- 1. DP: Mr. Don Phillips SG: Dr. Steven Greer
2.
3. DP: My name is Don Phillips and, I live in Los Angeles, California. I have worked
4. with Government sponsored agencies, as well as spent my appropriate time in the
5. military, as a civilian, but also as a military person. I did have experiences with
6. what we would refer to as Unidentified Flying Objects.
7.
8. Lee's go to a time frame, when I was about 19 or 20. I entered college after high
9. school, but I also went to work for Lockheed Aircraft Corporation. And, after a
10. year of employment in the regular field of aircraft construction and design, I was
11. asked if I would like to go to a new department, or, one that was already in gear
12. for a new project. And, of course, I said yes, not knowing exactly what it was. But,
13. I figured that it was in my best interest.

49. decided to get up and walked up to the main road, and up near my
office. I got to

51. the area where the fellows were standing -- there was a group of
about five people

52. -- and they were looking up in the air. And, I looked up in the
air and saw these

53. objects, lighted objects, moving at tremendous speeds. It was in
the area slightly

54. to the north and northwest of Mount Charleston. Right at that
instant I saw these

55. things making acute angles and traveling, I would estimate 3,000
to 4,000 miles

56. per hour. And, then immediately making acute turns. I knew that
they weren't

57. ours. And, I had a special background with the Skunkworks,
Lockheed Aircraft

58. Advanced Development and Engineering, that said, these are not
ours. And, having

59. been a pilot, I'm thinking, if there are people in these craft,
what kind of forces

60. are their bodies taking? Then, I said, well, these have to be
guided by some type

61. of intelligent pilots.

62.

63. It went on for about another 90 seconds. And, then, all of a
sudden, they

64. seemed to group, from what would be hundreds of miles in the sky
to the west.

65. And they came into a circle, rotated into a circle, and then
disappeared. And, I

66. thought, wow, what a show.

67.

68. So, the security Sergeant happened to be on duty. And, we all
looked at each

69. other and said, gee, this is really something. And, he said, well, continuing to use Pastebin, you agree to our use of cookies as

73. Anthony was the first one to get off of the bus after the door opened. I was standing

74. Right up close to the doors when they opened up. I looked at him

and- Anthony

75. is a very large fellow with this blonde flowing hair, and a jovial spirit -- and, he was

76. as serious as anybody could possibly be. He was almost as white as a sheet. He took

77. I said, yeah, we've been watching them - some of the fellows have

78. been watching

79. them for the last four to five minutes. And, I've seen them for a little more than 90

80. seconds. He says, we saw them on the radar screen and we documented them. He

81. says, they are not bogeys. They are not apparitions. They are real solid objects.

82. And, of course, they would have to be in order to get a fix with radar, the kind of

83. radar we used there, it would have to be a solid object. And, it's not that we tracked

84. them with the radar- they would go in and out of the signal and register that way.

85. He finally documented that there were six to seven. The speeds that we estimated

86. were also estimated by the radar operators and their scopes.

87.

88. SG: What did they estimate?

89.

90. DP: They estimated, around, 3,800 to 4,200 miles per hour equivalent, ground

91. speed. These things are darting across the sky. First they look like a star. And then

92. they move, in any direction or make any kind of a straight line, or just hover.

93.

94. Most of us had Top Secret and then there's a few that had Above Top Secret clearances.

95. Myself, I dealt with documents of all types. And for my time period in the

96. service, it was Top Secret. The people that would record the information, all this is

97. recorded, and, it is documented. And then it is signed off. And then it is put in

98. the archives. And, our division, our radar squadron, was part of the 26th Air

was near Phoenix, Arizona. So, where the reports

103. And, we kept very quiet about things because they always knew where we were and what we were doing. I automatically had that team spirit- we were a big family there. And, I was very proud of that, having worked directly for Kelly Johnson. I was asked a question by a fellow businessman several years ago, in 1997: 'Do

104. you think that some of the technology that you incorporated into that aircraft, came from outside the planet Earth?' And, I said, it's very possible. But, I said, you have to remember, we'd still have to make it work here on planet Earth. SG: Had you heard of antigravity propulsion systems being worked on while you were at Lockheed Skunkworks? DP: The propulsion system that you are asking about, I heard that it existed. But, the left hand never knew what the right hand was doing, and, for good reason. Again, they didn't want us asking questions. We wanted to stay focused on the projects that we were working on. I came in at the tail end of the U-2 project. That still continues, the use of that type of aircraft. The first four models that I had to do with design and the construction and the eventual flight test were not the first military models. We have another air force in this United States that works on contract. And, I won't identify that name. They worked it with contract pilots,

