

British Columbia Flap Is Continual

Victoria, BC - October 27, 1967

U.F.O. (CAPIC), Vol. 2, No. 1 Sept-Oct. 1967, p. 6.

Oct. 27, 1967 - 6:30 p.m., J. Moore, 1824 Chestnut Street, Victoria, B.C., was on Heywood Avenue, when, as he looked at the evening star, he saw close to it a very bright silver object streaking from west to east far faster than a jet plane. From horizon to horizon, its passage took less than one minute. The object emitted no noise. The object travelled in a straight line. It was definitely illuminated, and larger and faster than a jet-powered aircraft. No further details are obtainable.
