10 APR 1973

Mrs J.K.M. Foote,
8 Barr Street,
DIANELLA WA 6062

Dear Mrs Foote,

With reference to the report of an unusual aerial sighting on 25th November 1972, submitted by yourself and Miss Tinton, the investigating team has determined that the most probable cause of the sighting was a phenomenon known as 'Ball Lightning', or 'Kugelblitz'.

To explain the phenomenon, the following detail has been extracted from the Report on the Scientific Study of Unidentified Flying Objects, carried out in the U.S.A. by Dr Edward Condon, for the U.S. Air Force:

> 'Among the most mysterious manifestations of atmospheric electricity is the phenomenon of ball lightning, or Kugelblitz. A glowing ball either (1) appears after a cloud to ground lightning flash and remains near the ground, or (2) is first seen in midair, descending from a cloud, or arising from no obvious cause, thereafter remaining aloft until it vanishes. Some 83% of observers agree that the size and brightness of the ball remains roughly constant throughout the period of sighting and that no changes occur, even immediately prior to its disappearance. A minority report brightening and colour changes. The colours red, orange and yellow are most common, but most other colours are seen occasionally. About 30% of observers detect internal motions or rotation of the ball itself, although this may depend on the distance from the ball of the observer. Several reports do indicate some guidance from telephone or power lines and by grounded objects.

The descriptions given by yourself and Miss Tinton are closely identifiable to the American observers' descriptions, and no other 'normal' theory investigated by the team was feasible.

We trust that this explanation is satisfactory, and thank you for your interest.

Yours faithfully,

(G.J. ODGERS)
Director of Public Relations

N/A.

FELIXCUN PLT OFF PARISH - WG CDR MANNING (HQPEA) 23.3.78

1. How was the sighting reported, and to whom?

Reported to Duty Controller (Pearce) by phone. He passed message to F/O Pyles (Unit UFO officer).

2. Were any other investigations carried out?

Not to their knowledge.

3. Were there any other reports - newspaper, radio etc?

No.

REPORT ON UNUSUAL AERIAL SIGHTING

Part 1 - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of Observer Mrs Joyce K.M. Foote Age 47

2. Address of Observer 8 Barr Street
Dianella 602 Phone Number

3. Occupation of Observer House wife

4. Dat & Time of Start of Observation 25/11/72 20/1 in the morning
How certain is the date? positive checked at Time of happening
How accurate is the time of start? checked by our Time by wireless time

5. Duration of Observation 10 minutes
How accurate is your estimate? Approx

6. Observer's location at time of sighting on our front Porch at 8 Barr St Dianella
How familiar is observer with this locality? 18 years living here

7. Weather conditions at time of observation It was a beautiful night, perfect at time of seeing flying object

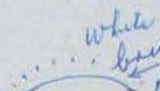
8. Describe any aids/equipment used in the observation
only our eyes

9. Where was object first observed?:
a. Relative to your surroundings at the front of our place on the Porch as we open front door
b. Angle of elevation refer to diagram
c. Compass angle bearing " " "
d. How accurate are these estimates? To the best of my ability

10. What first attracted observer's attention? brightness like a big Star

11. If there was more than one light/object:
a. How many were there? refer to diagram
b. in what formation were they? only one

/ 12. What was



Orange + red light seam like if spinning around

What was the colour of the light or object?.....

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards)
.....brighter than a street light.....

14. What was the apparent size at nearest approach? :
a. relative to Venus or Moon..bigger than moon.....
b. relative dimensions in inches at arm's length (About 20 inches from eyes)....2 inches.....

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?
.....refer to diagram.....

16. Was any method of propulsion obvious?.....lights seam to be spinging around.....

17. Describe any sound heard, including changes in pitch and intensity
faint humming constant ..... then a ~~thick~~ swish sound when it wizzed off like lighting

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?
Arms length (20 inches) ....½ inch.....

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances....from where object stopped to where it wizzed off it took 6 seconds (refer diagram)

20. Give duration of any stationary phases....stop about 5 minutes which we had a very good look at it

21. Describe any deviations or manoeuvres ....refer to diagram

22. Describe any trail of exhaust, vapour or light seen.....
.....nothing.....

23. Where was object last observed? :
a. relative to your surroundings .....two house down from where it stopped
b. angle of elevation .....refer to diagram.....
c. compass angle bearing.....

24. What was the manner of its disappearance?...wizzed off and
....disappear like Lighting.....

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)
.....no.....
.....

/ 26. State any

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.

none at all

27. How many witnesses to the sighting? one

28. Do you know of witnesses to similar sightings in the area?

not at Present

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?

Flying Saucer (Seen clearly

30. What are your main reasons for excluding this explanation?

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form if needed.

Signature. Mrs J. K. M. Foote

MINUTE PAPER

(Write on this side only)

SUBJECT: REPORT OF INTERVIEW WITH MRS J.K.M. FOOTE REF. UFO SIGHTING

1. Mrs. Footes residence is situated approx. 5 miles north west of Perth airport. At the time of the sighting she was facing away from the airport.

2. Mrs Foote said that she was up at such an early hour because she was waiting for her husband to return home from work at the Claremont Speedway. Miss Tinton was keeping her company and is a close friend of Mrs. Foote. The particular night was hot and humid.

3. At about 0020 hrs Miss Tinton decided to depart for her home and Mrs. Foote accompanied her to the front door. When they opened the front door they observed the UFO. Their attention had been drawn by a bright light. Mrs. Foote said that she went out to the front path to have a closer look while Miss Tinton, who was frightened of the object, stayed at the front door. Mrs. Foote claims that the object stopped when she switched on the front light, after remaining stationary for from five to ten minutes the object followed the path outlined in the drawing

/6.

4. Mrs Foote's drawing is an accurate description of the street as it appears from her front door. When questioned more closely as to the nature of the object she was adamant that it could not have been an aircraft and that her description of the object was accurate. The white light on top was very bright while the red and orange lights beneath were revolving. She claims that the object passed behind the tree drawn behind the opposite house (about 100 yards distance from Mrs Foote's house) and when I explained the method of measuring at arms length she said it was about 1" – 1½" wide.

5. Mrs. Foote did not appear to be a person who would gain from fabricating such a story and says she is active in her local church. I cannot assess what it was that she in fact saw.

Mr R. Webb,
Moorgunya Hostel,
Box 196,
PORT HEDLAND, WA 6721

Dear Sir,

Investigation of your report of an unusual aerial sighting on 19th October 1972, has revealed that the objects you saw were most probably part of a meteor shower.

A similar sighting on 20th October 1972 by long-time residents of Port Hedland, has confirmed that this type of meteorite activity is not uncommon in this area.

Yours faithfully,

G. J. Odgers

9.11.72.

Dear Sir,

I am replying to your letter with enclosed form of 25th Oct. regarding sightings of aerial phenomena at Marble Bar on Oct. 20th.

It now seems that this spectacle was in fact a meteor shower & with this knowledge I feel it is just a waste of time to fill in the pro forma.

Friends who are long time residents of Marble Bar & have seen these lights previously were fortunate enough to make the observations on this occasion through a pair of binoculars They saw four bodies falling in quick succession whereas I thought maybe 8 to 12

I now feel that their assessment is the correct one & no doubt you will confirm this.

Yours faithfully,
K. F. Andrews.

SIGHTING # 24

QUEANBEYAN NSW

R.R. TAKKENBERG

580/1/1 Pt20 (25A)

27 FEB 1973

Mr Robert Takkenberg,
C/- 35 Boronia Crescent,
QUEANBEYAN NSW 2620

Dear Sir,

Having carried out initial investigations into the unusual aerial sighting alleged to have occurred at Queanbeyan on 19th January 1973, we regret to inform you that little credence can be placed on the report, and that the investigation has ceased.

This determination has been made as a result of conflicting statements by witnesses interviewed, and the impression gained by the investigating officer that you apparently wish to further the activities of your 'Society for Plotting Interplanetary Reconnaissance' (S.P.I.R.) by imaginative reporting.

We reiterate that it is regretted that this report cannot be taken seriously unless further substantial evidence is forthcoming.

Yours faithfully,

G. J. Odgers

SUBJECT REPORT ON UNUSUAL AERIAL SIGHTING	ATTENTION	

SEPT. PRS DAFI 580-1-1 20.2.73

1. Forwarded herewith is a copy of a letter from Mr Robert Takkenberg concerning the alleged sighting of a UFO, received at this Headquarters on 12 Feb 73.
2. The report, also attached, was completed with the assistance of Pet Off Sw Hunt GD Pt 5 Sqn, who interviewed Mr. Takkenberg on 13 Feb 73 at his home in Queanbeyan.
3. Pet Off Hunt considers that there is no basis of fact in the matter and attaches no credence to the alleged sighting. He found that Robert Takkenberg was a 16 year old schoolboy, who had recently formed a 'Society for Interplanetary Reconnaissance' with three other boys. They appear to be highly imaginative schoolboys with a desire to get their society "off the ground".
4. In view of the circumstances, no further investigation at unit level is considered necessary.

5. FOR HQOC. A copy of HQOC policy letter along the lines of Ref. A would be appreciated if available.

29 - 1 - 73.

Dear Sir,

This will most probably be the most comprehensive report on a U.F.O. sighting you have ever received.

The following is the S.P.I.R. report as filed by my colleagues and I:

"U.F.O. Sighting 5.
19 - 1 - 73.

Sighted U.F.O. with telescope with magnification 50x.
Was not planet or star because of odd shape. Had single ring following inner object shape.
Colour change:
Red - orange - yellow - green - violet in a circular motion.
Grew larger verry rapidly.
Colour changed to white and remained so growing large and close.
S.P.I.R. Theory: a U.F.O. investigation craft.
Evidence of tail though not commet because of rapid direction changes.
Shape: saucer - like shape.
9.40.05
Outer ring dissapeared and tail changed direction. Resiliant green with main body bright red.
Flat bottom, dome top. (see diagram.)
Changes direction frequently.
chenged to gold colour. (appeared stationary.)
Dogs Howling!
Could feel high - pitched scream on eardrums.
Row of lights near peak of dome suggesting cabin. (see diagrams.)
Saw flash on horizon. When Science Department - Head Patterson and I went to investigate we felt as if our brains were being sucked out of our heads."

The report ends here. There are, however, a number of diagrams accompanying this letter. Please study them and discuss them, and reply.

3 FEB 73
SIGHTING # 23

DINGABEE via - MRS DRUMMOND
DUNGOG, NSW

580/1/1 Pt20 (24A)

27 FEB 1973

Mrs A. Drummond,
DINGADEE,
via DUNGOG NSW 2420

Dear Mrs Drummond,

With reference to your report of an unusual aerial sighting on the 3rd February 1973, it has been determined that the most probable cause was a sighting of the planet Saturn.

During the time of sighting, Saturn was located at an elevation of 60° and relative movement was through an arc subtended by bearings 360° - 330°. Additionally, a defined temperature inversion was apparent, and this would feasibly account for some distortion of light, without affecting brilliance. The smoky exhaust effect and apparent movement were probably due to atmospheric conditions at the time.

We trust that this determination satisfactorily explains the phenomenon that you saw.

Yours faithfully,

G. J. Odgers

REPORT ON UNUSUAL AERIAL SIGHTING

1. Forwarded herewith is a report on an unusual aerial sighting, reported to this Base on the night of Saturday 3rd February 1973. The observer, Mrs Amelia Drummond, was interviewed at her home at Dingadee via Dungog on the afternoon of Wednesday 7th February 1973. Mrs Drummond is a level headed, mature, middle aged woman and reported the sighting because she was unable to arrive at a satisfactory explanation.

2. There were no military aircraft active in the area at the time of sighting, however, the time span and nature of the sighting would preclude aircraft as a possible resolution. Meteorological balloons have also been discounted because of time of launching (2100 hrs) and prevailing wind directions. A temperature inversion of 1½°C was recorded at RAAF Base Williamtown during the time of the sighting. Saturn was the only major planet visible, in a northerly direction at approximately 60° angular elevation. Satellite OAO-3 Rocket was visible during the period 2115-2300hrs (local) bearing 342°, at 89° angular elevation on heading 79° 66'.

3. The most likely explanation is that the object(s) was(were) in fact the planet Saturn, distorted by a temperature inversion, although a 1½°C inversion would be unlikely to bring about distortion to the degree described.

4. Forwarded for your further action, please.

VASSE W.A. 6283

Dear Lindsay,

With reference to your report of an unusual aerial sighting on 2nd October 1972, it has been determined that the most probable cause was a sighting of the planet Jupiter.

During the time of sighting, Jupiter was bearing 290° azimuth at 60° elevation and had a magnitude of -1.7. The changing colour and apparent slow movement up and down are fairly common effects of atmospherics on light, and result from density variations.

We trust that this determination satisfactorily explains the phenomenon that you saw.

Yours faithfully,

REPORT ON UNUSUAL AERIAL SIGHTING

Part 1 - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of Observer ....Lindsay E. Armstrong.....Age...11....

2. Address of Observer....."Lynwood"....Vasse.....
.....WA....6283.....Phone Number..554033

3. Occupation of Observer.....Student.....

4. Dat & Time of Start of Observation...Oct. 2. 1972....9:45 pm
How certain is the date?.....Very certain.....
How accurate is the time of start?...It is an assumption

5. Duration of Observation.....10-20 minutes.....
How accurate is your estimate?....fairly accurate.....

6. Observer's location at time of sighting....."Lynwood"...Vasse
.....
How familiar is observer with this locality?...Resident for 11years

7. Weather conditions at time of observation...Fine...No clouds
.....

8. Describe any aids/equipment used in the observation...None used
.....

9. Where was object first observed?:
a. Relative to your surroundings..High above our shed
.....
b. Angle of elevation.....70°.....
c. Compass angle bearing.....N.W.....
d. How accurate are these estimates?....fairly accurate...

10. What first attracted observer's attention?...The UFO.....
.....

11. If there was more than one light/object:
a. How many were there? .....One.....
b. in what formation were they?.....

/ 12. What was

12. What was the colour of the light or object? Red. Orang. Yellow. White

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards)
O. magnitude

14. What was the apparent size at nearest approach? :
a. relative to Venus or Moon.... Size of Plato crater.
b. relative dimensions in inches at arm's length (About 20 inches from eyes)... A pea held at 20"

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?
W.N.W. 60° approx

16. Was any method of propulsion obvious? No

17. Describe any sound heard, including changes in pitch and intensity
No

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?
65° - 70°, - 60°

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances... Fast... low-flying aeroplane.

20. Give duration of any stationary phases... No

21. Describe any deviations or manoeuvres ... veered slowly up and down

22. Describe any trail of exhaust, vapour or light seen... None seen

23. Where was object last observed? :
a. relative to your surroundings ... too high to tell
b. angle of elevation ... 60°
c. compass angle bearing... W.N.W.

24. What was the manner of its disappearance? ... faded away...

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)

/ 26. State any

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.

Club training

27. How many witnesses to the sighting? One

28. Do you know of witnesses to similar sightings in the area?

Yes Peter McCarthy

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?

Aeroplane balloon ect

30. What are your main reasons for excluding this explanation?

It changing colour

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form if needed.

REPORT ON UNUSUAL AERIAL SIGHTING

Part 1 - Report by Observer

NOTE: (As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of Observer Peter W.C. McArthy Age 9

2. Address of Observer R.S.M. 203 Busselton
6280 Phone Number 554140

3. Occupation of Observer Student

4. Dat & Time of Start of Observation Oct 2 1972 10:30 pm
How certain is the date? Very certain
How accurate is the time of start? It is an assumption

5. Duration of Observation 2-3 seconds
How accurate is your estimate? Not too accurate

6. Observer's location at time of sighting Observers Home-stead
How familiar is observer with this locality? Resident 9 yrs.

