

Reddish-Orange UFOs Over Williams Lake

Williams Lake, BC - February 29, 1968

APRO Files (two separate files both describing the same event?)

First sighted UFO's on corner of Third and Oliver – drove home to Fourth and Conies. Got Ernie Beaulieu to confirm sighting of two ufo's moving at the speed of a jet fighter. These ufo's were moving in an east to west direction. Gave off a bright reddish-orange lite. Lite was steady and not pulsating. The sky in surrounding area was clear and no stars were visible in surrounding area of ufo's. Ufo's flying pretty low. Disappeared very quickly over hills in direction stated. After sighting the two ufo's, looked in southerly direction and saw two more objects. Believe one was a satellite and other UFO only stationary beside satellite. UFO beside satellite was a reddish-orange color and not pulsating.

Larry Beaulieu,
Williams Lake, BC.

Sighted two UFO objects travelling from east to west at high speed. Objects bright reddish-orange in colour, disappeared over horizon in a few seconds. Altitude unable to estimate but travelling under clouds.
