**dannysilvarecord** Wow haven't seen the technical collaboration companies in writing before. Is this on the website, also? Great stuff!

The times and half-times have culminated. In order to prepare the world for the accelerating profound changes that are upon us, that we are living through as I write this. It can be traumatic or gentle, depending on one's individual sensitivity and awareness. But we will recognize that we are one, yet separate in our personal identities.

As far as major corporations and advanced propulsion, I know the Dr Fred Alzofon, Boeing engineer was fired from Boeing for his Anti-gravity paper 81-1608. Also my late friend. Henry "Hank" Wallace was fired from GE Aerospace. His patents US3626605 and 606. Most corporations are concerned with Quarterly Profits...and use other people s money or our Government money. Not sure IF you ever contacted the BAE, now BAE Systems, Project Greenglow researchers of the past. Ad astra per ardua, Ron Kita, Chiralex

Ron Kita: I don't understand. Why would those companies fire them for those patents?

## CONTEXT FROM ORIGINAL DOCUMENT

ff-california-went-on-for-weeks

(PUBLIC DOMAIN) - 8 August 2019 — To The Stars Academy of Arts & Science (TTSA), advised by current and former USG/USG contractor officials, announces a “technical collaboration” with Lockheed Martin, Boeing, Bigelow Aerospace and BAE Systems. It is seemingly published by mistake and removed from Instagram soon after it goes live. A technical collaboration with these aerospace contractors is never mentioned in TTSA’s public SEC filings, nor has TTSA ever mentioned working with Boeing or BAE. Lockheed Martin Skunk Works veteran Steve Justice was TTSA’s Aerospace Division Director.
