**10. BRIEF SUMMARY OF SIGHTING:**

Brilliant elliptical object, size of fifty cent piece while viewed in theodolite.

Moved rapidly.

**11. COMMENTS:**

Info in initial and subsequent report is too general to allow a valid conclusion. It is possible that object was a high flying a/c at an altitude where a ground observer could not determine the shape, and in such a position that all that could be seen was a bright spot. Due to the absence of more detailed info, this report is categorized as insufficient data.

**12. CONCLUSIONS:**

Insufficient Data for Evaluation
