KAMLOOPS RESIDENTS SEE FIERY OBJECTS

KAMLOOPS – Confirming the report made recently by Mrs. S. V. Reith and her son, Bill, four Louis Creek boys claim to have seen a fiery red object about two feet in circumference with a silvery tail ten feet long, flying through the air above Louis Creek. The boys say the object fell towards the earth for some considerable distance before disintegrating, making no noise.

Mrs. Reith and her son reported they had seen a bright object flying eastward over the hills south of town. It appeared to be extremely high and was travelling at a fast speed. Mrs. Reith said it was shaped like a large ball, with a silvery appearance. It kept getting brighter, then suddenly it seemed to burst into flame and disappear. There was no sound.