137. the United States Army to have the foresight to put these technologies into industry
138. for the benefit of the people of the world.
139.
140. SG: We have retrieved extraterrestrial vehicles that have been studied?
141.
142. DP: I know this to be a fact. We put it to use. But, it took us a long time to figure

143. out what it was. And, then, figure out how we can use it and then, what to use
144. it for. And, are those products useful for humanity. It wasn't until later on, in the
145. '80's and '90's, when I founded a company called Light City Technologies, that I
146. confirmed this.
147.
148. It was a technology development corporation of a secret nature. And, we
149. worked with data signals, avionics, computers. And, as I had talked with you
150. before, we knew each other from certain agencies of the military in contract with
151. the CIA, or other branches of what we call unseen industry. I would say that's a
152. good term. We can term it black, deep black, or hidden.
153.
154. Well, the knowledge that I have of these technologies, came from the craft that
155. were captured here-I didn't see the craft, nor did I see the bodies. But, I certainly
156. know some of the people that did. And, of course, they are passed on now, from
157. their earthly bodies. But, there was no question that there are peoples, or beings
158. from outside the planet, that have lived here for a long time.

167. countries. They were kept under a lock and key, if you will. And,
the prominence

168. or greater exposure of Unidentified Flying Objects led to these
reports.

169.

170. We have records from 1954 that were meetings between our own
leaders of this

171. country and ET's here in California. And, as I understand it from
the written documentation,

172. we were asked if we would allow them to be here and do research. I

173. have read that our reply was, well, how can we stop you? You are
so advanced. And

174. I will say by this camera and this sound, that it was President
Eisenhower that had

175. this meeting. And it was on film, sort of like what we are doing
now. Bringing it

176. up to date, the NATO report gave that there were 12 races. To make
a final summary,

177. they had to have contacts to go to these races in order to
understand who they

178. are, what they are doing, and what they could do. And the report
didn't get into the

179. context, but it certainly did verify that they haven't been here
for just a few years,

180. but rather hundreds maybe thousands of years. And, this is written
in the text.

181.

182. Now, getting back to the ET technology that we might have used-
the chips,

183. lasers, the night vision, the bulletproof vests, and a few others-
these were all developed.

184. Well, the chips, what they call the Central Processing Units, were
developed

185. in great strides. Now, why did that happen? Why, you put a few
things together

186. and do a bit of research, you think, wow- we did benefit.

196. concern, Light City Technologies, Incorporated, worked with these technologies

197. He worked with a couple of those technologies while he was with a very

198. prominent intelligence agency of the United States Government.

199.

200. The one person that I've talked to outside of the military or the government

201. level is Dr. Greer. And, the reason for that is because he makes it the professional

202. approach, which is more in line with the way we were in the military.

203.

204. About the ET lenses: there were some eyeball coverings that allowed the people

205. inside the craft that made the journey across space to see in the minimal light

206. that we know is now present during space travel. These lenses magnified light but

207. also brought in a certain type of clarity. And my reason for mentioning this was

208. that it was Earth doctors and specialises that got them into the removal and study

209. of these lenses.

210.

211. I think a lot of this has been well documented by Colonel Corso. You know,

212. who was there with him? Well, there were a lot of people there with him. But a

213. lot of the things that are said in the book by Colonel Corso, I can verify, corroborated

214. by people that I have worked with and do work with now. So, I can say what

215. I know about it is very true. The pathway that it took, that's another story. We

216. talk about hidden technologies and why don't they let people know

225. The sensationalism that reporters and newspapers and writers put

forth doesn't

226. do the public any good. It feeds the desire for sensationalism in
people. We

227. naturally have a curiosity. But it can be fed with fact and truth,
or it can be fed

228. with sensationalism and half-truth- or no truth at all.

229.

230. How I came to learn of that NATO report: the impetus for doing the
report

231. in the first place was because during that time period, late
'50's- '60's, the Cold War

232. was beginning. There were flying craft, UFOs, intruding upon the
Russian airspace.

233.

234. And, then there were flying craft intruding upon our a airspace
and we were

235. each blaming the other. In doing so, we were ready to push
buttons. We came very

236. close to pushing the buttons and would annihilate, perhaps, both
sides. But, before

237. the buttons were pushed, there was a secondary type of control --
we call it human

238. reason, it is something that machines can't do. They assessed the
situation and said:

239. wait a minute; it is happening to both sides, something is unusual
here. Maybe we

240. should do some research and then do a report, before we push the
buttons.

241.

242. And, thus, the report

243.

244. I learned of the report through working for the CIA, while I was
following the

245. pathway on some information that had to do with NASA, that had to
do with

246. extraterrestrial visitation, and how real it was. That's how I

254.

