

# U.F.O. Over Knox Mountain

Knox Mountain, BC., May 1967

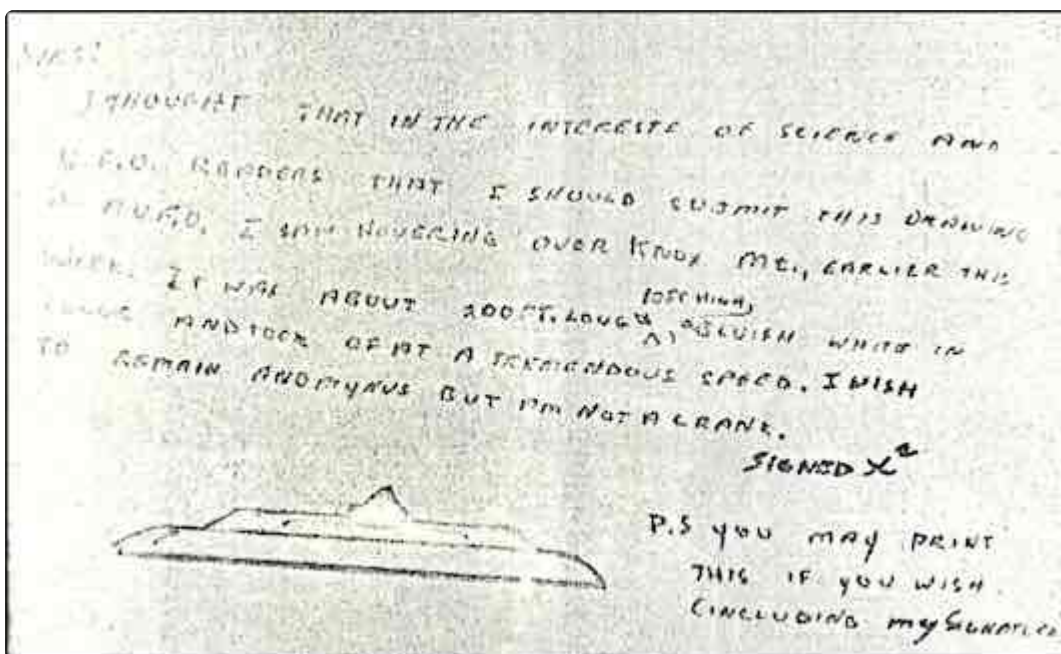

Kelowna Daily Courier, Friday, May 5, 1967

SIRS:

I thought that in the interests of science and U.F.O. readers that I should submit this drawing of a U.F.O. I saw hovering over Knox Mountain earlier this week. It was about 200 ft. long, 10 ft. high, bluish white in color and took off at a tremendous speed. I wish to remain anonymous but I'm not a crank.

Signed X2

P.S. You may print this if you wish (including my signature)

\*\*\*\*\*

We offer no comment on the above correspondence except to admit we don't know for sure such a thing did NOT appear over Knox Mountain last week. The writer of the letter is apparently not afraid of ridicule, as he freely gave us permission to use his signature – X2. The description and sketch are approximately the same as other sightings over the Kelowna area in the past.
