

Disk Near Langley High School

Langley, B.C. - October 30, 1958

Langley Junior Senior High School, Thursday Oct. 30, 1958, 12– 2:30 PM (lunch hour).

Richard and quite a number of the boys at the school saw a disk-like object almost hovering over the small airfield (they do sightseeing trips and teach flying) near the school. It suddenly speeded off in the direction of White Rock. According to what some of the older boys said, it was about 3000 ft. up and 30 ft. in diameter (Weather cloudy).