7. Weather conditions at time of observation Fine Small Cumulus clouds to north

8. Describe any aids/equipment used in the observation No aids used

9. Where was object first observed?:
a. Relative to your surroundings South side of Farmhouse
b. Angle of elevation 60° approx
c. Compass angle bearing South approx
d. How accurate are these estimates? approximates

10. What first attracted observer's attention? an interesting star

11. If there was more than one light/object: No
a. How many were there?
b. in what formation were they?

/ 12. What was

12. What was the colour of the light or object? Changing quickly

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards)
magnitude very much the same as Full moon

14. What was the apparent size at nearest approach? :
a. relative to Venus or Moon ½ of Venus
b. relative dimensions in inches at arm's length (About 20 inches from eyes) Small nail hole at 20"

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?
SW 60° approximately estimated

16. Was any method of propulsion obvious? No

17. Describe any sound heard, including changes in pitch and intensity
No

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?
60° - 30°

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances. It was a blur too fast to be estimated

20. Give duration of any stationary phases. No

21. Describe any deviations or manoeuvres Dived

22. Describe any trail of exhaust, vapour or light seen. —

23. Where was object last observed? :
a. relative to your surroundings SW of Farmhouse
b. angle of elevation 60°
c. compass angle bearing S.W. approx

24. What was the manner of its disappearance? disappeared into thin air

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)
No

/ 26. State any

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.

....Training....in..use...of...astronomical.devices

27. How many witnesses to the sighting? .....One.....

28. Do you know of witnesses to similar sightings in the area?

.....Yes.....Lindsay...Armstrong.....

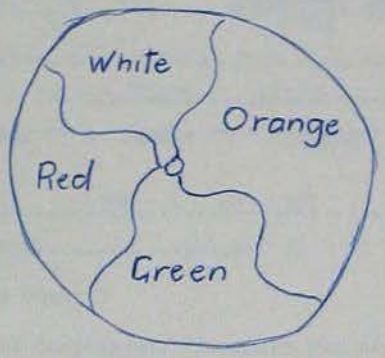
29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?

...Meteorogical..balloon..or...aircraft.....

30. What are your main reasons for excluding this explanation?

.....One....It....acted...differently.to.an.Aircraft

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form if needed.



It was changing colours.

SIGHTING #20

PINJARRA - JOHN DEVENISH-MEARES
WA

580/1/1 Pt20 (21A)

27 FEB 1973

Mr J. Devenish-Meares,
Pinjarra Farmlands,
PINJARRA W.A. 6208

Dear Sir,

With reference to your report of an unusual aerial sighting on 4th September 1972, we regret to say that investigations carried out by the RAAF have not been conclusive in determining the cause.

Difficulty has been experienced with this report due to the time period between the sighting and receipt of the report at RAAF Base PEARCE W.A. As such, our opinion of the cause is that the sighting was probably 'space debris' re-entering the atmosphere.

For your information. the number of man made vehicles in Earth orbit as at the 6th August 1972, was 2825, and numerous items of debris are re-entering constantly.

Yours faithfully,

G J Odgers

(~~D.G.~~ G.J. ODGERS)
Director of Public Relations

Dhl

ANNEX E

(21)

REPORT ON UNUSUAL AERIAL SIGHTING

Part 1 - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of Observer JOHN DEVENISH-MEARES Age 46

2. Address of Observer PINJARRA FARMLANDS
PINJARRA W.A. 6208 Phone Number 095 311249

3. Occupation of Observer MANAGER, BEEF PROJECT, ALCOA OF AUST (W.A.)

4. Dat & Time of Start of Observation 7.25 p.m. 4/9/72
How certain is the date? CERTAIN
How accurate is the time of start? CHECKED TIME

5. Duration of Observation APPROX 5 MINS.
How accurate is your estimate? PLUS OR MINUS 1 MINUTE

6. Observer's location at time of sighting STH.-WEST HIGHWAY PINJARRA.
How familiar is observer with this locality? VERY

7. Weather conditions at time of observation SLIGHT CLOUD, CLOUDS STREAKED NORTH-SOUTH DIRECTION,

8. Describe any aids/equipment used in the observation
BINOCULARS

9. Where was object first observed?:
a. Relative to your surroundings SLIGHTLY SOUTH-WEST, ABOUT 20 DEG. FROM DIRECTLY OVERHEAD
b. Angle of elevation APPROX 70 DEG FROM HORIZON
c. Compass angle bearing APPROX 270 DEG. ON COMPASS
d. How accurate are these estimates? REASONABLE

10. What first attracted observer's attention? PERFECT ISOS. TRIANGULAR SHAPE LIGHT. SAME INTENSITY AS CLOUDS LIT BY STARLIGHT BUT DIRECTED WEST TO EAST ACROSS LINE OF CLOUD WHICH WAS NORTH SOUTH

11. If there was more than one light/object:
a. How many were there? -
b. in what formation were they? -

/ 12. What was

12. What was the colour of the light or object? WHITE

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards)
SAME AS CLOUD IN BRIGHT STARLIGHT

14. What was the apparent size at nearest approach? :
a. relative to Venus or Moon APPROX. TWICE LENGTH OF DIAM. FULL MOON
b. relative dimensions in inches at arm's length (About 20 inches from eyes) THREE INCHES

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?
PASSED SLIGHTLY Sth.West H OF DIRECTLY OVERHEAD Sth. EASTERLY DIRECTION. T [redacted] T.

16. Was any method of propulsion obvious? NO

17. Describe any sound heard, including changes in pitch and intensity
NONE

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?
AS IN 15

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances.
ROUGHLY SPEED OF USUAL SATELLITES VIEWED

20. Give duration of any stationary phases NONE

21. Describe any deviations or manoeuvres NONE

22. Describe any trail of exhaust, vapour or light seen. ALMOST PERFECT ISOSCELES TRIANGULAR SHAPE, SIDES APPROX TWICE AS LONG AS BASE. BRIGHT LIGHT SIMILAR TO SATELLITE OBSERVED AT APEX OF TRIANGLE NOT VISIBLE TO NAKED EYE. HOWEVER TRIANGLE OF LIGHT QUITE VISIBLE with binoculars

23. Where was object last observed? : WITHOUT BINOCULAR ASSISTANCE.
a. relative to your surroundings EASTERN S.S.E.
b. angle of elevation APPROX 45 DEG.
c. compass angle bearing ROUGHLY 115 DEG. FROM NORTH

24. What was the manner of its disappearance? FURTHER EAST IT TRAVELLED, LIGHT BECAME FAINTER, FINALLY I BROKE OFF SIGHTING AND RESUMED TRIP.

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)
NONE

/ 26. State any

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.

NO NAVIGATIONAL TRAINING, BUT MATRIC. STANDARD MATHS.

27. How many witnesses to the sighting? ONLY MYSELF

28. Do you know of witnesses to similar sightings in the area?

NONE

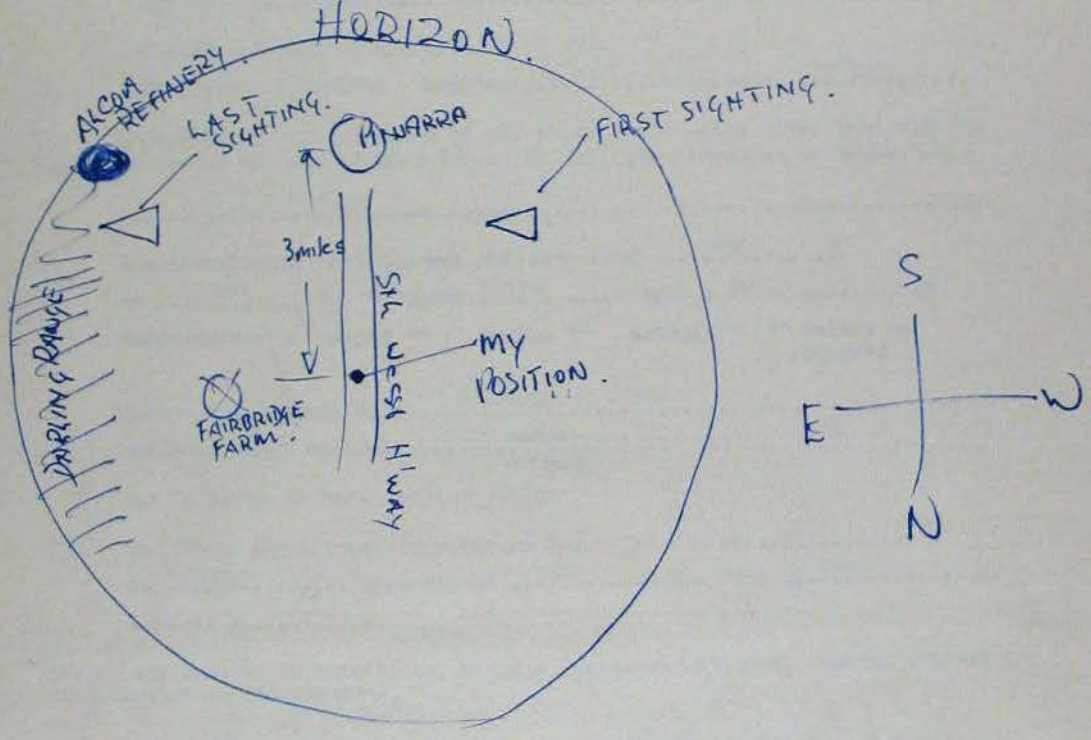
29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?

AT THE TIME THOUGHT IT TO BE SATELLITE JUDGING BY SPEED OF TRAVEL AND APPEARANCE OF LIGHT AT APEX OF TRIANGLE. LIGHT WAS NOT VISIBLE TO NAKED EYE.

30. What are your main reasons for excluding this explanation?

HAVE SINCE THOUGHT IT COULD HAVE BEEN HIGH FLYING AIRCRAFT, BUT LIGHT SEEN WAS WHITE LIGHT AND NO SIGN OF NAVIGATIONAL LIGHT OR AIRCRAFT IDENTIFICATION LIGHTS

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form if needed.



Signature R.S. Jeffreys-Thearle

Date 2 Oct. 1973.

For the attention of the Public Relations Director

Dear Sir,

Thank you for your letter of 14th May (580/1/1 Pt 20 (20A).

The findings of the investigation do nothing at all to satisfy me, because the colour, size and direction of movement of the object sighted just do not fit the explanation provided.

It has occurred to me, that, in the interests of public peace of mind, the formal statement of an explanation different from that given could introduce problems, however, if I had not been sincere in the first place, I would not have gone to as much trouble as I have so far, so while I must disagree with the result, there is no antagonism on my part, and the exercise has not been wasted.

Sincerely,

A.H. Brown

N&A rang Mr Brown explained re entry phenomena more fully and satisfied the reporter. Also recommended the Condon Report as reading material and he was very receptive. No further action required.

14 MAY 1973

Mr A.H. Brown,
11 Yanderra Street,
CONDELL PARK, NSW 2200

Dear Sir,

With reference to your report of an unusual aerial sighting on 6th January 1973, it has been determined that the most probable cause was space debris re-entry to Earth's atmosphere.

Normally, logical explanations such as aircraft movements, planet/star positions, meteorological phenomena and space vehicle movement, are found as reasons for reported sightings.

The above determination resulted from the short period of time of observation, the magnitude and the velocity of the object.

We thank you for your interest, and trust that this explanation is satisfactory.

Yours faithfully,

G. J. Odgers

(G.J. ODGERS)

580/1/1 Pt20 (22A)

Master Peter McArthy
RSM 203
BUSSELTON W.A. 6280

Dear Peter,

With reference to your report of an unusual aerial sighting on 2nd October 1972, it has been determined that the most probable cause was either space debris re-entry, or meteorite entry to Earth's atmosphere.

Normally, logical explanations are available for reported sightings, and investigation of your report covered aircraft movements, planet/star positions, meteorological phenomena and space vehicle movement. From investigation, all but meteorological phenomena and space vehicle movement can be discarded.

The determination resulted from the short period of time of observation, the magnitude described, the size and the colour change, which would occur during passage of the object through atmospheric layers of varying densities.

We thank you for your report, and for your information, there were, as at 31st January 1973, 2899 man made objects in space and numerous items of debris are re-entering the Earth's atmosphere constantly.

Yours faithfully,

G J Odgers

CANBERRA ACT 2600

For Information:

Headquarters Operational Command (Attn: C Intell O)

UNUSUAL AERIAL SIGHTING

1. Forwarded herewith is a report on an unusual aerial sighting observed on 6th January 1973 by Mr A.H. Brown of 11 Yanderra Street, Condell Park (Sydney) New South Wales whilst he was holidaying in the Shoal Bay area. The sighting was in the form of an intense blue light spherical in shape, estimated to have traversed an arc of 100° within the time of three seconds. The object maintained a steady course North to South at a constant elevation of 50°.

2. No military or civil aircraft were active in the area at the time of sighting; Saturn was visible BRG 20°, EL 30°; 2°C temperature inversion from 1000-3500 ft was recorded at Williamtown at 1015Z; and OAO-A2 Booster No 1968/110B was visible at 2103 hours AZ14°, EL 79° HDG 104°.

3. It is possible that the object seen by Mr Brown was the OAO-AZ Booster, with size and intensity magnified by the temperature inversion, although a heading of 104° can hardly be classed as "North to South". A three second sighting however, leaves little time in which to make positive identifications. Failing this, the only other explanation at this time is that the object was space debris, burning up on entry into the earth's atmosphere.

4. Forwarded for your further investigation.

(A.F. BLACKBURN)
Flight Lieutenant
for Officer T Commanding

Enclosure: 1. Report on Unusual Aerial Sighting

(a) how many were there? ..... by the .....

(b) in what formation were they? .....

7th February, 1973.

The Secretary,
Department of Air,
Russell Offices,
CANBERRA. 2600

Dear Sir,

My name is ALAN HUFTON BROWN, of 11 Yanderra Street, Condell Park (Sydney) N.S.W. 2200, presently 51 years of age.

From March, 1940 to about June, 1944 I was attached to an anti-aircraft unit, seeing service in Darwin under active service conditions for some 2 years.

I then transferred to the R.A.A.F. as an aircrew trainee, (pilot) until being discharged as surplus to staff requirements.

That is my general background.

On the night of 6th January, 1973 I was holidaying at Shoal Bay, Port Stephens in N.S.W.

At approximately 9.00 pm, in a clear moonless sky, I saw an object travelling without sound, at a great speed, in a direction from North to South, clear of the coast line.

The object was spherical in shape, and emitted an intense clear pale blue light from its entire surface area.

I observed the progress of the object for about 3 seconds, which was the time it took to traverse a straight line across an arc of about 110 degrees.

After the object had passed out of sight, the stars behind the course of the object appeared to be blacked out. Some four other people with me at the time saw the blue flash across the sky, but did not actually discern the outline of the object.

10. What first attracted observer's attention? ...nil... looking at the sky, in that direction at that time.

11. If there was more than one light/object:

(a) how many were there? ...Only One...

(b) in what formation were they? .....

From my past experience, I conclude the following:-

It was not a conventional aircraft, even though Williamtown operational base is close at hand.

It was not a rocket of any description, there was no trail, and in any case the course was horizontal.

It certainly was not a searchlight, nor was it a flare.

As the sighting of unidentified objects is not all that unusual these days, I considered at length whether or not I would report the incident, however, on telephoning the R.A.A.F. on my return to Sydney, it was requested that a report be made.

Yours faithfully,

Alan Brown

A. H. BROWN

10. What first attracted observer's attention: ..... looking at the sky, in that direction at that time.

11. If there was more than one light/object:

(a) how many were there? ..... Only One

(b) in what formation were they? .....

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer. ALAN HUSTON BROWN Age 51

2. Address of observer. 11 YANDERRA ST CONDELL PARK 2200
BUS. 820211
Phone PRIV. 70-5819

3. Occupation of observer. MARKETING EXECUTIVE.

4. Date and time of start of observation. 6th Jan 1973 9.00 pm.

How certain is the date? Absolutely certain

How accurate is the time of start. + or - 5 minutes

5. Duration of observation. 2½ to 3½ seconds

How accurate is your estimate?

6. Observer's location at time of sighting. Caravan park at Shoal Bay Rd (Alexander McDonald Park)

How familiar is observer with this locality? quite familiar, visit area frequently.

