My name is [REDACTED]. I am a student at Westbrook Academy, Westbrook, Maine. At precisely 8:00 p.m., Saturday, March 2, 1957, I was having a smoke outside my dormitory when I noticed the object which at first appeared to be a star. However, the condition of the sky this night were no stars or moonlight, a broken arrangement of clouds which I thought to be thick because of the ship's pitch darkness. This may seem to be a hoax since the craft seems to resemble in great detail the one which is featured in the T.V. program - Star Trek.

but I know what I saw! , and I would gladly
swear ~~to~~ it on the Holy Bible.

6A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.

7. IN THE SKETCH BELOW, PLACE AN "A" AT THE POSITION OF THE PHENOMENON WHEN FIRST SEEN, AND A "B" AT THE POSITION OF THE PHENOMENON WHEN LAST SEEN. CONNECT THE "A" AND "B" WITH A LINE TO APPROXIMATE THE MOVEMENT OF THE PHENOMENON BETWEEN "A" AND "B". THAT IS, SCHEMATICALLY SHOW WHETHER THE MOVEMENT APPEARED TO BE STRAIGHT, CURVED OR ZIG-ZAG. REFER TO SMALLER SKETCH AS AN EXAMPLE OF HOW TO COMPLETE THE LARGER SKETCH.

1. Occupation - getting a good education
2. I know most aircraft and satellites of all types fairly well and can honestly say it wasn't any kind of blimp, dirigible, or weather balloon.
3. I left no exhaust, at least, that could be seen. I have no sound of any engine known on earth, (didn't see any sound).
4. I was apparently looking for something, because it used a flight pattern which is commonly used in search planes. That is, planes that hunt submarines, look for lost people, or make reconnaissance flights.
5. I identify it as a U.F.O. because it gave off a shine, a white light which had tones of greenish-blue mixed in. This shine appeared to be coming from a light on the center, or top, of the disk. From this shine I could make out, fairly clearly, the rest of the object's shape and proportions, which seemed to be huge.

25. WHEN AND TO WHOM DID YOU REPORT THAT YOU HAD SIGHTED THIS PHENOMENON?

INFORMATION WHICH YOU FEEL IS PERTINENT TO THE SIGHTING.
ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

1967- I was sitting at my desk in the dormitory room at the time of the sighting. I saw a bright object in the sky at about 65 degrees angle above the horizon. The direction seemed to be over the coast a little to the north-west. This object drew my attention because the sky had a strange arrangement that night. No celestial object should have been able to be seen because the entire sky was covered with some sort of high fog or thin cloud cover. It moved from the North-East to the South-East. Its light was rather irregular; it flew in a pattern. This pattern seemed to be designed for some sort of scanning or mapping. The pattern looked like the following line; ~~~~~

At about 9:15 P.M. that same night I hurried into the dorm to inform my roommate of this thing. We both had it under surveillance for about the next two hours, then it put on speed and disappeared rapidly into the sky. While we had it under surveillance a friend of ours sighted it too. He was able to observe it for about ten minutes before it went out of sight. His name is [REDACTED]. While we, my roommate and I, observed it together we were in our room in the dormitory.

Post Script; As I have said in the first report, I will say again: I am a God bearing person, and I will swear on the Holy Bible that what I have written here, is the absolute truth. (as far as I know) Also I have some interesting theories about these craft. Mainly their propulsion systems. If you are interested please let me know in the (probably) next communication from you. To give you an idea of my theories, they are based on atomic and solar power, also magnetism.
