

Sighting By Canadian Ranger

Burns Lake/Smithers, BC - December 4, 1964

UFO Investigator (NICAP). Vol. 3, No. 2. April-May 1965. P. 6.

Blue Book Report No. 9214.

On Dec. 4, 1964, an unknown flying object with four equally spaced yellow lights was sighted over British Columbia by Forest Ranger Ronald M. Hawkins and a companion, V.G. Bate.

At first Hawkins and Bate thought the lights could be coming from the cabin of a low-flying aircraft, but when they got out of their car they could hear no sound. The UFO traveled approximately the speed of a DC-6 airliner. The lights were "perfectly round, equally spaced, and pale yellow in colour."

When first observed, the object was about one-fourth of a mile away, at which time it was measured as the size of a dime held at arm's length. After a few moments, the UFO disappeared behind a cloud.

The sighting occurred between Burns Lake and Smithers, B.C. When the witnesses arrived at Smithers, they checked with the airport and learned that no aircraft were reported in the vicinity.