7. Weather conditions at time of observation. clear moonless night. Stars bright and clearly visible

8. Describe any aids/equipment used in the observation. none

9. Where was object first observed:

(a) Relative to your surroundings. Apparently North East.

(b) angle of elevation. about 50 degrees.

(c) compass angle bearing. about 45 degrees.

(d) how accurate are these estimates. Fairly accurate.

10. What first attracted observer's attention? happened to be looking at the sky, in that direction, at that time.

11. If there was more than one light/object:

(a) how many were there? Only One

(b) in what formation were they?

12. What was the colour of the light or object? Light or pale blue.

13. What was the brightness? (compare with full moon or common light source at a stated distance, e.g. ordinary street light at 100 yards) Would describe as intense, but did not project a beam

14. What was the apparent size at nearest approach:

(a) relative to Venus or Moon Had there been a full moon, it would have been half the size.

(b) relative dimensions in inches at arm's length (about 20 inches from the eyes) Are to never mind.

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? Bearing about 90 degrees. Elevation still 50 degrees.

16. Was any method of propulsion obvious? No

17. Describe any sound heard, including changes in pitch and intensity No sound at all

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? 50 degrees all the time.

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances. Traversed an arc of more than 100 degrees in approx 3 seconds.

20. Give duration of any stationary phases None

21. Describe any deviations or manoeuvres None.

22. Describe any trail of exhaust, vapour or light seen. None, although the stars behind the course of the object were blanked out for some seconds after it had disappeared.

23. Where was object last observed:

(a) relative to your surroundings South East.

(b) angle of elevation 50 degrees.

(c) compass angle bearing About 120 to 130 degrees.

24. What was the manner of its disappearance? Seen obscured by hill.

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc) No

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity 4 years in anti aircraft artillery (3.7 in Guns included)

27. How many witness to the sighting? At least four although others saw the object less distinctly.

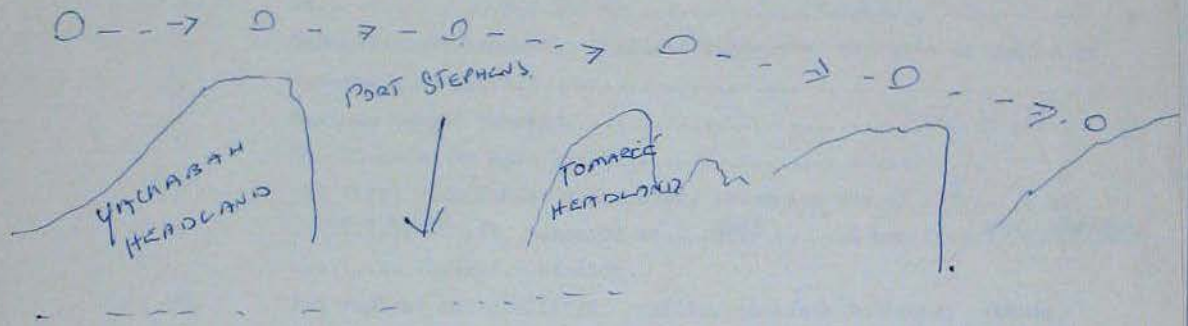
28. Do you know of witnesses to similar sightings in the area? Only those with me at the time.

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? None - not an aircraft, searchlight, rocket flare or balloon

30. What are your main reasons for excluding this explanation?.....

.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.



X Alexander McDonald
Caravan Park.

2. DAFI

The Secretary,
Department of Air,
Russell Offices,
CANBERRA. 2600

Dear Sir,

My name is ALAN HUFTON BROWN, of 11 Yanderra Street, Condell Park (Sydney) N.S.W. 2200, presently 51 years of age.

From March, 1940 to about June, 1944 I was attached to an anti-aircraft unit, seeing service in Darwin under active service conditions for some 2 years.

I then transferred to the R.A.A.F. as an aircrew trainee, (pilot) until being discharged as surplus to staff requirements.

That is my general background.

On the night of 6th January, 1973 I was holidaying at Shoal Bay, Port Stephens in N.S.W.

At approximately 9.00 pm, in a clear moonless sky, I saw an object travelling without sound, at a great speed, in a direction from North to South, clear of the coast line.

The object was spherical in shape, and emitted an intense clear pale blue light from its entire surface area.

I observed the progress of the object for about 3 seconds, which was the time it took to traverse a straight line across an arc of about 110 degrees.

After the object had passed out of sight, the stars behind the course of the object appeared to be blacked out. Some four other people with me at the time saw the blue flash across the sky, but did not actually discern the outline of the object.

From my past experience, I conclude the following:-

It was not a conventional aircraft, even though Williamtown operational base is close at hand.

It was not a rocket of any description, there was no trail, and in any case the course was horizontal.

It certainly was not a searchlight, nor was it a flare.

As the sighting of unidentified objects is not all that unusual these days, I considered at length whether or not I would report the incident, however, on telephoning the R.A.A.F. on my return to Sydney, it was requested that a report be made.

Yours faithfully,

Alan Brown

A. H. BROWN

KEW VIC - MRS GRETCHEN CROW

- LIBRARY ASST ABC

580/1/1 Pt20 (19A)

27 FEB 1973

Mrs G.I. Crow,
178 Princess Street,
KEW VIC 3101

Dear Mrs Crow,

With reference to your report of an unusual aerial sighting on 22nd October 1972, it has been determined that the most probable cause was a sighting of the star RIGEL.

During the time of sighting, Rigel which was shining very brightly, was located at 2300 hours at 020° elevation and 090° azimuth, and by 2359 hours, relative movement was to elevation 050° and 070° azimuth. The apparent ziz zag movement and stationary periods were probably due to atmospheric conditions pertaining at the time.

We trust that this determination satisfactorily explains the phenomenon that you saw.

Yours faithfully,

G.J.

SIGHTINGS OF UNUSUAL AERIAL OBJECTS

1. The attached reports of unusual aerial sightings have been examined and assessed at Part 2 of the reports.

2. All but one of the objects were observed from the Melbourne area. The incident reported by Cpl Conlan (RAAF) was sighted whilst he was driving between Warnambool and Port Fairy.

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer (Mrs.) Gretchen Inez CROW .....Age ....28.....

2. Address of observer..178 Princess Street, KEW, 3101.....

.....Phone.(Home).86.5482....

3. Occupation of observer..Acting Record Library Assistant (A.P.C.).....

4. Date and time of start of observation. Sunday, 22nd October, 1972. about 2300 hrs.

How certain is the date?..Bang on. We'd just been to a lecture on that date

How accurate is the time of start?. We'd just arrived home and were parking the car

5. Duration of observation..Approximately one hour.....

How accurate is your estimate?..I only know it was from approximately 2300 hrs. to midnight

6. Observer's location at time of sighting. Driveway of 178 Princess Street, KEW, and driveway of 176 Princess Street, KEW.

How familiar is observer with this locality?. I live there (and have for nearly two years)

7. Weather conditions at time of observation. Quite cold, very clear night no clouds.

8. Describe any aids/equipment used in the observation. One pair of opera glasses

9. Where was object first observed? : See drawing on back page

a. Relative to your surroundings. From the end of the drive, just above some trees

b. angle of elevation. Not very good at things like this - probably about 30°

c. compass angle bearing..None taken.....

d. how accurate are these estimates?. I'm no expert!.....

10. What first attracted observer's attention?. The extreme brightness of object. It was so much brighter than anything else around at that time.

11. If there was more than one light/object : No.

a. how many were there?. Only one.....

b. in what formation were they?.....

12. What was the colour of the light or object? Brilliant white, with flashing lights, red, blue and green (red on top - reminded me of an ambulance - blue and green on the bottom, and they were rotating all the time)

~~RESTRICTED~~

C/INTEL C Sooley

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards) Not sure, but if I compared it with say, Venus, about three of four times as bright

14. What was the apparent size at nearest approach?:

a. relative to Venus or Moon. Twice the size of Venus

b. relative dimensions in inches at arm's length (about 20 inches from the eyes). Not sure how you do this. See previous answer

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? Not taken. Don't know about this one.

16. Was any method of propulsion obvious? Not sure of METHOD, but it moved.

17. Describe any sound heard, including changes in pitch and intensity Absolutely silent all the time.

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? Haven't a clue. 2300 hrs. about 30° and Midnight about 45°

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances It moved only quite slowly and stopped several times. Lost count of the times.

20. Give duration of any stationary phases. Up to five minutes.

21. Describe any deviations or manoeuvres. See diagram for this

22. Describe any trail of exhaust, vapour or light seen. None

23. Where was object last observed :

a. relative to your surroundings. We were still in the back garden, and it was seen above us, about 45°.

b. angle of elevation. I don't really know, I only estimate 45°.

c. compass angle bearing. None taken. Don't know what this means.

24. What was the manner of its disappearance? We just went inside. It was quite late, about midnight, and the object seemed in no hurry to go!

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc). Nope.

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity. Well, I haven't had any! My husband (Brian) estimated angles, etc. for me!

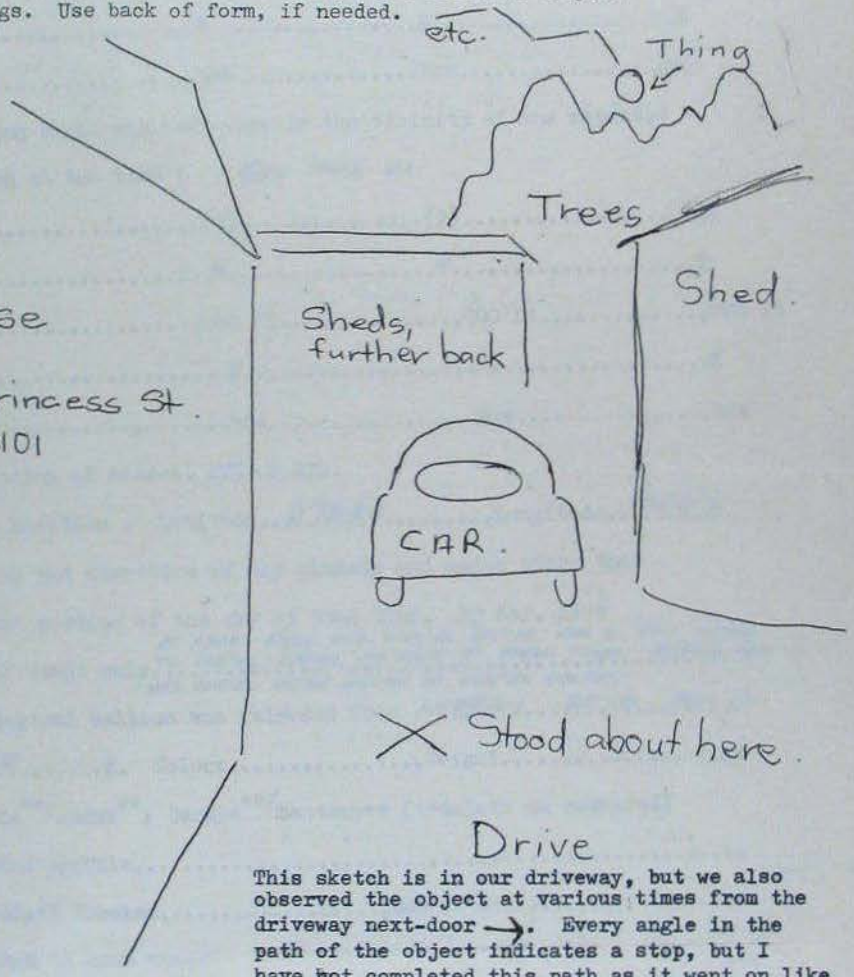
27. How many witness to the sighting? Four - Myself, my husband, and our next-door neighbours from 176 Princess Street, KEW.

28. Do you know of witnesses to similar sightings in the area? Not that I know of.

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? Either an undersized moon, or an oversized (very) Venus.

30. What are your main reasons for excluding this explanation? Because both the moon and the all planets (incl. Venus) do NOT twinkle, blink, flash, (or move,) since they rely on reflected light. Only stars do this, and even stars don't zig-zag across the sky!

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.



This sketch is in our driveway, but we also observed the object at various times from the driveway next-door →. Every angle in the path of the object indicates a stop, but I have not completed this path as it went on like this all the time. When seen through the opera glasses, we thought it could have had a half-moon shape, ☾ but it was too bright to see clearly.

UNUSUAL AERIAL SIGHTING - 17 NOV 72

1. With reference to your report of an unusual aerial sighting on 17th November 1972, it has been determined that the most probable cause was either space debris re-entry, or meteorite entry to Earth's atmosphere.

2. Normally, logical explanations are available for reported sightings, and investigation of your report covered aircraft movements, planet/star positions, meteorological phenomena and space vehicle movement. From investigation, all but meteorological phenomena and space vehicle movement can be discarded.

3. Although in your narrative of the occurrence you rejected the probable cause from being a meteorite, due to the horizontal path and direction of travel of the object, these reasons are not valid. Due to the short period of sighting, the path in fact could have been very shallow and there is no reason to reject an east-west direction of atmospheric entry of either meteorites or space debris.

4. We thank you for your report, and for your information, there were, as at the 31st January 1973, 2899 man made objects in space and numerous items of debris are re-entering the Earth's atmosphere constantly.

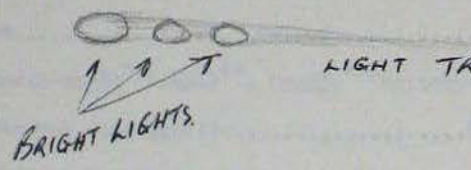
CLOUD LEVEL



Signature.....A Condon..... Date....24 NOV 72.....

LOCATION: Approx 5 miles from Warambool toward Port Fairy on Princess Highway.

DATE: 17NOV72 TIME: 2120 Hrs

On the particular night of the sighting I was proceeding from Melbourne on a trip home to Mt Gambier SA in the company of my brother and a friend. Shortly after leaving Warnambool a passing the Tower Hill Game Reserve I noticed an extremely bright light moving in a horizontal attitude from East To West on the Northern side (drivers side) of my car. I kept the objects in sight and said to my brother 'What in the Hell is that', he had time to sight the object and remark 'Christ'. The object then dissapeared. The other passenger in the car only managed to catch a glimpse of the objects. We dispelled light reflection on the window because it was down and I had pointed to the objects.
My brother then commented that it was a meteorite but this was also dispelled because of the manner of horizontal flight.
It (the object/s) looked very similar to a meteorite burning up in the atmosphere but once again I must point out that it was moving at great speed horizontally from East to West.
I took note of the time as soon as the object dissapeared and have been driving over that particular highway regularly for the last 2½ years both at night and during the daytime.

Passengers were;

Pvt G Conlan (now discharged)
45 Orr Street
Mt Gambier SA 5290

and,

Pvt Summers (now discharged)
37 Whele St
Mt Gambier Sa 5290

were in that portion of the sky at that time. By day, give location of Venus only. ALDHERATZ MAG 2 003° AZ 03° EL HAMAL MAG 2 025° AZ 029 EL

40. The cause (or likely cause) of the sighting ~~was~~*/cannot* be determined.

41. The object reported probably was*/~~may have been~~* (delete as required)

..... A METEOR .....

The usual suspects in cases of this nature, ie aircraft met balloons, planets and stars, have been ignored because of the extremely short duration of this sighting. The manner of the objects' appearance and disappearance therefore leans heavily toward it having been a meteor, which burned out in the atmosphere. There were no other reports of this object nor can the Meteorological Bureau shed any light on it.

580/1/1 Pt20 (17A)

Mr A.L. Marshall,
101 The Boulevarde,
IVANHOE, VIC 3079

Dear Sir,

With reference to your report of an unusual aerial sighting on the 9th December 1972, we regret that a determination of the cause has not been possible.

If the period of observation (30 seconds) has been over estimated, a feasible solution is that the occurrence was a meteor, or fireball as described, or re-entry of space debris to the atmosphere.

We thank you for your report and for your information, there were, as at the 6th August 1972, 2825 man made vehicles orbiting the Earth, and numerous items of debris are re-entering constantly.

