To be more computer-friendly, the reprint has been divided into parts. Here begins **Part 6** of *Status Report VI*, from July 1991. These status reports were written by Leonard H. Stringfield from 1978 to 1994. *Status Report VII* begins at **[Earthfiles 12/15/03](#)**. Leonard Stringfield died on December 18, 1994.

Len Stringfield - continued:

**THE "ROSWELL" ERA: INSIDERS BARE
SECRETS**

Survivors in-the-know, going back to the "Roswell" UFO crash era, both before and after the established date of July 2, 1947, are thinning out. For most of the few remaining, so are their memories when they try to recapture the details of the role they played in the drama of events. While we might never be privy to the whole "inside," unexpurgated story hidden under the lid of secrecy, I

believe it should behoove all of us in research to get all the facts we can from these old-timers - now.

(PUBLIC DOMAIN) - July 1991 — Ret. USAF Sgt. states he saw a report of a landing of a saucer type craft over the north range of White Sands Missile Range near Tularosa. Askania and Mitchell tracking cameras showed a craft resting near a hillside, slightly tilted, with a large round dome shaped disc with a flat bottom, no landing gear or windows but an access opening. Base personnel were around the craft wearing suits, climbing on top of the craft. The report he saw was a technical description for the AMC and ATIC that recorded dimensional, material and structural specifications and radar data. The report was done by a German scientific team headed by Ernst Steinhoff and Wernher von Braun.
