---

"Paul Hadikin, Margaret Laktin and Christine Poznecov, all of Castlegar, were driving south of the local airport at 11 P.M. on June 8th when they were followed by an oval-shaped object, about six feet in diameter, with beams of light pointing upwards and downwards. It gave off a bluish glow and moved parallel with the car as they drove along the highway at 45 m.p.h. The UFO made no noise. The young people dropped Miss Laktin by her own car when the object vanished. Then the UFO reappeared later and resumed following Hadikin's car until another auto came into view on the highway. Hadikin thought he observed wings jutting from the UFO at each end, but the girls denied seeing this."