Yours faithfully,

G. J. Odgers

40. The cause (or likely cause) of the sighting ~~can~~*/cannot* be determined.

41. The object reported probably was*/may have been* (delete as required)

..... UNKNOWN .....

From an examination of Mr Marshalls' sketch and somewhat hazy description, it would appear that the object was sighted to the SSE (approx 150°) from the house. (Balwyn lies to the SE of Ivanhoe). There are no known lights in the area which could have been mistaken for an unusual aerial object, and no aircraft activity was reported in this sector. No other authorities - obet, Observatory or DCA had any reports of this sighting. The bearing of this sighting from Ivanhoe places the object in the general direction of Moorabbin which on some nights (not Saturdays) and not at 2330 hours) conducts light aircraft night flying training, so that the possibility of light aircraft can be ruled out. On the evidence available this sighting cannot be explained.

for covering letter from HQSC

580/1/1 Pt20 (16A)

- 9 MAR 1973

Mr B. Costello,
42 Ruby Street,
BURWOOD EAST VIC 3151

Dear Sir,

With reference to your report of an unusual aerial sighting on 13th December 1972, investigation has determined that the most probable cause was an atmospheric phenomenon related to refraction of light.

Normally, logical explanations are available for reported sightings and investigation of your report covered aircraft movements, planet/star positions, space vehicle movement, meteorological measurement devices and atmospheric phenomena.

There were no RAAF or Civil aircraft movements in the area at the time of sighting, and the apparent size precluded meteorological measurement devices, stars and planets, and space vehicles. Additionally, no unaccountable radar observations were made from radar sites in the surrounding area.

Investigation into atmospheric conditions for the period revealed that a marked temperature inversion of 9°C occurred between 2,000 ft and 3,000 ft altitude with an accompanying variation in density. Also a directional wind change from south-east at 2,000 ft to north-west at 3,000 ft occurred. With these conditions and a clear, fine, warm day the feasibility of light refraction/reflection is great.

From these parameters, the investigating team is of the opinion that the sighting resulted from the reflection of the sun (which was high and slightly behind your vehicle) on a mirror like object, (car windscreen, solar heating appliance, storage tank etc) being refracted through the varying density of the atmosphere at the level between 2,000 and 3,000 ft. This refraction could result in the formation of a mirage of eliptical shape which would be apparently stationary until either the

/reflecting surface

reflecting surface moved, or the atmospheric conditions changed. The apparent rapid speed and subsequent disappearance was probably due to movement of the reflective surface or small rapid change in the density of the 2,000 - 3,000 ft atmosphere level.

We trust that this explanation is satisfactory and thank you for your interest.

Yours faithfully,

G.J. Odgers

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer Brian & Jan Costello ..... Age 29 and 28.

2. Address of observer 42 Ruby St., Burwood East, 3151

..... Phone 232 1292

3. Occupation of observer School Counsellor Teacher, and House wife.

4. Date and time of start of observation 13.12.72 at 2.30 - 2.45 pm.

How certain is the date? Positive.

How accurate is the time of start? Fairly accurate.

5. Duration of observation 1. minute.

How accurate is your estimate? We agree.

6. Observer's location at time of sighting We were driving down the Burwood Hwy, 100 yds past Waragul Rd, and travelling east.

How familiar is observer with this locality? It is our suburb.

7. Weather conditions at time of observation Very clear. It was a fine day and warm.

8. Describe any aids/equipment used in the observation. None.

9. Where was object first observed? :

a. Relative to your surroundings Above and to the right of the road. It was stationary mid-air.

b. angle of elevation about 60°

c. compass angle bearing Not used.

d. how accurate are these estimates? Pretty fair.

10. What first attracted observer's attention? Its size and the fact that it was too big to be a plane. Also that it wasn't moving.

11. If there was more than one light/object :

a. how many were there? NA

b. in what formation were they? NA

12. What was the colour of the light or object? Metalic silver grey. (Similar to the colour of the moon on the left).

~~RESTRICTED~~

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards)..The same as the moon for that day.....

14. What was the apparent size at nearest approach?:

a. relative to Venus or Moon.....The same size as the moon.....

b. relative dimensions in inches at arm's length (about 20 inches from the eyes)..about 1.5"....

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?.Estimated by having to bend head when viewed from inside car.....

16. Was any method of propulsion obvious?.....No method, obvious.....

17. Describe any sound heard, including changes in pitch and intensity There was no sound what so ever.

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?. About 50 - 70°. (Two observers from different positions.)

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances .....It sped towards the eastern horizon, but it did not follow it down, but disappeared to a point (within 30 seconds). Error ONLY (15 Seconds).

20. Give duration of any stationary phases...about 30 seconds.....

21. Describe any deviations or manoeuvres.....no deviations. Straight course.

22. Describe any trail of exhaust, vapour or light seen..Nothing.....

23. Where was object last observed :

a. relative to your surroundings..it disappeared along a straight easterly bearing from our position.

b. angle of elevation..25 - 30°.....

c. compass angle bearing.....due east (estimated).....

24. What was the manner of its disappearance?.....Bloody amazing. (Speed.)

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc)..No.....

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity..Mathematics teacher.

27. How many witness to the sighting?....(2).....

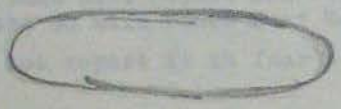
28. Do you know of witnesses to similar sightings in the area? No.

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? None that we know or understand.

30. What are your main reasons for excluding this explanation? The speed at which it was able to reach a pin-point dot and disappear within 15 seconds from from zero.

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

These were drawn independently.



Mrs. Janice Costello

Mr. Brian Costello

Signature. Brian Costello Janice Costello Date. 15.12.72

Report to accompany schedule: by Brian Costello

I was driving along Burwood Highway after visiting the bank to get a cheque book. After the intersection at Warragul Road Jan asked me to look up. "Brian, Look up there!"
I thought she meant inside the car - a spider on the ceiling or something. She was speechless and just kept staring.

"It isn't a plane. It's too big. What is it?" At this point I was able to see what she was looking at, and had the same questions in my mind.

I pulled over and stopped the car. The object was silent. There were no "plane" sounds before, during or after our observation. It was still stationary when we stopped the car, and remained in its position for a few seconds.

It then moved off following a straight line in an easterly direction. Unlike planes, it did not appear to go down with the horizon but continued straight outwards on a tangent.

It was an amazing experience. My wife and I had seen the same thing, ie the same size object and behaviour, in 1966 on an isolated stretch along the 90 mile beach near McLoughlan's Beach, Yarram.

We did not report it in fear of ridicule.

Brian Costello

Report to accompany schedule: by Mrs Janice Costello

From where we were the object looked like it was above Tally Ho boys home, because it looked so big. When I first looked at it I thought it was a plane, then realised it was far too large. It was stationary and as long as I was looking at it, it must have been about 30 seconds. When I pointed it out to my husband he saw it and then it shot off. I did see the dot. It moved so fast I couldn't follow it.

Janice Costello

40. The cause (or likely cause) of the sighting ~~can~~*/cannot* be determined.

41. The object reported probably was*/may have been* (delete as required)

.....UNKNOWN.....

I talked to Mr Costello on the afternoon of this sighting and requested he fill in a proforma. He sounded sincere in his belief that he had seen some kind of high speed flying object, which moved faster than anything he had ever seen. He was quite accustomed to seeing DC 9s inbound from Tasmania and was adamant that the object was not an aircraft. (I live in the same general area - within 2 miles - and have noticed that aircraft approaching and leaving Tullamarine stick ~~to~~ fairly rigidly to flight paths which in no way approximate the heading of this object). DCA air traffic control officers stated there were no aircraft in that sector at the time (and that it was only inbound/outbound aircraft for Tasmania which would be seen here in any case). DCA radar at Tullamarine had no unexplained radar tracks. As Mr Costello stated, the weather was fine (it was cloudless), and from my own observations visibility was excellent. The cause of this sighting cannot be determined.

SIGHTING # 14

CHADSTONE - MRS M.W. HALL
VIC

- HOUSEWIFE

- Refer sighting # 18 for covering letter from HRSC

580/1/1 Pt20 (15A)

- 5 MAR 1973

Mrs M.W. Hall,
6 Amaroo Street,
CHADSTONE, VIC 3148

Dear Mrs Hall,

With reference to your report of an unusual aerial sighting on 2nd January 1973, investigation has determined that the most probable causes were orbiting space debris.

Normally, logical explanations are available for reported sightings and investigation of your report covered aircraft movements, planet/star positions, meteorological measurement devices and phenomena, and space vehicle movement.

There were no RAAF or Civil aircraft movements in the area at the time of sighting, and the reported speed was too fast for meteorological measurement devices. No apparent phenomenon was reported from any source. The stars Sirius and Procyon were highly prominent but again, the movement precluded them as possible causes.

During the period of your report, there were 2879 man made objects in space. Two of these objects can be equated to your observations as follows:

a. The sighting at 1035 PM on 19th January was probably COSMOS 44;

b. The sighting at 10.25 PM on 24th January was probably AOA-3 rocket.

The Satellite Prediction Bulletin predicts only those highly luminous objects selected on the basis of being 'long lived'. It is believed that the remainder of the sightings can be attributed to 'short lived' items which do not meet the criteria for prediction.

We trust that this explanation is satisfactory and thank you for your interest.

Yours faithfully,

G.J. Odgers

(G.J. ODGERS)

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer MRS. M. W. HALL Age 47

2. Address of observer 6 AMAROO ST.
CHADSTONE, VICTORIA 3148 Phone 277 2067

3. Occupation of observer HOME DUTIES AND PART TIME SALES ASST.

4. Date and time of start of observation 2-1-73 @ 10:35 P.M.

How certain is the date? DEFINITE

How accurate is the time of start? DEFINITE

5. Duration of observation. 3 SIGHTINGS. 10.35 PM, 10.45 + 10.50

How accurate is your estimate? WITHIN A COUPLE OF MINUTES

6. Observer's location at time of sighting. FRONT GARDEN OF MY
HOME, 6 AMAROO ST. CHADSTONE 3148

How familiar is observer with this locality? 18 YEARS RESIDENCE

7. Weather conditions at time of observation. VERY HOT NIGHT, CLEAR
OF CLOUD

8. Describe any aids/equipment used in the observation... EYESIGHT ONLY
~~Later, Binoculars, Did not much help~~

9. Where was object first observed? :

a. Relative to your surroundings. SORRY! COMING FROM THE DIRECTION OF BOX HILL TO OAKLEIGH (APPROX.) THIS WOULD MAKE THE HEADING ABOUT 200° ~~???~~

b. angle of elevation

c. compass angle bearing DO NOT KNOW

d. how accurate are these estimates?

10. What first attracted observer's attention? I WAS LYING ON THE GROUND, GAZING AT THE STARS, WHEN ONE APPEARED TO SEPARATE, MOVING QUICKLY ACROSS THE SKY

11. If there was more than one light/object : (PRESUME SAME LIGHT, RETURNING?)

a. how many were there? ONE ?

b. in what formation were they?

12. What was the colour of the light or object? SLIGHTLY PINK

~~RESTRICTED~~

~~RESTRICTED~~

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg ordinary street light at 100 yards). AS BRIGHT AS A SMALL STAR

14. What was the apparent size at nearest approach?:

a. relative to Venus or Moon..... SMALL STAR

b. relative dimensions in inches at arm's length (about 20 inches from the eyes).....

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?..... DO NOT KNOW

16. Was any method of propulsion obvious?..... NO

17. Describe any sound heard, including changes in pitch and intensity ..... NO SOUND - VERY HIGH IN THE SKY

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?.. VERY HIGH

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances FROM OVERHEAD, OUT OF SIGHT IN LESS THAN A MINUTE

20. Give duration of any stationary phases..... NONE

21. Describe any deviations or manoeuvres. PRESUME IT TURNED, TWICE, BUT OUT OF MY RANGE.

22. Describe any trail of exhaust, vapour or light seen. LIKE A SMALL STAR, SLIGHTLY PINKISH.

23. Where was object last observed : SORRY!

a. relative to your surroundings COMING FROM BLACKBURN TO NURRUMBEENA (APPROX) 220°

b. angle of elevation.....

c. compass angle bearing..... DO NOT KNOW.

24. What was the manner of its disappearance?.. FADING INTO DISTANCE

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc)..... NO

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity..... NONE

.....

27. How many witness to the sighting?.. 2 ..... TO FIRST SIGHTING 2/1/73, 2 (different 18/1/73, 3 19/1/73. 5 and 6 people 21st & 22nd January 73.

~~RESTRICTED~~

28. Do you know of witnesses to similar sightings in the area? ONLY MY OWN FAMILY TO DATE + FRIEND

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? A FAST MOVING STAR (SATELLITE SPEED?)

30. What are your main reasons for excluding this explanation?.....

.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

Sketches included, amateurish, but I'm afraid, but the only way I can explain our sightings. Generally, summing up, it appears that an object appears every night between 10.20 & 11pm, once, twice or three times. It evidently turns, out of sight, & returns within 10 - 15 minutes. It was too cloudy on 23rd or that time, to see stars, nothing seen. Should you need any other detail you can phone me on 277.2067, after 31st Jan, I shall be on a weeks holiday until then. Trusting these details will be of some interest to you,

..... SATELLITES & SPACE DEBRIS .....

During the period of Mrs Hall's reports there were 2879 man-made objects in space. Two of these objects can be equated to Mrs Hall's observations as under:-

a. The sighting at 2235 on 14th January was probably COSMOS 444 which appeared at 223555, 294° AZ 027° EL and 028° HDG.

b. The sighting at 2225 on 24th January was probably AOA-3 ROCKET which appeared at 222625, 021° AZ 038° EL and 109° HDG.

Our satellite passes bulletin predicts only those highly luminous objects selected on the basis of being long-lived. I believe that the remainder of Mrs Hall's sightings can be attributed to short-lived satellites and rocket stages which do not meet the criteria to be predicted in the visible satellite passes bulletin

Dear Sir,

Thank you for your letter dated 23rd March 1973 with the names and addresses of witnesses to the unusual aerial sightings at Lion Island and Terrigal Lake. We await your advice regarding the name of the witness to the sightings at Killarney Vale, NSW in October and November last year. Due to the elapsed time between the sightings and initiation of investigation, we would be interested to know if your Research Bureau has determined the causes of any of these sightings.

With reference to the alleged unusual aerial sighting at Bateau Bay, the photographs were returned to Mr Owen with a request for the negatives of the prints. These have not, so far, been forthcoming and our investigation is not continuing.

Yours faithfully,

G. J. Odgers

Dear Sir,

In reply to your letter dated 1,march 1973,I am now able to spply you with the names and adresses of two of the witnesses to the ufo sightings. Terrigal, which is our reference number R11,was witnessed be Mr.David Radley c/o Radio 2GO P.O.Box 564 Gosford N.S.W.2250.

Lyon Island,ou reference R10,was Mrs.Pat Clelland,friend,and sons,of Flat 1,70 Ocean Beach Road Woy Woy N.S.W.2256.

In future,we will do everything within our powers to supply you with the names and adresses of the witnesses,so that we may count on your co-operation.

Also,have you reached any decision as yet in regards to the photographs of the ufo which was taken at Bateau Bay last September? Could you kindly advise me on this.

Looking forward to an early reply,

Yours Faithfully,

Harry Griesberg

The Secretary,
Central Coast UFO Research Bureau,
P.O. Box 546,
GOSFORD, NSW 2250

Dear Sir,

The Department of Air has received three reports, via RAAF Base Williamtown, of alleged unusual aerial sightings at Terrigal, Lion Island and Killarney Vale, NSW. These reports have been completed by your organisation on behalf of the witnesses to the sightings, and their names withheld.

The Directorate of Air Force Intelligence within this Department is responsible for investigating all reported unusual aerial sightings, and is willing to co-operate with organisations such as yours in these investigations. The withholding of witnesses' names, however, is considered prejudicial to unbiased investigation, and unless the names and addresses of the witnesses are supplied, so that personal reports may be obtained, we regret that we are unable to carry these investigations further.

