

# UFOs and Jet Plane in British Columbia

Skookumchuck, B.C. - February 1959

SS&S, No. 10 May 1959, P. 3.

---

In the beginning of February. J.W. Blake and two others heard and saw an arrow-shaped jet approaching from an easterly direction, leaving a vapor trail. Right in front of it was a machine similar to the jet, but leaving no vapor trail. Ahead of that were three more identical craft appearing about the same distance ahead of one another, but no vapor. It looked like one of our jets chasing four UFOs. Those four machines made no sound. They kept the same distance ahead of the jet all the time while they were in sight and finally disappeared out of sight in the distance. It was a clear day and all were close enough to be easily seen with the naked eye. It looked as if the UFOs were linked together and pulling the jet along after them.
