passed over the horizon.

(6) The objects were visible for approximately 1 1/2 minutes.

c. Manner of observation:

- (1) Ground visual
- (2) No optical aids
- (3) N/A

d. Date and Time:

- (1) 1255Z 9 Nov, 1955 local 9 Nov 1967.
- (2) Night

e. Location of observer:

- (1) Udorn RTAFB
- (2) Lat 1722N Long 10248E

f. Identifying information of observer:

- (1) Military -

(a) John C. Scholtz Jr, Lt Col, 11th Tac Recon Sq, Aircraft Commander/Squadron Executive Officer, RF4C qualified recon pilot.

(b) Observer is a trained electronic engineer with Masters Degree in Electronic Engineering and 3 years engineering design experience in the development of radars capable of tracking re-entry vehicles. Total of 7 years engineering experience with AF Systems Command.

g. Weather:

Observer's account of weather - clear, no cloud coverage, visibility 5 miles.

## **Light In The Sky**

LAMPANG—An incandescent beam of light which travelled across the sky at estimated 20 kilometers per hour Thursday night has excited the imaginations of Lampang residents.

The beam, about 30 meters long, was seen by residents northeast of the city. Observers said the beam was wider and longer than that of a meteor tail.

NOTE: Lampang is located at  $18^{\circ}17'30''\text{N}/99^{\circ}30'\text{E}$

# Memorandum

TO : Hector Quintanilla Jr. Major, USAF

DATE: 12/29/67

In reply refer to:

FROM : MIC, WBAS, Akron, Ohio

SUBJECT: ~~Star~~ letter of 12/26/67 TDPT/UFO

Our office did not launch any balloons during the day Nov. 11, 1967. I also checked Goodyear Tire and Rubber Company in regard to any blimp operations and they had none in the area on that day. No other industries are engaged in balloon operations in the area at least as far as I can ascertain. Sorry I could be of no help.

Yours truly,

*Terry A. Ritter*  
Terry A. Ritter

# OFFICIAL U.S. AIR FORCE

## U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

10 / 11 / 67  
Day Month Year

2. Time of day: 9 Hours 10 Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern  
b. Central  
c. Mountain  
d. Pacific  
e. Other \_\_\_\_\_

(Circle One): a. Daylight Saving  
b. Standard

4. Where were you when you saw the object?

[REDACTED] ST. BURLINGTON N.C.  
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

\_\_\_\_\_ 15 \_\_\_\_\_  
Hours Minutes Seconds

a. Certain  
b. Fairly certain

c. Not very sure  
d. Just a guess

5.1 How was time in sight determined? TIMED BY WATCH

5.2 Was object in sight continuously? Yes / No \_\_\_\_\_

6. What was the condition of the sky?

DAY  
a. Bright  
b. Cloudy

NIGHT  
a. Bright  
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you  
b. In back of you  
c. To your right

d. To your left  
e. Overhead  
f. Don't remember

8. IF you saw the object at NIGHT

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight—pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

LIKE A LIGHT BULB

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
  - b. Like a bright star
  - c. Sharply outlined
  - d. Don't remember

e. Other \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

13. Did the object:

(Circle One for each question)

- |   |                                      |                                     |            |
|---|--------------------------------------|-------------------------------------|------------|
| a. Appear to stand still at any time?           | <input checked="" type="radio"/> Yes | No                                  | Don't know |
| b. Suddenly speed up and rush away at any time? | <input checked="" type="radio"/> Yes | No                                  | Don't know |
| c. Break up into parts or explode?              | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| d. Give off smoke?                              | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| e. Change brightness?                           | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| f. Change shape?                                | Yes                                  | <input checked="" type="radio"/> No | Don't know |
| g. Flash or flicker?                            | <input checked="" type="radio"/> Yes | No                                  | Don't know |
| h. Disappear and reappear?                      | Yes                                  | <input checked="" type="radio"/> No | Don't know |

# Official U.S. Air Force UFO form c

Page 3

14. Did the object disappear while you were watching it? If so, how?

No.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes  No  Don't know. IF you answered YES, then tell what it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes  No  Don't know. IF you answered YES, then tell what in front of:

17. Tell in a few words the following things about the object:

- a. Sound HIGH PITCHED WHISTLE SOUND  
 b. Color LIKE A STEEL GRAY

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

HARDLY NOTHING, FOR IT WAS SO CLOSE UP.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the size of the object?  
(Circle One)

IF you answered YES, then

21. Do you think you can estimate the speed of the object?  
(Circle One)

IF you answered YES, then

22. Where were you located when you saw the object?  
(Circle One):

- a. Inside a building  
 b. In a car  
 c. Outdoors  
 d. In an airplane (type)  
 e. At sea  
 f. Other IN FRONT

24. IF you were MOVING IN A

24.1 What direction were you

- a. North  
 b. Northeast

24.2 How fast were you moving?

24.3 Did you stop at any time?

(Circle One)

25. Did you observe the object through

- a. Eyeglasses  
 b. Sun glasses  
 c. Windshield  
 d. Window glass

26. In order that you can give a description of the object, please draw a picture of the object which, when placed upside down, will show the shape of the object.