Yours faithfully,

G. J. Odgers

For Information:

Headquarters Operational Command

REPORTS ON UNUSUAL AERIAL SIGHTINGS

1. Forwarded herewith is a report on three unusual aerial sightings, directed to this Headquarters by the Central Coast UFO Research Bureau. A copy of their covering letter is also enclosed. This report was recently discovered unactioned on a closed part of this file and because of the time lapse, some background details are not available.

2. No Service aircraft were active in the area at the time of the reported sightings. Civil aviation activities for these dates are unknown. Weather balloons are released daily from the Williamtown Bureau of Meteorology at 0300, 0900, 1500 and 2100 hrs, none of which timings could co-incide with any but the first sighting. No satellites were visible at the time of the sightings, and no planets or major stars were visible in that portion of the sky.

3. It will be noted that these sightings have been reported as being very similar to the object "photographed" at Bateau Bay. A copy of the photograph was forwarded to Department of Air on 8th November 1972. The name of the observor is given as "classified", and this must also detract from the value of the report.

4. Cause or likely cause of the sightings cannot be determined at this time.

5. Forwarded for your further attention, please.

CENTRAL COAST U.F.O. RESEARCH BUREAU

P.O.Box 546 Gosford N.S.W.
2250

November 20th, 1972.

N.J.McLoughlin,
Flight Lieutenant
for Officer Commanding.

Dear Lieut.McLoughlin.

Enclosed please find a report of an Unidentified Flying Object.As you will notice,the one witness has had three sightings of the same or similar object. The first two, 6,1o,72 and the second, 8,10,72, were already on our files, and the witness contacted me the day after he sighted the object once again.

As you will notice,the object somehow is similar to the UFO which was photographed at Bateau Bay recently,around the same time of the first two sightings.As you will notice on the report, the witness alerted his neighbour to also watch the object, as the witness thought that if he would claim to have seen the object himself only, possibly no-one would believe him. It was only when the witness telephoned a radio station that he found out about our bureau,then contacting us. You will also notice on my notes on the reverse of the report that the neighbours accounts of the sighting co-incided with the witness' . I might add that we interviewed the witness,his wife and the neighbours all separately,and all stories match by about 99%.

Also, is there any further news or development on the photograph?

Hoping to hear from you soon,in regards to any development on this case,

Yours faithfully,
Harry Griesberg.

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer. Classified Age about 45-50
2. Address of observer. at Killarney Vale near Bateau Bay (The Entrance) N.S.W. Phone.....
3. Occupation of observer. unknown
4. Date and time of start of observation. ① 10 P.M. ② 7.30 P.M. ③ 8-30 P.M
   How certain is the date? 100%
   How accurate is the time of start? 100%
5. Duration of observation ① 15 MIN. ② 10 MIN. ③ 10 MIN.
   How accurate is your estimate? by wristwatch
6. Observer's location at time of sighting. ① facing North (in back yard) ② facing North East (in back yard) ③ facing East - walking along street - near home
   How familiar is observer with this locality? Very. Resident of Killarney Vale
7. Weather conditions at time of observation ①+② Very clear - No moon or Wind or Clouds.
8. Describe any aids/equipment used in the observation. NIL
9. Where was object first observed:
   a. Relative to your surroundings Low on horizon - travelling upward.
   b. Angle of elevation. about 32° from horizon
   c. Compass angle bearing
   d. How accurate are these estimates? taken by C.C.U.F.O.R.B. officers (2) (compasses)
10. What first attracted observer's attention? object was very much larger & brighter than any star. (see back of form under *)
11. If there was more than one light/object:
    a. How many were there? only One
    b. In what formation were they?
12. What was the colour of the light or object? at first gold/pink - white then changed to Orange & Red
13. What was the brightness? (Compare with full moon or common light source at a stated distance, eg, ordinary street light at 100 yards) Very bright & sharp
14. What was the apparent size at nearest approach?
    a. Relative to Venus or Moon. about size of Golf Ball at arms length
    b. Relative dimensions in inches at arm's length (about 20 inches from the eyes). 1½ to 2"
15. What were the bearing and elevation angles at nearest approach and how were these values assessed? about 32° from horizon - verified by Central Coast UFO Research Bureau officials (2) with compasses
16. Was any method of propulsion obvious? NO

① Refers to 1st sighting on 6-10-1972
② = second sighting on 8-10-1972
③ = 3rd sighting on 15-11-1972

/17. Describe

* Witness at first thought the object was the evening star, but then realised it was very much larger & brighter, also moving ~~so~~ much too fast for a star or planet.

CENTRAL COAST
U.F.O.
RESEARCH BU EAU

17. Describe any sound heard, including changes in pitch and intensity
None whatsoever

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? unable to estimate

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances
slow, like an aircraft

20. Give duration of any stationary phases N.K.

21. Describe any deviations or manoeuvres Object zig zagged while traveling Not at 3rd sighting

22. Describe any trail of exhaust, vapour or light seen
Nil

23. Where was the object last observed:
a. Relative to your surroundings disappeared in Southerly direction over ocean
b. Angle of elevation... approximately 40°-45°
c. Compass angle bearing.....N/A

24. What was the manner of its disappearance? became smaller + smaller

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc) NO

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity. Not known.

27. How many witnesses to the sighting? 4. Witness, wife, neighbour + his wife

28. Do you know of witnesses to similar sightings in the area? NO

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? Nil. Never saw anything like it

30. What are your main reasons for excluding this explanation? —

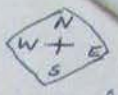
31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form.

Goldy-white colour
Much richer than any star.
But yet, object glittered like a star

Signature C.C.U.F.O.R.B. per N. Grisberg SECRETARY Date 16-11-1972

(SEE BACK)

Witness states that he has 20-20 Visi



1st observation, 6-10-1972

10 P.M.

The observer called his wife, then went and called his neighbours (Man + wife) to also look. (Interviewed separately, both parties' accounts of the incident matched 99%)

Object first appeared in NORTH section, travelling in an arc to WEST - then to South, gradually getting smaller & smaller, and disappearing over the ocean.

Object also changed colour when in WEST part of arc, from goldy-white to Red, with orange on bottom + top only. orange

Object also larger & brighter than any other star in the sky.

2nd observation, 8-10-1972

7.30 P.M

The object travelled in the exact opposite direction to 6-10-72 sightings. Ie. from North to East to South, then disappearing over the ocean.

3rd Observation 15-11-72

8.30 P.M.

Witness walking from Store homeward, in a easterly direction, object all of a sudden visible NORTH-EAST.

Witness stopped to observe. Steady light - very bright

NO flashing or coloured lights on object visible.

Object seemed to float. Goldy colour. Observed for approx. 10 minutes.

Witness then turned South into street where he lives. Looking back, saw object same size + shape as on previous 2 sightings. Object moving in arc & disappearing Easterly. over ocean.

PLEASE NOTE: Witness was shown (AFTER INTERVIEW) a photograph of UFO taken over Bateau Bay recently (about 3-4 miles away) by someone else, & witness states that his observations were very similar in shape as to the one on the photograph.

(Air force has a copy of said Photograph

Mr H. Griesberg,
Secretary,
CCUFORB,
P.O. Box 546,
GOSFORD, NSW 2250

Dear Sir,

With reference to the report of an unusual aerial sighting made by Mrs P. Clelland on 21st December 1972, and submitted to the RAAF by your organization, it has been determined that the most probable cause was the sighting of a naval 'Tracker' aircraft.

The apparent stationary phase was probably due to the slow speed descent of the aircraft on a constant angle towards the sighting position, and the two lights described as 'headlights' were the aircraft's landing lights being used as position identification.

We trust that this explanation is satisfactory and thank you for your interest.

Yours faithfully,

G.J. Odgers

Dear Mrs Clelland,

With reference to your report of an unusual aerial sighting on 21st December 1972, it has been determined that the most probable cause was the sighting of a naval 'Tracker' aircraft.

The apparent stationary phase was probably due to the slow speed descent of the aircraft on a constant angle towards your sighting position, and the two lights described as 'headlights' may have been the aircraft's landing lights being used as position identification to civil aircraft in the approximate area at the same time.

We trust that this explanation is satisfactory and thank your for your interest.

Yours faithfully,

G. J. Odgers

Dear Madam,

This Department has received a report of an unusual aerial sighting witnessed by you on 21st December 1972 at Lion Island, NSW. The report was completed on your behalf by the Secretary of the Central Coast UFO Research Bureau, Mr H. Griesberg.

Third party reporting of unusual sightings is not considered a basis for objective evaluation of reports. We would like you, therefore, to complete the enclosed report form and return it to this Department to enable us to investigate the sighting.

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of observer Mrs. P. CLELLAND. Age 36...
2. Address of observer 170 OCEAN SCH. RD.....
   .....WARRAWEE N.S.W..... Phone...-.....
3. Occupation of observer ..SALES ASSISTANT.....
4. Date and time of start of observation ~~12~~ 21.12.1972 at 10 PM.
   How certain is the date? ..100%.....
   How accurate is the time of start LOOKED AT WATCH SHORTLY BEFORE
5. Duration of observation ...~~About~~ 5 TO 10 MINUTES....
   How accurate is your estimate? ..APPROXIMATELY....
6. Observer's location at time of sighting..WALKING..
   ....ALONG..MANLY BEACH, looking TOWARD LION ISLAND.
   How familiar is observer with this locality?.....
   ...VERY FAMILIAR, OFTEN WALK ALONG THIS beach...
7. Weather conditions at time of observation.....
   .....FEW SCATTERED CLOUDS.....
8. Describe any aids/equipment used in the observation
   .....NONE.....
9. Where was object first observed? :
   (a) Relative to your surroundings .HOVERING.....
   .....ABOVE LYON ISLAND.....
   (b) Angle of elevation ..ABOUT...45°...from HORIZON
   (c) compass angle bearing ...-.....
   (d) how accurate are these estimates ...-.....
10. What first attracted observer's attention? .PULSATING
    ...RED LIGHT, THAT CHANGED INTO WHAT LOOKED LIKE
    TWO CAR HEADLIGHTS.

/11.

11. If there was more than one light/object:
    (a) how many were there? ..TWO.....
    (b) in what formation were they? LIKE CAR LIGHTS, NEXT TO EACH OTHER.

12. What was the colour of the light or object? WHITE headlights, ALSO RED PULSATING LIGHTS

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg, ordinary street light at 100 yards)..HIGH BEAMS OF CAR.....

14. What was the apparent size at nearest approach:
    (a) relative to Venus or Moon .....
    (b) relative dimensions in inches at arm's length (about 20 inches from the eyes) ..... LIKE ROUGHLY 5¢ COIN AT ARMS LENGTH.

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?
    .....

16. Was any method of propulsion obvious? ..NOT THAT I COULD DETECT.

17. Describe any sound heard, including changes in pitch and intensity NONE UNTIL OBJECT had ALREADY PASSED OVERHEAD, THEN LIKE A WHOOSH

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?
    .....NOT VERY HIGH.....

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances ..NOT KNOWN, COULD BE LIKE
    .....A JET.....

20. Give duration of any stationary phases .ABOUT 5 TO 10 MINUTES

21. Describe any deviations or manoeuvres ONLY CHANGING FROM THE RED TO WHITE AND BACK TO RED (BUT IN SAME PLACE, UNTIL

22. Describe any trail of exhaust, vapour or light seen IT TOOK OFF)
    .....NONE WHATSOEVER.....

23. Where was object last observed? :
    (a) relative to your surroundings HEADING INLAND IN A NTH WEST DIRECTION
    (b) angle of elevation ..STRAIGHT ABOVE.....

/(c)

(c) compass angle bearing.....

24. What was the manner of its disappearance? DISAPPEARED OUT OF VIEW

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)?
.....No.....
.....

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity .....NONE.....

27. How many witnesses to the sighting? MYSELF, SON & FRIEND.

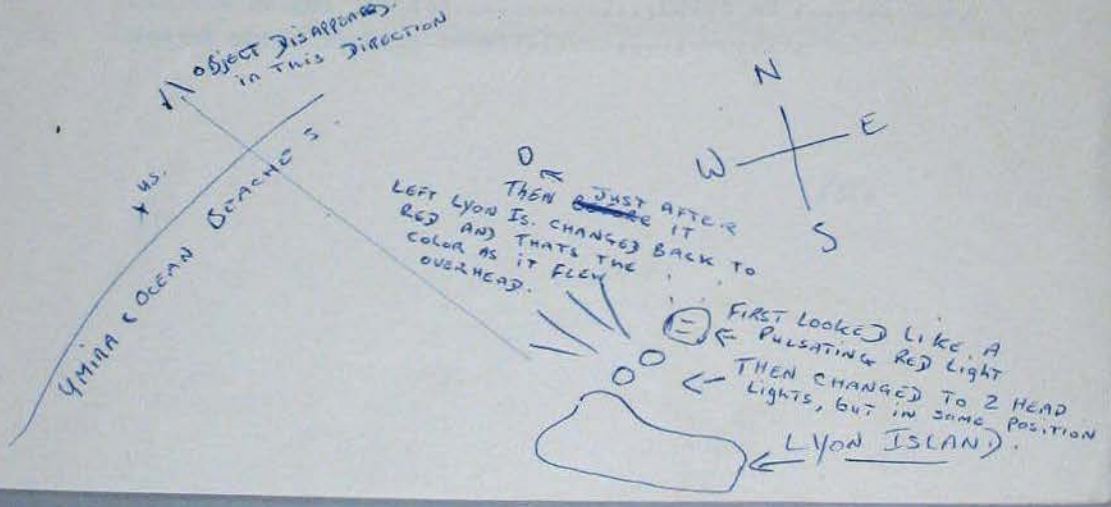
28. Do you know of witnesses to similar sightings in the area? YES. MR. GRIESBACH OF CENTRAL COAST UFO BUREAU, HAS TOLD ME THAT SOMEONE ELSE HAS SIGHTED THE SAME OBJECT, THE SAME NIGHT, AT SAME TIME.

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? A CAR COMING TOWARDS ME.

30. What are your main reasons for excluding this explanation? ....CARS DON'T FLY YET.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

Signature ...P. Clelland..... Date ..18th April 1973.



Part 2 - Unit Evaluation

32. The following military aircraft were in the vicinity of the reported UFO position at the time:

A/C type .....(1).....(2).....(3)
Heading.....T.....T.....T

DAFI

Department of Air

For Information:

Headquarters Operational Command (Attn: CCIO)

REPORTS ON UNUSUAL AERIAL SIGHTINGS

1. Forwarded herewith are two reports on unusual aerial sightings directed to this Headquarters by the "Central Coast UFO Research Bureau". Also enclosed are Unit Evaluation forms, and a copy of the covering letter from the "Research Bureau".

2. Considerable difficulty has been experienced in providing detailed evaluation because of elapsed time from the sightings to receipt of the reports. Details of civil aircraft movement in the area have not been included because DCA was unwilling to provide details without a formal written request. (Senior Supervisor Air Traffic Control).

3. Further difficulty has been encountered due to incorrect identification of place names, eg, "Lyon Island" instead of "Lion Island" and "Terrigal Lake" as opposed to "Terrigal Lagoon".

4. As the witnesses to both sightings were located on the flight path of aircraft travelling between Sydney and Brisbane it is considered that aircraft were involved in each instance and in fact that the object of Report No 10 was an aircraft. As for "Report No 11", the observer awoke from a deep sleep, and watched for five seconds, hardly the basis for an objective report. At the time of sighting, 12.45 am, a half moon was just rising, and could have been mirrored in the lake under prevailing weather conditions. A small cloud obscuring the moon from view would then give the impression of the object disappearing "at close to the speed of light". The noise heard could well have been a piston engined civil freighter aircraft.

5. In each instance the names and addresses of observers have been withheld, and the reports "produced" by Mr Griesberg, whose bona fides are open to some doubt as a result of earlier dealings in this field.

6. Forwarded for your further attention.

January 2,1973.

Flight Lieutenant
Frank Blackburn,
Intelligance Officer
RAAF Base Williamtown

Dear Sir.