255. I do know that there were what we call these little beings. An engineer that

256. did some work for us in the military was asked if he would like to do a special project.

257. It was to build a flight trainer. He is a mechanical engineer and electrical engineer.

258. And, through the process of building the trainer, he discovered that he was

259. to work with some other people after it got to a certain point. The other people

260. came out and they were these little humanoids- kind of startling, because they are

261. all, you know, short, short people. But, very, very intelligent- like very intelligent

262. children, super intelligent children. And, pretty soon it became like us sitting here.

263.

264. And, what they were building was a trainer for us to learn how to fly their craft.

265. It's a very interesting approach.

266.

267. [See the testimony of Bill Uhouse. SG]

268.

269. Other technologies from the retrieved ET craft were fiber optics that went into

270. these computer chips. And, mind you, the signal didn't travel on hard wire as we

271. know it. It traveled through a hollow core and in the form of colored light. And,

272. each color had a spectrum, an assignment to do a certain thing. So, we had fiber

273. optics that we put to use. They did a lot of research and reverse engineering.

274.

275. We also got these things that are handheld scanners, that we scan

282. development group views the use of technologies.

283. development group views the use of technologies.

284.

285. SG: Have you bee associated with that group?

286.

287. DP: I founded the organization that became a corporation in California. I was

288. associated with it six, seven years before, so that would be, back in the '80's.

289. We were contractors to the CIA while working for the Skunkworks. Working

290. for the Skunkworks was five years. And, the military, I was in for a standard four.

291.

292. In 1997, I met some of our expert recon people in the military. Highly trained

293. and they could blow up cities and terminate a great number of people. But, they

294. did an exercise -this is a confirmation . Security in the United States is constantly

295. tested. That's the only way you are going to find out if it is bullet proof or where

296. you need to improve. So this recon group was asked to breach the security ar Area

297. 51. And, they did a wonderful job and did it. They went through and they disassembled,

298. piece by piece, the security at Area 51. And, you know, they would take

299. our the pieces, piece by piece, and it would send a signal, an alert, and then they

300. would hide. These guys were experts. They were expert recon people for the military.

301.

302. [NOTE: Filtering out portions related purely to security which Greer should never have released]

303.

304. I know there are two prominent people that founded what we call Area 51.

316. DP: For the benefit of their families, yeah. Well, they a retired, but they are still

317. involved in this by contract.

318.

319. SG: What corporations have been connected to these UFO projects?

320.

321. DP: DuPont. IBM, what is now, I think, Western Digital, EG&G. I've had business

322. dealings with EG&G. They make products for us. They have made products

323. for our private sector corporation. They are a contractor- very good. They were

324. responsible for the safe delivery and return of personnel to various work locations.

325. But, that isn't all of it. That's just a small amount of their work.

326.

327. During the Apollo landing, Neil Armstrong says , "They're here . They are right

328. over there and look at the size of those ships. And, it is obvious, they don't like us

329. being here." And, what he went on to describe was like a lineup of military planes,

330. only here are these craft, and their people, observing them. Neil Armstrong, he

331. said, they don't want us to be here.

332.

333. SG: Do you have an audiotape of that?

334.

335. DP: No, I have the written communication.

336.

337. SG: Do you know if Kelly Johnson knew of the UFO and ET issue at all?

338.

339. DP: Oh yeah. I would say he did. But, he was focused on developing a job. There

352. done? I asked, right after we first talked, why is Dr. Greer

Greer doing this? I've

350. done my research -- maybe a lot of it. And, I've watched what's happening. And,

351. you've been very dedicated to what you are doing, and professional. That's why I

352. am here tonight. That is why I am speaking with you.

353.

354. And, we still have those contacts around the world that can verify a lot of

355. things.

356.

357. SG: Do you know of anyone else that you feel may be willing to come forward

358. now?

359.

360. DP: We all have our agreements that we signed and they are still, you know, to be

361. honored. However, there isn't any reason why certain information can't be shared

362. when it is for the benefit of humanity ...

363.

364. Well, Dr. Greer, one of the purposes for founding this technology corporation

365. chat I did in 1998 was to bring forth these technologies that can help get rid of the

366. toxins - that can clean the air, that help get rid of the need for so much fossil fuel

367. or help it become more efficient. Yes, it is time. I can tell you, personally, that it

368. has already started.

369.

370. And I can prove what we have come up with. We can prove it.

371.

372. SG: Are these energy generation systems, or, can you speak about them? We use cookies for various purposes including analytics. By continuing to use Pastebin, you agree to our use of cookies as described in the Cookies Policy (/doc_cookies_policy).
