

# Disc-Shaped Object

Langley, BC - Summer, 1965

APRO Files

---

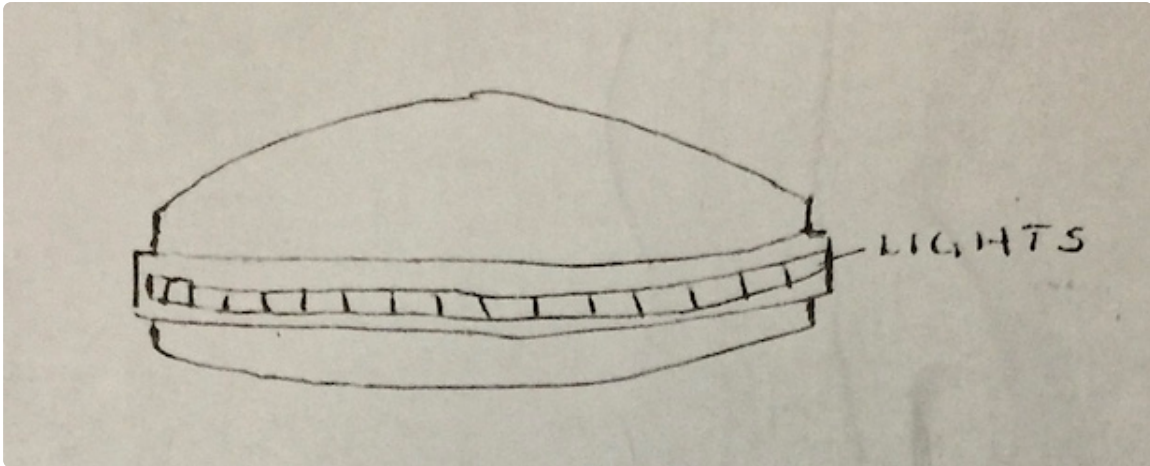

To whom it may concern:

I have just finished reading the book "Beyond Earth – man's contact with UFO's" by Ralph & Judy Blum. Because of the book I finally decided to tell someone else about what happened to me and a few of my friends.

It all started one night when we were driving back to Langley from a town called White Rock. None of us had been drinking and chugs were almost unheard of so it wasn't anything like that. As we were driving, the car radiator boiled over, but as the car was old it wasn't any shock. As we pulled over to the side we were all talking about how to get water out of the ditch when something caught my eye and made me look out the rear side window. As I did I could see a large disc-shaped object hovering over this farmer's field. I guess I was so shocked I didn't say anything but the driver got out and saw the same thing and said something like "Oh God!" and then everyone got out and we all stood there looking at it. But as we stood there it slowly started moving toward us. Well not knowing what it was or what it was going to do we jumped into the car and drove off – just remembering now it's odd no one thought about the boiled rad or why the car started so quickly. Anyway as we drove up the road I noticed that it was following us at the same speed as we were going. That in itself made us more afraid so we went faster but so did it. We had to go up a hill before we reached a main street and I remember the driver saying he had turned off the lights but the disc was right beside us at tree top level. A few miles down the road it just vanished and I had not taken my eyes off of it. It just went. So when we got back to town we agreed not to tell anyone because of what would be said. The next morning I decided to tell my father. Well to my surprise, he had seen it too. He had taken a client to see some property at the top of the hill. He was at the top and we were at the bottom.

This happened in 1965 in late Summer or early Fall. The location is just south of Vancouver, B.C., Canada. The disc followed for about 5 miles.

This is a rough sketch of it.

I don't remember the main colour but the middle lights were so bright and fast they seemed to all blend together. The noise was very high pitched and unlike any other sound I have ever heard.