As by arrangement with Flight Lieutenant McLaughlin, enclosed please find another two Unidentified Flying Object Reports our bureau is investigating at the moment.

Re OUR REPORT No.10, would you please be as kind as to check your flight schedule for 10 p.m. on 21,12,1972 in the vicinity of Ocean Beach, over Lyons Island, near the Central Coast.

We are thinking along the lines of a helicopter with two powerful searchlights, except for the fact that when the object passed overhead, there was no chopping sound, but a sound similar to a jet, which followed the object quite a considerable distance behind.

Re OUR REPORT No.11, this, we cannot put down to a plane, as the object was hovering about 5 feet above the lake surface. The observer in this instant is a very respectable businessman, and in my opinion he would not conjure up this kind of story.

Also, would you by any chance have a survey map of the central coast, showing details of mountains and valleys height, depth etc. on the central coast. We would be most pleased if you are able to help us.

Also, just before F.L.McLaughlin retired from the Air Force, I forwarded a Report on a UFO sighted at Killarney Vale near Gosford to him, to see if he could come up with an explanation.

Also, any news as yet on the photograph of the UFO taken at Batteau Bay.

Would you kindly advise me in regards to both these matters, plus the two reports enclosed.

Waiting to hear from you at your earliest convenience,

Yours sincerly,

Harry Griesberg.

Harry Griesberg.
Secretary.

16. Was any method of propulsion obvious? NO.

/17. Describe

Our Report No 10.

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer... MRS P. CLELAND FL 1/70 Ocean Beach Road, Way Way c/o Central Coast UFO Research Bureau 22 24 35
2. Address of observer... P.O. Box 546 Gosford N.S.W 2250
... Phone... NIL
3. Occupation of observer... Saleswoman
4. Date and time of start of observation... 21-12-72 10 P.M.
   How certain is the date?... exact
   How accurate is the time of start?... looked at wristwatch shortly before
5. Duration of observation... about 10 minutes
   How accurate is your estimate?... by watch
6. Observer's location at time of sighting... standing on beach with Male friend + 2 sons (ages about 14+12)
   How familiar is observer with this locality?... living in Vicinity
7. Weather conditions at time of observation... overcast. Sky covered with clouds.
8. Describe any aids/equipment used in the observation... None
9. Where was object first observed:
   a. Relative to your surroundings... Hovering over Lyon Island Central Coast. Witness standing on beach. looking out to sea.
   b. Angle of elevation... directly above Island
   c. Compass angle bearing... NIL
   d. How accurate are these estimates?... —
10. What first attracted observer's attention?... 2 bright lights, like oncoming Car.
11. If there was more than one light/object:
   a. How many were there?... TWO
   b. In what formation were they?... same as car headlights
12. What was the colour of the light or object?... WHITE
13. What was the brightness? (Compare with full moon or common light source at a stated distance, eg, ordinary street light at 100 yards)... High beams of Car at very close range.
14. What was the apparent size at nearest approach:
   a. Relative to Venus or Moon... same size as car headlights
   b. Relative dimensions in inches at arm's length (about 20 inches from the eyes)... (as above)
15. What were the bearing and elevation angles at nearest approach and how were these values assessed?...
16. Was any method of propulsion obvious?... NO.

/17. Describe

17. Describe any sound heard, including changes in pitch and intensity: when object had already passed overhead, sound like a jet plane trailed fairly far behind

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?: unable to estimate

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances: Not known fairly fast though

20. Give duration of any stationary phases: about 9 minutes

21. Describe any deviations or manoeuvres: /

22. Describe any trail of exhaust, vapour or light seen: Nil.

23. Where was the object last observed:
    a. Relative to your surroundings: disappearing over Umina near Yoofos
    b. Angle of elevation: /
    c. Compass angle bearing: Nil

disappearing North-West.

24. What was the manner of its disappearance?: into the distance.

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc): NO

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity: Nil.

27. How many witnesses to the sighting?: four

28. Do you know of witnesses to similar sightings in the area?: yes. One other woman in Umina saw object about 10:10PM pass overhead

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?: None Whatsoever

30. What are your main reasons for excluding this explanation?: /

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form,

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.) DAVID RADLEY C/- Radio 2GO POBOX564 GOSFORD2250

1. Name of observer C/o Central Coast UFO Research Bureau Age about 35
2. Address of observer P.O. Box 546 Gosford NSW 2250
   ..... Phone .....
3. Occupation of observer Sales Manager
4. Date and time of start of observation 28-12-1972 . 12.45 A.M.
   How certain is the date? EXACT.
   How accurate is the time of start? Looked at Wall Clock
5. Duration of observation only about 5 seconds
   How accurate is your estimate? average
6. Observer's location at time of sighting standing at Window of home about 150 feet above Lake surface.
   How familiar is observer with this locality? living there
7. Weather conditions at time of observation Very Clear - NO Wind
8. Describe any aids/equipment used in the observation Nil.
9. Where was object first observed:
   a. Relative to your surroundings hovering directly (about 5 feet) above Terrigal Lake (Central Coast)
   b. Angle of elevation /
   c. Compass angle bearing Nil
   d. How accurate are these estimates? /
10. What first attracted observer's attention? (see back of form) under * sign
11. If there was more than one light/object:
    a. How many were there? Only One
    b. In what formation were they? /
12. What was the colour of the light or object? Orange with blue tint throughout
13. What was the brightness? (Compare with full moon or common light source at a stated distance, eg. ordinary street light at 100 yards) very bright, brilliant light.
14. What was the apparent size at nearest approach:
    a. Relative to Venus or Moon about one cent coin at arms length
    b. Relative dimensions in inches at arm's length (about 20 inches from the eyes) about ¼ inch.
15. What were the bearing and elevation angles at nearest approach and how were these values assessed? Lake is only about 500 yards distance from house
16. Was any method of propulsion obvious? Nil

/17. Describe

* Observer was awakened by sound, which sounded like a convoy of heavy army trucks passing through.

CENTRAL ... U.F.O. ...

The sound seemed to fill the whole area around the lake.

17. Describe any sound heard, including changes in pitch and intensity Very deep drone like convoy of heavy trucks

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? about 5 feet from water surface

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances. (see back of form under (+) sign

20. Give duration of any stationary phases.. about 5 seconds

21. Describe any deviations or manoeuvres just sped away from lake.

22. Describe any trail of exhaust, vapour or light seen.... None

23. Where was the object last observed:
    a. Relative to your surroundings. last, out to sea
    b. Angle of elevation. climb, out to sea
    c. Compass angle bearing.... NIL

24. What was the manner of its disappearance? EXTREMELY fast

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc).... None

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity. Witness served time in the ~~Army~~ Navy (7 years)

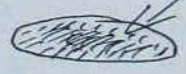
27. How many witnesses to the sighting? TWO (Witness + Wife)

28. Do you know of witnesses to similar sightings in the area?.... Not as yet

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? None whatsoever

30. What are your main reasons for excluding this explanation?....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form,



Orange with blue Tint or mist blended in

Central Coast UFO Research Bureau

Signature per M. Greenberg SECRETARY. Date 30-12-72

⊕ When object disappeared out to sea, in a Easterly Direction, it disappeared so quickly that it ALMOST gave the impression that light went out.

Witness said that he could only put it down to ONE thing. Object must have sped away at close to speed of light.

Mr G.P. Frewin,
47 Nicholson Crescent,
TURNER ACT 2601

Dear Sir,

Investigation of your report of an unusual aerial sighting on 2nd January 1973 has revealed that the sighting was most probably a meteorite.

Your description of the sighting corresponds with a typical meteorite observation and the probability of meteorite activity in the area at the time has been confirmed by the Mount Stromlo Observatory. In addition, several reports were investigated by the Bureau of Mineral Resources, which indicated probable meteorite activity in the area at the time.

Yours faithfully,

G.J. Odgers

OBSERVERS REPORT

SITUATION - REAR GARDEN BLOCK 14/14 TURNER ACT SITTING AND LOOKING IMMEDIATLY ABOVE

A FAST MOVING AND VERY BRIGHT WHITE MOVING OBJECT PASSED OVER BLACK MOUNTAIN TV TOWER DIRECTLY ACROSS MT AINSLIE — EXTREMLY HIGH — MUCH ABOVE REGULAR FLIGHT PATTERNS

NO AVIATION REDS OR WHITES WERE APPARENT — BUT SIZZLING FLASHES LIKE A SPARKLER EMANATED FROM ALL AROUND.

THE OBJECT DISSAPPEARED QUICKLY — AFTER ABOUT 2-3 SECONDS

NO SOUND

OPINION

1) IT DID NOT APPEAR TO BE A REGULAR AIR FLIGHT

2) IF IT WAS A PLANE IT WAS NOT A NORMAL FLIGHT

3) IF IT WAS A PLANE IT MUST HAVE BEEN SUPERSONIC

4) THE WHITE BRIGHTNESS WAS UNUSUAL

5) I THOUGHT THE RAAF BASE SHOULD BE ADVISED, AND ADVISED WHAT I SAW.

ORDERLY OFFICERS REPORT

RECIEVED A CALL FROM MR. G. FREWIN THAT AT 2127 HOURS SAW A LIGHT. VERY HIGH TRAVELLING FROM WEST TO EAST CONSISTED OF A WHITE FLASHING LIGHT AND TOOK APPROX 30 SECONDS FROM START TO FINISH OF OBSERVATION. APPEARED TO PASS OVER BLACK MOUNTAIN.

PLT OFF A. BRYANT

Was it known to have burst?.....No.....

/37.

Q33.

The only civil a/c in the area at the or about the time of the observation were four DC-9's which in the Canberra area would have been approaching to land.

The speed and height of the object, together with the lack of sound. discounts these civil a/c as the cause.

Quickly
of 3 seconds
No SOUND
I C

37. The first significant temperature inversion was of .....°C at ....5000..ft, measured at .....Z hrs from .....station.
DETAILS UNKNOWN BY MET SECTION

38. Any remarks on satellites, rockets, research balloons, comets, meteorites etc. relevant to the sighting .....CANBERRA HAS BEEN EXPERIENCING METEORITE ACTIVITY RECENTLY

39. When an aircraft is a possible identification, include radar trace if available, and ascertain which of the aircraft lights were operating .....
.....N/A.....

40. The cause (or likely cause) of the sighting can*/~~cannot~~* be determined.

41. The object reported probably was*/~~may have been~~* delete as required)
.....a meteorite.....

① The description of the sighting tallies with a typical meteorite observation. The Mt. Stromlo Observatory confirmed the probability of meteorite activity in the area at the time.
② Several reports investigated by the Bureau of Mineral Resources indicated a probable meteorite sighting at the same time and area.
③ The possibility of it being an a/c has been virtually eliminated
④ The brightness and movement of the object precluded its being a planet

SIGHTING # 9

AVONSLEIGH - GILLIAN MYRA DANES
VIC

HOUSEWIFE

580/1/1 Pt20 (10A)

1 MAR 1973

Mrs G.M. Danes,
Stillwells Deviation,
AVONSLEIGH VIC 3159

Dear Mrs Danes,

With reference to your report of an unusual aerial sighting on 29th September 1972, it has been determined that the most probable cause was a light aircraft flying to MOORABIN airport.

Normally, logical explanations are available in answer to sighting reports and theories investigated in relation to your report covered RAAF and Civil air movements, meteor activity, space vehicle/debris re-entry, and positions of planets and stars.

No meteor activity was recorded as visible in the sighting area at the particular time, and space vehicle/debris re-entry was discounted due to the direction of movement reported. There were no RAAF aircraft movements, and of the two civil movements recorded, viz; a Bristol Freighter which departed Essendon for Launceston at 9.30 PM, and a Fokker Friendship which arrived at Tullamarine from Launceston at 9.30 PM, both were discounted due to the relationship of their tracks to the sighting position. The three main planets/stars visible were Jupiter, Vega, and Canopus, but all were stationary.

From your description, you probably saw the left wing navigation light of an aircraft flying from the north to intercept the inbound light aircraft lane to MOORABIN. This would account for the apparent stationary period. The bobbing movement of the light is explained as the aircraft manoeuvering by 'banking' to correctly position itself for the approach to land. The apparent speed is accounted for by the aircraft being approximately 4-5 miles away rather than 10-20 miles, and no noise was heard because the wind at altitude at the time was blowing from the south east in excess of 10 knots.

We trust that this explanation is satisfactory and thank you for your interest.

Yours faithfully,

G. J. Odgers

APPENDIX 1 TO
ANNEX A TO
BS/5/4/Air 81
DATED 05OCT72

SIGHTING UNUSUAL AERIAL OBJECT - 29SEP72

1. Mr J. TRAINER from the Astronomical Society advised that on the date of the sighting there were 10 satellites in orbit which are visable with the naked eye and comparable in brightness to stars.

2. If the object was not a decaying satellite it was most probably a piece of spent hardware from a rocket launching. Thousands of these objects are in the earth's atmosphere and occaisionally fall back to earth. The vibration type of movement would be accounted for by an irregular shape tumbling as it fell (eg likened to a coin falling through water) until it burnt out.

3. When the object appeared over the horizon it would appear stationary then as it passed, it would increase speed. As it went to the west, the smaller area of the object receiving the suns light, or as the object was burnt out, explains the change and decrease in light from the item.

4. The time interval for satellites or hardware to burn out is normally between 2-3 minutes.

RESTRICTED

BLAKEHURST - MR GROSVENOR
NSW

9A

13 FEB 1973

980/1/1 Pt20 (9A)

Mr Grosvenor,
2 Marie Dodd Crescent,
BLAKEHURST, NSW 2221

Dear Sir,

Investigation of your report of an unusual aerial sighting on 23rd December 1972 has revealed that the object you saw was probably a satellite.

On the day of the sighting the satellite PAC-A (1969/68B) was predicted to be over the area at 9.09 pm on a heading of 113°.

Yours faithfully,

(G.J. ODGERS)
Director of Public Relations

OBJECT OBSERVED

(Operational Command ASI 3/A/5)

PART 1 - REPORT BY OBSERVER

1. Name of observer MR. GROSVENOR ..... AGE Mature
2. Address of observer 2 MARIE DODD CRES
   BLAKEHURST. ..... PHONE .....
3. Occupation of observer .....
4. Date and time of observation 23/12/2100
5. Duration of observation 1 minute
6. Observers location at time of sighting Blakehurst
7. Weather conditions at time of observation Fine
8. Describe any aids or equipment used in the observation
   binocular & naked eye
9. Where was object first observed? (eg, overhead, coming from behind a hill, over the horizon).
   from west, high in the sky
10. What first attracted observer's attention? (eg, light or noise).
    light
11. Did object appear as a light or as a definite object?
    light
12. If there was more than one object:-
    (a) how many were there? One
    (b) in what formation were they? .....
13. What was the colour of the light or object? reddish yellow
14. What was its apparent shape? Circular
15. Was any detail of structure observable? No
16. Was any method of propulsion obvious? No

RESTRICTED .../2

17. Was there any sound? No.

18. What was its height? (or angle of elevation) High in sky

19. What was its speed? (or angular velocity) Very fast

20. Was the object stationary? No

21. What was the direction of flight with reference to landmarks or points of the compass?
From South Hurstville over Blakehurst to Kurnell (W to E)

22. Did the object remain on a straight path, deviate, or manoeuvre at all?
Straight path

23. Was any trail of exhaust, vapour, or light seen? No

24. Where did object disappear? (eg, in mid-air, behind a hill, over the horizon)
Over horizon to east

25. Do you know of any physical evidence? (such as fragments, photographs, or other supporting evidence)
No

26. Have you observed any unusual phenomena previously? No

27. If so, give brief details of incident (s) .....

28. State any experience which enables observer to be reasonably certain about the answere given to 18 and 19.
Qualified pilot

29. Are you a member of any organization interested in aerial phenomena? No

30. Name and address of organisation .....

31. Any additional information which relates to the sighting.

PART 2 - UNIT EVALUATION

32. The following military aircraft were in the vicinity of the reported UFO position at the time:-

Aircraft type ..... NIL KNOWN .....

