

# UFO at Chetwynd

## UFO Watched Miniskirted Students

Chetwynd, BC - November 1967

**The Reporter**

**Alaska Highway News, Fort St. John, BC. Wed. Nov 15, 1967.**

---

Reports of a flying saucer over the school attracted the attention of numerous school children recently.

"All the kids were pointing at it," said one adult who didn't know what it was either.

The accounts made the whitish-coloured object seem quite large. "Three inches wide at arm's length" appears to be a good description of the reported object.

"It was parked quite high in the air over the school for 15 minutes, watching the girls in mini-skirts and then moved over Wabi Hill for several more minutes before being hidden by moving clouds, said a Reporter informant.

The Chetwynd School's office said that they had not heard of the object.

Speculation on the possibility of the UFO being a meteorological balloon or other well-known object failed to suggest any mundane answers.