A LARGE UPSIDE

# Force UFO form continued

Page 3

Page 4

20. Do you think you can estimate the speed of the object?

(Circle One) Yes  No

IF you answered YES, then what speed would you estimate? \_\_\_\_\_

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes  No

IF you answered YES, then how far away would you say it was? 150 FT.

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other IN FRONT YARD

23. Were you (Circle One)

- a. In the business section of a city?
- b.  In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other \_\_\_\_\_

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- a. North
- b. Northeast
- c. East
- d. Southeast
- e. South
- f. Southwest
- g. West
- h. Northwest

No.

24.2 How fast were you moving? \_\_\_\_\_ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes  No

25. Did you observe the object through any of the following?

- |                 |     |                                     |                |     |                                     |
|-----------------|-----|-------------------------------------|----------------|-----|-------------------------------------|
| a. Eyeglasses   | Yes | <input checked="" type="radio"/> No | e. Binoculars  | Yes | <input checked="" type="radio"/> No |

Akron, Ohio 44309      Fort Wayne, Indiana 46801      Flint, Michigan 48501

1. The Aerial Phenomena Office is in receipt of an unidentified flying object report from Olmsted (Cleveland) Air Traffic Control Center.
2. They painted an object at approximately 2105 EST on 11 November 1967 that was approximately twenty to twenty-five miles north of Erie. The object traveled in a straight line toward Buffalo at approximately fifty mph. The object was painted by the Cleveland radar for about 1½ hours and vanished from the set approximately ten miles from Buffalo.
3. Buffalo radar was also tracking the object and it disappeared from their screen at approximately three miles from Buffalo.
4. Were any balloons launched from your station that might be responsible for this sighting? Do you know of any other agency launching balloons in your area?
5. Any assistance you can provide is appreciated.

1. This replies to your letter of January 22, 1968. With regards to the beautiful pictures which you submitted, I am happy to state that the images which have been a cause of concern to you are nothing more than lens flares. Lens flares are a natural photographic phenomena which is caused by artificial light on the iris diaphragm.
2. Inclosed is a picture which was submitted to the project office and depicts the same phenomenon.
3. Thank you for letting the project office retain your pictures; we will put them to good use.

Wright-Patterson Air Base,  
Dayton, Ohio.

Gentlemen:

On November 11, 1967, while on a visit to Mexico, I took some night pictures of the Monument to the Independence, sometimes called "The Angel." Not being sure as to what exposure would be best, I took a series of four pictures, each one at a different aperture but at the same speed, 1/25". The apertures were f.8, f.6.3, f.5.6, and f.4.5. The camera was a Praktina equipped with a 58 mm. f.2 Zeiss Biotar lens. The camera was on a tripod so that all pictures were taken from the same position with all factors being the same excepting for the aperture of the diaphragm.

Since there was considerable traffic both on the Avenida de la Reforma and on the north-south cross street, (it being about nine o'clock on a Saturday night), my chief concern was to expose the pictures when there was a minimum of traffic movement on either street. Hence, once the camera was positioned and the monument framed on the ground glass, I paid no further attention to it but only to the traffic below. My sequence of exposure was as follows: watch for a lull in the movement of traffic, expose, transport the film one frame, change the aperture, watch for a lull in traffic, expose, etc. until all four exposures had been made.

Great was my surprise, when projecting the pictures as received from the Eastman processors, to note the presence of two strange looking objects that seemed to be hovering near the top of the monument. I was further amazed to note that in each exposure these objects were in a slightly different relation to the monument and to each other. Moreover, their axes also varied in their relation to the vertical plane of the monument. This variation, it should be noted, is not one of a constant progression from exposure one to four, but is one that changes back and forth.

I have been at a loss to explain this phenomenon as have also been others who have seen the pictures, included among which have been engineers. Many theories have been propounded. All of them have seemed to be more or less acceptable excepting, perhaps, for one little detail or two that just didn't fit into the theory. All of us have been agreed, however, that these pictures might be of interest to you. Hence, my sending you these prints. And if your interest is great enough to pursue the matter further, I shall be glad to send the original slides also.

I must say in all candor that I did not personally see those objects in the sky. Neither can I say that they weren't there. Frankly, I was not concerned with looking either at the monument or at the sky above it, once that I had framed it through the viewfinder which, because of the small size of the ground glass, would not have permitted me to see the objects even if they were there. I was, actually, more concerned with the flow of traffic below.

However, I have been greatly puzzled by the sharpness of the objects' outline and by their peculiar shape. If they should be reflections, they are reflections of nothing of that shape which, to my knowledge, is to be found on or near the monument. Moreover, the objects are of a reddish hue and there is nothing else of that hue in the picture or in the originals, save the traffic lights or the tail-lights on the automobiles.

Whether there were objects there or not, I cannot say. I wish that I could positively say so and thereby be eligible to belong to that select group who have actually seen UFOs. But honesty, alas, prevents my doing so. All I can report is what the camera recorded even though I myself didn't see the objects.

The pictures you may keep and add them to what must be now a sizable file of reported UFOs. If you have any explanation for this phenomenon, I would certainly be very happy to hear from you. Even though I have been greatly puzzled, as have also been all others who have seen the pictures, I am convinced that there must be some kind of reasonable explanation for the apparent presence of those objects.

Yours truly,

this case includes

Seven (7) 2x10 color photos

Four (4) 4x5 " "

Two (2) 4x5 " Negatives
