

# Five Foot UFO Lands in Duncan, BC

Duncan, BC - May 1962.

Letter written from P. M. H. Edwards to Coral Lorenzen (APRO)

---

4297 Gordon Head Road  
Victoria, B.C.

Area Code 604. Tel. 477-4749

Jan 25, 1966

Dear Mrs. Lorenzen,

I trust you have by now rec'd my \$3.50 subscription safely. I am writing to you for three purposes: -

I. Are you at all able to get me the correct title of a magazine which reportedly contains an article by Ed. Moffatt called "Flying Saucers are landing in America"? An elderly lady with a rather muddled brain told me of this, and said she thought the name of the publication was something like MARS CONQUEST. I've never heard of it, have you? I'd very much like a copy of that article, if it can be tracked down. Can you possibly help me, with a postal card?

II. I see you wrote an article in January FATE magazine called "UFO's Blanket South America", and I am going to try to get myself a copy of that one.

III. The other day, through a gentleman who is collaborating here with one of our professors in compiling a Canadian Dictionary, I came into contact with an elderly lady who saw a UFO 3 years ago with two or three witnesses, near Nanaimo. I called on one of them, who gave me the copy of the color slide. The picture is NOT at all spectacular, however. But through them I found a dentist's assistant at Sidney, north of Victoria, on this Island, who saw a 5 ft. UFO land in a field at Duncan, 40 miles north of Victoria, 3 years ago. I lunched with her, and got her

story: Mrs. Helen Campbell, 1875 Graham Ave., R.R. 2, Sidney V.I., B.C. Canada, dentist's assistant, married, with children, good eyesight, saw in May 1962, around 6.15 a.m. (Sun just rising, early summer) an object land in a vacant lot opposite her house in Duncan, where she was then living. She was standing between the house and that vacant lot, on Trunk Road, Duncan, just less than a block east from the Trans-Canada Highway running north out of Duncan. Slightly to the left, opposite, about 150 ft. away, on a vacant lot being considered then for purchase as a carpark by the Canadian Legion, she saw an object reflecting sunlight at the height of a telephone pole, descending slowly. She drew a sketch for me (enclosed facsimile), and described the object as silvery-pearly in color, fuzzy, glimmering. It swayed before it touched down. It had apparently come from South-East. Weather was fine and clear. No side-effects noticed. She badly wanted to run over to see it, but felt her feet were glued to the ground as though in hypnosis. After a few minutes, she was able to turn and walk back into the house. I asked whether she then had any headaches. She replied, "How did you know?". She had to go as an out-patient to the hospital for 2 months to be treated for a mysterious headache ever since that day. She says that it looked exactly like pictures one sees of jellyfish. It was small, 5 ft. across, and with a dome on top. Husband and friends laughed at her, so she clammed up. Hearing the elderly lady speak of UFO's in my connection, the other day, while the lady was being treated by the dentist (Dr Gray), Mrs. Campbell opened up and told her story, and that is how I found her out.

This story is not very interesting; but as you repeatedly ask for all details, no matter how trivial, I am sending it to you for what it is worth. She added that, Jan. 12, 1966, on the upward incline of the main Patricia Bay Highway here, half a mile north of Mow's Farm Market at the corner of Keating Cross Road, at 6:45 a.m., her car's headlights failed for 2 seconds. No other similar reports have come to my knowledge.

May I suggest that Eugenio Douglas' case at Monte Maiz, Argentina, could with benefit be investigated thoroughly. It is reported by London's FSReview, as well as in the CODOVNI Bulletin from Buenos Aires, recently. The facts that are interesting are:

The enormous size of the craft (30 ft high). And the size of the beings (Douglas said 5 metres or more!) in it.

The change in the electric lights, and candles, in the village, from normal to red, to green, and then to give out an asphyxiating odor which compelled people to run outside for fresh air. What "on earth" could produce such side-effects?! Chemists and physicists could well be brought into this for questioning.

With best wishes to you, and congratulations on your fine work.

Yours sincerely,

P M H Edwards

P.S. You may be interested to know that today I am to give my 9th talk on UFO's to North Victoria Kiwanis Club. And on Feb. 3rd, my 10th talk, to Faculty Women's Association, Univ. of Victoria. I hope this will close the series! But interest is running high, and at each talk I make a point of showing copies of your book and other important publications in the field.

Please may I hear from you soon, by airmail if possible, about that "Mars Conquest" thing, so as to secure a copy before it goes out of print? (Meanwhile, of course, I am conducting an enquiry also at this end).
