

Lights Over Mount Tolmie

Victoria, BC. April 13, 1967

Source Unknown

Time: 7:55 p. m. April 13/67.

Place: Mt. Tolmie, Victoria, B. C.

Weather: Clear, starry.

Observer: Ron Turner (17) 3537 Richmond

Description: Flashing red light surrounded by a circular glow. Hovered above Mt. Tolmie for 2 minutes, then moved slowly NNW. Made no sound.

As it moved off, it was seen as a group of three lights - two red, and a white one at the rear. The leading red light flashed or pulsated slowly about 1-second intervals slower than when first seen. Second red light was steady.

Twice the object "jumped sideways" a short distance and then continued in original direction.
