

Woman Sees UFO With Windows

Cloverdale, B.C. - May 01, 1959

About 5:30 on New McLellan Road

Wendy saw another UFO. Looked exactly like the first one she saw, but was not so high up. Saw it sideways and low enough to see windows over the one visible wing, she says the windows were square. "Square black blobs" was her description. Definitely did not look like any plane she has ever seen, and we see quite a number here; seaplanes, troop carriers, passenger and small training planes.

I have copied these verbatim from entries I made in my book. I have a book into which I put all things unusual which occur to me or my family.