Heading ..... T ..... T ..... T

JOURNALIST 25M

8A

980/1/1 Pt20 (8A)

13 FEB 1973

Mr I. Maurice,
8 Nevis Crescent,
SEVEN HILLS NSW 2147

Dear Sir,

Investigation of your report of two unusual aerial sightings on 4th December 1972 has revealed that the objects you saw were probably satellites.

On the day of the sightings the satellites Cosmos 315 Booster (1969-107B) and Pageos I (1966-56A) were predicted to be over the area at 9.09 pm and 9.44 pm on headings of 17° and 359° at elevations of 17° and 37° respectively.

Yours faithfully,

G. J. Odgers

(b) in what formation were they?.....

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer..IAN MAURICE.....Age..27...

2. Address of observer..8 NEVIS CRESCENT.....
.....SEVEN HILLS.....Phone..621-1507

3. Occupation of observer..JOURNALIST - SPORTS COMMENTATOR, RADIO 2SM.

4. Date and time of start of observation..4/12/72 — 8-30 PM.

How certain is the date?....POSITIVE.....

How accurate is the time of start...WITHIN 30 MINUTES.....

5. Duration of observation....20 - 30 SECS.....

How accurate is your estimate?....ACCURATE.....

6. Observer's location at time of sighting...OBSERVER'S HOME ADDRESS
.....

How familiar is observer with this locality?....VERY FAMILIAR.....

.....

7. Weather conditions at time of observation..FINE, ...PATCHES OF...
THICK CLOUD.....

8. Describe any aids/equipment used in the observation...OBSERVED WITH
NAKED EYE AND POWERFUL BINOCULARS.....

9. Where was object first observed:

(a) Relative to your surroundings....OBJECT FIRST OBSERVED
TRAVELLING FROM SOUTH APPROX. 60°.....

(b) angle of elevation.....[redacted].....

(c) compass angle bearing..10° SW to 10° N.E.....

(d) how accurate are these estimates ....APPROXIMATE.....

10. What first attracted observer's attention?...OBJECT'S MOVEMENT
.....

11. If there was more than one light/object:

(a) how many were there? .....—.....

(b) in what formation were they?..—.....

18/12/72

MY NEXT DOOR NEIGHBOUR, MR. JIM DAVIS, AND I WERE WATCHING STARS THROUGH MY TELESCOPE WHEN I NOTICED THE OBJECT, A BRIGHT LIGHT, TRAVELLING THROUGH SOME THICK CLOUD. THE LIGHT WAS BLINKING ON - OFF REGULARLY AND TRAVELLED IN A NORTH - EASTERLY DIRECTION.

WE CALLED OUR WIVES WHO BROUGHT BINOCULARS TO VIEW THE OBJECT.

HOWEVER ALL THE BINOCULARS MANAGED TO DO, WAS TO ENLARGE THE LIGHT.

THE LIGHT TOOK ONLY 20 - 30 SECONDS TO TRAVEL 2/3 OF THE ENTIRE SKY VISIBLE TO US.

DURING THE ENTIRE OBSERVATION, THE LIGHT BLINKED OFF-ON AND APPEARED TO SLIGHTLY DEVIATE FROM A STRAIGHT COURSE. APPROXIMATELY 5 MINUTES LATER ANOTHER LIGHT WAS OBSERVED TRAVELLING ALMOST AT RIGHT ANGLES TO PREVIOUS OBJECT, HOWEVER I consider this to have been a satellite because the light was constant.

12. What was the colour of the light or object? WHITE

13. What was the brightness? (compare with full moon or common light source at a stated distance, e.g. ordinary street light at 100 yards) OBJECT WAS AS BRIGHT AS THE MOON.

14. What was the apparent size at nearest approach:
    (a) relative to Venus or Moon APPROX 1½ TIMES VENUS AT ALL TIMES.
    (b) relative dimensions in inches at arm's length (about 20 inches from the eyes) BETWEEN 1/16 AND 1/32 OF AN INCH.

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? ~~NO ESTIMATION POSSIBLE~~ 90°
    BEARING 10° N.E — ASSESED BY FAMILIAR COMPASS POINTS

16. Was any method of propulsion obvious? NO

17. Describe any sound heard, including changes in pitch and intensity NO SOUND AUDIBLE

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? FROM 60° TO 180° ~~NOT ESTIMATED~~

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances. THE HEIGHT OF OBJECT COULD NOT BE DETERMINED

20. Give duration of any stationary phases NONE

21. Describe any deviations or manoeuvres OBJECT APPEARED TO SLIGHTLY WAVER FROM STRAIGHT COURSE

22. Describe any trail of exhaust, vapour or light seen NONE

23. Where was object last observed:
    (a) relative to your surroundings DISAPPEARED INTO CLOUD NEAR HORIZON
    (b) angle of elevation 180°
    (c) compass angle bearing 10° N.E

24. What was the manner of its disappearance? INTO CLOUD

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc) NONE

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity ....NONE.... (OTHER THAN NORMAL SCHOOL EDUCATION)

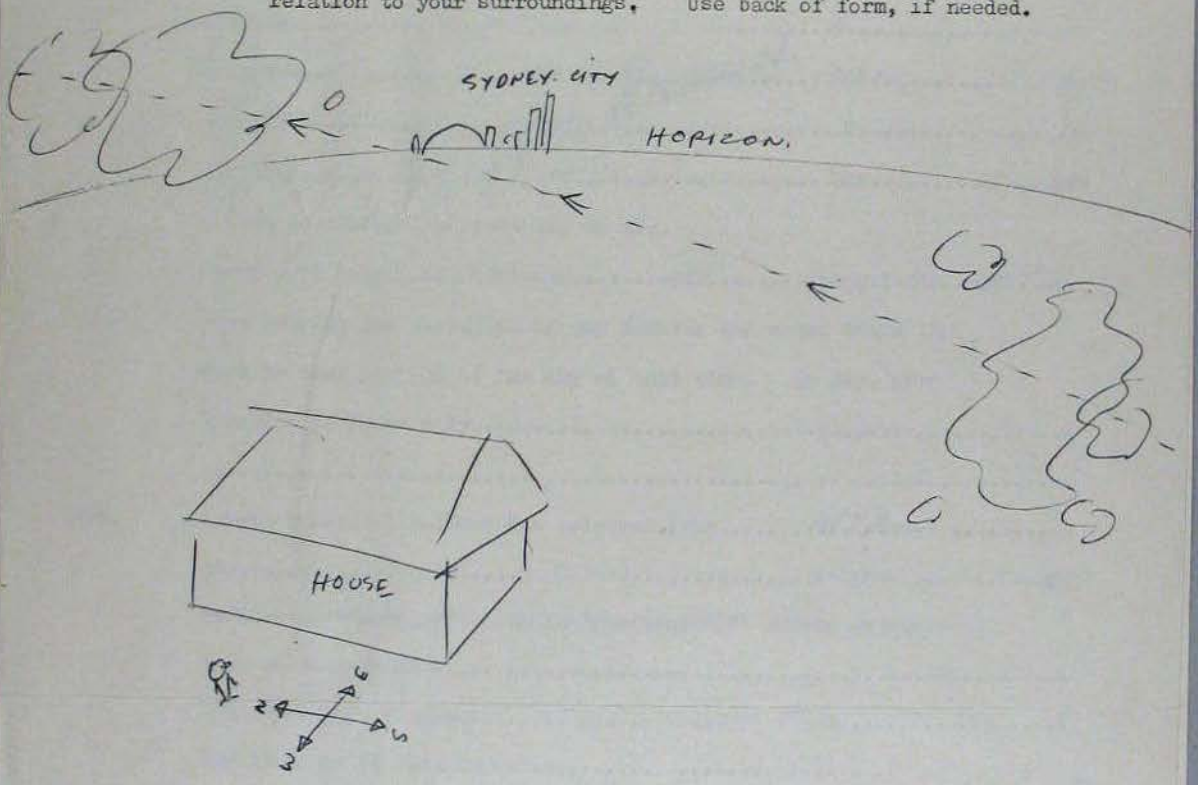
27. How many witness to the sighting?....4.... (INCLUDING OBSERVER)

28. Do you know of witnesses to similar sightings in the area?...NO.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?...SATTELITE.....

30. What are your main reasons for excluding this explanation?.....
OBJECT BLINKED AT REGULAR INTERVALS, AND WAVERED SLIGHTLY FROM COURSE.

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.



Signature..... Date....18/12/72....

SIGHTING # 6

BALD HILLS - MR THOS BARRY MARSH
BLD

- FRUIT FARMER.

580/1/1 Pt 20 (7A)

21 MAR 1973

Mr B.A. Mason
16 Fairway Street
BALD HILLS QLD 4036

Dear Sir,

With reference to your report of unusual aerial sightings on the 14th and 16th November 1972, investigation has determined that the most probable causes were light aircraft operating into a small airfield at REDCLIFFE.

Normally, logical explanations are available in answer to sighting reports, and theories investigated in relation to your report covered RAAF and civil airmovements, meteor activity, space vehicle/debris re-entry, and positions of planets and stars.

From these theories and your description, only civil aircraft activity appeared feasible and on further investigation, information relating to light aircraft activities was forthcoming from Brisbane Air Traffic Control Centre. There is a small airfield located north-west of Redcliffe and approximately 9 miles NNE of your observation position. Light aircraft may operate from this field without being under air traffic control if they operate below 3,000 feet altitude.

The opinion of the investigating team is that the occurrences that you saw were light aircraft approaching to land at Redcliffe airfield and the white lights seen were landing lights. These lights are often used by pilots at dusk as aids to landing and identification features to other aircraft which may be in the same area.

We trust that this explanation is satisfactory, and thank you for your interest.

Yours faithfully,

G. J. Odgers

12th March 1973

Department of Air (DAFI) Attn: Flt Lt Dennes

For Information:

Headquarters Operational Command (Attn: CIO)

Dear Sir,

AMPLIFICATION OF UFO REPORT

References: A. 82W/5/9/Air (93) dated 28th November 1972
B. DAFI note dated 7th March 1973 (refer Flt Lt Dennes)

1. In answer to reference B above, all that can be determined is that an error must have been made at this Headquarters when annotating the angles of observation on the map attached to the report.

2. A small airfield is located at REDCLIFFE, about 9nm NNE of the observers position. Information from Brisbane Control suggests that the UFO's could have been light aircraft operating from that airfield. Aircraft from Redcliffe are not controlled by Brisbane if they operate locally (ie) 11-22nm up to 3,000 feet and 22-35nm up to 4,000 feet.

3. Enclosed is a map with amended annotations to coincide with the observer's report. The dotted line referred to in your note depicts the ROUGH track of the lights sighted (this is not annotated on the enclosed map).

Yours faithfully

(L.J. EGAN)

Master S. Stephenson,
9 Lovelin Street,
Ashgrove,
BRISBANE QLD 4000

Dear Stewart,

Investigation of your report of an unusual aerial sighting on 17th November 1972, has revealed that the sighting may have been the planet Venus.

In relation to your position at the time of sighting, the planet was overhead. The smoky exhaust effect and deviation to the left and right of track were probably caused by the atmospheric conditions at the time.

Yours faithfully,

G. J. Odgers

REPORT OF UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer..STEWART STEPHENSON.....Age..14..

2. Address of observer..9...LOVEHN ST.....
ASHGROVE..... Phone..383877..

3. Occupation of observer....STUDENT.....

4. Date and time of start of observation..17 NOV 72....1300.....
How certain is the date?....CERTAIN.....
How accurate is the time of start...ACCURATE.....

5. Duration of observation....1300 - 1400.....
How accurate is your estimate?....ACCURATE.....

6. Observer's location at time of sighting.....
...KELVIN GROVE HIGH SCHOOL.....
How familiar is observer with this locality?.....
.....FAMILIAR.....

7. Weather conditions at time of observation.....
...SCATTERED CLOUD.....

8. Describe any aids/equipment used in the observation.....
.....NIL.....

9. Where was object first observed:
(a) Relative to your surroundings.....
.....SOUTH.....
(b) angle of elevation.....90°.....
(c) compass angle bearing.....180.....
(d) how accurate are these estimates.....AVERAGE.....

10. What first attracted observer's attention?.....
PREVIOUSLY OBSERVED AT 8 HOUR INTERVALS.....

11. If there was more than one light/object:
(a) how many were there?.....N/A.....
(b) in what formation were they?.....

RESTRICTED

12. What was the colour of the light or object? SILVER

13. What was the brightness? (compare with full moon or common light source at a stated distance, e.g. ordinary street light at 100 yards)... BRIGHT

14. What was the apparent size at nearest approach:
(a) relative to Venus or Moon.....
(b) relative dimensions in inches at arm's length (about 20 inches from the eyes)..... ½

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? AS PARA 9 ESTIMATION

16. Was any method of propulsion obvious? NIL ~~SMOKY TRAIL~~

17. Describe any sound heard, including changes in pitch and intensity..... NIL

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?..... VERY HIGH

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances.....

20. Give duration of any stationary phases..... NIL

21. Describe any deviations or manoeuvres LEFT & RIGHT DEVIATION FROM TRACK

22. Describe any trail of exhaust, vapour or light seen..... SMOKY EXHAUST

23. Where was object last observed:
(a) relative to your surroundings... OVERHEAD
(b) angle of elevation..... 90
(c) compass angle bearing..... 180

24. What was the manner of its disappearance? NOT OBSERVED

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc)..... NIL

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity..... STUDENT

27. How many witness to the sighting?..... 10

28. Do you know of witnesses to similar sightings in the area?..... SUSAN GIBSON CLIVE WALDRON

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?..... NIL

30. What are your main reasons for excluding this explanation?.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

O

SIGHTING # 41

KANGAROO PT - QLD

MR HUGH JORDAN }
MRS BETH JORDAN }

580/1/1 Pt20 (51)

- 1 MAR 1973

Mr H.V. Jordan,
Flat 5,
23 Quinton Street,
KANGAROO POINT, QLD 4169

Dear Sir,

With reference to your report of an unusual aerial sighting on 12th November 1972, our enquiries have failed to determine a likely cause for the sighting.

Normally, logical explanations can be found for the majority of unusual sightings, but from the description given in your report, theoretical explanations have not been confirmed. Unless you have any further information which may enable us to determine the cause of the sighting, we regret that we are unable to offer any explanation.

Yours faithfully,

G. J. Odgers

RESTRICTED

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer BETH JORDAN HUGH VINCENT JORDAN ..... Age 22 23

2. Address of observer.. FLAT 5 ... 23 QUINTON ST ..... KANGAROO POINT ..... 4169 ..... Phone WORK 52-4989

3. Occupation of observer... PMG TECH .....

4. Date and time of start of observation.. 12 NOV 72 2100 HRS (K)

How certain is the date?..... ACCURATE .....

How accurate is the time of start... VERY ... ACCURATE ..

5. Duration of observation 40 MINS - SMALL PERIODS CLOUD COVER 10 MINS - GOOD OBSERVATION OF 3 LIGHTS.

How accurate is your estimate?..... VERY ... ACCURATE .....

6. Observer's location at time of sighting KANGAROO POINT .....

LOOKING OVER RIVER TOWARDS BALMORAL .....

How familiar is observer with this locality?.. FAMILIAR ..

12 MTHS RESIDENCE .....

7. Weather conditions at time of observation. NIGHT - SOME ...

CLOUD .....

8. Describe any aids/equipment used in the observation. EYE .....

OBSERVATION - MR JORDAN WEARS GLASSES - WIFE DOES NOT. COMPASS FOR BEARINGS - PROTRACTOR FOR ELEVATION.

9. Where was object first observed:

(a) Relative to your surroundings.. 60°; 80°; 100° from NORTH .....

(b) angle of elevation..... 15° .....

(c) compass angle bearing.... AS ... SUB PARA 9(a), ...

(d) how accurate are these estimates.. ACCURATE .....

10. What first attracted observer's attention? BRIGHTNESS, FLASHING AND CHANGING COLOUR OF LIGHTS .....

11. If there was more than one light/~~object~~:

(a) how many were there?.... THREE (3) .....

