

TWO MEN SEE "QUIVERING" UFO

Richmond, B.C. - May, 1959

The Vancouver Area Flying Saucer Club

Saucers, Space & Science. No 13, Dec 1959. P. 4.

Mr. J. H. Kacer, River Road, East Richmond, BC, in second week of May, from Aluminum Plant where he is a night watchman – went out of main building to check a steam boiler in another building; (approx. 5:00 am) partial overcast; observed east side of building to be illuminated – then his attention was drawn to large ellipsoid motionless about 1/3 mile SE of ALCAN buildings at about 1000 ft. Reddish-pink glow below, upper part dark, the glow was "quivering" as an arc welder. Kacer had time to call another man who saw it before it disappeared into the overcast. Cabin above circular airfoil showed markings of ports. About 5 minutes later returning from second building, the object was again seen hovering; after a few seconds it took off and circled the main masts of CKWX to the south of ALCAN Plant, then took off to East at amazing speed.

There is a large open area south of the buildings probably a mile by 2/3 mile running east and west with only a deserted farm, also a power line running through it. Incident reported to RCAF. Mr. Kacer was later called on by two men in plain clothes, one from Ottawa and the other identified himself as a Lt. Colonel, USA – first was non-committal but the American reported to have opined – "We hope they are extra-terrestrial and not from....."
