

"Shaped Like A Turtle"

Kelowna, BC - July 15, 1965

YC Newsletter, Sept. 12, 1965

Construction worker George Kozuh and his wife had just finished supper and were outside in the garden when a shiny object was spotted to the east. Kozuh novelly described it as "shaped like a turtle with a hump in the middle and a tail behind. It shone like nothing you could imagine. The sky was clear, and this thing, whatever it was, was not following a fixed course. It seemed to hover at about 8000 feet then it picked up speed and seemed to vanish, almost straight up."

His house guests, Mr. and Mrs. Nick Gordie of Calgary, and fellow Calgarian Vernon Giles, also saw the object.
