

Another 'Flying Saucer'

Port McNeill, BC - March, 1967

Saucers, Space & Science. No. 48, 1967. p. 7

(Source: The Upper Islander, Campbell River, B.C., March 8, 1967)

Up in Port McNeill, B.C., Mrs. Peter Flick, while visiting friends, first spotted an object travelling from Port Hardy to Port McNeill in the vicinity of the bay. It looked like a star travelling in a straight line, then it turned left and right. Suddenly it became very large and bright, white on top, blue on bottom and took on an oval shape and appeared to have a tail. It disappeared and reappeared approximately 6 times, once appearing a bright red.