(b) in what formation were they?.. HORIZONTAL .....

RESTRICTED

12. What was the colour of the light ~~or object~~? RED, GREEN, & WHITE CHANGING IN RANDOM SEQUENCE.

13. What was the brightness? (compare with full moon or common light source at a stated distance, e.g. ordinary street light at 100 yards) COMPARED WITH STREET LIGHT EXAMPLE: 60° LIGHT 1/8 SIZE; 80° LIGHT 1/6 SIZE; 100° LIGHT 1/3 SIZE.

14. What was the apparent size at nearest approach:

(a) relative to Venus or Moon.....

(b) relative dimensions in inches at arm's length (about 20 inches from the eyes) 60° LIGHT 1/8"; 80° LIGHT 1/4"; 100° LIGHT 3/8".

15. What were the bearing and elevation angles at nearest approach and how were these values assessed? LIGHTS STATIONARY - BEARINGS AND ELEVATIONS AS STATED.....

16. Was any method of propulsion obvious? NO.....

17. Describe any sound heard, including changes in pitch and intensity..... NO .....

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? N/A.....

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances..... N/A .....

20. Give duration of any stationary phases... 40 MINS.....

21. Describe any deviations or manoeuvres..... N/A .....

22. Describe any trail of exhaust, vapour or light seen... RED, GREEN, WHITE LIGHTS.....

23. Where was object last observed:

(a) relative to your surroundings SAME POSITION AS FOR FIRST OBSERVATION

(b) angle of elevation.....

(c) compass angle bearing.....

24. What was the manner of its disappearance? CLOUD COVER...

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc)..... NO .....

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity. MAP READING., TECH. - GEN KNOWLEDGE.

27. How many witness to the sighting?....TWO.....

28. Do you know of witnesses to similar sightings in the area?.....
.....NO.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?.HOVERING HELICOPTORS.....

30. What are your main reasons for excluding this explanation?.....
BECAUSE THE LIGHTS WERE ~~STILL~~ STATIONARY FOR TOO LONG.

31. Please sketch the light/~~object~~ with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

REPORT ON UNUSUAL AERIAL SIGHTING

INTERVIEWED BY FLG OFF L. J. EGAN

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer. GRAHAM DICKMAN AND CARL TEW ..... Age 23/22

2. Address of observer. 4/20 NORLE ST .....

CLAYFIELD QLD 4011 ... Phone ——

3. Occupation of observer. PMG EMPLOYEES .....

4. Date and time of start of observation. 3/11/72 9/45PM .....

How certain is the date? POSITIVE .....

How accurate is the time of start. ACCURATE .....

5. Duration of observation. 60 SECS .....

How accurate is your estimate? ACCORATE .....

6. Observer's location at time of sighting. .....

SEE MAP ATTACHED .....

How familiar is observer with this locality? .....

NOT FAMILIAR .....

7. Weather conditions at time of observation. .....

OVERCAST AT TIME OF SIGHTING .....

8. Describe any aids/equipment used in the observation. .....

NIL .....

9. Where was object first observed:

(a) Relative to your surroundings. .....

DUE NORTH .....

(b) angle of elevation. 40° .....

(c) compass angle bearing. N/A .....

(d) how accurate are these estimates. ACCURATE .....

10. What first attracted observer's attention? .....

OBJECT / LIGHTS .....

11. If there was more than one light/object:

(a) how many were there? TWO LIGHTS ONE OBJECT .....

(b) in what formation were they? IN HORIZONTAL PLANE SIDE BY SIDE

RESTRICTED

OBJECT — DARK GREY

12. What was the colour of the light or object? ONE ORANGE / ONE WHITE

13. What was the brightness? (compare with full moon or common light source at a stated distance, e.g. ordinary street light at 100 yards)..... DULL LIGHTS

14. What was the apparent size at nearest approach:

(a) relative to Venus or Moon..... SLIGHTLY LARGER THAN MOON

(b) relative dimensions in inches at arm's length (about 20 inches from the eyes)..... 10 INCHES

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?..... 0° / 75° ..... ESTIMATION

16. Was any method of propulsion obvious?..... NO

17. Describe any sound heard, including changes in pitch and intensity..... NO SOUND

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?..... 1700 - 1800 ft AMSL.

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances. OBJECT STATIONARY THEN BANKED LEFT AT 5 MPH WHEN COMPARED WITH A CAR PASSING AN OBSERVER IN THE STREET

20. Give duration of any stationary phases..... 45 SECS.....

21. Describe any deviations or manoeuvres... LEFT BANK ONLY.

22. Describe any trail of exhaust, vapour or light seen.... NONE. ..... ONLY..... PREVIOUSLY... MENTIONED... LIGHTS.

23. Where was object last observed:

(a) relative to your surroundings.... INFRONT... OF... CAR.....

(b) angle of elevation..... 70°.....

(c) compass angle bearing..... 05°

24. What was the manner of its disappearance? FLEW BEHIND TREES.

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc)..... NO.....

.....

26. State any training which enables observer to be reasonably certain of his/~~her~~ ability to estimate angles and angular velocity....1A..HRS....STUDENT....PILOT;.....

27. How many witness to the sighting?.....TWO.....

28. Do you know of witnesses to similar sightings in the area?..... .....NO.....

Mr D.L. Owen,
Lot 55, Berne Street,
BATEAU BAY NSW 2261

Dear Sir,

Further to our letter dated 13th February 1973, returned herewith are the two original photographs submitted by you in respect of the alleged unusual aerial sighting at Bateau Bay on 14th September 1972.

Yours faithfully,

(G.J. ODGERS)
Director of Public Relations

13 FEB 1973

580/1/1 Pt 20 (2A)

Mr D.L. Owen,
Lot 55 Berne Street,
BATEAU BAY NSW 2261

Dear Sir,

With reference to your report of an unusual aerial sighting in the area of Bateau Bay on 14th September 1972, investigation by the RAAF has not resulted in absolute definition.

From your description of the sighting, the object location and traverse time corresponds with Sydney - Brisbane air route operations, but the 'arrowhead' mentioned and object depicted in the photographic prints are not consistent with civil or service aircraft identification.

As a result of a technical examination of the original photographic print by the RAAF Williamtown Base Photographic Officer, further clarification and/or identification is not considered possible without examination of the original negative. The prints that you supplied, are presently being copied for our file and will be returned to you as soon as possible.

If you should change your attitude regarding official examination of the original negative, you may be assured that the greatest possible care will be taken during examination, and that on conclusion the negative will be returned to you, with, it would be hoped, a satisfactory explanation of the alleged sighting.

Yours faithfully,

G.J. Odgers

(G.J. ODGERS)

REPORTS ON UNIDENTIFIED FLYING OBJECTS

580-1-1 DAFI 17-11-72

Reference: A. HQWLM 5/2/Air(64) dated 8th November 1972.

1. Further to Reference A, Mr Owen was interviewed on 23rd November 1972 at Gosford by Flt Lt Fish Phot O and Flt Lt McLoughlin Intel O.

2. Despite Mr Owen's promise, his original negative was not available but he said he would post it to WILLIAMTOWN as soon as possible. Nevertheless, the original print was available and Flt Lt Fish's report is at Annex A.

3. It is doubted whether the negative will appear as it was ascertained that Mr Owen does have some connection with a body calling itself the "Central Coast UFO Research Bureau" and a possibility exists of some publicity seeking by this organisation. This would be in accord with the writers' assessment of Mr Owen's personality.

4. You will be further advised if the negative is received.

(N.J. McLOUGHLIN)
Flight Lieutenant
for Officer Commanding

Annex: A. Report by Flt Lt Fish

ANNEX A
TO 5/2/Air(68)

TECHNICAL EXAMINATION AND INTERPRETATION

OF ALLEGED UFO PHOTOGRAPHY

Further clarification and or identification is not considered possible without examination of the original negative.

The orange coloured pattern apparent on the original print, but not visible on any subsequent prints, leads me to believe that that print may have been subjected to light or chemical fogging during processing.

The solid image in the centre of the frame would also be easier to define on the original negative. Taking into consideration the image size, and the focal length of the camera used, "Kodak Instamatic", the object would have been quite large and readily visible to the naked eye. Once again, without access to the original negative, the possibility of a negative defect cannot be discounted.

Mon 6th November 1972

Flt Lt McLauchlan
Intelligence Officer
RAAF Base Williamtown
Newcastle NSW 2314

Dear Sir,

By this time you would havereceived my account of an object which appeared in a photograph I took at my home a few weeks ago, the subsequent report which I sent you, and now I presume this has been evaluated and sent on to a higher authority. Today I received a phone call from a Mr. Harry Griesberg of the Central Coast UFO Research Bureau asking me to reconsider my view on not wanting to send any photos up to you.

All I would like out of this situation is some acknowledgement that this object is or is not a UFO (i.e. if it can be explained or not), depending on what your conclusion is, to satisfy my own curiosity and opinion.

Without being too audacious, I could have gone to the press and employed their sensationalism in treating this matter, but I selected a course I felt was best and went to you first.

Enclosed are two blow-upsoff the original negative, unfortunately the red arrowhead I described was not re-produced, due to a different colour process being used in the development. I realise I will not receive this back, as Mr. Griesberg informed me, and I am quite prepared for this.

I have two main requests, firstly that I do receive some kind of explanation of this object after the investigation is completed and secondly could you reimberse me the sum of two dollars, the cost to me of having the photos developed.

I will definitely not part with the negative and original photo.

If I can be of any further assistance please do not hesitate to contact me. Awaiting your reply to confirm some of my questions,

Yours Sincerely

David Owen.

David Owen.

camera was used, loaded with PACIFIC COLOUR FILM.
The photo was the last on the reel.

26/10/72.

WING COMMANDER
S.L. GRANVILLE RE: UFO SIGHTING c/- 2GO GOSFORD

DEAR SIR,

MR. Mike Mac Namara c/- Radio 2GO Gosford passed your letter on to me, seeing I was the one who photographed the phenomena. Here is my account of the sighting and after reading it you will see why I could not complete all of your questions on the forms enclosed.

On Thursday afternoon the 14TH of Sept last I was on my front patio which faces due west. I was reading a book when I happened to glance up into the sky. NOTHING - I repeat - NOTHING made me glance up, my eyes were tired of reading. I remember thinking how clear the sky was on that day. When I looked to the south-west I saw a distinct RED ARROWHEAD MOVING from the S.W to NW. I watched it for several minutes and established beyond doubt that it was moving. Often we have brilliant sunsets so I thought it could have something to do with light being reflected from the sun. I have a few photos of sunsets so I decided to take one of this. I did this, watched the light/colour arrowhead until it faded and thought no more of it until the photo was developed. A small instamatic camera was used, loaded with PACIFIC COLOUR FILM. The photo was the last on the reel.
Negative N° 12.

[illegible] the light faded I went inside and checked the time. It was 4.07 PM so my estimates are fairly correct. My wife and neighbours did not see anything unusual at all at that time.

The light centre when I first saw it was approx 30° from the horizon, coming from the SW. When it faded from view it was approx. 30° from the horizon climbing to the NW. The two outer 'tails' of the arrowhead where about 30° - 35° apart. NO OBJECT WAS VISIBLE AT ANY TIME.

I have the original photo, plus 9 other blow-ups and copies, all done with different colours. The negative has been deposited in a safe place for security. The processing of these copies was done by a professional photographer in Gosford. He checked the camera and negative - Cannot determine, not a double exposure, Venus, Planets, Gas weather Balloons, Clouds, Conventional aircraft or any known phenomena, but of course this is up to you folk to decide. The actual shape of the craft defies explanation. Or should I say 'convincing' explanation. It is definitely a solid object, with either a light in the front or the sun reflecting off it.

I realise I could be putting some of your people in a position but I am definitely not going to send any photo, copies or negatives to you through the mail. Please do not misunderstand me, it is just that any photo of an unexplained object that is sent to the authorities is never returned to the owner. They are simply told that they photographed Venus, a cloud etc and the case is closed.

...ld be quite willing to meet any of ...s people down here, either at my home or at Radio 2GO c/- Mike Mac Namara.

I am a representative for the AMP Society on the Central Coast.

Previously I spent 3 yrs in the Army, 2½ of these with the S.A.S.; including 12 months on active service in South Vietnam, so I have had some experience with aircraft.

We have the occassional helicopter & Hercules passing over us here where we live, but these are always easy to identify.

I have withheld the photo and story from the press pending an investigation by you people, if possible.

I am convinced I have photographed a genuine UFO, and am hoping you will co-operate in some way.

I hope you see my point about the photo.

One thing I do ask is that if an investigation etc is carried out and the story filters to the press, for business purposes I would appreciate my name remaining out of it.

Awaiting your reply,

Yours Faithfully

David Owen.

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer... DAVID LLOYD OWEN ..... Age 23.
2. Address of observer. LOT 55 BERNE ST
..... BATEAU BAY ..... NSW ..... 2261 ..... Phone 321219
3. Occupation of observer..... AMP INSURANCE REP .....
4. Date and time of start of observation... 1/9/72 ..... 4:00 PM.
   How certain is the date?..... ACCURATE .....
   How accurate is the time of start?... 5 MINS EITHER WAY.
5. Duration of observation..... 10 - 12 MINUTES .....
   How accurate is your estimate?..... VERY ACCURATE .....
6. Observer's location at time of sighting..... HOME .....
..... AT HOME ADDRESS .....
   How familiar is observer with this locality?.....
..... LIVED IN LOCALITY FOR 10 YEARS .....
7. Weather conditions at time of observation.....
... CLEAR BLUE SKY. NO WIND, CLOUDS ETC .....
8. Describe any aids/equipment used in the observation.....
..... OBSERVED THROUGH NAKED EYE. PHOTO TAKEN.
9. Where was object first observed:
   a. Relative to your surroundings..... SOUTH WEST FROM .....
..... HOUSE .....
   b. Angle of elevation..... 30° .....
   c. Compass angle bearing..... S.W. APPROX .....
   d. How accurate are these estimates?..... FAIRLY ACCURATE .....
10. What first attracted observer's attention?.....
..... SAW 'ARROWHEAD' IN SKY .....
11. If there was more than one light/object:
   a. How many were there?.....
   b. In what formation were they?.....
12. What was the colour of the light or object?.....
13. What was the brightness? (Compare with full moon or common light source at a stated distance, eg, ordinary street light at 100 yards)
..... LIKE BRIGHT RED IN A SUNSET .....
14. What was the apparent size at nearest approach:
   a. Relative to Venus or Moon.....
   b. Relative dimensions in inches at arm's length (about 20 inches from the eyes).....
15. What were the bearing and elevation angles at nearest approach and how were these values assessed?... SEEMED TO REMAIN AT ..... SAME DISTANCE MOVING ACROSS SKY .....
16. Was any method of propulsion obvious?..... NO .....

/17. Describe

17. Describe any sound heard, including changes in pitch and intensity
.....NONE.....

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)? MIN 30° MAX 50° APPROX

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances.....
...FASTER THAN NORMAL AIRCRAFT.....

20. Give duration of any stationary phases.....N/A.....

21. Describe any deviations or manoeuvres.....N/A.....

22. Describe any trail of exhaust, vapour or light seen.....
.....RED ARROWHEAD DESCRIBED.....

23. Where was the object last observed:
a. Relative to your surroundings.....NORTH WEST.....
b. Angle of elevation.....30°.....
c. Compass angle bearing.....

24. What was the manner of its disappearance?.....FADED OUT.....

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc).....
.....COLOUR PHOTO TAKEN, DEVELOPED - AI.

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.....
3 YRS ARMY 22 YRS S.A.S. 1 YR SVN.....

27. How many witnesses to the sighting?.....ONLY OBSERVER.....

28. Do you know of witnesses to similar sightings in the area?.....
.....NO.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?.....(NIL).....

30. What are your main reasons for excluding this explanation?.....
PHOTO + WHAT I SAW.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form.

SEE ATTACHED SKETCH.

Signature.....MOwen..... Date...26/10/72.....

Part 2 - Unit Evaluation

32. The following military aircraft were in the vicinity of the reported UFO position at the time:
