Project Magnet, July 1952

Project Magnet: Case IX, Vancouver, BC, July 3, 1952. Weight 39%

A single observer noticed at 11.55 PDT a bright round amber light move from the south in a northwesterly direction, until it was about due west when it turned and headed southwest. The object was in view about 1 minute.

Project Magnet: Case XVI, Nootka, BC, July 30, 1952. Weight 68%

On July 30, 1952, at 1.37 PST the lightkeeper at Nootka Station observed a luminous object travelling northwest by north. It was in view between 3 and 4 seconds and passed almost overhead. There was no sound or vapour trail.
